VERNER'S LAW IN ITALY,

an Essay in the History of the Indo-European Sibilants.

'The method is rigidly scientific and Mr Conway is fully entitled to the credit of a good working hypothesis. The essay deserves a cordial welcome, not only for what it contains, but also as a promise of excellent work in the future'

Prof A S Wilkins in the Academy

'Mr Conway has an excellent case, and an array of evidence admirably collected and marshalled'

7he Classical Review

'Mr Conway's book is worthy of all praise In formulating his law he has shown a mind keenly sensitive to linguistic phenomena. In working up his material he shows thorough acquaintance with the most advanced German authorities and the conscientious painstaking of a true scholar. Aside from the main line of his investigations many questions are touched suggestively and helpfully ... We predict many more papers of value from Mr Conway's pen'

'Der etwas sonderbare Titel dieser hochst beachtenswerthen Untersuchung erklätt sich aus dem Bestreben des Verfassors, die Verschiedenheit in der Behandlung von intervocalischem sim Lateinischen in ähnlicher Weise zu erkläten, wie man seit Verner's schoner Entdeckung das Verhaltniss von ahd nasie bar zu altslov nosie berätelt zurechtlegt. Die Untersuchung, welche von ernsten lautphysiologischen und sprachgeschichtlichen Studien zeugt. begrundet die Aufstellungen in scharfsinniger Weise ... Auf jeden Fall ist die Arbeit ein werthvoller und interessanter Beitrag zur altstalischen Lautlehre.'

Gustav Meyer in Literarisches Centralblatt

'Au point de vue de la conscience et de la methode, de l'étendue et de la variété des connaissances, peu d'essais de linguistique indoeuropéenne méritent plus d'attention et d'éloges que celui de M Conway ... En tout état de cause l'auteur garde le mérite d'avoir complètement exploré un domaine jusqu'à présent peu connu, et enrich la science de résultats nouveaux glanés au cours de sa consciencieuse enquête'

Victor Henry in the Remine critique.

HIS OLD PUPILS

PREFACE TO THE ORIGINAL EDITION.

In consideration of the length to which the Second Volume of this Grammar was likely to extend it seemed desirable to publish it in parts 1). Those which are still to appear will first complete the Morphology of Nouns and Pronouns, including the history of the Case-Endings. The latter section will be comparatively brief, since the ablaut of the inflexional syllables has been discussed in all its most important points in connexion with the Formative Suffixes. Then will follow the Morphology of Verbs (Stem-Formation and Inflexion), and finally a list of Additions and Corrections to the First Volume, [and an Index to both].

A third and last volume of smaller dimensions will contain the Syntax. In this part of Comparative Grammar very little work has been done, at least very little that can be called scientific, and hitherto no one has tried to give any systematic account of the subject as a whole. For a long while, I confess, I could hardly make up my mind to include it in the present work, but I have been greatly encouraged to make the attempt by the appearance of the fifth Volume of Delbruck's Syntaktische Forschungen (Altindische Syntax 1888), which, though it is not directly concerned with Comparative Grammar, has done a great deal to prepare the way for a general history of Indo-

¹⁾ The different parts of the German edition will appear as separate volumes in English.

Germanic Syntax. And in my work for the third volume I hope to have the help of O. Behaghel's Grundzüge der germanischen Syntax which has been announced for some time.

I have accepted as necessary one or two alterations in the transcription of Avestic; no instead of no (before r, see vol. I § 558 p. 415), š for all three signs š, š and š As regards these sibilants we ought still, in all probability, to make some distinction between the sounds in such words as histaiti = Skr tišthati (I § 556 p. 410), mašya- = Skr. mártiya- (I § 260 p. 212 f., § 474 p. 350), šyaopna- = Proethnic Arvan *crautna-(I § 448 p. 333, § 473, 4 p 350) I accepted with other scholars the theory which Bartholomae advanced in Bezzenberger's Beitrage VII 188 ff. as to the respective value of these three signs in the Zend alphabet, and, so far as I can see, it is not disproved by Geldner's recent edition of the Avesta. At the same time it is certainly not confirmed by the results of Geldner's work. and Bartholomae himself, with Hubschmann and others, now follows him in writing 5 indifferently in all cases. Thus I had no alternative.

In Celtic Prof. Thurneysen has given me the same generous assistance as in the first volume. My pupil Dr. W. Streitberg has helped me in correcting the proof. To both I may here offer my hearty thanks.

LEIPZIG, Oct. 1. 1888.

Karl Brugmann.

TRANSLATORS' PREFACE.

In the two years that have followed the translation of the First Volume of the Grundriss der vergleichenden Sprachwissenschaft by Dr (now Professor) Joseph Wright, the difficulty of the task has sensibly diminished The methods and the nomenclature of the scientific school of Comparative Philology have found their way more and more into the work of English teachers, and it has become far easier to decide what innovations can, and what cannot be reconciled with established usage. Such words, for example, as 'thematic', 'ablaut', 'analogical', 'contamination, 'proethnic' are completely naturalised. The last we have universally adopted as the clearest equivalent of the German ur- prefixed to the name of a group of languages: 'proethnic Greek' is Greek older than the rise of its various dialects, 'proethnic Indo-Germanic', or more simply where there is no ambiguity, 'the proethnic language' is the parent of the various families of Indo-Germanic speech

On the other hand the new subject-matter of the present volume involves new difficulties. On almost every other page of the original the word *Grundform* is used to denote the original form from which any particular word has been developed by phonetic change, and considering the frequency of its occurrence we could see no alternative but to adopt it bodily into English. Again some such expressions as 'fertile' (produktiv) and 'extended' (erweitert) were indispensable to describe the history of the different suffixes. The process of deriving a feminine form

from the masculine stem of an adjective (Germ. Motion) we have called 'differentiation'. To express the change by which a substantival compound becomes an adjective, or in terms of Sanskrit grammar, by which a karma-dharaya-compound becomes a bahu-orthi German scholars have created a new verb mutieren. i. e. the Lat. mutare: the word 'epithetised' which is used for the first time in this translation is an attempt to describe the nature of the change a little more explicitly. Thus in English blackbard is a simple or 'non-epithetised' compound, Greatheart, rosy-fingered, in Latin magnanimus, in Greek ὁοδοδάκτυλος are 'epithetised' (see p. 92). The ambiguity of the word 'formation' which like the German Bildung does double duty, to denote sometimes an abstract process and sometimes its concrete result, is a source of considerable difficulty, which might well be avoided by using such a term as 'formate' to express the second meaning; and the convenience of words like trans-formate, re-formate afformate (Umbildung, Neubildung, Nachbildung) is at once obvious. But the change is not absolutely necessary and therefore, since this is a book of general reference, it seems fairer to the reader to suggest it in the Preface rather than to introduce it directly into the text; perhaps however we may assume the licence in the following volumes.

A small but perpetually recurring difficulty of which the reader should be warned, has been the translation of the preposition zu in its technical sense, for which we have no exact equivalent in English, except such phrases as 'directly related to', 'connected in accidence with' and these would be, to say the least, a little wearisome, if they appeared twenty times on a page. It really covers several shades of meaning; in 'amavī zu amo' 'tulī zu fero' it means used as a tense of; in 'ansatus' zu ansa', a derivative of; in 'modestus zu modus', used as a derivative of; in 'Lat. inclutus zu Gr. $\kappa\lambda\dot{\nu}\omega$ ', containing the root of; and so on. The nearest English equivalent in the first two cases would be the preposition from, in which there is a more serious ambiguity, used as it is to denote both historical and logical connexion, 'tulī from the root tel-', 'tulī from fero'.

Sometimes of course the two coincide, but only in the case of words of which the first was in use in the form in which we quote it before the second came into existence. suavior 'comes from' suavis historically as well as logically because it is a special formation in Latin (in place of the Indo-Germanic stem *syad-ijos-); whereas the genitive patris can only be said to 'come from' the nominative pater in the logical sense, not the historical, since both are descended from proethnic forms. The rule therefore that we have adopted has been to write from in the logical sense only where there can be no possible doubt that that is its meaning; where there would have been any danger that the reader should infer from it a historical, derivative relation that was not implied in the German, we have used beside. Thus in the examples given above we should render 'tulī from fero' but 'modestus beside modus' (see p. 418). The line is of course hard to draw, but for safety's sake, we have used beside in all cases of doubt. To do so universally, i. e. to have written always 'patris beside pater' instead of 'from pater' seemed a little pedantic. On the other hand from has of course its proper derivative significance in such phrases as 'ansatus from ansa', where in German von and zu are used indifferently. The German aus connecting a form with its immediate phonetic antecedent, e. g. 'Lat, fissus aus *fid-to-s' we have followed prevailing usage in rendering by for, 'fissus for *fid-to-s'. The reader will find that for is used only in this sense of direct phonetic connexion; to describe an analogical substitution (Germ. für) we have regularly kept to 'instead of'.

In minor matters, such as abbreviations, and details of printing we have followed English rather than German precedent. For obvious reasons however we have retained the order of the original in such phrases as 'Gr. Att. 'innog' 'Skr. Ved. 'sray-iṣtha-' (cf. p. 244), where they occur in a list of forms from different languages. But we have ventured to retain the symbol: which occurs on every page, and denotes that the forms that it connects stand in a definite relation to one another, and this, when it is not otherwise explained by the context, is always

one of regular phonetic correspondence; for instance it is invariably used to connect an Indo-Germanic form with the words which represent it in the derived languages e. g. Idg. *klu-tó-s: Skr. śru-tá-s. Gr. xàv-zó-s etc. A modification of this symbol, for which it was equally impossible to find a substitute, ': cp.' means 'partly related to' in some respects to be compared with'; it is employed where the forms compared are not completely parallel, but only to some extent, e.g. on p. 39, § 23 'Skr. án-apta-s: cp. Lat. in-eptu-s'; here the two words are parallel, but not identical, as the Latin form is derived from *ap-tó-, the Sanskrit from *ap-tó-, see Vol. I § 97, 3 p. 91. Similarly on p. 60, § 34 'Lat. sim-plex: cp. Gr. α-πλόος' implies that the compounds are parallel, but identical only in their first member; p. 193, § 75 Gr. ημέ-τερο-ς cp. Lat. nos-ter', that the use of the suffix is the same in both. It would be difficult to enumerate all the varieties of positive meaning that may be implied by this practically colourless symbol; to remove it altogether would be to re-edit the whole Grammar, not to translate it. The symbol: is also placed at the end of a general statement which is immediately followed by a list of illustrative examples, but otherwise it is not used as a mark of punctuation. On the other hand where the scientific brevity of the original made the connexion of the argument a little difficult to follow, so that sometimes the meaning of a whole paragraph turned on the significance of a comma or a bracket, we have felt less scruple in giving it more explicit expression.

In the first hundred pages and in the sections on the Meaning of the Suffixes, the reader will find a few additions to the text for which the translators are responsible. With Prof. Brugmann's permission we have inserted illustrations from Modern English beside his own from Modern German, where the latter are given to illustrate some general principle. These interpolations are all enclosed in square brackets.

At his request we have departed from Dr. Wright's usage in one important respect by using Old Church Slavonic instead of Old Bulgarian as the name of the language of the Slavonic apostles Cyril and Methodius. We hesitated for some time between 'Welsh' and 'Cymric', but decided on the whole to keep the latter in conformity with the first volume. The Corrections and Additions' of the German edition are embodied in the text, together with several other minor alterations, mainly of misprints, which Prof. Brugmann has sent us. To him we would offer our hearty thanks for his constant help in matters of difficulty. We owe to Dr. Wright's courtesy a list of Corrigenda in Volume I.

The translation is a joint work throughout, but Mr. Conway is everywhere responsible for its final form, as Mr. Rouse will be in the remaining volumes, which we hope will follow the parts of the German edition as they appear, at much shorter intervals than has been possible so far.

The present volume has demanded a year's continuous work and a good deal of anxious consideration from us both. But we shall be more than rewarded if it can do anything to extend the share which English-speaking students can claim in the marvellous increase of exact knowledge which the book itself records. It is the boast of modern discovery to have made the world more thinkable and human life more full of meaning in a thousand ways; and before the century reaches its close, Comparative Philology, that is, the History of Language, will have attained no mean rank in the great sisterhood of sciences whose task is to explore the history of man.

R. SEYMOUR CONWAY. W. H. D. ROUSE.

CAMBRIDGE, Aug. 1. 1890.

CORRIGENDA.

VOLUME 1.

- P. 112 l. 6 Read the variation instead of the opposite
- P. 350 last line but one. Remove the comma after cases.
- P. 529 Rem. 2 l. 2 Read velars palatals and dentals instead of lingual palatals

SIGNS AND ABBREVIATIONS.

* prefixed to a form indicates that it is not on record, but only inferred from other forms in the same or kindred languages. Prefixed to a root it implies that that form of the root does not occur in any word of which we have record.

√ = root

= 'to be directly compared with'

cp -- 'to be in part compared with' (see the Preface, p XII)

after a form denotes that its final sounds cannot be exactly determined, (e.g. in *mēn-s-) p 186 all that is said of the suffix is that it began with 1)

 a^{x} denotes a sound which was either a, ϵ , or a but cannot at present be more closely identified

A small figure added to the name of a book denotes the edition referred to, e g Paul, Princip²

Hom A, B, $\Omega = \text{Hom II book 1, 2,}$ 24

Hom α , β , ω = Hom Od book 1, 2, 24

cp = compare

lit - literally.

orig = original, or originally

esp = especially

seil or ac = scaleet, 1 e the word which follows it is to be supplied in the preceding phrase

ıb = ıbıdem.

loc. cit. = in loco citato

Pr., O, Mid, Mod prefixed to names of languages denote Procthmic, Old, Middle, and Modern respectively

poss = possessive (adjectives).

dimin = diminutive (adj or subst)

denom. = denominative (noun or verb)

There remain the usual abbreviations of Gender (m t n), Number (sg du pl), Case (nom gen etc), Degree (pos comp superl), Mood (ind impv etc.), Voice (act med pass.), Tense (pres impf etc) and Part of Speech (subst ad) parts sup(ine) ger(und) etc)

It is unnecessary to add a list of the abbreviations for the names of the languages. The latter are fully enumerated in the Introduction to the First Volume (p 4 ff) Observe only that A S = Anglo-Saxon O.Sax = Old Saxon

MORPHOLOGY: STEM-FORMATION AND INFLEXION.

§ 1. All the developements of language denoted by the terms Stem-formation and Inflexion are based upon one common principle, the juxta-position and more or less intimate fusion of elements which were originally independent 1. The units of speech produced by this kind of composition became in later ages the types on which new words were made; and many such standard forms, which were in use long before the dissolution of the proethnic Indo-Germanic community, still serve as models for new words. But this process of blending groups of independent words into single forms has been continually repeated all through the centuries; and thus new types have been successively evolved, to be in their turn the means of further developement. Yet these new types have never brought about any material change in the general method of forming words which had been adopted by the Indo-Germanic language in its proethnic stage. Certain primitive types, which were characteristic of the morphology of this family of languages, remained in constant use wherever they were spoken; and the forms which have arisen in later times, from the coalescence of words grouped in some syntactic relation, have always been cast in the mould of one or ther of these prescribed models.

¹⁾ See Vol. I § 13. 14. Brugmann, Elements. I

It is therefore the business of the grammarian, in this division of his subject, to exhibit these processes of composition, and the new formations to which their analogy gives rise.

In this department of the history of language, the main line of division is that which separates Noun and Pronoun on the one hand from Verb on the other. In dealing with the former class, we have to discuss terminations of Case, and the many different methods by which nouns or pronouns form their stems, in the latter class, we have to consider terminations of Person, and the equally numerous methods by which verbal stems are formed. These two departments, however, constantly overlap Verbs are formed from noun-stems, as (ir. $\tau \bar{\iota} \mu \dot{\alpha} \omega$ I honour from $\tau \bar{\iota} \mu \dot{\eta}$ honour Lat plantō from planta ("Derivative Verbs"); and, on the other hand, nouns often contain verbal stems (for example, the so-called participles, gerunds, infinitives, and supmes, e. g. Gr. part. $\delta \dot{\omega} \sigma \omega \dot{\omega}$ informative as compared with $\delta \dot{\omega} \sigma \omega$ dabo'). Forms of this double nature are accordingly discussed in both divisions of Morphology.

In either case we shall begin with those words whose structure exhibits most clearly the principle of composition, which is the basis of the whole formative system of the Indo-Germanic languages, we shall begin, that is, with compounds in the common acceptation of the term, such as Gr. innó-δαμο-ς horse-taming' inno-βάλλω 'I cast away' Last of all will be treated those elements of words whose original independence is now least obvious, i. e. the signs of the cases on the one hand and the personal-endings on the other

Throughout our discussion we shall consider both the forms as such and the meaning attached to them. Here we shall meet with questions of Syntax, which however includes too many heterogeneous elements to be fully treated in connexion with Morphology.

It is necessary first to offer a few remarks on the general principles of formation whose action can be traced in the histery of Indo-Germanic. To a certain extent these will merely repeat in greater detail what has been already said in the General Introduction (I § 13. 14) to explain the use of hyphens, and of a few special terms, which will be found in this work.

§ 2. When a group of words connected in some syntactical relation is fused into a single form, it is called a 'compound'; e. g. Gr. Διόσκουροι 'sons of Zeus' from Διὸς roveou, Mod.H.G. hungersnot 'pressure of hunger' from Mid.H.G. hungers not, [Eng. commonwealth from common wealth]. compound — to restrict the term for the moment to those consisting of two members — becomes a simple word when either its first or its second member has lost its connexion in the mind of the speaker with kindred words which are uncompounded, and consequently the comparative independence which it formerly had. This process may give rise to a word which to the speaker's consciousness is absolutely simple, c. g. Lat. nom. sing. qui for *quoi¹) i. e. *quo 'who' + $\bar{\iota}$ (deictic particle, cp. Umbr. po-ei sing. 'qui' pur-i pl. 'qui'), O.Pers. nom. sing. hauv this' from *ha = Skr. $s\acute{a}$ + the particle u = Skr. \acute{a} , Lith. bú-k 'be it, as though' which contains the particle -ki -k, Lat. s-ub no doubt for *(e)x-ub (I § 568 p. 425); or else the element in question loses its full meaning, and being used with the same value in a considerable number of words is reduced to what is called a suffix or a prefix; as -heit, a suffix which forms substantives denoting a quality, found e. g. in schonheit, which originally meant 'beautiful condition' (in O.H.G. and Mid.H.G. heit is still an independent word), [Germ. heit = A.S. had Mid. Eng. hod Mod. Eng. -hood in maiden-hood etc.]. Lat. -tter, a suffix used in forming adverbs, e. g. breviter, which originally = breve iter 'short-way' (iter 'way'), O.H.G. ala- ('omni-') an intensive prefix, e. g. in ala-festi 'firmissime', Mod.H.G. stock-, also intensive, e. g. stock-finster 'pitch dark' stock-dumm utterly stupid' [cp. Eng. stone-deaf, stone-blind] (see Tobler, Uber die Wortzusammensetzung p. 116 ff.). If a word is compounded with itself the process is called reduplication, e. g. Gr. πάμ-παν en-

¹⁾ It is a most question whether qor in the Duenos-inscription is question cui, see Zvetaieff, Inscriptiones Italiae inferioris, 1886, p. 80 sqq.

tirely'. Here also either of the two parts may be degraded by a process similar to that which gives rise to a suffix or a prefix; e.g. on the one hand Mod.H.G. mur-mel 'murmur' (Lat. mur-mur), where the termination -mel has the character of a suffix, and or the other hand Skr. ci-kit- 'comprehending, aware', where ci- is a kind of prefix.

§ 3. No hard and fast line can be drawn between a phrase or group of words connected in some syntactical relation, and a compound.

It is no doubt a fair definition of a compound to say that it is fully formed when the whole becomes in any way isolated from the parts of which it is composed as used independently (I § 13 p. 14). Lat. magnopere, for instance, was isolated from its component elements magno opere by its vowel contraction, Lat. dēnuō, from dé novō, by the weakening of -ov- to -u- due to its enclinic position, and Hom. παν-ημαφ 'all day long' by the circumstance that the neuter $*\pi \dot{\alpha} \nu$ (for $*\pi \mu \nu \tau$) when used independently took a long a from πας πασα. In Gr. Διός-κουροι, in Lat. plebis itu-m, und in Mod H. (+. gross-vater grandfather', sussholz 'licorice' the isolation was caused by the meaning of the whole being more definite and limited than the meaning conveyed by the mere syntactical grouping of the parts [cp. Eng. best man, blackberd. Again in Attic Greek ἀπο-βαίνω 'I go away' έχ-βάλλω 'I throw out' Lat. ab-eō, ē-μισο the cause (or rather one of the causes) was the restriction of each one of the prepositional adverbs to use within a particular series of combinations. Thus the causes of isolation, and of the accompanying change of a phrase into a compound, are very diverse and quite easy to appreciate. But isolation is a matter of very gradual developement; and we cannot fix a point at which the phrase passes into the compound, least of all in ancient languages, where we cannot appeal for help to the consciousness of any living speaker. At every stage in the developement of language we find compounds in process of formation; and, naturally enough, it is often impossible to decide whether in any given instance a compound

is completely formed or not. Thus opinions may and do differ whether the spelling to be adopted is διτφιλος οτ διὶ φίλος, καρηκομόωντες οτ νάρη νομόωντες, and so forth, in Homer (see La Roche, Hom. Textkr. 311 ff.), senātūscōnsultum or senātūs cōnsultum in later Latin, and in Mod.H.G. aus himmelshöhn or aus himmels höhn (in Schiller, compare his phrase an ufers rand), möylicherweise or möglicher weise, wenngleich or wenn gleich.

Remark. According to a very common view, if a phrase is included under one accent, it is proved eo ipso to be a compound; but this is incorrect In that case every syntactical combination of two words where the second word is an enclitic (cp. I § 669 p. 534 § 672 p 538 and elsewhere) would be a compound, which no one would maintain can the formation of derivatives from a given phrase by means of secondary suffixes be taken as a certain proof that the group is a true compound (e g. Gr Aισπαυύρειον from Διος κούροι). For the need of a derivative often creates a compound where the original is only a phrase; cp Gr καλοκάγαθία from καλός κάγαθός, Mod H G langueilig from lange weste, | Eng freetrader from Free Trade], Gr. byxéqualo; adj 'in the head' from έν κεφαλή, παραθαλάσσιος 'situated by the sea' from παρά θάλασσαν, Skr. anušatyá-s 'consistent with truth' from ánu satyám (cp § 15), O.C.Sl. obonupolină 'situated on the further shore' from obd ond polu (§ 47). Thus a derivative of this kind, itself a true compound, may be formed while the original phrase is only on its way towards becoming one; op also Lat Sacraviēnsēs as compared with sacra via, quartadecumānī as compared with quarta decuma, OCSI petinadesetini 'fifteenth' compared with pett na desete 'fifteen'; Avest. aspa-rīra-jan- 'striking horses and men down to the earth' compared with aspa vīra (a Dual combination, cp. § 27)

Where a compound consists of parts each of which can be used as an independent word, the following are the surest signs that it is a true compound. 1 If the termination of one member of the phrase is transferred to words which are incapable of taking it when uncompounded; e.g. when Gr Jián-Joro; (Jián gen. sing.) gives rise to such a form as 3-660-3070; (cp § 17) 2 If the case-ending or other inflexion of the first member, which was essential to the meaning of the original compound, loses its force in analogical formations; when for instance Aphi-livno; (Hom.) Apei-Sidaro; 'fimbria Martialis' (Aeschyl.) are formed in imitation of aphi-quato; apelopato; 'slain in war'. 3. If the phrase is 'epithetised' (§ 50), as alept-oixo; 'having one's dwelling in the air', not 'a dwelling in the air'

^{§ 4.} It is equally impossible to draw a hard and fast line between a compound and a simple word. One part of a compound is reduced or degraded to a suffix or prefix,

or generally to an inflexional element, by losing in some way or other its connexion with the simple word in the consciousness of the speaker. This isolation may affect the meaning only, take e.g. the Lat. suffix -iter in bremter longiter and the like, which were originally compounds (for breve iter, longum iter. see p. 3 above), the O.Ir intensive prefix bith- (originally 'world-' cp. bith 'world') in such for is as bith-beo semper vivus, immortalis' bid-slān 'semper salvus' etc; or it may affect only the form, e g. Mod.H.(f. -tel in drittel viertel etc. as contrasted with teil; or it may affect both at once, e g. Mod H G. -lich in weiblich (orig. = 'having woman's form') beside leiche lesch-dorn = Eng -ly in wife-ly A.S. lic, Eng lych-gate The suffixes in hat-red, friend-ship bishop-ric etc. were independent words in Old English]. Isolation is most complete when the simple word passes out of use altogether, e g. Gr. ποθ-από-ς Lat long-inquo-s prop-inquo-s, the second part of which is the Skr. -anc- 'directed somewhither' (§ 163), Mod.II.G. schonheit, whose second part was still an independent word in Mid.H.G.; the same thing has happened in the first part of a compound e. g. in Germ. alu-, as in Goth alu-mans pl 'all men' O.H G. ala-war 'quite true' (the only form used independently is alla-, for *al-no). Thus even in the proethnic Indo-Germanie period the temporal adverb *e, seen in such phrases as *é bherom 'I bore' * drhom 'I saw' (Skr ábharam ádršam, (†r. Equegov εόρα/ον), had no doubt sunk to the level of an inflexional prefix, because it was no longer used except in these combinations with encline preterite forms. Sometimes the conscious connexion with the simple word is lost because one member of the compound chances to resemble some common suffix in sound; the compounded word is then treated as equivalent to this suffix, and the whole becomes a simple word: for instance, Gr. καθ-ίζω 'I set down' (πω for *si-zd-ō, V sed-) was associated with verbs in -ιζω, as πολεμίζω, hence the fut. Att. καθιώ Dor. naθιξίΰ; O.H.G. gom-man (gen. gom-mannes) 'married man, man' was associated with simple nouns like eban zeihhan, hence such new formations as gen. sing. gommanes nom. acc. pl. gommana.

But in all these cases the change of function is very gradual; in every period we find compounded words in course of becoming simple inflexional elements. Compare further Skr. úd-añc-'upwards' praty-áñc- 'backwards' práñc- 'forwards' and the like (see § 163, and observe their later association with the suffix qo-, § 86); Armen. -a-vor in lus-a-vor 'clear' etc., corresponding to the Gr. -φόρο-ς (§ 28); Gr. -ειδής in Θεο-ειδής 'godlike, divine' etc; Lat. -qn-o- (cp gen-us) in benignu-s, malignu-s and similar forms, -iq-a- (cp. agere) in navigare lītigare flammigare and so forth (Leo Meyer, Bezzenberger's Beitr VI 130 ff.), Olr. -mār (mār 'great') in ardd-mār 'very high' Mod.lr. buadh-mhar 'victoriosus' (Gluck, Kelt Namen 77. 80 ff.), O.Ir. -lach (slog 'troop') in teg-lach 'household, familia' lucht-lach 'the gens in toto, the district community' etc. (Zimmer, Kelt. Stud. 11 25 ff.); Mid.H.G. nīt-hart lug-hart, Nod H.G. aller-hand gewisser-massen and allerbest aller-meist.

Remark The reverse process does not often occui, i e when an element once a suffix or a prefix is raised in the speaker's consciousness to the dignity of a compounded word, but we find it e. g in Mod H G leu-mund 'repute, character' (popularly connected with mund 'mouth') — Skr \$r\vec{\sigma}r\vec{\sigma}mata-\left(\vec{\sigma}\

It has already been pointed out in § 2 that the transition from a compound to a simple word does not always give rise to an element of the nature of a suffix or prefix. The following conditions are necessary for the production of an element of this kind. 1. the principal member of the compound must be etymologically clear; it must be associated with a kindred word or a kindred group of words. 2 the part so degraded must appear not in isolated words only but in a group of words, and in all of them it must have the same meaning: 3. this meaning must be more or less abstract and general

(Paul Princip.² 294). When these conditions are not fulfilled, the resultant forms may be called obscured compounds. To the speaker's consciousness they may appear absolutely simple words (apart from the endings of declension or conjugation which were ultimately affixed), as Mod.H.G. welt for O.H.G. wer-alt [Eng. world, A.S. woruld], Lat. surgo for *sub-rego. Or even if they produce the impression of a word containing a suffix or prefix, it is only because their initial or final part has become associated with real suffixes and prefixes through some phonetic resemblance, e g. Mod.H.G. adler for O.H.G. adal-ar ('noble bird of prey'), Mod.H G. wimper eye-lash' for O.H.G. wint-brawa 'wind-brow', Mod.H.G. albern 'foolish' for ().H.G. ala-wāri, 'very friendly' whose terminations resemble those of such words as sattler, schneider, silbern and the like [cp Eng. righteous for right-wise, as though its formation were the same as that of duteous plenteous, window from Icel. vindauga 'wind-eye' compared with meadow fallow, scabbard whose second part is identical with -berk in hau-berk, Mod.H.G. berg-en, not with the -ard of pomard petard etc.]. A third group consists of polysyllabic words like Mod.H.G. brautigam (O.H.G. brūti-gomo 'bride-man') Lat ūsūrpō 'I use' for *ūsū-rapō [cp. Eng. nightingale A.S. nihte-gale 'singer of the night', wiseacre = H.G. weissager, watershed whose second part is Mid.E. scheden A.S. sceadan Mod.II.G. scheiden]. Here the second element has not become clearly associated with previously existing suffixes, while on the other hand such words as these are not conceived as absolutely simple. No general definition can express the way in which the instinct of the speaker regards them; each case must be treated by itself.

Obscured compounds undoubtedly existed as early as the procthnic period of Indo-Germanic, and in its later stages they are nowhere rare. The following examples may be assigned to the proethnic vocabulary: suékuro- 'father-in-law' (Skr. śváśura- Gr. źwoó-; Goth. svaíhra), *suésor- 'sister' (Skr. sváśūr-

Lat. soror etc.)1), *utknti- 'twenty' (Skr. višati- Gr. Fixati εἴκοσι etc.), no doubt also *nizdo- i. e. *ni-zd-o- (\scales sed-) 'settling place, nest' (Skr. nīdá-s Armen. nist etc.), *per-ut(-i) loc. 'last year', connected with Gr. Fέτ-ος (Skr. parut Gr. πέρνσι etc.), *pr-sto- *pr-sti- *per-sti- 'prominence, something prominent' beside \sqrt{sta} - 'stand' (Skr. pršthá-m 'prominent ridge, height, peak, top'-L.Germ. and Dutch vorst f. O.H.G. first m. A.S. first fyrst f. 'roof-ridge'), *sou 'this' i. e. *so + the particle u (O.Pers hauv Gr. ov in ov-vos), *nei 'not' i. e. *ne + the deictic particle I (Avest. nae-ciš 'no one' Lat. nī Lith. neī, cp. § 15). Even where this obscuration is found in more than one language it may often have arisen during the individual developement of the languages in question: e. g. Skr. ptdáyāmi 'I press' (pf. pipīdė) for *pi-zd-, Gr. πιέζω 'I press' for *pi-sed-, originally 'sit upon'; Lat. crēdo O.Ir. cretim 'I believe' beside Skr. śrád dadhāmi 'I believe, trust' (cp. § 160, 1). Examples peculiar to single groups of languages are: Skr. néd-tyas- Avest. nazd-yah-'nearer' for *na-zd-, originally either 'έφίζων, προσήμενος' (V sed-'sit') or 'approaching' (sed- 'go, move', Gr. oso-5). Skr. bhişájphysician', no doubt to be resolved into bhi-šáj- 'conjuror, magician', cp. abhi-šajati 'he bewitches, curses'. Gr. ἐκατόμ-βη, cp. Skr. sata-gu- 'having a hundred cows'. δεσ-πότη-ς originally 'lord of the house', $\delta \alpha' - \pi \varepsilon \delta \sigma - \nu$ originally 'house-floor', see § 160, 2. ωπεανό-ς probably to be resolved into ω-πεανό-ς 'lying around', and compared with Skr. \vec{a} - $\vec{s}\vec{e}t\vec{e}$, see § 66. $\delta\pi\pi\omega\varsigma$ $\delta\pi\omega\varsigma$ how (soever)', $\delta \tau \tau \iota \ \delta \tau \iota \ \text{`what (soever)'} \ \text{for *} \sigma F \acute{o} \delta \ \tau \omega g, \ \sigma F \acute{o} \delta \ \tau \iota, \ \text{cp.}$ II.G. sō hwēo, swie 'howsoever' sō hwer, swer 'whosoever'. Lat. sub super for orig. *(e)ks-upo *(e)ks-uper, cp. Gr. έξ-ύπερθε. ap-eriō op-eriō beside Skr. r-noti 'he moves something, makes away with it', with apa 'he makes away with, removes, opens'. pergo for *per-rego. surput for *sub-raput. promo for *pro-emo. noenum non for *ne-oinom. superbu-s for *super-fu-o-s, √ bheu-, cp. Gr. ύπερ-φ-/αλο-ς I § 166 p. 147. Goth. preterite frēt

The -sor- in *spesor- seems to have been a root-syllable, but the word appears to have attached itself to nouns like *bhrātor- 'brother' *dótor- 'giver' (§ 119 ff.), just as Gr. παθ-άζω was associated with πολεμίζω etc. (p. 6).

O.H.G. fraz 'he devoured' from pr. Germ. *fra-ēti, O H.G. hiutu ().Sax. hiudu 'to-day' beside O.Sax. hiudiga A S. heódæz for *hiu-dgu = Goth. hia daga 'on this day' (ep. Kluge, Paul Braune's Beitr. XII 376 f.). Mid.H.G. bange adv. 'anxiously' for *bi-ango Mid H.G. gunnen for O.H.G. gi-unnan 'to give treely'. Mid.H G niht 'nothing' for O H G nuwiht. Goth. ni valits not a whit'. Mod H G amt. Goth and-bahti, [Eng. huzzy O.E. hūs-cof.]

Obscured compounds of this kind will be treated along with the rest, although no doubt by this method words will often be classed together which were very differently regarded by the speakers of any given period

Lastly, it should be observed that the terms Suffix and Prefix, particularly the latter, are sometimes used in the science of language with a far wider sense than that which has been here assigned to them. One of the members of a compound may be called suffix or prefix, as the case may be, simply because it appears with the same meaning in each one of a group of words. Thus we meet with such phrases as 'the compound $\dot{\alpha}no-\beta airo$ with the prefix ano'.

§ 5 When one member of a compound has become a prefix or a suffix, the group of words which contains it generally creates similar forms, and is thus enlarged by analogy. The more general the significance of such an element, the more readily are words of the same type formed, take for example the extent to which -heit -lich (mann-heit mann-lich) have spread in Mod.H G, and in Latin the future ending $-b\bar{o}$ (cal \bar{v} -b \bar{o}), which is derived from Idg. *bhy- \bar{o} (\checkmark bhey-become').

If a suffix or a prefix at a given epoch can be employed to produce new forms on the analogy of those already in existence, it is called fertile or living, and if not, barren or dead. Suffixes or prefixes which once had great vitality may die out, to be perpetuated only by memory in a certain number of examples, and no longer used for the formation of similar words. Thus the suffix -ti- (§ 99. 100), used in all the Indo-Germanic languages to form nomina actions, was still fertile in proethnic Germanic, but in the High German period was restricted to a

limited group of nouns, such as zucht 'breeding, discipline' ankunft 'advent' geburt 'birth'; its place has been taken principally by -ung (as in schenkung 'donation'), which still maintains its vitality. [In English it has been largely replaced by -ness, e. g. drought dryness, dearth dearness, sloth slowness]. In like manner the same suffix was dead in Latin by the beginning of the literary period (e. g. messi-s, mors stem morti-), and its place had been taken by -tiōn- (as fissiō nātiō captātiō), which is fertile even in late Latin. Again, -o-, in Homer still a living conjunctive suffix for verbs in -\mu ("\omega-\o

In a historical account of Indo-Germanic morphology this point must always be kept in view; and we are further bound to look for the reasons why one element used in forming words has died out and another taken its place. Thus for instance the suffix -ti- just mentioned fell out of use because it had split into several different forms by phonetic change, ep. Goth. ansti- ga-baúrpi- ga-mundi- ga-dēdi- (pronounced ga-dēdi) usstassi- (ep. § 100 under Germanic); so that the unity of het group was destroyed. But language always seeks like phonetic expression for like functions; and thus new suffixes of other and usually fuller form were preferred, and encroached more and more upon the old ones.

An adequate consideration of this aspect of Indo-Germanic Morphology is here impossible. Unfortunately the present position of the science of language precludes such an attempt, and, in any case, regard must be had to the due limits of this work.1)

¹⁾ In monographs on Word-Formation full justice has been done to it; see e.g. K. von Bahder in his work 'Die Verbalabstracta in den german Sprachen', 1880. I may record my complete agreement with the principles laid down in his Introduction (pp. 1-9).

§ 6. In § 2 reduplication was mentioned as one of the factors in the formation of words in Indo-Germanic. This subject also calls for a few preliminary observations. (1)

Here too we start from the juxta-position of two originally The same word is repeated twice or independent words. still oftener, to express repetition or lengthened duration of a process, or such ideas as universality and intensity. At every stage of the developement of the Indo-Germanic languages, so far as they can be traced, we find this process going on; and it is undoubtedly as old as human speech itself. Now no hard and fast line can be drawn between the mere repetition of a word independently and the new single word arising from the coalescence of the original with its echo, if only because the aim of the repetition is nearly always such that the resulting form has the nature of a compound. Cp. Skr. piba-piba 'drink!' (Rgv. II 11, 11 pibā-pibēd indra šūra soma 'drink, drink the soma, mighty Indra'), divé-divê 'day by day', prá-pra on and on', yáthāyathā 'howsoever'; Gr. πάμ-παν 'altogether', προ-προ-γυλινδόμενος 'rolling on and on' (Hom), μαλλον μαλλον 'magis magisque', πλέον nheor 'more and more'; Lat. mane mane, audī (Plaut. Asin. 229),

I 252 f.

jam jam, semper semper, quis-quis, ut-ut, Ital. colpo colpo, piccolo piccolo.

In this way repeated words had been fused into single forms even before the inflexional period of the Indo-Germanic parent language; and there is nothing to prevent our referring immediately to this oldest type of reduplication any words in the descendant languages in which the whole root is repeated; e. g. Skr. gárgar-a-s 'eddy' dár-dar-ti 'he shatters, breaks up', Gr. βάρ-βαρ-ο-ς 'speaking unintelligibly' ἀγ-αγ-εῖν 'lead on', Lat. quer-quer-u-s murmur, O.C.Sl. glagolŭ 'noise, word' for *gol-gol-ŭ (I § 281 p. 224).

Where, however, the reduplication is part of the structure of a simple word, full reduplication ('reduplicatio integra') is comparatively rare. As a rule there is hardly more than a suggestion of the repetition, 'reduplicatio mutila', e. g. in the perfect forms Skr. ri-rec-a Gr. λέ-λοιπ-ε 'he has left', Lat. tu-tud-it, Goth. ga-rai-rōp' 'he applied himself', and in Skr. ši-šir-a-s 'cold, frost', O.H.G. fi-faltra 'butterfly'.

It is usually the former of the two syllables which has this abbreviated form. It is then regarded in the speaker's consciousness as a prefix, like the adverb é, the so-called 'augment' (cp. Gr. ĕ-φευγον: πέ-φευγα) and other degraded initial elements of compound words ('reduplicatio praefixa'). This mode of regarding it was supported by the unreduplicated forms which usually existed side by side with it; these the speaker's thought connected into one group (e. g. πέφευγα beside φεύγω φεύξομαι φυγή etc.). Where the simple form corresponding to a reduplicated form had died out, or if it survived had lost all connexion with it in the mind of the speaker, the reduplication had not so clearly the stamp of a prefix; e. g. Skr. jā-gar-mi 'I watch', Gr. Γί-γā, (Γί-γαν-), Lat. me-mor me-moria, Skr. da-dru- A.S. te-ter Lith. de-dervině 'pustular eruption'.

Less frequently the second element of the reduplicated form is debased ('reduplicatio suffixa'). The commonest example is what is called 'broken reduplication', e. g. Skr. dar-d-\bar{u}- 'eruption on the skin' Lat. derbi\bar{o}su-s for der-d-u- (I \ \ 170 \ p. 150) beside Skr. dar-dar-a 'burst' and the Skr. da-dru- etc. already mentioned,

Gr. μορ-μ-ώ 'bogie' beside μόρ-μορ-ο-ς fear', πόρ-π-η 'needle, clasp' beside περόνη 'clasp' περάω 'I pierce', Lat. bal-b-u-s beside Skr. bal-balā-karōmi 'I speak stammeringly', gur-g-es beside gurgul-10, Lith. mùr-m-11 'I growl' beside Lat. mur-mur. nothing of the nature of a suffix could arise because there were no clearly defined groups of words with which these single forms might have become respectively connected, as was the case in the reduplication of the perfect. Only where there was some accidental phonetic resemblance to an already existing suffix did the element of reduplication assume the character of a suffix; e. g Goth. val-v-ja 'I roll' (resembling ufar-skad-v-ja): cp. Gr. έλ-ελ-ίζω; and this often occurred in examples of reduplicatio integra and of reduplicatio praefixa as well, if the last element happened to sound like some suffix: e g. Mid H.G. Mod.H.G. murmeln = O.H.G. murmulon mur-mur-on (Lat. murmur-āre) like lisp-eln schauk-eln hund-eln, Skr. cakrá-m 'circle, wheel' Gr. xvx20-5 'circle' A.S. hweowol 'wheel' (Idg *qe-ql-0-) like Skr. abh-rá-m 'cloud Gr. a9-lo-g 'contest' A.S. tunz-ol 'star'; Mod.H.G zittere zittre (for pr Germ. *ti-trō-mi) like schnatt-ere schnatt-re zimm-ere zimm-re; Mod.H.G. that (for O.H.G. te-ta, reduplicated perfect) like schau-t'.

Remark. How are the types de-der- (di-der-) and der-d- related in their origin to the full form der-der-? First as regards de-der-. Pott and other scholars may be right in assuming that this is not a phonetic corruption of der-der-, but a mere 'suggestion' of the complete syllable, which was felt to be enough. de-der-, they maintain, is equivalent to der-derm intention though not in fact, and there is no need to assume that such a form as der-der- preceded it. They point to such words in colloquial French as mé-mère 'httle mother' bé-hète beastie' Ba-barpe 'Bab' (dimin. of 'Barbara') Cha-chale 'Charlie' as examples of the same principle. In single instances, however, phonetic change may have produced this type of formation, such a form as der-dr-o- becoming de-dr-o by dissimilation. Again, in the process of broken reduplication different agencies may have been at work, and in any case the examples of this kind have not all the same history. Here too dissimilation may sometimes have been the cause; der-d-o- may stand for der-dr-o-. And sometimes der-der-o may have been unconsciously resolved into derd-ero-, and thus being associated with words of the same type as Skr. pat-ara- 'flying', may have given rise to new formations in which derd- was taken as the 'root'.

It should be remembered that we are here discussing only the ultimate origin of these different kinds of reduplication. When for instance such a form a de-der- had once been evolved it became a creative type, and the later examples (e.g. all extant reduplicated perfect forms) are—directly or indirectly—mere analogical formations, made on the model of those in which the genuine process of development had taken place.

We have still to mention one more resemblance between these forms and compounds in the strict sense. In reduplicated words, as well as compounds, the real nature of the form may be obscured in some way or another, especially by phonetic change, and the result is a word which the speaker supposes to be absolutely simple (disregarding of course derivative suffixes, and any case-endings that may be in existence at the time); e. g Skr. sēd- (in the perf. indic. 1. pl. sēd-imá opt. 3. sing. sēd-yā-t = Avest. ha-zd-yā-b etc.) Lat. sēd- (in sēd-imus sēd-āre) for Idg *se-zd- i e. *se-sd- from \$\sigma sed-\text{ ind}\$ (in sēd-imus sēd-āre) for Idg *se-zd- i e. *se-sd- from \$\sigma sed-\text{ ind}\$ (in sēd-imus sēd-āre) = O.H.G. bibē-t, Skr. bi-bhē-ti 'he fears'; another example which must be as old as the proethnic period is the perfect stem *ēd-(1. pl. Skr. ād-imá Lat. ēd-imus Goth. ēt-um, Lith. part. éd-ęs) for *e-ed- from \$\sigma ed-\text{ 'eat'}\$.

§ 7. Lastly, we must consider Vowel-Gradation (Ablaut, see I § 307 ff. p. 244 ff.) as a factor in the formation of Indo-Germanic words.

This appears in elements of all kinds: in root syllables, e. g. i- ei- 'go' Gr. i-uev εl-μι; in suffixes used to form nounstems, e. g. -tr- -ter- Gr. πα-τφ-ός πα-τέφ-ες, or verb-stems, e. g. the present suffix -nu- ney- Skr. ci-nu-más ci-nō-mι; in case-endings, e. g. the genitive ending -s -es -os Skr. sūnō-ξ O.C.Sl. nebes-e (for *-es) Gr. νεφέ-ος; in personal endings, e. g. 3. sing. -ti-taz Gr. δίδω-πι δίδο-ται; and in the reduplicatio praefiza, e. g. Skr. pres. imper. act. ci-kiddhi indic. med. (intens.) · έ-kitē from eit- 'perceive'.

• We saw in vol. I (loc. cit.) that vowel-gradation, a mechanical consequence of shifting accent, has quite as little to do with morphological differences of function as any other phonetic variations which arose within a given group of forms through

the action of what is called phonetic law. For instance, the o-form of ablaut which appears in the root-syllable of perfect forms like *de-dork-e *le-log-e (Gr δέδομας λέλοιπε), as distinguished from *derk- *leig- and *drk- *lig- in other forms of the verbal system, had originally no more connexion with the meaning of the perfect, nor had the e-form of ablaut, found in the formative suffix in the accusatives *po-ter-m *ma-ter-m (Gr. πατέρα μητέρα) etc., as distinguished from -tr- -tr- in other cases, originally any more connexion with the notion conveyed by the accusative, than (say) the σ of the second persons of σ -9a ig-re, as contrasted with the s of the 1. and 3. persons olda iduer ofde, had to do with the distinction of persons. But the arbitrary phonetic differences produced by ablant in the various groups of forms often acquired in time a special meaning, the particular phases of ablaut becoming closely attached to the particular idea conveyed by the whole word, and appropriated to this or that function in connexion with it. This is most clearly seen when such formative elements as had served, either solely or primarily, to distinguish the meaning of a particular form from that of other members of the same group, have been lost, thus leaving only the ablaut to indicate the meaning; e. g. Mid.H.G. 1. pl. pres. binden 'we bind' pret. bunden 'we bound' = Goth. bindam bundum, Idg. present stem *bhendho- preterite stem *hhehhndh-; (toth. acc. aúhsan dat. (loc) aúhsin (nom. aúhsa ox) = Skr ukšán-am (ukšán-am) ukšán-1; (toth. acc. fadar bropar dat. fadr bropr cp. Gr. πατέρ-α πατο-/. Thus even in proethnic Indo-Germanic the vowel-grade -ter- e. g. *pəter father' (Gr. πατήρ) had become in the nom. sing. the chief exponent of the special meaning of the case, as opposed to the voc. sing., Gr. πάτερ, and differences of ablaut like δέρχοιτο δοάκοι. λείποι λίποι had become connected with different kinds of action (continuous as opposed to momentary). In the same way other phonetic differences which had arisen accidentally became the exponents of different meanings. For example, in the masculine i-declension in Old High German it so happened that the whole plural had come to have the modified vowel: gesti etc. as opposed

to the sing. gast. The cases of the plural had originally been sufficiently distinguished from the singular by other means. But later on final -e was lost in Upper Germany, and partly so in Central Germany; and hence the modified vowel became, and still is, the sole sign of the distinction of number in the nom. and acc.: sing. gast pl. gest (gast). Afterwards on this analogy tag was formed as a plural for tag, and arm for arm etc.

In this way a definite phase of vowel-gradation in the Indo-Germanic languages has often become the mark of some definite meaning, so that the relations of Ablaut are of special importance in any account of their morphology.

In accordance with what has been previously said (I § 310) we distinguish 'Strong' and 'Weak' forms in the elements of which words are built up. The weak form shows the vocalism of the Lower or Weak Grade of Ablaut, the strong form that of the Higher or Strong Grade, and in each class again there are differences, which in forms of the strong grade may be very considerable (cp. e. g. I § 311).

The simplest of all the phenomena of vowel-gradation are those which appear in the terminations denoting case and person.

In the formation of stems, especially those of nouns, very complicated relations have sometimes arisen, chiefly because the original differences of gradation have been readjusted in course of the various processes of 'levelling' which the forms have undergone in one direction or another. Some such readjustments must have taken place soon after the differences in gradation had first appeared, i. e long before the proethnic language had broken up; and since then the process has been continually repeated. In this branch of our enquiry we can scarcely hope for anything like complete success in investigating the original distribution of the different phases of Ablaut.

Yet in a considerable number of groups of forms we have attained to a fair degree of certainty, and can even now reproduce, in all essential points, the vowel-gradation shown by the stem at the period of the first separation of the tribes. In many classes of noun-stems the formative suffix had Strong-Grade vocalism in

the nom. acc. voc loc. sing., in the nom. acc. du., and in the nom. (no doubt also acc.) pl., e. g. Gr. πα-τήο πα-τέρ-α πά-τερ πα-τέρ-ι, πα-τέρ-ε, πα-τέρ-ες πα-τέρ-ας, and in the other cases that of the Weak Grade, e. g πα-τρ-ός, πα-τρ-ών πα-τρά-οι. And similar distinctions hold good to some extent in the stem-syllable of root-nouns, e.g. Skr pắt pắd-am pắd-as as opposed to pad-é pad-ás etc. The terms used to distinguish these forms are Strong and Weak Cases respectively; a more detailed account is reserved for the sections dealing with Case-formation. In the verbal system, the three singular persons of the active generally had the strong form, and the plural and dual of the active with the whole of the middle had the weak form; and indeed this difference appears equally in root-syllables, e. g. Gr. εἶ-με, in suffixes of Tense, e. g Gr. δάμ-νη-με δάμ-να-μεν, and of Mood, e. g. Gr. ε-ἴη-ν ε-ἶ-μεν (*ἐσ-ιη-ν *ἐσ-ι-μεν)

§ 8 We have seen in the foregoing pages that the Indo-Germanic formative system in all its branches is really based upon composition. This being the case, the task of systematic morphology is to exhibit, first the processes of composition which gave rise both to what are usually known as compounds, and to all formations containing elements of the nature of suffixes or prefixes; and secondly, the development of the analogical formations which are associated with these. It is clear however that this task can only be very imperfectly accomplished.

The furthest point to which we can trace the past history of Indo-Germanic speech, without entering upon a region of the merest conjecture, is an epoch when, so far as we can judge, many elements originally independent had become so completely lost in composition as to show no vestige of their original character either in meaning or in form. The instinct of the language for the particular kind or kinds of composition by which these elements had assumed the shape in which we find them had by that time completely died out, and it is hence very probable that there had already been a good deal of shifting and displacement. It is therefore impossible for us to say whether any given formative element ever existed independently in

precisely the form which it has when we remove it from its surroundings, or whether one or other of its sounds may not have been a later accretion which originally formed no part of it (cp. Mod. HG. -keit, I § 14 p. 16, [Eng. -ology in ge-ology, cp. theo-logy], Lat. -cētu-m in būcētu-m busticētu-m, which was abstracted from such forms as nuc-eu-m tlic-etu-m). By that time, too, hundreds of complex forms may have become simple units both in use and in appearance, so that, strictly speaking, we cannot be sure that any one formative element which we regard as a unit in morphology was really a simple form to start with. In modern times we are not in a position to determine what the actual processes of composition may have been - they were certainly many in number - whose work began and ended before the proethnic community was dissolved: all that can be done is to accept as data their after effects, direct and indirect. I would take this opportunity of once more calling attention to a point on which I have already laid stress (vol. I p. 17 f.). The formative elements which date from the proethnic period we call by such names as 'root', 'suffix', 'prefix'; but this does not imply that they were originally independent words. Thus the division of a word by hyphens, e. g. *seq-e-ta_l (Gr. επ-ε-ται Skr. sác-a-tē), merely indicates the parts which the speaker probably regarded respectively as the kernel of a whole group of forms (seq-), or as a formative element used in different words with the same special function (-e- and -tax).

Among the forms that serve to show the method of formation which prevailed in the parent language there are comparatively few in which we can feel sure that our analysis actually agrees with the original process of composition, so that the hyphen really marks the point where the word originally divided. We feel most confidence in analysing reduplicated formations like Skr. dárdarti; next, in the case of the augment, e. g. *é-dykom 'I saw' (Gr. §-doanov); and the same may be said of some of the personal endings, as -mi -mai, -ti -tai. e. g. ey-mi 'I go' (Gr. sl-\mu), since these are no doubt connected with *me- 'I' *to- 'the, that'.

The case is different with later compounds formed after

the first division of the language had taken place; e. g. Skr. Ekacitti-bhavanti 'they become of one mind' Lat calē-bō for *calē fuō. Here, unless the contrary is expressly stated, our hyphens always imply the assertion that in the case of the oldest examples of any formation which gave the type for the whole group, each of the parts thus separated was once really an independent word-

Remark 1 Of late years much labour and ingenuity has been spent in the attempt to determine the original form of Indo-Germanic 'roots', especially since the publication of de Saussure's suggestive Mémoire sur le système primitif des voyelles (Leipz 1879) This subject, important as it undoubtedly is, I must dismiss with only a reference in passing, because of the grievous uncertainty of the theories hitherto advanced, nor do I wish to suggest to the beginner that he need at the outset give any special attention to the question I still feel wholly uncertain whether Idg *age-"go- (Gr pres αμε-τε αμο-μεν, subst αμε αμο-.) was earlier or later than *ag- (th in-ax-ro-) and Idg *geno- (Ski juni-tur-) than *gen- (Skr jún-mun-), whether the shorter form came from the tuller or whether the latter was derived from the former by the addition of -e- -o- and -a- The relation of Idg *ple- (Lat ple-nu-s) to *pel- (Goth. fil-u Ski. pi-par-ti) 18 also quite obscure *plc- may be regarded as standing for an older form *nele-, and its -e- as an element not originally belonging to the root But we may equally well regard 'pele- as the original sample root-word from which all shorter forms have been derived. The authorities are cited by Hubschmann, Das indogerm Vocalsystem p 181 ff, Johansson, De derivatis verbis contractis linguae Graecae p 82 sqq 98 sqq, Bezzenberger, Gotting, gel Anz. 1887 p. 417

Remark 2. Another question much discussed is that of the so-called 'root determinatives' Certain consonants frequently appear as the final sound of roots in a larger or smaller number of the words which belong to them E g -dh- in Skr ra-dh-u-di 'brings about, prepares, satisfies' Goth qu-re-d-an 'to reflect upon something' O C Sl 1 a-d-it; 'to reflect upon, care for beside Lat 1 e-1 i, 1 u-1 io Goth ra-pjo 'ratio'; Gr π ν- θ-ω 'putrefy' beside πύ-ον 'pus', O C.Sl ι-d-a' go' beside G1 εί-μι 'I go', further, in the suffixes -dh-ro- -dh-lo- -dh-mo- (see § 77). -s- in *kley-s- 'to hear' Skr kru-š-fi-š 'courtesy, readiness' part \$ 0-4-a-māna-s O.Ir. cluas 'ear' (I § 516 p 377) AS hlu-s-t hearing OCSI slu-ch-u act of hearing, hearing beside *hley- Skr part šru-tá-s (11. xlu-tu-c etc., and in *ten-s- 'extend, stretch out' Skr tasáyatı 'he pulls this way and that' vi-tasti-š 'span' O.H G. dinsan 'to drag, trail' Lith. tesiù 'I stretch' beside ten- Skr. fut tanisyá-ti Gr. rever etc The use of this --- became widely extended in the Aorist and Future and also in Desiderative formations, it may also be etymologically connected with the -es- in Gr. ξ-εα- (ξέω 'I scrape, smooth' sor. ἔξεα-σα) beside ξ-v- (ξύω) and qes- (Lith has-aŭ 'I scratch' O.C.Sl čes-ati 'to comb, curry'), in $\sigma\beta$ -ea- ($\sigma\beta$ éa-rau 'to quench') beside $\sigma\beta$ -n- (ξ - $\sigma\beta$ n 'was quenched') and seq- (Lat segmi-s etc); in w-(s- (Lat. ves-ti-s) beside eu- (Lat. ind-uo

Lith mi-mi mi-mi mi-mi, and many similar forms $-e\mu-u-$ may sometimes be regarded in the same way, e. g in "re μ -"flow" (Skr. srdv-a-t: Gr. $\tilde{\ell}_{\ell}$) beside set-"move forward" (Skr sdv-a-t: 'goes, flows' Gr. $\tilde{\iota}_{\ell}-\mu \eta$ ' 'haste, impulse'). There need be no hesitation in assuming that in such instances we are dealing with elements which were not originally integral parts of the primitive word, or 'root', and that therefore, in parallel forms which we find without them, they have not been lost, but simply never existed. The name we give them — determinatives, formative suffixes, or what not — is matter of no importance. Their origin and their original value are obscure. Where, as -s- in the aorist, they have a definite grammatical function, they may be named accordingly. Thus I describe -s- in $t\delta e_{tin}-d-a$ as an aorist-suffix, although I take it for granted that this element had originally nothing to do with the meaning of the aorist, but in doing so I imply no more than in calling e. g. -minī in Lat. legiminī (= legioninī (= legioninī) a suffix of the second person plural

FORMATION AND INFLEXION OF NOMINAL (AND PRONOMINAL) STEMS

§ 9 Our discussion so far has led us to the conclusion, that in the Indo-Germanic languages the first step towards a complete inflexional system is to be seen in the nominal compounds whose first member is an uninflected stem, and reduplicated nouns in which neither of the two members has sunk to the level of an inflexional element; that is, if we consider them apart from their case-suffixes and from any further derivative elements or other particles which may have become attached to them. It seems appropriate, then, to begin our account of the Morphology of Nouns, by treating first of Compound Words and of Reduplicated Forms.

COMPOSITION OF NOUNS (NOUN-COMPOUNDS)1)

THE COMPOUNDS CONSIDERED IN RESPECT OF THEIR FORM.

§ 10. We may distinguish four classes of compound forms.

1. Compounds whose first part is the stem of an inflected noun or pronoun, e. g. Gr. μονο-γενής compared with μόνο-ς;

F. Bopp, Vergleich Gramm. III³ § 962 ff. F. Justi, Über die Zusammensetzung der Nomina in den idg. Sprachen, Göttingen 1861.

II. Compounds whose first part is a word which never admits of inflexion in any period of the history of the Indo-

(Fernance languages accessible to our investigation, and only appears in compounds, e. g. Gr. $\check{\alpha}$ - $\beta \alpha z o c$:

- III. Compounds whose first part is an old adverbial word (with or without case-ending), which was also used uncompounded, e. g. Gr. ἐπί-θετος compared with ἔπι (ἐπὶ);
- IV. Compounds whose first part is either a case-form which when it first entered into composition was a living member of some case-system, or an adverb which had only become such during the development of the separate languages, and had the force of an adverb at the time when it was compounded; e. g. (Ir. Διόσ-νουροι and παν-μίολος.

No differences in principle are implied by this classification. It is chiefly intended as a convenient means of survey. In the course of the development of the different languages, the boundaries of the various classes often wavered considerably, and here and there new formations arose which departed widely from the type originally proper to their particular class.

Classe I and IV are often contrasted as 'genuine' and 'spurious' compounds The latter are also called Juxtaposita.

Proethnic Indo-Germanic.

§ 11. Class I. This type of formation was certainly represented by a large number of examples in the Indo-Germanic period, although there are not many compounds which occur simultaneously in different branches of the derived lan-

VI 204 ff.

guages, and therefore may reasonably be classed here. Several have a numeral for their first member; e. g. Skr dvi-pád-Gr. di-novg Lat. bi-pes A.S. twi-fete 'two-footed'; Skr. tri-danttri-dánt- Lat. tri-dēns 'three-toothed'; Skr. sata-pád- Lat. centipes 'hundred-footed'. O.Pers. hama-pitar- Gr. όμο-πάτωρ όμοnárosoc O.Icel. sam-fedr 'having the same father, a common father'; Gr. όμό-γνιος Goth. sama-kunja- see I § 142. p. 128. Avest. pouru-nar- Gr. πολυ-άνωρ 'rich in men'; Skr. purudásas- 'rich in wondrous deeds' (tr. πολυ-δήνεω' πολύβουλον, πολύμητιν (Hesych.). Gr. ώχύ-πους Lat. acu-pedius swift-footed; Skr. asu-pátran- Gr. ώκυ-πέτης 'swiftly flying' Lat. *acu-piter, which popular etymology changed to accipiter, as though from accipio, and even to acceptor. Skr ng-manas- having the mind of a man', Gr 'Aνδυο-μένης. Skr. navajá- i. e. nava + ajá- 'driving ships, seaman', Lat. nāvigō 'l navigate' from *nāvigo- 'driving ships'. It is to be noticed that these formations scarcely ever correspond exactly; we have usually to suppose that analogy has modified the forms in the separate languages (e. g. Gr. 'Ardoo-uivng instead of *ardoa-, see § 29).

§ 12. The termination of the first member.

Stems in -o- had -o-, ep. Gr innó-danos 'taming horses', thall. Dēvo-gnāta (dēvo- 'god'), (toth. garda-valdands 'master of the house', Lith. gera-dējis O.C.Sl. dobro-dējī 'benefactor'. Whether -o- occurred as well as -o- (ep (†r '1/1/2-laos beside àyó-s, see § 29. 30) is doubtful. The final vowel of the stem seems to have remained unchanged even where the second part of the compound began with a vowel: Skr Ved. yuktá-ašva- 'who has horses yoked', O.C.Sl bělo-okŭ 'white-eyed' (ep. also Pruss. dago-augis 'young sprig of a tree' deina-algenika-mans dat. pl 'to day-labourers'), see I § 600 p 453

Stems in -a-, in compounds formed in the separate families of language, sometimes end m -a-, and sometimes have the same form as the o-stems. The former is frequent in Aryan and Greek, rare in Latin and Lithuanian: Skr. urvara-jit-gaining arable land' Avest. daena-vazah- (proper name) from

daenā- 'law, faith', Gr. βουλη-ψόρος 'giving counsel', Lat. fabā-ginus 'proceeding from beans', Lith. sziksznó-sparnis 'bat' (properly 'leather-winged creature'). The -o-form is not uncommon in Aryan and Greek; it preponderates in Latin and Lithuanian; and in Keltic, Germanic and Slavonic it is the only form found: Skr. Ved. ukha-chid- 'breaking the pot' from ukhá-, Avest. gađa-vara- 'wielding a club' from gađa-(= Skr. qadá·), Gr. τλο-τόμος 'felling timber' from τλη, Lat. ali-pēs from āla, Gall. Teuto-bodiācī beside O.Ir. tuath f. 'people' ground-form *teuta, Goth. airpa-kunds 'of earthly origin' from airpa, Lith galvā-raisztis 'headband' from galvà, O.C.Sl. glavo-bolije 'headache' from glava. From these data I do not venture to draw any definite conclusion for the proethnic period It seems to me, however, improbable that the transition from -ā- to -o- took place independently in all the different languages Indeed it is certain that the latter was the regular form in proethnic Indo-Germanic when the compound consisted of an adjective + a feminine substantive Skr priya-bhāryā 'beloved wife', Gr. axoónolic 'upper part of a city', O.Ir. sen-mathir 'old mother, grandmother' from *seno- (ep. however § 39), O.H.A. junc-frouwa 'young lady' for *jungo-, Lith. jauna-marte 'young woman' sen-mote 'old mother, grand-mother' for *sena- (cp. O.Ir. sen-mathir), O.C.Sl. pluno-luna 'full moon'.

Stems in -ī- and -ū- had -ī-, -ū before consonants and u-, -uu- before sonants. Skr. dhī-jávana-s 'exciting devotion, inspiring', bhrū-kuṭi-š 'frown'. Skr. śriy-āditya- (man's name) from śrī-, Gr ov-ayyog 'choking swine' from ov-c Compare Skr. instr. pl. dhī-šú beside instr. sing. dhiy-ā.

Stems in -i-, -u-, nasals, liquids, and such of the stems in explosives as were declined with vowel-gradation had regularly the weak form of ablant, from the proethnic period onwards, in compounds as well as in derivatives (e. g. Gr. \(\beta a v - \delta a \)/(\lefta \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{tr} \)/(\text{tr} \(\text{tr} \)/(\text{tr} \)/(\text{

'Stems in -i- and -u- had -i-, -u- before consonants. Skr. tri-pád- (tr. τρί-πους Lat. tri-pēs A.S. đri-fēte 'three-footed', Gall. tri-garanus 'with three cranes', Lith. tri-kójis 'creature with three

feet' O.C.Sl. tri-zabu 'trident, three-prong'. Skr. agni-dhana-m receptacle for fire', Lat. igni-fer. Proper names containing *uesu- 'good': Skr. vásu-röciš- Avest. vohu-raocah-, Gall. Visurīx (woman's name) O.H.G Wisu-rīch. Skr. paśu-pá-s cattlekceper' Goth. faihu-friks 'covetous' Gr. ήδυ-(F)επής 'speaking sweetly' Skr. svādu-rāti-š 'bestowing beautiful gifts', Lat. manufestus, Gall Catu-riges ('battle-kings') O.Cymr Cat-mor, O.H.G. Hadu-mar, Lith. virszù-kalms 'mountain peak'. Before sonants we find sometimes -i(1)-, -u(1)-, sometimes -1-, -1-, cp. I § 120 p. 111 ff. The first form is certainly original in such words as *tri- 'three', *dru- 'wood' · cp. Skr Ved. tri(y)-aruša- 'marked with red in three places', Gr. zoi-olog 'three-branched', Lat triennum, (fall. Tri-obris, (). H G. dri-orter 'triangulus'; Skr. Ved. drú(v)-anna-s 'having wood for food', Gr Δον'-οψ Cp. further Skr. Ved. hárí(y)-ašva-s 'havmg golden-yellow steeds' kršti(y)-ōjas-'vanquishing the nations' beside ahy-árşu-ş' falling upon dragons', puru(v) antka-s 'having many semblances' madhu(v)-ád- 'eating sweet things' bāhu(v)-ōjus- n 'strength of arm' beside pulv-ughá-s 'harming much' (examples with -y-, -v- - which alone occur m classical Sanskrit - are rare in Veda, see Edgren, Journal of the Amer Orient Soc. XI 71), Gr. βωτι-άνειρα fem. 'nourishing men', πολύ-ιππος 'rich in horses', O.C.Sl. has an isolated example, medv-edi 'bear' ('honey-cater') from medu = Lith. medù-s 'honey'.

of original types. What we most commonly find is a substitution of o-stems for the stems in -n-, and this mode of representing the u-stems in composition appears to me undoubtedly proethnic. (ir. rtó-κρανον 'capital of a column' from κίων, ακμό-θετον 'anvil-block' from ακμών, αίμο-βαφής 'dipped in blood' from alua, Lat. hom-cida, sangui-suga, numi-clatori (inser.), Mid. Ir. talam-chumscugud 'earthquake' from talam gen. talman (§ 37), Goth. guma-kunds 'of the male sex' from guma gen. qumins, áuga-daúrō n. 'window' ('eye-door') from áugō gen. auans. Skr compounds like šīrša-bandhanā mav also be classed here, and all the more confidently because such forms as Skr ukšánna- = ukša-anna- 'devouring oven' (from ukšan-) Avest zrvāvu- = zrva-āvu- 'specified time' (from zrvan-) elearly show the type of the o-stems (cp. yuktúśva-). substitution of o-stems for stems in -n- is obviously connected with a similar change in the final members of compounds, as Skr. tri-parva-s 'with three edges' from párvan-, priyá-dhāma-s 'occupying a charming position' from dhaman-, Gr α-πειφο-ς 'boundless' beside α-πείοων (stem *περ.For-), αν-αίμο-ς 'bloodless' beside ar-aimor, Lat. ex-sangui-s for an older fex-sanguo-s (see § 93, under Italie) from sanguen, sublimu-s, later sub-limi-s (properly 'reaching up to the lintel') from limen.')

Stems in -m- Skr. sa-kft 'once' Gr. α-πλόσς 'single' Lat. sim-plex, 1dg *sm-, from *sem- 'unus' Gr. ε̄τς neut. 'εν. Gr. δά-πεδον 'floor in a house', then 'ground' generally, for *dm-, from *dem- 'house', see § 160, 2

The Indo-Germanic type of formation in r-stems is shown in Skr. ptr-śrάvana-s 'gaining glory for one's father' and pitrartham 'for one's father's sake'. Cp. also Gr. τετρά-γυν-ς 'containing four measures of land', from the Idg. stem *qetuer-(τετρα- = Idg *qetur-, cp. I § 285), Goth. brößru-lubō 'brotherly

¹⁾ No inference can be drawn from such Germanic examples as Goth hauk-hairta- 'haughty' beside hairtan- n 'heart'. For even granting that stems like these had always been n-stems, the a-inflexion must in any case have been forced upon them by the analogy of the strong declension of adjectives Cp Leo Meyer, Got Spr. p. 247.

love' (? see § 40) and Gr. πατρ-ωννίμιο-ς 'named from the father', ἀνδρ-άγρια 'spoils of an enemy'

Stems in -nt- had -nt- Skr. byhad-ratha- 'having a great car', Idg *bhrāhnt-

Stems in -s- Gr. $\mu\bar{\nu}\sigma$ - $\phi\acute{\nu}\sigma$ c 'killing mice', Lat. $m\bar{u}s$ -cipula 'mouse-trup', Idg. * $m\bar{u}s$ -. Stems in -es- no doubt had -es-: (tr $\sigma\alpha\kappa\epsilon\sigma$ - $\phi\acute{\nu}\sigma$ c 'shield-bearer', Goth sigis-láun 'prize of victory', Skr rajas-túr- 'hastening through the sky' -s- no doubt occurred as well, cp Skr. $mandhāt\acute{u}r$ - 'thoughtful, devout person' for *manz-dhātar-, beside $m\acute{a}nas$ - Gr. $\mu\acute{\nu}voc$. The use of -o-stems in their place, which is found in Greek, Latin, Keltic, and Slavonic (§ 29–34–37–47, cp. also the Germanic, § 40 Rem 5) may be an independent developement of the separate languages

§ 13 The action of analogy produced many changes in what we must assume to have been the original forms of the initial members of compounds

On the one hand, we find one kind of stem taking the place of another, e. g. a stem in -o- replacing a stem in -i-, as Slav. gosto- instead of gosti- (§ 47). We have just seen (m § 12) that changes of this kind arose even in proethnic Indo-Germanic. Thus it may well be the case that *dyi- 'two' (beside nom. acc du. *dyōy: Skr dvōw etc.) was formed in this period to correspond with *tri- 'three' (cp. c. g. *dyi-pod- 'two-footed' beside *tri-pod-) just as Gr. diā-xōow was modelled on rwā-rōow, nervā-nov (for nerti-nov) on intá-nov, and so forth, a different explanation of *dyi-, which does not seem to me convincing, is given by Bartholomae (Ar Forsch. III 39) In the development of the separate languages the use of -o- as the connecting link in compound words was especially frequent; hence this ending has been called the 'vowel of composition' ('Compositionsvocal').

On the other hand, the stem is sometimes replaced by a case-form (the compound thus passing into Class IV) Of this kind are new formations like Skr. agrē-gá-s (loc. sing.) beside

the more archaic agru-ga-s 'going at the head', Gr. Hudonyern's (loc. sing.) 'born in Pylos', Mod.H.G. befehls-haber lands-mann (gen. sing.) for the older forms befelch-haber land-mann. In this class also a few examples may be proethine, ep. Skr. aštá-pad- aštā-pada- Gr. óxroí-nove 'eight-footed', Lat. octō-jugis (Goth. ahtáu- seen in ahtáu-dōgs 'eight-day' (adj.) for *ahtō-, following the uncompounded ahtáu) with the form of the nom. acc. du., and similarly, with the form of the nom. acc. sing., Gr. ¿aróu-nove -nedos Lat. centum-peda beside the more archaic Skr. śuta-pád- Lat. centu-pēs -peda (cp. also Goth. handa-faþs 'centurio', Lith szimta-kájis 'hundred-footed').

Remark Cp the occurrence of the -ō- of the nom acc du. in the case-endings Skr -ā-blyām Lat. -ō-bus (duōbus) Skr. ašṭa- (seen in Ved ašṭa-karṇā- etc) and Lat octi- (seen in octi-pēs etc) do not represent the Idg. stem *οkto-, from which the dual was formed, but they follow the analogy of sapta- and septi-, cp Gr ο'ετα- beside ἀετω- in imitation of ἑπτα-.

The same substitution of case-form for stem is seen in certain derivatives formed by means of suffixes, examples of this are Skr tad-īya-s 'belonging to that' tad-vant- 'provided with that' (tá-d nom acc neut.) ki-yú-š 'desiring what' (ki-m nom acc neut.), Skr divá-tana-s 'diurnus' (divā instrusing 'by day', § 69), Skr. uccāis-tarā-m 'higher' (uccāiš instruktingh', § 75), (ir. µv/oi-tatos 'furthest back in the corner (µvxoī loc. sing 'in the corner, within', § 75), Gr. ǐqio-ş 'powerful' (l-qi instr. sing. 'with power, with night'), Lat. extrē-mu-s (*extrē-adv., § 72, 2), Goth. jái-n-s 'that' (m) (*100 loc. sing., § 66).

§ 14. ('lass II ldg. *y- *yn- 'un-, connected with *ne*nē 'not' (Skr. ná ná etc.) Skr. a-mṛta-s á-martiya-s 'immortal' anaśvá-s 'without horses', Armen. an-qēt 'unknowing', Gr. à-μροονος
à-μροόσω-ς (cp. I § 120 p. 111) αν-ιππος, Lat. τη-somnis (Skr.
a-svapná-s 'sleepless'), O.Ir. ē-tromm 'not heavy, light', O.H. G. unende n. 'endlessness' (Skr. an-antá-s 'endless'), cp. I § 227 p. 194, and
the parallel form *\bar{v}- 'un'- = Gr. v\bar{v}- v\eta- etc., see I § 253
p. 207. Idg. *dus- 'mis- ill-': Skr. dur-manas- 'illwill, malevolence', Armen. t-gēt 'unknowing', Gr. δνσ-μενής 'ill-disposed',
O.Ir. do-chruth 'deformed, ugly' (from cruth 'form', the c being

changed to ch on the analogy of so-chruth 'beautifully formed', see 1 § 658 p. 510 f.), O.H.G. zur-lust 'wilfulness, illwill'.

These initial members of compound words may once have been independent adverbial words which were restricted even in the proethnic period to use in composition; just as Idg *su well and *sēmi half, which in Aryan still occur as independent words, in the other branches of Indo-Germanic only survived in compounds.

§ 15. Class III. This class may be split up into numerous subdivisions; only a few of them can be noticed here.

Adverbs used in the separate languages as verbal prepositions are compounded with verbal nouns. Idg. *έρι-dhəto-s added'. Skr áρι-hita-s 'shut, enveloped' Gr. ἐπί-θετος 'added'. Idg. *άρο-qιτι-s 'expiation, punishment' Skr. áρα-citi-š Gr. ἀπό-τισις. Idg. *mι-zdo-s 'place for sitting down' (\sqrt{sed}): Skr. nīdá-s, Arm. nist, Lat. nīdu-s, O.Ir. net, O.H.G. nest, see I § 590 p. 447 Idg. *peri-sroyo-s 'a flowing round': Skr. pari-srāva-s, Gr. περί-ρροος. It was not before the period of separate developement that adverbs of this kind were closely united with the finite verb, as in Gr. ἐπι-τίθημι, and it is clear that the older practice of compounding them with nouns gave considerable impulse to this tendency.

Remark. The group of purely verbal compounds then reacted upon the class of nominal compounds. It is true enough to say that e.g. Gr. \$\varepsilon \chi_0 \

Adverbs, used in the separate languages as prepositions governing a case, are compounded with nouns which are found governed by them; $\dot{\epsilon}\gamma\kappa\dot{\epsilon}\varphi\alpha\lambda o\cdot\varsigma=\dot{\epsilon}\nu$ $\kappa\epsilon\varphi\alpha\lambda\tilde{\eta}$ $\delta\dot{\nu}$. In the proethnic

period, when this group of forms began to develope, prepositional phrases like Skr. anu satyam 'conformably to truth' Gr. ev negali 'in the head' Lat. ante portam can hardly, as yet, have become a recognised construction. The need of derivatives, however, had already given rise to compounds, exactly in the same way as in Mod.H.G. lang-weilig is derived from lange weile, in Lat. Sacraviënsës from sacra via etc. (cp. § 3 Rem. p. 4 f.). Then, the more firmly the prepositional construction established itself in the separate languages, the easier was it to form corresponding compounds, and the more freely were they coined. Skr. api--karná-m 'that which is situated by the ear, the region of the ear', Gr. ἐπί-γαιος adj. 'on the earth'. Skr. upári-martya-s 'rising above mortals', Gr ὑπερ-ἀνθρωπος ὑπερ-ήνωρ (the same). Lat inter-vallum 'that which is situated between two palisades (inter vallos), intermediate space', Skr. antar-hastá-s adj 'in the hand' Goth. uf-áipeis 'under an oath, bound by an oath', Skr upa-kakšá-s 'reaching to the armpit'. Lith. pér-galve f. that which is laid over or around the head, cowl', Gr. negiκέφαλον περι-γεφαλαία 'head-covering'. It is noteworthy that Sanskrit and Greek agree in using as adverbs the acc. sing. neut. of these adjectival compounds, e g. Skr. praty-ákša-m from praty-ákša-s 'lying before the eyes', ati-mātrá-m from ati--mātrá-s 'exceeding the proper measure', Gr έμ-πεδον from εμ--πεδος 'situated on the earth, firm', ὑπέρ-μορον from *υπέρ-μορος beyond destiny'.

The negative particles *ne, *ne½ (cp. O. Brugmann, Uber den Gebrauch des condicionalen NI in der alteren Latinität, 1887, p. 32 f.), *mē are compounded with the pronominal stems *qi- *qo-. *ne: ná-ki-š 'no one, nothing, not' (ki- instead of the regular ci-, see I § 448 Rem. p. 333). *ne½: Avest. nae-ci-š 'none', Lith. nē-kas O.C.Sl. ni-kūto 'none'. *mē (prohibitive) Skr. má-ki-š, Gr. μή-τις.

§ 16. Class IV. Compounds of this kind do not appear in any great numbers until the later periods of the history of the languages. Of these, too, by far the greatest number are due to no real process of composition, but merely to the ana-

logy of already existing types. The following may be regarded as formations which had the character of compounds as early as the proethnic period.

The words for the tens from thirty upwards, as Gr. τριά-κοντα, τετταρά-κοντα, which have a nom. acc. pl. neut. as their initial member.

Idg. *dyō-dekṃ *duyō-dekṃ 'twelve': Skr. dvā-daša duvā-duša, Avest. dva-dasa (with a instead of ā, following dva), Gr. δω-δεκα διώ-δεκα, Lat. duo-decim (with o instead of ō, following duo), compare Skr dvādašama-s Lat duodecimu-s 'twelfth'. Idg *trēzez-dekṃ 'thirteen': Skr. trāyō-daša, Lat. trēdecim (I § 594 p. 450), Mid.H.G. drī-zehen (the sounds at the junction of the two words have been modified on the analogy of the two uncompounded forms, for -zd- would have become -st-in Germanic)

Remark. We may generalise so far as to assume that in procthine Indo-Germanic there already existed compounds for all the numbers 11—19. Yet it must be noticed that the names of the numbers up to nine are not all genuine case-forms, e.g. Idg. *perque 'five' seen in Skr. páñcadaša Lat quindecim Goth fimflathun.

Possibly there were also in the Indo-Germanic period compounds containing case-forms of diu-'heaven'; cp. Skr. divō-rúc-'shining from heaven' (Ir Aióo-doros 'given by Zeus', Skr. divi-já-s divi-játa-s 'born in heaven'. The Greek compound deo-nóine 'master of the house', whose first member was the Idg. gen. *dem-s (1 § 204 p. 171 and § 160 below) may also have been inherited from the parent language.

To this class also belong such forms as Skr. tad-vaśá-s having a desire for that, Gr. $\pi o \partial$ - $\alpha \pi o'$ - $_5$ whence coming? with the form of the nom acc. sing. neut. See I § 228 p. 195 and § 163 below.

§ 17. The forms of this class, like those of Class I, gave rise to many analogical innovations. The most noteworthy of these is that the case-ending of the first member of the compound ceased to be regarded as a case-ending, and was used in composition with nouns which could not be joined with

t uncompounded; e. g. Gr. θεόσδοτος (beside θεό-ς, gen. θεοῦ) on the analogy of διόσ-δοτος, Mod.H.G. hilfstruppen 'auxiliary force' (beside die hilfe, gen. der hilfe) on the analogy of forms like hungers-not. See § 24. 32. 44. 47.

§ 18. Compounds of all classes have been used from the earliest period as personal names 1), and it must be assumed that even in the parent language this was the commonest method designating of persons.

It remained in living use amongst all the Indo-Germanic peoples except the Italic²). Examples are · Skr. άἐνα-mēdha-s (aἑνα- 'horse'), dur-mitrά-s (duṣ- 'mis-'), upa-diṣa-s (upa 'hither, this way'), dɨνō-dāsa-s (divás gen. of div- 'heaven'); Gr. ΄Ιππό-μαχος, ΄Α-δμητος, 'Υπό-δικος, 'Αοηί-λνκος; Gall Dēνο-gnātu (dēvo-'god'), Su-carus Su-caria O.Bret. Hu-car Ho-car (su- 'well'. Skr. sú, su-, cp. I § 573 p. 430), Ro-smerta (ro: Gr. πμο΄); (toth. Austro-valdus with Latinised termination (austro- 'cast'), O.H G. Wolf-boto (wolf- 'wolf'), O H G. Un-forht (un- 'Gr. α΄-), Lith. Vaisz-nor-s, Nor-buta-s, But-vila-s (*vaisza-s or *vaiszu-s 'guest' cp vaiszinù 'I receive as a guest, entertain', nora-s 'will', bùta-s 'house') '), Pruss. Buti-lubes (buta- house') Austi-gaudis (austa- 'mouth') Na-bute (na 'after, in accordance with'), Serv Vuko-mir (vuk () ('Sl. vlūkū 'wolf'), Ljubo-mir (O.C.Sl. ljubū 'dear').

These compounds had in many respects a peculiar history. Amongst the Greeks and the Germanic peoples, it was a custom to insert in a child's name one of the words which were found compounded in the name of the father or the mother:

¹⁾ See in particular A. Fick, Die griech. Personennamen nach ihrer Bildung erklärt, mit den Namensystemen verwandter Sprachen verglichen und systematisch geordnet, Göttingen 1874.

²⁾ And perhaps the Armenians. On the subject of personal names in Armenian I have received communications from Prof. Hübschmann, and I am satisfied that in the present state of our knowledge it can neither be affirmed nor denied that this people retained any genuine Indo-'Germanic compound names. In the case of geographical names, however, the old principle of nomenclature may be said to be still fully in force.

³⁾ In Lithuanian this mode of forming family names is now obsolete.

e. g Δῖνο-νράτης son of Δῖνο-νλῆς, Εὐ-κράτης son of Εὐρν-κράτης, 'Ανδρό-νῖκος son of Νῖνο-νλῆς; in the 8th century A. D. we have Walt-bert son of Wald-ram, Wald-bert and Wolf-bert sons of Hram-bert, Wine-gaudus son of Wine-burgis (Stark, Die Kosenamen der Germanen, p. 159)) This explains the fact that words of the most heterogeneous meaning were often combined to form one name, as Gr. Ἰππό-λᾶς, Ἰροδ-ιππος, O II G. Wolf-dag, Fridu-gundis.

One of the two compounded words was sometimes used alone as an abbreviation for the whole name (these are called 'Kurznamen' 'short names'), and suffixes expressing endearment were often added at the same time to this single stem. This practice of abridgement, which shows the same kind of linguistic thrift as we see e. g. in Mod.H.(4. balin = eisenbahn, lager = lagerbier, soda = sodawasser, kilo = kilogramm, ein viertel neuen = ein viertel liter neuen weines, in London slang phrases such as zoo = zoological garden, pops = popular concerts, bus = omnibus, and in (4r. na, na from marno, narno2, may be regarded as unquestionably belonging to the proething period. Skr dēva-s dēvaka-s dēvika-s dēviya-s dēvala-s dēvila-s = deva-datta-s deva-kšatra-s deva-šravas- etc. Gr. Zevela: = Zeviš-innoc Zevil-danoc Zevil-deoc etc. (fall. Toutus Toutius Toutillus == Touto-bocio () Cymr. Tut-ri (cp. Gall. Toutio-rīx) etc. ().H.(+. Wolfo Wolflo (Goth Vulfila) Wolfing == Wolf-brand Wolf-braht Wolf-gang etc. Pruss Bute Butil Buteko = Buti-Serv. Vuk Vukoj Vukel Vukolin = Vuho-voj Vuko--mer etc. (vuk = 0.0 Sl. vluku wolf) This shortening was also effected by dropping the first member of the compound.

¹⁾ In Grock the influence of the father's name may be observed even in names consisting of single stems, the formative suffix being taken over to the new name, e. g. Βράχ-νλλος son of Βάβ-νλλος, Μαρμεν-ίσκος, son of Φιλ-ίσκος. See J. Baunack, Stud. auf dem Gebiete des Griech, I 1, 57

²⁾ The psychological side of this practice of abbreviation has been examined by Behaghel (Die Deutsche Sprache, p 68 f.). It springs from the general tendency to leave unspoken whatever can be understood, or is at once suggested by the immediate context.

c. g. Gr. $K\lambda\tilde{\eta}\tau o\varsigma = Arάκλ\eta\tau o\varsigma$ (a bishop in the first century), Vulfus = Hun-ulfus, Scirorum primas, saec. V, Jornandes c. 54.

Where this kind of abbreviation took place the feeling for the etymological structure of the compound was sometimes lost, and so the initial consonant or consonants of the second member remain in the curtailed form. Gr. $N\bar{\iota}\kappa \circ \mu\bar{\alpha}\varsigma = N\bar{\iota}\iota \circ -\mu\dot{\eta}\delta\eta\varsigma$, $\Delta\eta\mu \circ -\sigma\vartheta\bar{\alpha}\varsigma = \Delta\eta\mu \circ -\sigma\vartheta\dot{\epsilon}\iota\eta\varsigma$, $E\tilde{\nu}-\chi\varrho\iota\varsigma = E\tilde{\nu}-\chi\varrho\eta\sigma\tau\circ\varsigma$, $H\circ\lambda v-\xi\dot{\alpha}=H\circ\lambda v-\xi\dot{\epsilon}\iota\eta$. O.H.G. Adal-bo =Adel-bero and Adel-boldus, Sibo=Sibold Sigi-bald, Rat-po =Rat-poto, Thiemo=Thiet-mārus, Ercam-bius =Ercam-bertus.

Remark. I do not know what view to take of the frequent strengthening of a medial consonant in abbreviated names in Greek and in Germanic; c. g. Gr. Ξεννώ, ᾿Αγαθθώ, Δικκώ, Καλλο-ννώ, Κλεό-μμις, Θεο-κκώ, Νικο-ττώ, Κλεο-θθίς, Ο H G. Itta = Ita-berga, Sicco = Sige-rīch Sig-bertus Sig-fridus, Aggo = Ago-bardus. Cp. Fick, Die griech. Personennamen p. LIX sq. and Bezzenberger's Beitr. III 277 f., Baunack, Studia Nicolitaina (Lips. 1884) p. 47 f., and Studien auf dem Gebiete des Griech. I 1, 60, Stark, Kosenamen p. 19 ff

The student should compare the examples of abbreviated names in other languages collected by R. Mowat, in his essay De la déformation dans les noms propres (Mém. de la Soc. de Ling. I, 171 ff.).

- § 19. Accentuation of Compounds. In languages where the free Indo-Germanic accentuation can still be observed, the position of the accent in compounds varies considerably in many ways, and it is certain that even in the proethnic period a complicated system had been developed. Certain principles, however, can be everywhere recognised, and must probably be assumed as holding good for that period.
- 1. Where the meaning was not 'epithetised' (§ 50) the compounds of Class I (see above) were usually oxytone if the second member was a nomen agentis: Skr radhra-cōdá-s 'driving on the weary' (cōdá-s 'driving on') aśva-hayá-s 'driving on the steeds' (hayá-s 'driving on'), Gr. ψυχο-πομπός 'conducting souls' (πομπός 'conductor') παιδο-τρόφος for *παιδο-τροφός (I § 676 p. 542 f.) 'nourishing children' (τροφός 'nourisher'). On the other hand, where the meaning was 'epithetised', the first member usually

bore the accent, no matter of what parts of speech the word was compounded: Skr. hári(y)-ašva-s 'having golden-yellow steeds híranya-kēša-s 'golden-haired', Avest. stehr-paesah- 'adorned with stars' = pr. Ar. *stf-paišas- (I § 260 p. 212, § 288 p. 229 f., § 674 p. 539), Gr. βαθύ-κολπος 'with deep, full bosom' κλυτό-πωλος 'having glorious steeds' χαλνό-πους 'bronze-footed' (as regards instances like εὐρυ-ρέεθρος 'with wide stream' for *εὐρύ-ρεεθρος see I § 676, 2 p. 541 and Wheeler, Der griech. Nominalacc. 43 ff.), A.S. fyder-fēte 'four-footed' for pr. Germ. *fipur- (I § 529 p. 384 f.) like Skr. cátuṣ-pad-. Thus we find existing side by side forms like Skr. rāja-putrá-s 'king's son' and rāja-putra-s having kings for sons', (†r nav-τρόπος turning all' (ep. τροπός 'turner, strap by means of which the oar is turned') and πολύ-τροπος 'of many wiles' (ep. τρόπος a turn') with many similar examples.

Remark 1. The exceptions to these rules still need careful investigation. Thus for example, Sanskrit compounds of -pati- 'lord', though they belong to the immutati or unepithetised class, accentuate the first member, as yand-pati-\(\delta\)' 'lord of a stronghold', and the d of Goth. -fadi- in hunda-fadi- 'leader of 100 men' points to the same accentuation, pr. Germ. *xunda-fadi- (I \(\delta\) 530 p. 386 f.). May not this substantive have been originally a nomen actions meaning 'rule, lordship' (op \(\delta\) 149), so that the compounds in question would originally have been mutatu (epithetised)?

2. Compounds with *v- *vn- un-' accented this prefix if they were the same part of speech as their final member. Skr á-kumāra-s 'non-boy, matured yonth' (kumāra-s), á-dīrgha-s not long' (dīrghá-s), á-kšīta-s imperishable' (kšītá-s), án-andha-s 'not blind' (andhá-s). Gr. α-διορα 'gifts that are no gifts' (δορα), ά-δηλος 'not plam' (δηλος), ά-q βιτος = Skr. á-kšīta-s, άν-αλτος 'insatiable'.

Remark 2 If the phonetic law for \hat{v} , which was laid down in I § 226, is correct, Skr. dn- and Gr. dv- must once have been regular even where the next part of the compound began with a consonant. In that case the unaccented a- d- of epithetised compounds like 'Skr. a-lamás- 'without darkness' Gr. d- $d(f)_{e\hat{v}_{e}}$ 'fearless', must have passed into more general use, thanks no doubt to the fact that before a sonant every * v_{e} n-, accented and unaccented alike, regularly became an- dv- (op dn-andha-s and dn-ends- 'sinless', dv-endv-v and dv-endv-v 'shameless').

- 3. Compounds consisting of adverbs + participles in -to-, abstract substantives in -ti-, or similar verbal nouns (Class III), had the accent upon the adverb, just as the corresponding forms of the finite verb in a principal clause threw back their accent upon the adverbs which qualified them (cp. 1 § 669 p. 534). Skr prá-tta-s given up' Gr πρό-δοτος abandoned, Skr. prá-tti-š Gr. πρό-δοσος; A.S. frá-coā Goth. frá-kunþs 'despised', O.H.G. frá-tāt 'transgression'. In Greek the accentuation followed new rules; thus we have ἀπο-τελεύτητος instead of *ἄπο-τελευτῶτος, ἀπό-τισις, for *ἄπο-τισις, cp. εὐχυ-ρέεθχος above, 1.
- 4. Cumulative numerals (Dvandva) had the accent on the first number, as Skr. dvá-daša Gr. δω-dexa 'twelve'.

Aryan.

§ 20. In the proethnic period of Aryan the existing types of formation underwent no important changes.

In certain forms, as Skr. áśva-magha-s, we find -a- where we should expect -a-. These no doubt arose by analogy in proethnic Aryan, if they are due to the influence of Indo-Germanic stems in -a-, or if they contain the form of the instr. sing. See § 22, with the Remark.

Examples of compounds which accurately represent the Indo-Germanic types are: Skr. vira-hán- Avest. vira-jan- 'slaying men'. Skr. áva-hata- Avest. O.Pers. ava-jata- 'beaten off, struck down, killed': cp. Lat. au-. Skr. dūrē-śruta- proper name, Avest. dūrae-srūta- 'far-famed', containing the loc. sing. of the stem dūra-.

§ 21. In Sanskrit, nominal compounds were freely developed. In the Veda and the Brāhmaṇa compounds containing more than two members appear but rarely; but in the classical language, especially in the artificial style, stem-compounds (Class I) consisting of several members are quite common, e. g. sakala-nīti-šāstra-tattva-jħa-s 'knowing (jħa-) the essence (tattva-) of all (sakala-) manuals (śāstra-) of deportment (nīti-)'. Later poets created compounds which were ab-

solute monstrosities; see the examples given by Justi, Uber die Zusammensetzung der Nomina, p. 17.

§ 22. Class I.

o-stems. aśva-yúj- 'yoking horses'. Gr. Innó-ζνγος. Ved. yuktá-aśva-s and yuktáśva-s 'for whom horses have been yoked'; in classical Sanskrit only the contracted form occurs. No satisfactory explanation has been given of the -a- in Ved. áśva-magha-s 'rich in horses' yūrtá-vasu-š 'possessing agreeable things' and other similar examples.

Remark. Cp $-\bar{u}$ - beside -a- in Iranian (§ 25) Here we may conceivably have either 1 the feminine $-\bar{a}$ - (cp Gr. $\Im ara\tau \eta - \varphi \phi \varrho \sigma_0$; beside $\Im ara\tau \sigma - \varphi \phi \varrho \sigma_0$ § 29), 2 Ar \bar{a} = Idg σ in open syllables (I § 78 p 69); 3 the effect of some principle of rhythm (cp. Avest. acc. $ve^{-\bar{v}}pr\bar{u}$ -jan-em beside gen $ve^{-\bar{v}}pru$ -yn- σ nom $ve^{-\bar{v}}pru$ -ja-ja); or 4 the instrumental in \bar{a} taking the place of the stem. The origin of the \bar{a} need not, of course, be the same in every instance Cp. also Ski $a^{\bar{v}}\bar{u}$ -vaut- and the like, § 127

ā-stems. Ved. juyá-vāja-s 'having the speed of the bowstring': Lith. gi/à 'cord' Parallel to these are forms with -a-, Ved. ukha-chid- 'breaking the pot (ukhá-)' etc, see § 12 p. 24 f.

 $\bar{\iota}$ -, \bar{u} -stems $\dot{s}ac\bar{\iota}$ -vasu- \dot{s} 'powerful', $tan\bar{u}$ -tyáj- 'abandoning life and limb'. Cp. § 12 p 25.

1-, u-stems. tri-pád-, paśu-pá-s, tri(y)-arušu- etc. (§ 12 p. 25 f.). Cp. also dyu-kša- 'dwelling in the light of heaven' beside div-it- 'going to heaven' (cp instr. pl. dyú-bhiš. instr. sing. dw-á): nom sing. dyāú-š, Gr. Zεύς.

Nasal stems nāma-dhā-s etc., see § 12 p 26 f. sa-kft (fr. ά-πλόος, see ibid. p 27

r-stems. pity-śrávana-s 'bringing honour to a father', pitr-artham 'for a father's sake'. Cp. § 12 p. 27 f.

nt-stems. brhát-kētu-š 'having a lofty banner': acc sing. brhánt-am. Cp. § 12 p. 28.

es-stems. rajas-túr- 'hastening through the atmosphere'. The -ō- in rajō-mēgha-s 'cloud of dust' vacō-vid- 'skilled in hymns' (vácas· Gr. $\epsilon no\epsilon$), like the -ō- of the instr. pl. (rájō-bhiš), is taken from the nom. acc. sing. in -ō (rájō), see 1 § 591 p. 447 f., and § 24 below.

It is not uncommon to find the types of Classes I and IV confused, a case-form taking the place of a stem. Examples are given in § 24.

§ 23. Class II. ά-gata-s 'not gone, untrodden': Gr. ά-βατος 'untrodden'; άn-āpta-s 'not reached, not reaching to, unskilful'. cp. Lat. in-eptu-s. duš-pāra-s 'hard to make one's way over, hard to pass': Gr. δίσ-πορος, the same. The opposite of the latter form, sú 'well', was not restricted to use in compounds until the post-Vedic period (as in su-śrávas- 'famous'); cp. § 26.

Class III. prá-tata-s 'outspread' prá-tati-s 'an outspreading'. Gr. ngó-rang 'a stretching forward, assertion'.

ánti-grha-m 'the space over against (before) the house': Gr. àvri-Ivoov 'the space over against (before) the door'. anu-satyá-s 'conformable to truth (ánu satyám)'. pari-hastá-s 'placed round the hand (pári hástam)'. á-dēva-s 'going to the deity (dēvám å)'.

§ 24. Class IV pitā-mahá-s 'grandfather on the father's side' (gen. pitāmahásya) from pitā mahá-s 'pater grandis', from which came the feminine derivative pitāmahā 'grandmother on the father's side'. Cp. Lat. rōs-marīnus gen rōsmarīnī § 36.

divō-jā-s 'child of heaven' (gen. of div-). dāsyāḥ-putra-s son of a slave-woman' (gen. of dāsī). brāhmaṇas-pāti-š 'lord of prayer', šubhās-pāti-š 'lord of adornment' (gen. of brāhman-, šūbh-). yudhi-šṭhira-s proper name, 'firm in battle' (loc of yūdh-). divā-ktrtya- 'to be repeated by day' (instr. of div-).

This group of forms was considerably enlarged because case-forms were sometimes substituted for stems in compounds of the type of Class I; e. g. divi-kšit- 'dwelling in heaven' (loc. of div-), apsu-kšit- 'dwelling in the waters' (loc. pl. of ap-), agrē-yā-s 'going at the head' (loc. of agra-, agra-ya-s is also found), vājam-bharā-s 'carrying off booty' (acc. of vāja-), agnim-indhā-s 'kindling fire' (acc. of agni-). In such compounds as these there can have been no transition from a phrase to a compound word, but merely an analogical imitation of compounds already in

existence; for at the time when these were formed, their final members were no longer in use as independent words.

The same holds good of all such 'epithetised' compounds of this class as had that meaning as soon as they came into existence; cp. rāyás-kāma-s 'having desire for wealth' (gen.) from kāma-s 'desire', dūrē-antas 'ended, ending in the distance' (loc.) from ánta-s 'end' (compare dūrē-šrutas, a proper name, 'far-famed'), šatám-ūti-š 'furnishing a hundred (acc.) aids' from ūti-š 'help' (with the simple stem. šatá-vāja-s 'furnishing hundredfold sustenance')

It often happened that the case-ending of the first member was used in new formations after it had coased to be recognised as such, so that one part of the new compound shows a case-form which does not appear when the word is independent: thus vánas-páti-š 'lord of the wood' (stem vána-, gen. vánasya-) is formed on the analogy of compounds ending in -as-pati-š, whose first member was the genitive of a consonantal stem, as bráhmanas-páti-š, vasun-dhara-s 'concealing treasure' instead of *vasu-dhara-s (ep. vasu-dhāra-s) from vásu n. 'treasure', on the analogy of forms like dhuran-dhara-s 'bearing a yoke' (acc. dhur-am) kulan-dhara-s 'sustaining one's family' (acc. kula-m).

A further consequence of the dull appreciation of these case-forms was their use in new formations without their proper meaning, i. e. as though they were simple stems. Thus e. g apsu-, loc. pl. of ap- 'water' (apsu-kšit-, see above), was used in place of ap- in apsu-yogá-s 'the binding effect of water' (Ath.-Vēda X 5, 5 beside sōma-yogá-s 'the binding effect of soma'), cp. the adjective apsavya-s 'situated in the water', which was formed from ap-sú as madhavya-s from mádhu ('sweet draught').

In imitation of old pronominal compounds like tad-vasá-s, containing the neuter element -d (§ 16), neuter pronominal forms in -m were made to serve as the initial members of compounds, as $id\acute{a}$ -rūpa-s 'having this form' beside masc. $ay\acute{a}m$ 'this', kin- $k\ddot{a}rana$ -s 'having what cause?' beside masc. $k\acute{a}$ -s 'who?' (cp. the parallel Vedic form $k\acute{a}d$ -artha-s 'having what purpose?' kad-= Lat. quod).

From the proethnic Aryan period onwards combinations of two dual forms were common; e. g. mitrá váruna', 'Mitra and Varuna', properly 'Mitra and the other (sc. Varuna) and Varuna and the other (sc. Mitra)'. Each dual form was inflected independently Side by side with them, however, we find mitrávárunābhyām mitrā-várunayōš, which should be compared with such forms as dvā-dašabhiš trayō-dašabhiš. In these the process of composition is complete, and the same may be said of the new compounds formed on the model of those whose first member ıs a dual form ending in -ā, as agnāvišņā 'Agni and Vishnu' (Ath-Vēda) instead of agnī-višnū (cp agnī-šomā in the Rig-Veda); which is shewn also by the substitution of -a- for -ā, as the termination of the first member, on the analogy of Class I, as parjánya-váta beside parjánya-váta ram-cloud and wind'. Cp. also the derivatives in -vant-, mitrá-váruna-vant-'accompanied by Mitra and Varuna'.

The compounds ptā-putrāŭ 'father and sou' mātā-piturāu mother and father' hōtā-pōtārāu 'summoner and purifier' must have been preceded by older phrases such as ptā putrah, mātā ptā, hōtā pōtā, which did not receive the dual inflexion until the process of composition was complete ('p. O.C Sl. bratŭ-sestra § 47.

When anyō-'nyam and paras-param 'alter alterum' had become compounds, the inflexion of the initial member was dropped and the form of the nom. sing. masc. was applied to all the cases; hence e. g. anyōnyam altera alteram' instead of *anyā anyām, tayōḥ...kāmō 'bhāt...anyōnyam prati (Nala 1, 17) 'eorum (in cis) amor enatus est alterius in alterum' instead of *anyasya anyam prati. Cp. Gr. άλλήλους § 32, Mid.H.G ein-ander § 44 and Lith. khts khtą § 46

§ 25. Iranian.

Class I. Stems in -o-. Avest. ver*pra-ju-'victorious': Skr. vytra-hán-. Avest. yuxta-aspa- and yuxtāspa- 'for whom steeds have been yoked': Skr. yuktá-aśva yuktáśva-. Avest. srīraoxšan- (proper name) = srīra + uxšan-. O.Pers. xšaša-

pāvan- 'guardian of the land, satrap'. Avest xšafra-Ski. kšatrá'lordship, kingdom'. O Pers. xšayāršan- (proper name) = xšaya
† aršan-. Sometimes -ā- is found in place of -a-, as Avest.
ašā-dā 'giving what is pure', acc ver pā-ā-janem beside nom.
ver pra-ja-, O.Pers. ariyā-rāmna- (proper name), perhaps also
uvā-maršiyu- 'dying by suicide' (cp Avest. xwā-daena- 'having
one's own faith'), on this point see § 22 Bem. In Avestic -ō
is often found instead of -a-, the form of the nominative being
used instead of the stem (cp the Author, Curt Stud. IX 269,
Bartholomae, Die Gāpā's 81), e g daevō-dāta- 'made by the
demons' (beside daeva-yāza- 'demon-worshippei'), even where
the o-stem was neuter, as xšafrō-dāh- 'bestowing lordship' (nom
ršafre-m). 'This -ō- spread still further, see below.

Stems in -ā- Avest. daenā-vazah- (proper name), from daenā 'faith'. At the same time we have forms with -a-, Avest gaāa-vara- 'wielding the club' (qaāa-) etc (see § 12 p 24 f.) and with -ō- instead of -a-, compounds like daenō-disa- 'teacher of the law'

Stems in -i- and u Avest uži-cipra- 'sprung from the serpent', pri-ayara- 'space of three days'. Avest. pouru-nar- 'rich in men', urv-āpa 'with broad stream', per pu-anuka- 'with wide front', O.Pers. parūv-zana- (read paruzana-) 'rich in people'. Here too we sometimes find in Avestic the form of the nominative in place of the simple stem e. g nasuš-pacya- 'burning of corpses' or 'arising in the burning of corpses', bāzuš-aojah- 'strong-armed', vanhuš-data- 'well made'.

Nasal stems. Avest. ašava-frazunti- 'pious offspring' from ašavan-. Forms with -ō- instead of -a- on the analogy of the o-stems. Avest bar'smō-zasta- 'holding twigs for offering in the hand' from bar'sman-. Avest. zem-frapah- 'encompassing the earth' from zam-.

Stems in -r-. Avest. stehr-paçsah- 'adorned with stars'. ner'-bar'zah- 'man's height'. Skr. ng-bahú-š 'man's arm'. Compounds in which the strong form of the stem is inserted: 'nar'-gar- 'devouring men', ātar'-curana- 'belonging to fire', with others like them; cp. dat. abl. pl. star'-byō beside ner'-byō. The form

of the nom. sing. has replaced the simple stem in atarš-ciprabeside atar*- cipra- 'sprung from fire, combustible'.

Stems in -nt-. Avest. raevas-cipra- 'of splendid family' (-sc- for -tc-, see I § 473 p. 349) from raevant-. O.Pers. daraya-vau- (proper name) 'possessing property' (gen. daraya-vahauš) for *darayad-vahu-: cp. Skr. dharayat-kšitiš 'sustaining the races of mankind'; cp. Hübschmann, Kuhn's Ztschr. XXVI 603 f.

Avest. $v\bar{s}$ -pati-'lord of a village': Skr. $vi\bar{s}$ -páti- \bar{s} . zar^az -dāh-'giving the heart' with -zd- for -d + d- (cp. 1 § 476 p. 351), from zar^ad -: Skr. hrd-.

As examples of the nominative used in place of the simple stem we may notice here Avest. vāxš-aeša- 'the desire of the hymn' (stem vāc-), afš-cipra- 'sprung from water' awž-dāta 'resting in water' (stem ap-), ker fš-xwar- 'eating flesh' (stem kehrp-).

Stems in s- Avest. vacas-tašti- 'preparation of words, text', temas-cipra- 'sprung from darkness', nogaz-dastema- 'most helpful'. Compounds with -ō-, which was taken from the nom. sing., are ayō-zaya- 'with iron weapon' ayō-ver pra- 'with offensive weapon of iron' ayō-ayra- 'iron arrow' (Skr. ayō'gra- 'pestle') from ayah-: Skr. ayas-. O.Pers. vahyaz-data- (proper name), like Avest. vahhaz-dāh- 'giver of the best', beside the comparative Avest. vahhah- 'better' · Skr vásyas-.

Remark. The student should compare the Avestic use of the nominative form instead of the stem in derivatives made by formative suffixes and even in the simple cases: srīrō-tara-'more beautiful' (srīra-), spentō-tema-'most holy' (spenta-), like daevō-dāta; huāānuš-tema-'wisest' (hu-āānu-) like nasuš-pacya-; dat. abl vāyž-byō from vāc- like vāxš-uēša-. Cp. § 13 p. 29.

§ 26. Class II. Avest. a-yru- 'not pregnant, virgin': Skr. á-gru-; O.Pers a-kšata- 'unmjured'. Skr. ú-kšata-; Avest. an-ašavan- 'impious' · cp. Skr. án-yta-. Avest. duš-manah- 'thinking ill' Skr. dur-manas- Gr. δνο-μενής. The ldg. *su 'well' (Avest. hu-ber ta- O.Pers. u-barta- 'well born, well cherished': Skr. sú-bhyta-), the opposite of Idg. *dus-, appears in Avestic, just as in the Veda, as an independent word (hu).

Class III Avest upa-yata- 'subactus, married'. Skr. úpa-yata-. () Pers. fra-tarta- 'drawn away'. cp. Skr. prá-tīrna-

Avest. pasti-biši- 'directed against the enemy, conquering the enemy'. antur'-daxyu- adj. 'within the country'. parridaxyu- 'lying around the country'. upapa- 'adj. in the water'

§ 27. Class IV The use in Avestic of the form of the nom. sing. instead of the simple stem, as in daevo-data, has been spoken of in § 25 p. 42

The Avestic adjectives appromainyava- and spentōmainyava-were no doubt formed from the phrases approximation mainyus 'the evil spirit' and spentō mainyus 'the holy spirit' cp. Skr. pitāmahī § 24. Gr. Neānolītā, § 32. O.Pers. aura-mazdā (with acc. aura-mazdām) 'Ormuzd' should be regarded inerely as a concretion of two nominative forms, not a compound of two stems (aura- 'lord', mazdāh- 'wise one') Avest. ahurō mazdā.

Avest. drujim-vanant- 'overcoming the fiend' (acc. of drujf) vīren-jan- with the acc. sing. beside vīra-jan-, see § 20
ahām-merenc- 'life-destroying' with the acc. sing., beside ahumerec-. vīspā-hisant- 'able to do everything' (acc. pl. neut. of
vīspā-). dūrae-fradāta- 'made in the distance' (loc. of dūra-)
rāpāe-štar- 'standing in the chariot (loc. of rāpā-), warrior' cp.
Skr. savyē-šthar- 'standing on the left', -sthar- for *st-tar-, see
1 § 316 p. 255. Epithetised compounds: dareyem-jīti- 'having
one's life long (acc. sing. neut. of dareya- used adverbially), longlived', zemās-ciprā- 'having an earthly origin' (zemās- gen. of
zam-), ayrae-rāpā- (proper name) 'whose chariot is at the head'
(loc. of ayra-).

Avest. aevan-dasa-'undecimus' from *aevan-dasa-'undecim'; the first half of the word is no doubt aeven, the form of the neuter and of the masculine alike.

Combinations of two dual forms occur in Avestic as in Sanskrit (§ 24 p. 41), c. g. ahura mipra and mipra ahura 'Ormuzd and Mithra', apa urvaire 'water and plants' (ap- 'water', urvara-'plant'), pasu vira 'cow and man'. But the fusion of these elements is not by any means so close as it is in Sanskrit,

since the first member always retains its own inflexion, e. g. dat. ahuraeibya mipraeibya. Cp. Bartholomae, Bezzenberger's Beitr X 267 ff., XIII 57 f.

Armenian.

§ 28. Class I. Here the Indo-Germanic differences in the termination of the stem of the first word were largely obliterated. Where the second member begins in a consonant we find an -a-, the so-called 'vowel of composition', whose origin is as yet unexplained.

Compounds in which the second member begins in a sonant: dr-and 'door-post, threshold' from *dur-, pl. durk. hair-anun 'having one's father's name' from hair, gen. haur. skesr-arr 'mother-in-law's husband, father-in-law' from skesur, gen. skesri. hing-ameay adj. 'of five years', from hing.

Compounds in which the second member begins in a consonant: dr-a-kic 'door-companion, neighbour'. lsn-a-qoin 'whitish' from lusn, pl. lusun-k, ' λ -vini $\mu a ra$ ' and qoin 'colour'. lus-a-vor 'clear' from lois, gen lusoy, 'light', -vor being a suffix which corresponds to the Gr. -qoiqoi 'bringing'; a later compound is lus-a-ber 'light-bringing, enlightener' (cp. I § 485 p 358 for an account of Idg. bh) ms-a-ker 'eating flesh' from mis, gen msoy, 'flesh'. mi-a-cin 'unigenitus', from mi, gen mioI, 'one'. Combined with the termination of stems in -i0-, -i0- became -i0-, e. g. a1i1i2 from a2i1 This -i2- was even introduced into compounds whose first member was the case of a noun, see below, Class IV.

Remark 1. This vowel of composition, -a-, no doubt formed the original ending of some one form or set of forms when used as the first member of a compound, and then became general. Phonetic laws, however, forbid our assuming that this represents the Idg. suffix -o-. I conjecture that it first occurred in words borrowed from the Iranian (e. g. bar-a-pan 'doorkeeper' = O.Iran. *dvara-pāna- or *dvāra-pāna-), and thence spead further by analogy. Compare the -o- borrowed from the Greek in Latin compounds like albo-galērus, § 34

Remark 2. It is not clear whether such compounds as stn-di 'sucking the breast, sucking' (stn, gen. stean, 'woman's breast') akn-kul 'in one's

eye, visible' belong to Class I, but have never had the composition-vowel -a-, or whether they contain case-forms (Class IV).

Class II. an-ban 'carens ratione et verbo': cp. Gr. \ddot{a} - $\varphi\omega ro\varsigma$; an-kin 'without a wife, widower' cp. Gr. \dot{a} - $\gamma vro\varsigma$; an-anun ' $\dot{a}v$ - $\dot{\omega}rv\mu v\varsigma$ ', an-arg 'unhonoured'. t- $g\bar{e}t$ 'not knowing' (beside an- $g\bar{e}t$). Skr. dur- $v\bar{e}da$ - 'unlearned'; t- $z\bar{o}r$ 'not mighty, weak' (beside an- $z\bar{o}r$). Its opposite, h- = Skr. $s\dot{u}$ 'well', is found only in composition, c. g. h- $z\bar{o}r$ 'excellent in strength, mighty'.

Class III. Excluding *m-st*, which has become a simple word (§ 15 p. 30), I know of no compounds containing prepositional words that are certainly procthnic. I strongly suspect that *ham-* 'with, together' (e. g. *han-dart* 'quiet, soft': cp. Skr. sq-dhrta-; han-dēs 'proof': cp. Skr. sq-dēša- 'information') was borrowed from Iranian (Avest. ham-).

Class IV. haur-elbair 'father's brother', haur gen. sing. of hair. diuc-azn 'divine race, he who is of divine race, demigod, hero', diuc gen. pl. of dev, which was borrowed from Iranian. The vowel of composition, -a- (see above, Class I), is inserted e. g. in arn-a-kin 'husband's wife', arn gen. sing. of air; mels-a-sēr 'loving sins', mels acc. pl. of mel.

air-ev-ji 'man and horse, knight' sometimes inflected both of its parts, e. g. gen. arn-ev-jioy, sometimes only the final noun. gen. air-ev-jioy; cp. Mod H.G. der wert deines grund und bodens, 'the value of your estate'.

Greek

§ 29. Class I.

·Stems in -o-, where the second member began in a consonant, had -o-: $\partial \gamma \rho o - \nu \delta \mu o \varsigma$ dwelling in the country' $(\partial \gamma \rho \delta - \varsigma)$. It must be left an open question whether the -\varepsilon in such compounds as $\partial \gamma \delta \partial \alpha \varsigma$ (from $\partial \gamma \delta - \varsigma$ 'guide') $\partial \rho \chi \delta \delta - \pi o \lambda \iota \varsigma$ (from $\partial \rho \gamma \delta - \varsigma$ 'governor') was derived from Indo-Germanic stem-forms in -\varepsilon-, or whether it was substituted by the Greeks for an older -o- in consequence of the association of the first member with a verbal stem (for which see § 30).

Where the second member began in a sonant, elision was

the rule (I § 600. 603 p. 457): $i\pi\pi-\alpha\gamma\omega\gamma\delta-\varsigma$ 'transporting horses' ($i\pi\pi\sigma-\varsigma$). This clision dates from the proethnic period of Greek, and the type then established gave rise later to such forms as $\kappa\alpha\chi\epsilon\tilde{\varsigma}/\tilde{\alpha}$ 'ill condition' ($\check{\epsilon}\gamma\omega$ for * $\sigma\epsilon\chi\omega$, I § 564 p. 421) $\varphi\iota\lambda-\epsilon\varrho\gamma\delta\varsigma$ 'loving work' ($\epsilon\varrho\gamma\sigma$ for $f\dot{\epsilon}\varrho\gamma\sigma\nu$, I § 164 p. 145), by the side of which we also find phonetically regular forms like $\dot{\varrho}\alpha\beta\lambda\sigma\tilde{\iota}\chi\sigma\varsigma$ holding a staff' (for * $\dot{\varrho}\alpha\beta\lambda\sigma-(\sigma)\sigma\chi\sigma\varsigma$) $\kappa\alpha\kappa\sigma-\epsilon\varrho\gamma\delta\varsigma$ $\kappa\alpha\kappa\sigma\tilde{\iota}\varrho\gamma\sigma\varsigma$ 'doing evil' Forms like $\dot{\alpha}\varrho\alpha\chi\nu\sigma-\nu\varphi\gamma\varsigma$ 'woven by spiders' (Philo) are obviously new formations of a later date; cp. Lat. multi-angulus § 34, Goth. galuga-apaústaúlus § 40.

The stem-final -o-, as we shall soon see, was extended from o-stems to others of the most widely different classes; monosyllabic stems were least affected by the tendency (e. g. $\chi \acute{\epsilon} \rho \nu \nu \rho$, $\pi \nu \gamma - \mu \acute{\alpha} / \sigma \varsigma$, see below).

-ā- (Ion. Att. -η-) often appears instead of -o-; e. g. θανατη- φ όρος beside θανατο- φ όρος 'death-bringing' (θάνατο-ς), όμβρη-γενής 'rain-born' (ὄμβρο-ς).

Remark This -a- appears side by side with -a- even where the latter was due to form-association, as ἀσπιδ-η-φόρος beside ἀσπιδ-ό-δουπος stem ἀσπιδ-, see below

As regards the origin of this -a-: the wide extent of its usage is certainly due to the action of analogy, and it is conceivable that its origin is to be found 1. In forms like νεα-γενής (νεη-γενής) δλιγη-πελέων, which contained adverbs like Dor. άμα άμᾶ, κευφᾶ (Westphal, Meth Gramm. II 8 f, Mahlow, Die lang. Voc. Λ Ε Ο 131 f.); 2 in a number of instances where ā-and α-stems existed side by side, 3. In such compounds as ντη-φόρος βουλη-φόρος, αλδεη-γενής μοιερη-γενής, the terminations -ηφόρος -ηγενής being regarded as indivisible and thus coming into general use; just as in Attic, compounds like δαβδούχος (ξάβδο-ς) and compounds like κακούργος (κακό-ν), being virtually analysed δαβδ-ούχος κακ-ούργο, gave rise to new formations, πολεούχος παι-ούργος παι-ούργος απα-ούργος απα-ούργος απα-ούργος ται the like, and just as feminines from n-stems, such as τέκταινα 1 e *τεκταν-ξα (from τέκτων), suggested new formations like λύκ-αικα (from λύκο-ς) (§ 110). I feel certain that a great part at least of the instances where -α- is found in place of -ο- are to be explained in this last way Cp also -η-εις (-α-Fεντ-) in § 127.

instances of -α-; as 'Αλκά-θοος, τ̄ιμωρός for *τ̄ιμα-ορος 'guarding a man's honour, protecting, helping' (Wackernagel, Kuhn's Ztschr. XXVII 263, XXVIII 132), the historical relation of -α- to -ᾱ- is obscure. -ο- frequently appears instead of -α-. Ν̄ικό-μαχο-ς: ν̄ίκη; πολ̄ιτο-φθόρος 'destroying the citizens': πολ̄ίτη-ς; Dor. ἑστιο-πάμων 'house-owner': ἑστία; ἀελλό-πος 'storm-footed': ἀελλα. 'The influence of ο-stems is seen also in the loss of the final vowel of the stem when the second member begins in a sonant, e g. Ν̄ίκ-ιππος. Cp. § 12 p. 24 f.

Stems in - $\bar{\imath}$ - and - $\bar{\imath}$ -. An original type of formation may be preserved in such compounds as $\sigma \dot{\imath}$ - $\alpha \gamma \gamma \sigma_S$ 'choking swine' $(\sigma \bar{\nu} \cdot s)$. Cp § 12 p. 25. Where the second member begins in a consonant we find the vowel short, thanks to the analogy of the preceding group: c g. $\sigma v - \varphi \circ \rho \rho \dot{\rho} \dot{\sigma}_S$ 'swineherd'; in the same way we have loc. pl. $\sigma v - \sigma \dot{i}$ for $*\sigma \bar{\nu} - \sigma i$ following $\sigma v - \dot{\sigma}_S$ $\sigma v - i \bar{\nu} v$ etc., see § 160, 4. Some forms insert -o-. $v - \sigma - \mu o v \sigma \dot{i} \dot{\sigma}$ 'swine's music' $\sigma v - \sigma x \dot{\tau} \dot{\sigma} v \sigma_S$ 'killing swine', $i \chi \partial v - \sigma - \psi \dot{\alpha} \gamma \sigma_S$ 'eating fish' beside $i \chi \partial v - \gamma \dot{\sigma} \dot{\lambda} \sigma c$ 'striking fish'. $i \chi \partial \dot{v} - c \dot{\nu} \dot{\sigma} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} \dot{\nu} \dot{\nu} \dot{\nu} - c \dot{\nu} - c \dot{\nu} \dot{\nu} - c \dot{\nu} -$

Stems in -ι- and -u-. μαντι-πόλος busied with prophecy' μάντι-ς. βιστι-άνειρα f. 'nourishing men': *βιῶτι-ς 'act of nourishing'. ἀστν-γείτων 'living near the city': ἄστν. πολυ-ανθής 'with many blossoms' πολύ-ς Cp. § 12 p. 25 With -ο-: ψυσι-ο-λόγος 'investigator of nature' φύσι-5.

van-nηγός 'shipbuilder' for *nāu- (I § 611 p. 461): cp. Skr.
nāu-cara-s 'going by ship'. From such forms van- came to be
used even where the following member began in a sonant, e. g.
ruν-αρχος 'ship's commander', instead of vā(f)- (cp. Lat. nāv-igō
§ 11), which is contained in Nέαρχος if this is for Νέᾶρχος,
from *Νη-αρχος (cp. I § 611 ad fin.). Examples of inserted
-υ-: νη-ο-σσόος 'preserving ships', which may be compared with
βο-ό-κλεψ 'cattle-thief' (βο-η-νήμος 'pasturing cattle') beside βοννήμος; hence the correspondence of νηο- βοο- with the Skr. forms
nāva- gavu-, which appear as the initial members of compounds,
is an accident.

Stems in -n-. With α = Ing. η: ὁνομά-κλυτος with famous name. We should no doubt compare κυτάμυνα 'dog-fly'; the regular

form would be *xva- μ via; the -v- came from forms like xvv- δg xvv- $\eta \gamma \delta g$; *xva- = Skr. $\dot{s}uva$ - (instr. pl. $\dot{s}uv\dot{a}$ - $bhi\dot{s}$) Idg. * $\dot{k}uu\eta$ -. It is questionable whether such compounds as xvv- $\tilde{\omega}\pi \iota g$ 'dog-eyed' are the immediate representatives of any original type of formation.

With -o- instead of the n-suffix: e. g. κ̄ṓ-κρᾱνο-ν 'capital of a column'. See § 12 p. 27.

Compounds in which we have a strong form of the n-stem are a new formation in Greek. If their second part began in a consonant, -o- or -ā- was inserted, poev-o-maris mad. zīov-óκράνον beside κιό-κράνον (see above). όην-ο-φορεύς bearing a sheepskin'. αγων-ο-θέτης 'director of a contest'. λιμεν-ή-οχος closing in the harbour' (cp. πολι-ά-οχος) beside λιμεν-ο-σκόπος 'watching the harbour'. ἀκτῖν-η-βολία 'the shooting of rays' beside ἀκτῖν-ο-βολία. Probably the only example without -o-(-α-) is φρέμ-πάρος 'with impaired understanding' Hesych. (the correct spelling is due to Lobeck), which appears beside quer-oμανής and the like as μελαγ-χροιής μελάγ-χροος beside μελαν-όχροος 'with dark skin' (μέλας gen. μέλαν-ος, compar. μελάν-τερος), cp. also χέρ-νιψ beside χερ-ό-νιπτρον p. 50. Where the second member begins in a sonant: φρεν-ώλης 'distraught in mind'; τεκτόν-αρχος 'presiding over the artificers'; άγων-άρχης 'director of the contest'.

ä- $\pi a\xi$ 'once': Skr. sa-kft 'once', Idg. *sm-. χ 90v-0- $\tau \rho \epsilon \phi \eta \phi$ 'nourished by the earth', beside Skr. $k\xi am$ -, a new formation like $\kappa \bar{\iota}$ 0v-0- $\kappa \rho \bar{\iota}$ vov; as to ν instead of μ see I § 204 p. 172 and below, § 160, 2.

Stems in -r-. Whilst the Indo-Germanic type was faithfully followed where the second member began in a sonant, e. g. πατρ-ωνύμιος ἀνδρ-άγρια (§ 12 p. 28), where this began in a consonant it was the rule to insert -o-, as πατρ-ο-φόνος 'patricide'. This was preceded by a form *πατρα-φονος, ep. loc. pl. πατρά-σι and Skr. pity-śrάναπα-s. Thus we still find τετρά-γνος = Idg. *qetyy-, where α was preserved by the parallel compounds with ἐπτα- etc. 1) The strong form of the stem is

I no longer compare the first part of the pl ἀνδρά-ποδα with Skr. ng- (G. Meyer, Gr. Gr. p 23), but I regard the word as a new for-Brugmann, Elements. II

often found instead of the weak, as ἀστερ-ο-ειδής 'star-like' from ἀστήρ ἀστέρος; this is regular in nomina agentis such as λαμπτηρ-ο-φόρος 'bearing lights' (λαμπτήρ) ὑητορ-ο-διδάσκαλος 'teacher of rhetoricians' (ὑήτωρ), the original type is shown by Skr. hōty-sádana-m 'seat of the offerer' (hôtar-); see § 120. Monosyllabic ρ-stems sometimes have and sometimes have not -ο- οr -α-: χέρ-νιψ 'water for washing the hands' and χειρ-ό-νιπτρον χερ-ό-νιπτρον wash-hand basin' (for the etymology of χείρ cp. § 132), πνο-καιή 'burning-place' and πνο-ο-ειδής 'fire-like' πνο-η-τόνος 'producing fire'.

Stems in -nt- show here as in their declension (§ 125. 126) their strong instead of their weak form. δοακοντ-ό-μαλλος with snaky locks, the weak form of the stem being *δρακατ-. όδοντ-ο-φυής 'sprung from teeth'. γιγαντ-ο-φόνος 'killing giants'. παντ-ο-μισής 'all-hateful'. Before sonants: πάντ-αρχο-ς 'all-governing'.

Stems ending in other explosives. πυγ-μάχος 'pugilist'. ποδώπης 'swift-foot, swift-footed'. These usually have -o- or -ā-: φλογ-ο-ειδής 'flame-like', νιφ-ό-βολος 'pelted with snow'; ἀσπιδ-ό--δουπος 'elattering with shields' ἀσπιδ-η-φόρος 'shield-bearing'.

Stems in -s-. μν̄σ-φόνος 'killing mice': Lat. mas-cipula.

es-stems have -εσ- in poetic diction, as ἐπες-βόλος 'hurling words, speaking boldly', ἐγχεσ-φόρος 'spear-bearing'. At the same time we find -ο- instead of -εσ-, sometimes even in Homer, and regularly in prose: εἰρο-κομος 'spinning wool', ἐπο-ποιός 'epic poet', ἀληθό-μαντις 'prophet of truth'; similarly ψευδ-άγγελος 'messenger of falsehood', where the second part begins in a sonant. -ο- for -εσ- no doubt arose from the similarity of the nominative forms, ἔπος: Ἱππο-ς. Examples with -ā- instead of -ο-: ξιφη-φόρος 'sword-bearing' (beside ξιφο-φόρος), θυη-πόλος 'busied with sacrifice'.

mation modelled upon τετράποδα (Iw. Müller's Handbuch II 70 Rem. 1). Of course it is conceivable that this form arose at a time when *πατρα' φονος was still spoken and that afterwards the -α- in ἀνδρα-ποδ- remained because it was supported by the -α- of τετρα-ποδ-. Cp. also Wackernagel, Kuhn's Ztschr. XXX 298.

Stems in -ασ- were treated in much the same way. σελασ-φόρος 'light-bringing', κερασ-φόρος 'horn-bearing' (cp. Skr. jyőtiğpakξα-ε 'winged with light', § 134, 2). At the same time we
find forms with -σ- -α-, as κερο-φόρος, κρεο-δόχος and κρεη-δόκος
'holding or containing flesh'. There is no example amongst
-εε-stems analogous to Hom. κερα-ο-ξόος 'worker in horn' (with
regard to the apparently similar Hom. ελεό-θρεπτος beside τὸ
ελος see p. 34 ff. of R. Schroeter's treatise cited on p. 22).

§ 30. From the phrase καλὸς κἀγαθός was formed the abstract substantive καλοκἀγαθία 'character of a καλὸς κἀγαθός'. Cp. O C.Sl. osmo-na-desçtŭ § 47 and the use of the bare stem in Mod H.G. phrases like freund- und verwandtschaft, gold- und silberschmid.

In Greek, as in Germanic and Slavonic (§ 41. 47), a large number of compounds came to be regarded in a new way. Their first member now appeared to the popular consciousness to have a verbal instead of a nominal force. This gave rise to many new formations in which real verbal stems were employed as the initial members of compound words.

Thus τανν-γλωσσο-ς, whose meaning originally was with outstretched (adj. *ravé-c = Skr. tanú-š) tongue', was explained to mean 'stretching out the tongue' (and compared with τάνν-ται), φιλό-ξενος 'to whom a stranger or guest is dear (φίλος)' was explained as 'loving one's guest' (and compared with φιλέω), φυγο-πτόλεμος 'unfriendly (*φυγο-ς: cp. Lat. lūci-fugu-8) to war' as 'fleeing from war' (and compared with έφυγο-ν), and so forth. Hence arose new formations like μιπό-ξενος (first modelled upon the form φιλό-ξενος, cp. μισέω: φιλέω) hating a stranger, φαινομηρίς 'showing the hips' (φαίνω), έθελό-πονος 'willing to work' (ἐθέλω). As to the -ε- of ᾿Αγέ-λᾶος, ἀρχέ-κανος etc. see § 12 p. 24, § 29 p. 46. If this is not the e-form of the suffix, and so derived from the pre-Greek period, we must assume that it was borrowed from forms like aye-1 aye-12 when the first part of such compounds came to be regarded as a verbal stem.

New formations of all kinds were introduced by compounds like τερψί-μβροτος ταννσί-πτερος άρχεσί-γυιος, the initial members of which were abstract nouns formed with the suffix -ti- (§ 100) τέρψ-ις 'delight' ταννσι-ς 'outspreading' ἄρκεσι-ς 'help, strengthening', because these were associated with the acrists in -o-(ἔτερψα ἐτάνυσα ἤρκεσα), and were consequently regarded as having a verbal force, 'delighting men' 'spreading the wings' 'strengthening the lumbs'. The new verbal signification was all the more easily established in these forms because of compounds like συγο-πτόλεμος, whose first member had been identified as an agrist-stem at an earlier stage of Greek. Thus in the first place, where the abstract noun and the \sigma-aorist showed different grades of ablaut in the root-vowel, that of the latter was introduced: by the side of στασί-αρχος (στάσις) arose Στησί-χορος 'bringing on the chorus' (on the model of έστησα); φθ τσί-μβοστος 'destroying men' (on the model of $\epsilon q \vartheta \tau \sigma a$) as contrasted with φθίσις. Next, the connexion of these agristic compounds in the mind of the speaker with such others as λειπο-ψυγέω φυγο-πτόλεμος ἀρχέ-κακος φυγ-αίχμης led to an imitation of the ending seen in the initial members of these latter forms. Hence compounds like λειψό-θριξ 'having lost one's hair' περσέ-πολις 'destroying cities' Erno-ayóone (contrast orasi-auroe from stási-e). But on the other hand the -i- of compounds in -oi- crept into compounds whose initial member was the stem of a present or a strong agrist. Hence such forms as αλεξί-κακος 'keeping off harm' (ἀλέξω) λαθι-κηδής 'forgetting care' (ελαθον, cp. λησίμβροτος). This process of mutual assimilation may have been aided by the double type of the σ-aorist, εδείξα and ίξον existing side by side. Many other new formations were caused by the association of these -oi- compounds with those of Class IV whose initial member was a loc. pl. in -oi, as oosof-rooms reared on the mountains'; see Osthoff, Verb. i. d. Nominalc. 193 ff. Lastly, we must notice certain other new formations: Howrest--λαος (beside Πρωτό-λαος, from πρώτος 'first') formed on the model of 'Aγεσί-λαος 'Aρκεσί-λαος and the like, and 'Eρμησί-λεως

Έρμησι-άναξ Έρμήσ-ανδρος (from Έρμῆς) modelled on such forms as 'Αγησί-λᾶος Ήγησι-άναξ 'Αγήσ-ανδρος.

§ 31. Class II. ἄ-γνωτο-ς 'unknown': Skr. ά-jñātas Lat. τgnōtus for *in-gnōtus (I § 506 p. 370); ἄν-νδρος 'waterless': Skr. an-udrá-s. On the analogy of forms like ἄ-υπνος 'sleepless' ἄ-οινος 'wineless', in which the hiatus was due to the loss of some consonant (the older forms were *ά-συπνο-ς, *ά-Γοινο-ς, though the latter can hardly have been developed regularly from a pre-Greek form *y-νορίπο-, see I § 225 p. 193), there were formed several other compounds like ἄ-οδμος ἄ-οζος (with όδ-cp. Lat. οd-οr; ὅζος = Goth. asts) by the side of the forms ἄν-οδμος ἄν-οζος which are also found. δύσ-φορος 'hard to bear'; cp. Skr. dur-bhara-s 'hard to bear, to nourish'.

Class III. ὑπό-θετος 'placed under' ὑπό-θεσις 'groundwork, foundation': Skr. ὑpa-hita-s 'placed under, situated' Lat. sub-ditus sub-ditiō (sub- for *x-ub-? see I § 568, 2 p. 424, II § 2 p. 3).

προσ-έσπερος 'towards evening': Skr. prati-dōṣá- 'towards evening'. παρά-βακτρος 'situated near one's staff', παρά-νομος 'contrary to law'. ἀνά-λογος 'corresponding to λόγος'. ἐγ-κέφαλος 'being in the head, brain'. These compounds generally end in the suffix -ιο-, as \dot{v} π-ασπίδ-ιο-ς παρα-θαλάσσ-ιο-ς ἐν-αγών-ιο-ς; see § 63.

 $o\ddot{v}$ - $\tau\iota\varsigma$ 'no one' beside $\mu\dot{\eta}$ - $\tau\iota\varsigma$, no doubt took the place of an Idg. form *ne-qi-s at the time when *ne was driven out of use by $o\dot{v}$, a form whose origin is still obscure (cp. § 15 p. 31). Later arose $o\dot{v}\dot{v}$ - $s\dot{\iota}\varsigma$ 'no one' and the like.

§ 32. Class IV. By the side of δώ-δεκα (§ 16) arose ξν-δεκα 'eleven' (ἐν- nom. acc. neut.), τρεισ-καί-δεκα 'thirteen', ιετταρεσ-καί-δεκα 'fourteen' (nom. pl. masc. fem.); another word for 'thirteen' is the Att. τρῖσ-καί-δεκα (acc. pl.), note also the form τρεισκαιδέκατος 'thirteenth', and others of the same sort.

From Νέα πόλις ('Newtown') were formed gen. Νέας πόλεως and Νεαπόλεως, and further Νεαπολίτης. Similarly τριτημόριος 'making the third part' was probably based on τρίτη μόρα.

Διόσ-κουροι 'sons of Zeus', hence Διοσκούρειον, διόσ-δοτος 'given of Zeus', properly 'one given belonging to Zeus' (gen.

of $Ze\dot{\nu}\varsigma$). νεούσ-οικοι 'ship's houses, arsenal' (gen. of $να\tilde{\nu}\varsigma$). $\dot{\nu}$ οσκέαμος 'pigs' bean' (gen. of $\dot{\nu}\varsigma$). Πελοπόννησος for Πέλοπος νῆσος 'island of Pelops' (cp. I § 565 p. 422 f.). δι \dot{t} -φιλος or δι \dot{i} φίλος 'dear to Zeus' (loc. of $Zε\dot{\nu}\varsigma$). δονρί-κτητος 'won in battle' (loc. of δόρν). ἐαρί-δρεπτος 'plucked in spring' (loc. of ἔαρ). 'Αλνιμέδων 'ruling in might' (loc. ἀλκ- $\dot{\iota}$). κηρεσσι-φόρητος 'driven or impelled by the Kêres' (loc. pl. of $κ\dot{\eta}ρ$). πασι-μέλων 'of interest for all' (loc. pl. of πας). 'Iφι-μέδονσα (proper name) 'ruling with might' (instr. of \tilde{t} - ς Lat. $v\tilde{t}$ -s). $παν-\tilde{\eta}μαρ$ 'the whole day' (acc. neut. of $π\tilde{\alpha}\varsigma$). νονν-εχόντως 'in an intelligent way' (acc. of $νο\tilde{\nu}\varsigma$).

This group of forms was considerably enlarged by the employment of case-forms instead of the first stem of the original stem-compounds (Class I). Among mixed formations of this kind are compounds whose final member has survived only in forms belonging to Class I, and no longer exists as an independent word, as πυλοι-γενής 'born in Pylos' (loc. of Πύλο-ς), δορί-μαχος 'fighting with the spear' (loc. of δόρυ), 'Ιφι-κράτης proper name (cp. 'Ιφι-μέδουσα above), νουν-εχής 'having intelligence, intelligent' (cp. νουν-εχόντως above), δικασ-πόλος 'administrator of justice' (acc. pl. of δίκη, cp. I § 204 p. 171).

As these words were formed not by any real process of composition but on the analogy of already existing compounds, so also were those which never had any but an 'epithetised' meaning; e. g. $\alpha \epsilon \rho t - c \cos c$ 'having one's dwelling in the air' $(\alpha \epsilon \rho - t)$.

When the termination of the first member was a case-ending whose true character was no longer clearly perceived, it often happened that it was applied to stems with which it properly had nothing to do, as θεόσ-δοτος 'god-given' (also θεό-δοτος, from θεό-ς) on the analogy of διόσ-δοτος; Δυκόσουρα a town in Arcadia ('Wolf's-tail', from λύκο-ς) on the analogy of forms like Κυνόσ-ουρα (dog's tail'); ποεσιτρόφος 'nourishing grass' and ποεσίχροος 'grass-coloured' (from πόα ποίη 'grass, herb') on the analogy of forms like δρεσί-τροφος and ἀνθεσί-χρως (with loc. pl. of τὸ ὄρος 'mountain' and τὸ ἄνθος 'blossom').

A further consequence of the obscuration of the case-ending of the initial member, was the use of this ending in

Remark 1. Compounds containing real stems in $-\iota$, as $\mu\alpha\nu\tau\iota-n\dot{o}lo\varsigma$, may also have given the appearance of simple stems, to initial members of compounds which were locatives ending in $-\iota$ like $\pi\nu\varrho\iota$. And in discussing those forms which contain locatives pl. in $-a\iota$, stem-compounds like $\tau\epsilon\varrho\psi\iota-\mu\beta\varrho\sigma\tau o_{\varsigma}$ dereal- $\gamma\nu\iota o_{\varsigma}$ $\tau\alpha\nu\nu\sigma l-\pi\tau\epsilon\varrho o_{\varsigma}$ (see § 30 p. 52) must not be forgotten. Compare also the fact that the abbreviated form ${}^{2}H\varrho\iota-\gamma$ was made from ${}^{2}H\varrho\iota-\gamma\dot{e}\nu\epsilon\iota\alpha$ ${}^{2}H\varrho\iota-\gamma\dot{e}\nu\tau$ and the like, whose initial part was the loc. ${}^{2}\eta\iota$ 'early', no doubt on the analogy of $Z\epsilon\bar{\nu}\xi\iota-\varsigma:Z\epsilon\nu\xi\iota-\delta a\mu o\varsigma$; and in the same way the abbreviated form ${}^{2}H\varrho\iota-\varsigma$ was made from ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ was made from ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ was made from ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ was made from ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ was made from ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ was made from ${}^{2}H\varrho\iota-\dot{\varphi}\iota$ and ${}^{2}H\varrho\iota-\dot{\varphi}\iota$

It should be observed, however, that a large proportion of the new formations we are now considering are only found in late poets whose diction contains much that is artificial.

The form $\pi\alpha\nu$, found in use as well as $\pi\alpha\nu\tau$ -(0-), is the neut. $\pi\acute{\alpha}\nu$ which stands for * $\pi\alpha\nu\tau$, and was used originally with the force of an adverb in compounds like $\pi\alpha\nu$ - $\alpha/0\lambda0\varsigma$ 'all-gleaming' $\pi\acute{\alpha}\nu$ - $\delta 0\phi0\varsigma$ 'all-wise' $\pi\acute{\alpha}\mu$ - $\pi \rho \omega\tau 0\varsigma$ 'quite the first, the very first'. From these forms it spread to others, with the same meaning as $\pi\alpha\nu\tau$ -(0-), e. g. $H\alpha\nu$ - $\ell\lambda\lambda\eta\nu\varepsilon\varsigma$ 'the united Hellenes' $\pi\acute{\alpha}\nu$ - $\delta\eta\mu 0\varsigma$ 'concerning the whole people' $\pi\acute{\alpha}\mu$ - $\mu\eta\nu 0\varsigma$ 'lasting through all the months'. $\pi\alpha\nu$ - $\delta 0\phi0\varsigma$ 'clever in any business' followed the type of forms like $\pi\alpha\nu$ 0 $\delta 0$ 0 i. e. $\pi\alpha\nu$ -(f) $\varepsilon\rho\gamma\acute{o}\varsigma$.

Remark 2. In some combinations, πar - may possibly be the regular phonetic representative of the stem πarr - (op. χe_{ℓ} - beside χe_{ℓ} -o- and the like). So much may be admitted; but it seems to me improbable that this was generally the origin of the form.

Other examples with adverbs: ἀκαλα-ρείτης 'flowing quietly'

(acc. pl. neut.), άμα-τροχιά 'collision of wheels' (instr.), παλαίφατος 'told from of old, foretold' (loc.).

έγ-χειρί-θετος 'placed in the hand'; ἐμ-πυρι-βήτης 'standing in the fire' derived from the phrases ἐν χειρὶ θεῖναι, ἐν πυρὶ βῆναι.

ἀλλήλους 'each other', which was used as readily of two single things or persons as of two pairs or two larger contrasted groups, must imply a proethnic Greek phrase *άλλος-αλλου, du. άλλω-αλλω, pl. *άλλοι-αλλους. *άλλαλλ- arose by contraction in the combinations *άλλα-αλλαν *άλλα-αλλα, and then spread through the other cases. Next the dual and plural inflexion was used even where only two single things were spoken of. Lastly -αλλ-became -αλ- Ion. -ηλ- (cp. Wackernagel, Kuhn's Ztschr. XXX 294 f.). A more detailed discussion may be found in Fleckeisen's Jahrb. 1887, p. 105 ff.

Similarly we have αὐτοσ-αντό- (also αὐσ-αντό-) in the Delphic dialect and elsewhere. Originally the phrase αὐτοσ-αντοῦ was used only in reference to a nom. sing. masc. in the sense of 'ipse sui', with the parallel forms *αὐτα-αντᾶς etc. But when the phrase passed into a single word, the first member became incapable of inflexion, and the form of the nom. sing. masc., as occurring most frequently, was used throughout. Hence e. g. Delph. inser. χυριεύονσα αὐτοσαντᾶς and χυριεύοντες αὐτοσαντῶν, Herael. inser. μετ' αὐτοσαντῶν.

The genuine forms $\pi o\delta - \alpha \pi \acute{o} - \varsigma$ àllood- $\alpha \pi \acute{o} - \varsigma$, whose etymological structure had become obscured (§ 16 p. 32), gave rise to new formations like $\acute{\eta} \mu \epsilon \delta \alpha \pi \acute{o} \varsigma$ born in our country, countrymanl $\pi \alpha \nu \nu \sigma \delta \alpha \pi \acute{o} \varsigma$ of all sorts or kinds, manifold, as though the second member of the compound were $-\delta \alpha \pi o$. The same δ occurs in $\~{o} \tau \iota \iota \varsigma$ $\~{o} \tau \iota \iota$ who (whoever) for ${}^*\sigma f \acute{o} - \delta \tau \iota \varsigma$, ${}^*\sigma f \acute{o} - \delta \tau \iota$, see § 4 p. 9.

τοῦτο = *τό \dot{v} το, where \dot{v} is a particle = Skr. \dot{u} . The forms masc. *ον- and fem. * $\dot{a}\dot{v}$ - = Idg. * $s\dot{o}$ u, * $s\dot{a}$ u, date from the pre- Greek period and perhaps these were pronounced as monosyllables * $s\dot{o}u$ * $s\dot{a}u$ even in proethnic Indo-Germanic: ep. masc. Skr. $s\dot{o}$, O.Pers. hauv. Then the neuter τό was added to these with the force of an adverb (ep. O.C.Sl. ku-to 'who?') giving the forms * $o\dot{v}$ το * $a\dot{v}$ το (for * $a\dot{v}$ το, by the regular change,

I§ 611 p. 461) and a new formation τοῦτο (instead of *rod-v-ro). Then these forms, whose ending was invariable, were influenced by other pronominal forms whose endings were inflected, and thus we have finally οὖτος αὕτὰ etc. Cp. Delbrück, Synt. Forsch. IV 139 f., Osthoff, Morph. Unt. IV 257 f., G. Meyer Gr. Gr.² p. 396.

The phrase $\hat{\epsilon}\mu\alpha\nu\tau\acute{o}\nu = \hat{\epsilon}\mu\grave{\epsilon}$ $\alpha \mathring{v}\tau\acute{o}\nu$ 'me ipsum' gave rise in Attic to the new formations $\hat{\epsilon}\mu\alpha\nu\tauo\~{v}$ $\hat{\epsilon}\mu\alpha\nu\tau\~{o}\~{v}$, while in Ionic $\hat{\epsilon}\mu\omega\nu\tauo\~{v} = \hat{\epsilon}\mu\acute{\epsilon}o$ $\alpha \mathring{v}\tauo\~{v}$ (cp. $\tau\omega\mathring{v}\tau\acute{o} = \tau\acute{o}$ $\alpha \mathring{v}\tau\acute{o}$) produced $\hat{\epsilon}\mu\epsilon\omega\nu\tau\~{o}\~{v}$ and $\hat{\epsilon}\mu\epsilon\omega\nu\tau\acute{o}\nu$.

Italic.

- § 33. In the Italic group, especially in Latin, the practice of compounding noun-stems by the method of Class I survived in popular speech, though only to a small extent. Amongst the Romans it received an artificial stimulus and attained a certain degree of importance through the close adherence of Latin poetry to Greek models. But eminent stylists and grammarians of the classical period recognised the spurious character of words coined on Greek types, and protested against encumbering the language with new formations of this kind. The development of the Fourth Class of compounds, however, was by degrees extended all the more widely for this restriction in Class I. As regards Classes II and III, Italic stands in the same position as the other branches of Indo-Germanic.
- § 34. Class I. We may discuss the Latin forms first. Stems in -o-. Where the stem-final of the first member was not entirely lost before an initial consonant in the second part, it took the intermediate form of the irrational vowel. Accordingly it usually appears as -i-, e. g. belli-ger (beside bellum); before labials and before l as the sound intermediate between u and i, e. g. centu-peda centi-peda, māgnu-ficus māgni-ficus, cunu-ligus. Where -o- appears instead, as in albo-galērus Ūno-mammia sexcento-plāgus (Stolz, Die lat. Nominalc. 19 ff.), we must assume that it is due to the influence of Gallic (cp.

the Armenian -a- in compounds, which - if our conjecture be right — was borrowed from Iranian, § 28 Rem. 1 p. 45) 1). The final of the stem has completely disappeared in prin-ceps from primo-, oin-vorsei (S. C. de Bacch. 19) from oino- uno-, and some other instances; see I § 633 p. 474. Where r, following a consonant, preceded the final vowel of the stem, it sank with the latter to r, perhaps as early as the proethnic Italic period, whence the er which appears in the historical period of Latin; e. g. sacerdos, which was directly preceded by the form *sácr-dō(t)-s (see vol. I loc. cit. and Stolz, Wien. Stud. IX 304 f.); such words as sacru-fex sacri-fex, agri-cola were formed afresh at later period 2), just as acri-tas took the place of *acertas. which would have been the regular form, and facili-tas arose by the side of the older form facul-tas. Where the second part began in a sonant, the vowel was elided, as somnambulus, rēm-ex, māgn-animus, flex-animus ('touched to the heart'); such forms as multi-angulus (beside mult-angulus) came into use later on by analogy (like Gr. άραχνο-υσής, § 29 p. 47) see I § 604 p. 458.

Since compounds like albo-galērus cannot count as genuine Latin formations, we are left in doubt whether the -i- (-u-) of historical Latin stands for Idg. -o- or -e-. The probabilities however are in favour of the former. Cp. § 12 p. 24.

Stems in -io- regularly show -i-, as medi-terraneus from mediu-s, offici-perda from officiu-m. Cp. capis I § 135 p. 122, also Goth. arbi-numja § 40 and the remarks on the gradation

¹⁾ The -o- of ho-diē must be regarded as of genuine Latin origin, if Danielsson (Stud. gramm., Upsal. 1879, p. 51 sq.) is right in his explanation of the word; he supposes that an old form *hō-diē (Class IV) was re-modelled on the analogy of Class I (op. multi-modīs § 36), and that the o was preserved from being weakened to -i- or -u- by its position in the accented syllable. But perhaps we ought rather to derive ho-diē from an instr. sing. *hō, with its ō shortened on the analogy of modo and similar words (op. quo-que). A third derivation is suggested by L. Havet, Mém. de la Soc. de Lingu. IV 229 sq.

sacerdos was not transformed into *sacridos, because its component parts had ceased to be clearly recognised.

of the suffix -io- which will be found in § 63. If this -i-stands on the same footing as the -r- of *sacr-dos (see above), the derivative socie-tas (from sociu-s) must bear the same relation to the above mentioned compounds as sacri-fex to sacer-dos. Med-amna 'Μεσοποταμία' follows the analogy of māgn-animu-s (see above). trit-avo-s then might be referred either to a form *tritio- (cp. tertiu-s, Avest. pritya- etc.) or to *trito- (cp. Gr. τρ/το-ς).

-i- corresponds in Latin to the -o- which serves in Greek as the 'vowel of composition' after most consonantal stems, cp. e. g. odorr-o-qvi's 'sprung from teeth' and dent-i-frangibulus. It seems probable that the Lat. -i- here sometimes represents the Idg. i of i-stems (cp. Igni-fer from Igni-s), especially when we consider how frequently the consonantal stems pass into the i-declension, e. g. nav-i-s and dent-i-bus dent-i-um § 93 (Italic). Then e. g. nav-i-fragus (beside the older nau-fragus) will have been formed from nav-i-s, that is from an i-stem.

Stems in -a-. -a- is hardly to be found except where the second member has sunk to the level of a suffix: fabā-ginus, cp. fabālis fabāceus; oleā-ginus -gineus. Elsewhere the forms are treated like the o-stems. tubi-cen: tuba; aqui-dūcus: aqua. tubu-lūstrium and tubi-lūstrium: tuba. -o- (a Grecism): vio-cūrus: via; blatto-sēricus: blatta (cp. holo-sēricus). glōri-ficus: gloria like offici-perda. The ī of tūbī-cen (:tūbia) has not been explained; is it parallel to Skr. śacī-vasu-š?

Stems in -i- and -u-. angui-cornis: angui-s. tri-dēns: dat. tri-bus. morti-fer: gen. pl. morti-um, Skr. mṛti-š. The disappearance of the final -i- of the stem in fūn-ambulus from fūni-s is to be explained as due to the analogy of o-stems; fūni-ambulus was a later analogical formation like multi-angulus (p. 58); cp. also sēm-ermis sēm-ustus beside sēmi-ermis sēmi-ustus from sēmi- = Skr. sāmi 'incomplete, half'. -u- occurs in u-stems only before labial sounds, as in acu-pedius (cp. Gr. wwi-s 'swift') manu-festus (manu-s), and since in such instances i is sometimes written as well as u (mani-festus) the sound must have

been intermediate between u and i (I § 49 p. 41 f.). Thus the u-stems also were treated in the same way as those in -o-.

nau-fragus, like Gr. ναν-πηγός, is no doubt a complete, not a syncopated form; nāv-igō is of the same kind, cp. § 11 p. 24; nāv-i-fragus and nāv-i-ger are new formations. Similarly we have bū-caedu and bov-i-cīdium: cp. Gr. βον- and βο-ο- § 29 p. 48; yet we must notice, first, that bou- was probably borrowed from Oscan (I § 432 Rem. 1), and secondly that the meaning 'great' in bū-mammus etc. points to Greek influence.

Nasal stems. nōmen-clātor like Gr. ἀνομά-κλυτος? homicīda (acc. homin-cm). Goth. guma-kunds 'of the male sex' (guma, gen. gumins), sangui-sūga (sanguen), inser. numi-clatori. See § 12 p. 27. With the last group we should probably compare nūncupō for *nōmi-cupō, ep. prīnceps p. 58. There is a third group, the largest and the latest formed, consisting of words like imāgin-i-fer germin-i-seca Aniēn-i-cola aquilōn-i-gena, ep. Gr. qoev-o-μανής etc. (§ 29 p. 49).

sim-plex · cp. Gr. ά-πλόος, § 12 p. 27. We must also mention here septem-fluos decem-peda nūn-dinae, beside which are found septi-rēmis sept-ennis, dec-ennis (cp. octi-pēs oct-ennis from octō).

Stems in -r-. frātr-i-cīda sorōr-i-cīda, cp. Gr. πατρ-ο-φόνος ἡητου-ο-διδάσκαλος (§ 29 p. 50).

Stems in Explosives. dent-i-frangibulus serpent-i-gena. ped-i-sequos frond-i-fer. vōc-i-feror. rēg-i-fugium.

Stems in -s-. nas-turtum müs-cipula. jūdex for *20u2-dic-s, jū(s)-stitium, and beside it jūr-i-dicus. Stems in -es-show -i- and -er-i- foedi-fragus volni-ficus and foeder-i-fragus mūner-i-gerulus. The forms with -i- only are no doubt due to the similarity of the nominative terminations of the two stems, foedus: haedu-s. Nouns in -ōs -ōris (§ 133): labōr-i-fer odōr-i-sequos; the form rūmi-ficō by the side of rūmor, implies, as does also rūmus-culu-s, an older word *rūmus -eris or -oris (cp. decus beside decor), cp. also horri-fer -ficus beside horror. The form cini-flō, from cinis -eris, is due to the nominative-ending -is (cp. angui-s), since we could hardly derive

it phonetically from a form like *cinis-flo; cp. the new formations cucumīt cucumim beside cucumis -eris, and another word which must also be explained by reference to the form of the nominative, lapi-cīda from lapis -idis.

Remark. We must no doubt assume the loss of -i-through syllabic dissimilation in the following: trucidāre, for *truc[i-c]idāre, arcubiī ('qui excubabant in arce') for *arc[i-c]ubīī, cordolsum for *cord[i-d]olsum. See I § 643 p 482 The monosyllabic stems contained in pelluviae for *pedluviae (I § 369 p 280), sōl-stitum (beside sōl-1-fer) and other such compounds may or may not have dropped an -1- (I § 633 p. 474). With pelluviae compare malluriae for *man-luviae.

In the monuments of the Umbro-Samnitic dialects this class of compounds is very scantily represented. If we disregard compounds containing numerals, and uncertain instances like the Osc. .ovfrikúnúss, whose initial part is mutilated (Pauli, Altit. Stud. II 118), there remains only the Osc. med-díss med-dis, whose first part is the same as the Umbr. meř-s mers 'ius, fas' (§ 132. 163).

du- for Idg. *dui- 'two' is peculiar to the Italic languages: Lat. du-plus du-plex du-centī du-bius (I § 170 p. 150), Umbr. du-pla 'duplas' du-pursus 'bipedibus'. I regard it as a new formation of proethnic Italic, suggested by quadru-: Lat. quadru-plus -plex -pēs, and in early Latin *quadru-centī for quadringentī (Wackernagel, Kuhn's Ztschr. XXV 283); quincu-plex etc. are formed on the same model. Umbr. petur-pursus 'quadru-pedibus' was a new Umbrian formation.

§ 35. Class II. Lat. in-jugis: Skr. a-yuga-s Gr. ă-ζυγος 'unyoked'; in-eptus: cp. Skr. án-āptu-s 'unattained, unskilled'. Umbro-Samnitic has an- 'un-', which seems to correspond to Gr. $v\eta$ - = Idg. * \bar{v} - (I § 253 p. 207): Umbr. antakres 'integris' Osc. an-censto fem. 'incensa, not valued'.

In Italic, Idg. *ne 'not' was also restricted to use in compounds, as Lat. ne-fas.

Class III. Lat. com-mōtus Umbr. comohota 'commota', Lat. con-ceptus Falisc. cun-captum 'conceptum', Lat. con-ventiō con-ventus Osc. kúm-bennieís gen. 'conventus'; O.Ir. com- e. g. ro co-scad 'correptus est'. Lat. per-emptus per-versus Umbr. per-etom 'peremptum': Skr. pari-vṛtta-s 'turned about' Lith. pérversta-s 'reversed, changed'. Lat. ab-ditus: Gr. ἀπό-θετος 'set aside, secret', ab-ductiō: Mid.H.G. abe-zuht 'a drawing away'. Lat. por-tentum por-rectum Umbr. pur-ditom 'proditum': no doubt to be compared with Gr. πάρα (Stolz, Arch. f. lat. Lexicogr. II 498 f.).

Lat. inter-mē(n)stris inter-mēnstruos Umbr. anter-menzaru 'intermenstruarum', op. Lat. inter mēnsēs. Lat. amb-urbium, Osc. am-vianud abl. of the stem am-viano- 'that which lies on both sides of the way', hence 'vicus, platea' (cp. Bücheler in Nissen's Pomp. Studien 499). Lat. per-nox per-dius (per noctem, per diem); per-fidus (per fidem fallere). sub-jugu-s (sub jugō). ante-novissimus (ante novissimum).

Idg. *ne 'not', as has been said above (Class II), was restricted in Italic to use in composition, as Lat. ne-fas.

Lat. ad-modum. in-vicem. af-fatim 'to satisfaction'. dē-nuō for dē novō I § 172 p. 152. īlicō for *in slocō 'on the spot'. I § 81 p. 73. pro-fectō for *pro factō properly 'as good as something done' I § 682 p 549 Many such phrases were reduced to single words largely through the enclisis of the noun and the isolation caused by phonetic change.

§ 36. Class IV. In Umbrian desen-duf corresponds to the Lat. duo-decim (§ 16 p. 32), cp. Gr. δέκα δύο beside διό-δεκα. Lat. ūn-decim, explained in I § 633 p. 474 as standing for *ūnu(s)-decim, may contain other case-forms; according to Wackernagel (Kuhn's Ztschr. XXV 284) it stands for *ūnum-decim, cp. Gr. Εν-δεκα.

Lat. Jū-piter Juppiter is said (no doubt correctly) to be = Gr. Zεῦ πάτιρ, and is therefore a vocative used as nominative (I § 612 p. 463), Umbr. Iu-pater. Lat. Diēs-piter, gen. Diēs-pitris; an analogous form is Mārs-piter, also Māspiter (I § 269 p. 217). The words postrī-diē cottī-diē (cottī- for *quettī-, see I § 419 p. 307, § 431 p. 320, originally meaning 'on which-soever day of a series'; Wackernagel, Kuhn's Ztschr. XXIX 147 gives a different explanation), and merī-diē (properly 'in the clear

day', from meru-s, see Stowasser, Archiv f. lat. Lexicogr. I 273 ff.) contain two locatives. The nom. meridies is like the Mod.H.G. die mitternacht 'midnight', which comes from the gen. dat. mitter nacht 'at midnight', and cottidianu-s meridianu-s like mitternächtig.

We have a group of words which did not become compounds until the literary period of Latin: holus ātrum, rēs marīnus, fēnum Graecum, jūs jūrandum, rēs pūblica, alter uter etc.: gen. holusātrī beside holeris ātrī¹), rēsmarīnī beside rēris marīnī, alterutrīus beside alterīus utrīus and so forth (Neue, Formenl. I² 590 f.).

Sacraviēnsēs from sacra via, quartadecumānī from quarta decuma ($legi\bar{o}$).

In some cases the initial member follows the analogy of Class I: Aquiflaviënsës from Aquae Flaviae; equiferτ 'wild horses' ovifer 'wild sheep' instead of equos ferus and ovis fera, influenced no doubt by the type of Greek compounds like αἴγ-αγρος 'wild goat' σύ-αγρος 'wild boar' (cp. the Author, Rhein. Mus. XLIII 404); multi-modīs, omni-modīs instead of multīs modīs, omnibus modīs (Danielsson, Studia grammatica, Upsal. 1879, p. 51).

In the literary period of Latin, phrases like aquae ductus and aquae ductio, agrī cultūra, plēbis scītum, fideī commissum, capite cēnsī, jūre cōnsultus etc. became compounds. Then, by a transition to Class I, aqui-ductus, cp. aqui-dūcus 'υδραγωγο΄ς'. paterfamiliās, like Mod.H.G. mutter-góttes, 'mother of God' leib-brót loaf of bread' (O.H.G. leip prōtes) Pol. štuka-mięsa 'piece of meat'.

*quot annī, *quot mēnsēs, originally relative clauses (cp. Gr. όσημέρω 'daily'), in course of time ceased to be regarded as such, and then the compounds quotannīs, quotmēnsibus were

¹⁾ The r of the form holsatra (Apicius) was due to the analogy of compounds of Class I like multi-sonus; for the formation is too late to admit of the supposition that it was caused by the natural course of phonetic change, as in the second syllable of ilico for *insloco (I § 81 p. 73.)

formed, like his annis (Wackernagel, Kuhn's Ztschr. XXIX 146 f.). Cp. Lith. kas-vākara § 46.

breve iter, longum iter became breviter, longiter, and so forth. Thus arose the adverbial suffix -iter -ter. See Osthoff, Archiv f. lat. Lexiogr. IV 455 ff.

nu-dius tertius 'the day before yesterday', properly equivalent to 'nunc dies tertius' ($nu = \text{Skr. } n\dot{u} \text{ Gr. } v\dot{v}$ etc.). Hence nudiustertianu-s 'belonging to the day before yesterday'.

male-volēns, male-dīcēns (from which were formed malevolentissimus, maledīcentior, cp. Mod.H.G. tieffühlendst, freigelegener). bene-volēns. Derivatives of these are malevolentia benevolentia, and on their analogy were formed malevolus benevolus, maleficus beneficus for the older forms mali-volus beni-volus, mali-ficus beni-ficus (Class I, cp. benīgnus for *beni-gnu-s, I § 619 p. 466 f.). A compound found in Tertullian, altēgradīus = altē gradiēns, shows the same type as male-volus.

In later Latin, as we have already seen (§ 33 p. 57), this class grew more and more extensive. Especially where the inflexional differences of the cases had disappeared, and the first member of the compound consequently lost its proper meaning as a case, compounds of Class IV came more and more into favour. By far the greatest part of the nominal compounds now found in the Romance languages belong to this class. This disuse of Class I, in favour of Class IV is most clearly seen in 'epithetised' compounds, as French rouge-gorge 'red-gullet' pattepelue 'hairy-paw' i. e. 'fawner, sneak'. See A. Darmesteter, Traité de la formation des mots composés dans la langue française etc., Paris 1875.

Old Irish.

§ 37. Class I. The final vowels of the stem of the initial members were accurately preserved only in Gallic. In Irish they suffered syncope and disappeared (I § 634).

Stems in -o-. O.Ir. ech-rad fem. (collective) 'horses': Mod. Cymr. eb-rwydd' quick' Gall. Epo-rēdia, pr. Kelt. *ekwo-rēdā- (as to the second part, see Zimmer, Kelt. Stud. II 24), beside O.Ir. ech

'horse', Skr. áśva- Gr. γπο- etc. O.Ir. dag-duine 'bonus homo', from dag 'bonus'1): Gall. Dago-vassus. O.Ir. Doman-gart: O.Cymr. Dofn-garth, Gall. Dubno-rīx Dumno-rīx, from domun 'world'; doman- for *domno- through the intermediate stage *domy-, see I § 623 Rem. 1 p. 469. Gall. rergo-bretus name of a magistrate amongst the Aedui, = 'cuius iudicium efficax est', beside O.Cymr. guerg 'efficax'; Nerto-mārus from nerto-'strength, might'. In Irish the change of t, c to p, χ (th, ch) at the beginning of the second member indicates that the first originally ended in a vowel (I § 514 p. 375 f., § 658 p. 510), as fir-threbaire 'true wisdom' from trebaire, nocht-chenn 'bareheaded from cenn. The same is true of the f in such compounds as find-folt 'white hair' from folt, and the s in compounds like macc-slabrad 'plaything' from slabrad 'chain' (I § 576 p. 431, § 658 p. 510). Where the second member began in a sonant, -o- disappeared in proethnic Keltic: c. g. O.Ir. find--arrgit 'white silver' (cp. Gall. Vindo-magus) fir-aingliu 'veros angelos'; so in Gallic we find Art-albinnum beside Arto-briga as compared with O Ir. art 'stone'; here too should be classed compounds like Mid.Ir. (h)uasal-athair 'patriarch' ('august father'), if the elision of -o- in this position was later than the loss of ınıtial p- (I § 339 p. 268).

Remark In Gall. -u- is sometimes found instead of -o-, e.g. Virdumārus and Virdo-mārus, Adiatu-maru-s and Adiato-rīx, and sometimes -a-, as Reita-genus (Esser, Beitr. zur gallo-kelt. Namenkunde I 5. 6 f.). These differences are due in part to an inexact representation of unaccented vowels in writing, but in part also to dialectic variation.

Olr. aili-thir 'stranger, pilgrim' from alio- and tīr 'terra'. nūe-litridi acc. 'novos, recentes litteratores': cp. Gall. Novio-dānum 'Newtown'.

Stems in -ā-. It may be assumed that -o- was regularly found even in proethnic Keltic (§ 12 p. 24 f). Gall. Teuto-bōdiācī Touto-bociō beside O.Ir. tuath f. = Goth. piuda f. 'people', common ground-form *teutā, so that no doubt O Ir. Tuath-char and

¹⁾ With this combination of adjective and substantive, and with those to be mentioned below compare § 39.

O.Cymr. Tut-ri originally had -o-. O.Ir. dal-tech 'forum' (house of assembly') dal-sude 'forum' (seat of assembly') from dal f. O.Ir. briathar-chuth 'battle of words' for *brētro- through the intermediate stage *brētṛ-, beside briathar f. 'word' for *brētra-(I § 623 Rem. 1 p. 469, § 634 p. 475)

Stems in -1-. O.Ir. muir-bran 'mergus' ('sea-raven') from O.Ir. muir n. 'sea' for *mori: Gall. Mori-tasgus Mori-dūnum. In these and other words the palatalisation of the last consonant of the first member is an obvious trace of the -1- which once stood before it (cp. buaid-lia 'fornix', properly 'triumphalis lapis' from buaid n. 'victory', sain-chenelæ 'proprium genus').

Stems in -n-. O Ir cath-bundach 'victorious in battle' cath-lach 'battle-host, assembled fighting men' cath-charpat 'battle-chariot' from cath 'battle' Gall. Catu-slōgus (= cath-lach) Catu-rīgēs, O II.G. hadu-. bith-beo 'semper vivus', from O Ir. bith 'world', which when used as the first member of a compound took the meaning 'everlasting, ever' (cp. § 4 p 6) Gall. Bitu-rīgēs. fid-bocc 'ligneus arcus', from fid 'wood, tree', O H.G. weitu 'wood'

To determine the chronology of the loss of the final vowel in the first member, we have the evidence of such forms as the nom. pl. gnīmartha beside sing gnīm-rad 'act, deed', compared with the u-stem gnīm, ep. ech-rad above. Since -ar- came immediately from -r-, and this came from -rē- (1 § 634 p. 475), the stem-final of the first member must have already disappeared before the process of samprasārana began. Indeed, even in Gallic we find Lūgdunum for Lugu-dūnum (Dio Cass. XLVI c. 50 τὸ Λουγούδουνον, νῶν δὲ Λούγδουνον γαλούμενον).

Stems in -n-. For these the form in -o- is substituted, as in Gr. $\nu \bar{\imath} o' - \nu \rho \bar{\alpha} \nu o \nu$ (§ 12 p. 27); e. g. Mid.Ir. talam-chumscugud 'earthquake' from talam, gen. talman, f. 'earth'.

Stems in -r-. The examples of these stems are not free from difficulty. O.Ir. athar-gein 'procreation (of the father)' mathar-marbthach 'matricide' mathar-lach 'matrix', the -thar being no doubt for *-tr-o- (op. Gr. unro-o-xróvos). athr-amil 'patri similis' madr-amil 'matri similis' beside forms like sain-

samail sain-email. Where the final member begins in a sonant: athir-oircnid 'patricide'. sethar-oircnid 'murderer of a sister' is no doubt modelled on forms like mathar-marbthach, where the gen. sing. determined the type.

Stems in Explosives. All of these must have had -o-. O.Ir. carat-rad 'friendship' from cara, gen. carat; compare Gall. Carent-o-magus. Mid.Ir. oiged-chaire 'friendship between guest and host' from oegi, pl. oegid 'guest'. O.Ir. rīg-thech 'king's house' rīg-fāith 'royal poet' from rī, gen. rīg, 'king', cp. Lat. rēg-i-fugium. Cp. also Gall. Cinget-o-rīx beside Cinges gen. -etis O.Ir. cing, acc. cingid, 'vir fortis, heros'; Gall. Brig-o-banne and *Brig-o-gilum (whence the modern Brigueil and Brieulles-sur-Bar), beside O.Ir. bri, gen. breg, 'rising ground'.

Stems in -es- show in Irish the same type as Gr. εἰρφ΄ κόμος. O.Ir. teg-lach 'household, familia' (O.Cymr. teulu 'familia') beside tech n. 'house' = Gr. στίγος, tecnate 'domesticus, familiaris' for *tech-gnate (the spirant having been assimilated to the initial consonant of the second member) a derivative from *tech-gnath (gnāth 'consuctus'). O.Ir. leth-cholba 'the pillar by the side, the second pillar', led-marb 'half dead', from leth n. 'side, half'. It is probable that Gallic names like Cartis-mandua Civis-mārus (see Zeuss² 785. 853) represent the same type of compound as Gr. ἐπεσ-βόλος; yet it is at least possible that a vowel has fallen out after the -s-, cp. e. g. gen. Viscari for *Visu-cari.

§ 38. Class II. Idg. *v-'un-' appears in Irish in different forms according to its phonetic surroundings. \(\varepsilon\)- before \(t, c\): O.Ir. \(\varepsilon\)-tromm 'not heavy, light' \(\varepsilon\)-cam 'indecens'; but in Cymr. \(an_\), as annheilwng 'unworthy': O.Ir. \(\varepsilon\)-te 'indignatus', cp. Mod.Cymr. \(cant:\) O.Ir. \(c\varepsilon\)-th 'hundred', I \(\varepsilon\)-243 p. 201. \(in\)- for *en- before \(d, g\) (cp. I \(\varepsilon\)-520 p. 378): O.Ir. \(in\)-derb 'incertus' in-gnad 'insolitus'. \(an\)- before vowels, Idg. *\(varepsilon\)-I \(\varepsilon\)-1 \(\varepsilon\)-243, 4 p. 202: O.Ir. \(an\)-eolas 'inscientia', beside \(eola\) 'gnarus', \(an\)-se 'heavy' beside \(asse\) 'light'. By analogical transference \(an\)-came to be used before explosives, even in O.Ir.: \(an\)-cretem 'infidelitas', \(an\)-dach 'nequitia', \(an\)-glan 'immundus'. Further examples of this

kind are un-fiss 'inscitia', an-bsud 'instabilis' (foss 'quietude)', Mid.lr. aun-mine 'roughness' and the like.

do- du- in do-chruth 'deformed' etc. Skr. duš-, cp. § 14 p. 29. The opposite of this, so- su- = Idg. *su-, is kept in Keltic (as in Armenian, § 28 p 46) only in composition. O.Ir. so-nurt 'good in strength, strong' from nert 'strength', su-thain 'everlasting' from tun 'time'.

Class III. O.Ir cum-rechta 'alligatus' beside con-rung 'alligo': cp. Lat. com-ēsus es-arte 'caesus, expalmatus' beside es-arcon 'excisio': cp. Gr. E-alvetos 'selected'. etar-scarthi 'divisa' cp Lat. inter-fectus. acsiu 'act of seeing' dat. acsiu beside the pres. ad-chiu· cp. Lat. ad-emptio

().Ir. ess-amin Mod Cymr. eh-ofyn 'fearless' Gall. Ex-obnus Ex-omius, from pr. kelt. ex 'out' = Lat. ex and (O.Ir.) omin 'fear'. Gall. Ambi-rēnus (around the Rhine'), Ad-lēdus (by the iver Ledus'), Are-morica (before the sea')

().Ir ro-, an intensive particle, as ro-mōr 'very great' ro-chain 'very beautiful', stands for pre-Keltic *pro- (1 § 339 p. 268). cp. Gr. πρό-καλος 'very beautiful' πρό-καλος 'very bad'. O Ir. ēr-er-, also an intensive particle, as ēr-chosmil 'very similar' ēr-chian 'very long', comes from *ex-ro-; for the loss of the -o see I § 634 p. 475.

\$ 39. Class IV. Besides compounds in which an adjectival stem was followed by a substantive (Class I), in Irish, as in the other Indo-Germanic languages, inflected adjectives were combined with substantives. Such phrases often developed into compounds, and this process was all the more natural because the adjective lost the characteristic inflexion of many of its cases, and thus the phrase looked like a compound of Class I. Hence the two groups overlapped, and in particular instances it is difficult to decide how the compound arose. In none of these words have we any clear traces of the destructive influence which the accent elsewhere exerts upon the final members of compound words, e. g. drog-scēla 'mali nuntii' dag-gnīm 'good work' (I § 685 p. 552), and therefore we might in all cases decide in favour of Class IV. But there

is nothing to prevent our assuming that compounds belonging to Class IV influenced the accent of those of Class I. See Zimmer, Kuhn's Ztschr. XXIV 224 f., Kelt. Stud. II 19 ff. We shall find a similar confusion of two different types of composition in High German, § 44.

Germanic.

§ 40. Class I.

Stems in -o-. Where the second member began in a consonant the vowel seems always to have survived in procthnic Germanic. In Gothic we find stems sometimes with -a- and sometimes without, but no rule has yet been discovered to account for this difference, although it must be connected with some variation of accent1): qudu-faurhts 'God fearing' qud-hūs 'God's house' from qub 'God', áina-baúr 'innate, native' áin-falbs 'simple' from ains 'one', lausa-vaurds 'speaking folly' laus-qiprs 'with empty stomach' from láns 'loose, empty, null', akrana-láus 'fruitless' from akran n 'fruit', Pindan-gardi f. 'king's house' from puidans 'king'. In West Germanic, where the vowel still appears as o in the oldest monuments (1 § 83 Rem. I p. 77), the law of syncope described in I § 635 p. 476 was in operation; but its results were largely obscured by new formations. following are examples of the regular development. O.H.G. tago-sterno taga-stern 'daystar, morning star', spilo-man spila-man 'player', wego-wiso wega-wiso 'guide'. On the other hand we find boum-gurto 'orchard', win-rebe 'vine', himil-zungal 'stars of heaven', houbit-band 'head-band'. Parallel to these stand such forms as eban-līh 'aequalis' regan-mānod 'rainy month' ātum-zuht 'respiration' accar-bigengo 'agricola' vogal-chrūt 'chick-weed', which come from prehistoric ground-forms containing *ebno-*rezno- *ēdmo- *akkro- *fuzlo- (cp. Goth. 1bna-leiks, figgra-gulþ 'finger-ring' and Austro-valdus, Count of Toulouse, 588 A. D.). However, it has still to be determined (cp. Kaufmann, Paul-

¹⁾ See Holtzmann, Altdeutsche Gr. I 2, 55; Kluge, Kuhn's Ztschr XXVI 81; Kremer, Paul-Braune's Beitr. VIII 381. 438. Kremer's theory is the least satisfactory.

Braune's Beitr. XII 537 ff.) how far the historical form of the first member may have been due merely to the influence of the uncompounded word (eban regan etc.).

Remark 1. In O.H.G. through the partial coincidence of the z-and the a-declension, -z- often intruded in place of -o- -a-, as wegz-rīh beside wego-rīh wega-rīh 'waybread, plantain' (properly 'way-ruler'). Cp. Rem. 3 infr.

The treatment of -o- in proethnic Germanic, where the second member began in a sonant, is uncertain (cp. I § .606 p. 459). It is possible that in some forms the hiatus remained (see above, § 12 p. 25), cp. Goth. galinga-apaistailus 'false apostle' (from galing n. 'lie'), O H G. sigo-ēra sige-ēra beside sig-ēra 'honour shown for victory'. Elision is by far the most frequent: Goth. hals-agga 'curve of the neck, nape' from halsa-'neck', all-andjō 'complete' from alla-'all'; O H.G. wer-alt O.Sax. wer-old A.S. wor-old O.Icel. ver-qld 'age of men, period, world' beside Goth. vair (stem vaira-) 'man', O.H G. ein-ougi A.S. ān-eáze O.Icel. ein-eygr 'one-eyed' beside Goth. áins. O.H.G. eban-alt 'equally old' Mid.H.G. ōster-abent 'Easter-eve, day before Easter' for *ebn-*ōstr-, show the same analogical change as is seen in O.H G. ebano ebanōn (see I § 215 p. 182 f); the regular type is preserved in Vestr-alpus, an Alemannic chief (Ammian).

Forms containing the suffix -20-. Goth alja-kuns of other origin, strange', frapja-marzens derangement of mind' (frapi n.), and on the other hand, with a long syllable before the suffix, arbi-numja receiver of an inheritance, heir' (arbi n.), agláiti-vaúrdei 'improper speech' (agláiti n. 'impropriety'). Cp. the contrast of gen. sing. harjis and hairdeis, I § 120 p. 112 f., § 143 p. 128 f., II § 63. In West Gothic -i-, not -ja-, is found from the sixth or seventh century onwards even in the former class of words. In Old High Gorman -i- is universal, as eli-lenti 'foreign' eli-boro 'alicnigena' heri-berga 'camp, shelter' arpilos 'without inheritance'. It is questionable whether we should assume that -i- had appeared after short syllables, as in eli- (cp. O.Sax.eli-lendi O.Fris.ul-lende), before the consonant-strengthening (I § 143 p. 129) and the syncope (I § 635 p. 476) of West Germanic (Sievers, Paul-Braune's Beitr. XII 488 ff.); see

Kaufmann ibid. 537 ff. -10- -10- are frequently found in proper names belonging to different Germanic stocks in the first centuries A. D., as Χαριό-μηρος Hario-baudes, Inguio-mērus.

Stems in -a-. It may be assumed that even in proethnic Germanic -o- was regular (§ 12 p. 25). Goth airpa-kunds 'of earthly origin' from airpa 'earth', hveila-hvairbs 'accommodating oneself to the time, πρόσεαισος' from hveila 'time, while'. O.H.G. beto-man 'one who prays' beta-hūs 'house of prayer' from beta 'prayer'; on the other hand erd-rīhhi 'kingdom of earth' from erda, brāch-mānōt 'month of the first ploughing, June' from brācha 'land broken up'. O.H.G. ahsal-pein 'shoulder-bone' from ahsla 'shoulder', like vogal-chrūt O.H.G. erd-aphil ('earth-apple') 'cucumber, melon' from erda-, scab-īsen 'shaving tool' from scaba 'shaving tool, plane', like wer-alt. Mid H G nādel-aere 'ncedle's eye' from O H.G. nādlu Goth nēpla 'ncedle', like ōster-ābent. Compare p. 70.

Words containing the suffix -iē-, -iā-. Goth. pūsundi-faps 'leader of a thousand' from pūsundi f (nom pl. pūsundjōs) 'thousand', O.HG. sunti-lōs 'sinless' from suntia sunta sunta 'sin', redi-haft 'cloquent' from redia reda 'speech', like eli-lenti; see above.

Remark 2 In these feminines -o- and -a- often occur as well as -i-, e g redo-haft reda-haft, hella-fiu; 'hell-fire' (from hella Goth. halla 'hell'). Here analogy has been at work, this new formation spread in the -ie- (-iā-) stems, not in those with -io-, because the sonant -i- which stood at the point of juncture was not supported in the former class of stems as it was in the latter (cp. heri-berga beside nom. acc heri) by the case-forms of the uncompounded word; the -i- of the compound was especially hable to alteration after the 1 of the original word had been completely assimilated to the preceding group of consonants.

Stems in -i-. In proethnic Germanic -i- was no doubt kept in all compounds whose second member began in a consonant. Goth. -i-, as gasti-gōps 'hospitable' from gasts, draúhti-vitōp 'service in war, fight' cp. ga-draúhts (stem ga-draúhti-) 'warrior'; rarely the -i- is lost (cp. the loss of -a- above): brap-faps 'bridegroom' from braps 'bride', put-haúrn 'horn for blowing' from *puti- 'noise, sound' = O.Icel. pytr Mid.H.G. duz. In O.H.G.

the forms are syncopated according to rule. steti-got 'genius loci' turi-sūl 'doorpost, post', but tāt-rahha 'narrative of what has happened' gast-hūs 'strangers' shelter' truh-sāzo trut-sāzo (Mid.H.G. truht-saeze) 'lord high steward'.

Remark 3 In O.H.G. through the partial coincidence of the r- and the o-declension -o- -a- often took place of -r-, as scrita-māl beside scriti--māl 'pace, step' from scrit, pl scriti Cp. Rem. 1 above.

Stems in -u-. In proethnic Germanic -u- always appeared in compounds whose second member began in a consonant. Gothic has always -u-, as faihu-gairns 'covetous' from faihu 'cattle, possessions', filu-faihs 'very various' from filu 'much, very'. In O H.G. the forms were altered by the law of syncope. fihu-wīāri 'cattle-pond', filu-sprāhhi filo-sprāhhi 'speaking much', witu-hoffa wito-hoffa ('wood-hopper') 'hoopoe' from witu wito 'wood', Hadumār proper name (hadu- 'battle'. Gall. catu-), but on the other hand tōd-līh 'mortalis, mortiferus' from tōd = Goth dáubu-s 'death', hungertag 'day of fasting' for *hungru- (cp. accar-bigengo p. 69) cp. (foth hūhru-s 'hunger'

Stems in -n- in proethnic and later Germanic show the same type as Gr. rīō-roārov (§ 12 p 27) Goth. guma-kunds 'of the male sex' O.H.G. gomo-heit goma-heit 'persona' beside (toth guma O.H.G. gomo in. 'human being, man', ep. Lat homi-cīda p. 60. O.H.G. hano-crād hana-crāt 'erowing of a cock' from hano (toth hana m. 'cock'. O.H.G. namo-haft numa-haft 'having a name' from namo in. Goth. namō n. 'name'. (toth. áuga-daúrō n. ('eye-door') 'window' O.H.G. oug-brāwa 'eyebrow' from Goth. áugō O.H.G. ouga n. 'eye'. O.H.G. herz-blīdi 'heartily agreeable' from herza Goth. haírtō n. 'heart'. When the second member begins in a sonant. O.H.G brunn-ādura 'vein of a spring' from brunno Goth. brunna m. 'spring, brook'.

Remark 4 It is noteworthy that the type of compound containing a genitive (Class IV), such as hanin-fuoz, Franchöno-lant (§ 44), common enough even in O H.G., in later times continually encroached upon the stem-compounds of Class I, particularly in the Modern period. The chie factor in this development was the circumstance that -en came ultimately to be the ending of other cases besides the genitive, and hence lost its originally definite character. Cp J. Grimm, D. G. II (1878) p 528. 591 ff

Stems in -r-. In Gothic we have the form bropru-lubō 'brotherly love'; it is uncertain whether the first part represents Idg. *bhrātṛ- (I § 299 p. 237 f.), or whether, like the nom. pl. broprius, it was a new form modelled upon the u-stems. bropr-a-lubō also occurs, cp. Gr. nato-o-oóros etc. O.H.G. pruodar-līh 'brotherly' may be variously explained; fatur-erpi 'patrimonium' is in any case a new form instead of *fatr-. We also find pruader-līh fater-līh and the like, where e is due to the influence of the inflected forms of the uncompounded word.

O.H.G. fiant-līh 'hostile' frunt-līh 'friendly', fuoz-scamil 'footstool', like Gr. δρακοντ-ό-μαλλος, ποδ-ο-στράβη At the same time it must be observed that in O.H.G. many of these consonantal stems have gone over bodily to one of the vowel-declensions, e. g. mānōd 'month' (Goth still has dat. sing. mēnōħ nom pl. mēnōħs), with which compare e. g. mānōd-sioh 'lunaticus'.

Stems in -s-. Goth. signs-laun 'prize of victory' (cp. Goth. Sigis-mēres Burg. Sigis-mundus O.Frank. Sigis-bertus etc.) from signs n. 'victory' (stem signs-a- or signz-a-). Skr. sáhas n. O.H.G. egis-līh 'horrible' beside (loth. agis n. 'fear' (stem agis-a-), cp. also O.H.G. egis-o m 'fright' egis-on 'frighten' like (fr. ouxeo-The following may also belong to this group, if they have lost the vowel of the suffix -es-. Goth prūts-fill A.S. drust-fel (for *druts-) 'scab' and A.S. Hens-broc, name of a place, compare probably O.Icel, hons (only in pl.) 'fowls'. Rather more frequently we have -es- stems extended by -o-. Goth áiz-a-smipa O.H.G ēr-smid 'copper-smith', OHG. Lembir--bah (cp. Kelbiris-bach with the gen. sing., Class IV) Mid H.G. eier-vel (A.S. azer-felma) 'skin of an egg', Mid.H.G. rinder-hirte 'cowherd' (A.S. hryder-heard 'herd of cattle'). After -er- became a sign of the plural (§ 132) the first member of these compounds took a plural meaning (rinder- hirte = 'herdsman of cattle').

Remark 5. The transference of these stems to the o-declension (§ 132), caused by the loss of the final -*os in the nom and acc. sing., gave rise to alterations of the stem in compounds, on the model of the o-class; thus O H.G. *ind-stal. The oldest example of this type is perhaps

the form requa- 'darkness' (cp. Goth. rigis Skr. rdjas-), seen in requalization, which occurs on an inscription of the second or third century A. D (found in the District of Cologne), if Holthausen is right in explaining it as 'living in the darkness', but perhaps it is better to refer it to the analogy of nom. *requaz *nolfa-z.

§ 41. In many compounds, in Germanic as in Greek and in Slavonic (§ 30. 47), the popular conception of the first member underwent a change, and the latter was regarded as having a verbal instead of a nominal force.

Thus in O H.G. first of all nominal stems in -i- (for an original -1-, -10-, -1a- or -ie-) came into immediate connexion with verbs in -ien, e. g spuri- in spuri-hunt 'hunting-hound' (Mid.H.G. spur spur f. n. 'trace, track') came into connexion with spurien spurren 'to trace'; smelzi-gold ('melted gold') 'refined gold, standard gold' (smelzi n. 'gloss produced by melting, enamel') with smelzen (Goth. *smaltjan) 'hquefy'; deche (older *decchi-) seen in deche-lachen 'cloth or sheet for covering' (decha, older *decchia, 'covering') with decchen (O Icel. pekja) 'to cover'; slengi-stein 'sling-stone' (slenga, older *slengia, sling') with slengen (O.Icel. slangea) 'to sling, hurl'. Hence numerous new formations whose initial members were real verbal forms, as deni-lachan 'cloth for spreading out, tent-cloth' from denen 'to spread out', wezzi-stein 'whetstone' from wezzen 'to whet'. The next step was to give a new verbal signification to nominal stems ending in original -o-; thus () II.G strīt-muot 'eagerness for the fray' strīt-louft 'race' (strīt m. 'strife') was referred to strītan 'strive', scelt-wort 'abusive word' (scelta f. 'abuse') to sceltan 'to abuse', giving a type which was followed by large member of new formations like melc-faz 'milk-vessel' from melchan 'to milk'. Then, when the o and e in inflexional syllables had sunk to e, which also represented a and e, when e. g beta-hus 'house of prayer' and beton 'to pray' had become bete-hūs beten, and lina-berga 'railing, trellis' and linen had become line-berga linen respectively, the numerous forms of this kind gave a fresh impulse in High German to the verbal interpretation of the initial members of compounds, and the new type of formation already established was taken into yet wider use: e. g. Mid.H.G. lebe-site 'manner of life' from leben 'to live'.

Remark 1 In Mid.HG the stems of all classes of verbs had begun to be used in the initial part of compounds, and the number of such verbal compounds has been considerably on the increase down to modern times. There were always a number of words which to the popular consciousness appeared halfway between nominal and verbal compounds; as do even now such words as streit-lusi, tanz-lust, schlummer-stätte, raub-rogel, op. streit and streiten, tanz and tanzen etc [Similar uncertainty is felt in English with regard to compounds like shou-room paint-brush watch-tower slaughter-house.] But such forms inevitably came to be regarded as verbal when the noun was no longer used uncompounded, e. g in bethaus, which was formed from O H G beta Mod H.G bete 'prayer', but, when this noun was lost, was of necessity connected with the verb beten.

Remark 2 The same process of analogical formation arising from a new interpretation of nominal stems is found in the other West Germanic dialects and in those of Scandinavia; whether it also took place in Gothic is doubtful See Osthoff, Verbum in der Nominale p. 10 ff

Remark 3. Connected with this is another characteristic of High German which may be mentioned here; — the new meaning given to the initial member of adjectival compounds in -bar, -lich, -haft, -sam. E g O H G danc-bar: Mid H G. danc-baere at first meant exactly 'gratias (re-) ferens' (O II.G danc Goth. pagks 'thanks'), O H G sein-bar: Mid H G schinbare literally meant 'bearing an appearance, having an appearance'. Now when the second member had acquired the character of a suffix, the first was referred to the verb to which it was akin (Mid H.G danken and schinen) Hence further new formations like Mid H.G hel-baere 'seeking to hide oneself' Mod H G trink-bar anwend-bar etc., in which the second member is used like a primary suffix. See Osthoff loc cit p 112 ff.

§ 42. Class II. Germ. un- 'un-' before consonants and before sonants: Gr. α- ἀν- etc. Goth. un-kunps O.H.G. un-kund 'unknown': cp. Gr. α-γνωτος. Goth. un-viss O.H.G. un-wīs 'in-experienced': Lat. in-vīsus; Goth. un-viss 'uncertain'. Gr. α-ιστος 'unseen, unknown' (cp. α-οινος § 31), cp. I § 527 p. 382. Goth. un-agands 'not fearing'; O.H.G. un-ende n. 'endlessness': Skr. an-antά-s 'endless'. Germ. tuz- 'ill-, mis-' = Gr. δνσ-: Goth. tuz-vērjan, a denominative formation, 'to doubt' ('be chary of faith'), O.H.G. zur-wāri 'suspiciosus, suspectus'.

In the course of the separate development of Germanic several particles were restricted to use in composition, c. g. fru-— Gr. noó in Gothic and in West Germanic.

§ 43. Class III. Goth. fra-kunps A.S. fra-cod 'despised': cp. Skr. prá-nata-s 'different, recognisable'. O.H.G. frá-tat

'transgression'. cp. Gr. πρό-θεσις 'a setting forth', Lith. pra-déti 'to begin' prā-džia 'beginning'. As regards the accent see § 19, 3 p. 37. Goth af-stass f. 'separation, defection': cp. Gr. ἀπό-στασις 'separation, defection'. O.H.G. m-ziht f. 'accusation'. Lat. m-dictiō, Gr. εν-δειξις 'an information'.

Goth. anda-nahti n 'the time towards night' cp. Lith. añt-kakle 'that which one has on one's neck (añt kāklo), burden', Gr. ária, ἀντί. uf-árþeis 'under an oath, bound by an oath' cp. Gr. νπ-αστίδιος faúra-daúri 'that which is before the dooi, street': cp. Gr. παρα-θαλάσσιος.

(foth mip-yasinpa m. 'travelling companion', Mid H.G. miterbeline 'co-hen'. (ir µêra. Goth ufar-fullei O.H.G. ubar-fulli f. 'superabundance'. Skr upári.

O.H.G. newest Vid H.G. nest 'nothing' contrasted with Goth. ni valits 'nothing' ne valita' in nothing, not at all': Goth. valits 'thing, something'; we have also O.H.G. neowist 'nothing' for ni ēo wist 'no thing at all' O.H.G. neoman Mid.H.G. neman 'no one' for ni ēo man, cp. Goth. ni manna and manna ni 'no one'.

§ 44. Class IV. O.H.G. drī-zug A S. đrī-tız 'thrty' — Goth. Preis tigjus, acc Prins tigius; O.H.G. zwein-zug A S. tuān-tiz twōn-tiz 'twenty' was derived from old phrases containing a dative, ep Goth. tiáim tigim 'duabus decadibus'. Other instances of this kind do not occur until later periods. Thus Mod H.G. jung-geselle 'bachelor' neu-jahr 'New Year' oberrock 'overcoat' are from the Mid.H G. phrases junc geselle 'young comrade' nunce jār, ober 10c, and these forms are therefore stem-compounds (Class I) only in appearance. Mod.H.G. jeder-mann 'every one', gen. jedermanns, from jeder mann 'every man' From the common phrases in which a preposition (ze, in etc.) was combined with a place-name consisting of adjective and substantive, arose new nominative forms, as Mid.H.G. Hōhen-burc, Hōhen-vels; ep. the nom. sing. Schwaben from zen Swaben (dat. pl.).

Many compounds in Germanic contain the genitive. In High German these continually grew more numerous; their

development out of mere phrases may often be traced in the literary monuments of the language, e. g. Mod.H.G. hungers-not from Mid.H.G. hungers not, Baierland from O.H.G. Beiero lant.

O.H.G. (Alemann.) Zios-tuc A.S. Tīwes-daez O.Icel. Tỹs-dagr' Tiu's (Zio's) day, Tuesday', cp. gen. Gr. $\Delta\iota(f)$ -óc Skr. div-ás. Similarly O.H.G. donares-tag A.S. đunres-dæz O.Icel. pōrs-dagr 'Thursday'.

Goth. baúrgs-vaddjus 'wall of a fortress or city' from baúrg'fortress, city'. Instead of dulgis skula 'he who has a debt
(dulg-s m) to pay, debtor' (Luke 7, 41) it is perhaps better
to write dulgisskula Crim-Goth. hæmis-clep would no doubt
in Wulfila's Gothic appear as *háimis-hlúifs 'house-bread'.

().II.G gotes-hās 'God's house', hundes-fluga (beside hunt-fluga) 'dog-fly', Suābo-lant 'Swabia', hann-fuoz 'crow-foot' (name of a plant, lit. 'hen's-foot'), ohsin-zunga 'ox-tongue' (name of a plant), gerstūn-korn 'barley corn', Franchōno-tal 'Frankenthal' (valley of the Franks), with these latter forms containing the gen. sing. or pl. of n-stems cp. § 40 Rem. 4 p. 72. In this class (not in Class I, § 40) should no doubt be placed the further examples O.H.G. truhti-gomo 'follower' brūti-gomo 'bridegroom'. In the Mid.II.G. period first occur compounds with the gen. pl. aller, as aller-best, aller-grōzest; in O.H.G. we have the phrase allero bezzist. From the beginning of the Modern period substantives are compounded with adjectives in forms like manns-toll (Mid.H.G. mannes tol) 'àrðgouarýs' geistes-arm (cp. (cp. Mid II G. lasters arm) 'poor in spirit'.

In Mod.H.G. it was often forgotten that -s was a sign of the genitive in such compounds as hunds-fliege. Hence many new formations; on the one hand, forms like hilfstruppen 'auxiliary troops' nahrungsmittel 'means of subsistence, provisions' from hilfe and nahrung, gen. sing. hilfe, nahrung (Grimm, D. Gr. II 922); on the other hand forms like bauersmann reitersmann instead of bauermann 'countryman' reitermann 'cavalry-man'. Similarly in English occurs doomsday: A.S. dömdæz, herdsman: Mid.Eng. herde-man. Cp. § 17.

Remark. Compounds containing a dative or accusative governed by the second member do not seem to occur in Gothic nor in the older periods of High German. In any case we must reject the view (Mahlow, Die langen Vocale p. 100) that Gothic seinas-gairnás 'pilavros' (gloss on 2 Tim. 3, 2) contains a dat-loc and means 'desiring for his own, 1 e. for himself. It is a matter of choice whether to regard this, like the reading láusasvaús dás beside láusavaús dás 'µaracoldyos' (Tit 1, 10), as a mere mistake in writing, or to assume that the scribe wished to represent the sound of & instead of a, following the pronunciation of his day; op. Sunyas-fripas (Lat Sunsefridus) in the Naples Document (Wulfile ed Bernhardt p. 649), where as is certainly to be read as &

The close connexion between the nom. sing. ein and the oblique cases of ander, which was established in O.H.G., produced the Mid. and Mod.H.G. ein-ander. In O.H.G. we still find such a phrase as sie sind ein anderen ungelih 'they are unlike each other' (lit. 'one to others'). Cp. Skr. anyō-'nya-\$ 24 p. 41.

Balto-Slavonic.

- § 45. During the proethnic period of Balto-Slavonic only a few new uses seem to have been developed. Two points may be mentioned.
- 1. The original Indo-Germanic compounds with *v-'un-'(Class II) gave way to compounds with *ne 'not'. Cp. Lith. ne-gālė 'weakness, sickness, disease' O.C.Sl. ne-mošti 'feebleness, weakness', with Lat. in-valitūdō O.H.G. un-maht. Besides *ne-, another particle, which appears in Lith. as bè, in O.C.Sl. as bezū, and is connected with Skr. bahiş 'outside, without', had no doubt begun to be used as a negative prefix; cp. Lith. be-dūgnis O.C.Sl. bez-dūnū 'groundless', Lith. be-dēvis O.C.Sl. bez-bogū 'godless'.
- 2. The compound adjectival declension came into use, as Lith. gerùs-is 'the good (masc.)' = gēras jis (I § 147 p. 131), ().C.Sl. novă-ji novy-ji 'the new (masc.)' (I § 84 p. 80).

§ 46. Lithuanian.

Class I. The nom. sing. of compounds of this group generally ends in -1s masc. (gen. -10) and -2 fem. (ep. § 63).

Stems in -o-. Where the second member begins in a consonant, -a- is found less and less frequently in the course

of the literary period; the conditions of its loss still need careful investigation (cp. 1 § 636 p. 477, § 664, 1. 2 p. 522). The old form veida-mains is now veid-mains (changing the countenance) 'hypocrite' from véida-s 'countenance'. Old form auksa-kasis, modern áuks-kasis 'gold-digger' from áuksa-s 'gold'. darbā-veté 'place of work' from dárba-s 'work', svetimā-szalis 'foreigner, stranger' from svētima-s 'strange', gera-dējis 'benefactor', visa-galīs (beside vis-galīs) 'all-powerful, almighty' (or perhaps the last two contain an acc. neut., and belong to Class IV?). szón-kaulis ('side-bone') 'rīb' from szóna-s 'side of the body', vilk-paūtis 'wolf's egg' (a kind of inalodorous fungus) from vilka-s 'wolf', minkszt-prōtis 'weak in mind, soft-head' from minkszta-s 'soft, tender'. In l'russian -a- is generally kept, e. g. lauca-gerto 'partridge' from lauka-n acc. 'field', labba-segīsna-n acc 'benefit' from labba-s 'good'.

Where the second member begins in a vowel, -a- is always dropped, e. g. vēn-ākis 'one-eyed man' from véna-s 'one'. In Prussian on the other hand (as in Slavonic, § 47) the stem-final is kept; dayo-augis 'summer shoot or sprout' beside daya-gaydis 'summer wheat' (cp. deina-algenika- below, p. 80).

Forms containing the suffix -10-. We still find -ja- in the older authorities, c. g. nauja-vedis 'newly married man' from naŭja-s 'new'; cp. Pruss. caria-woytis karige-wayte 'review' (q in karige- = 1), crauya-wirps 'blood-letter' from crauyo krawia 'blood'. In the modern language -10- stems are treated as though they were stems in -0- or -i- The stem-final has been lost e. g. in jaut-vede 'leading-rope for oxen', jaut-akis 'ox-eye' (a plant) from jautis -cžio 'ox', věžligė 'cancer' from vežỹ-s 'crayfish', krau-leidŷs 'blood-letter' from kraūja-s 'blood'; examples with -a- are grebl-ā-kotis 'rake-handle' from grebly-s, brol-ā-vaikis 'brother's son' from bróli-s. Cp. also naujì-kaulis 'bony excrescence'.

Remark 1. We meet with spellings like nunj-veda beside nau-vedà 'newly married man', krauj-gysle 'vein of blood', vēj-malūnis 'windmill' (ep. bašnýcz-këmis beside bažnýt-kėmis below). These forms cannot be said to represent the stage preceding the loss of the j, which is only restored in them from the uncompounded word.

Remark 2 This treatment of go-stems in composition, which is also found in Lettic, reminds us of the treatment of the same stems where they are extended by derivative suffixes juin-akis like jain-akis jain-akis little ox' The form žem-obūtīgs (from žēme), which will be noticed further on, should be compared with kari-aže kari-aite 'hittle cow' from karie 'cow'. In Prussian kel-laxde 'spear-shaft' (beside keliu-n 'spear') seems to correspond to these Lithuanian compounds.

Stems in -ā-. -ō- is quite rare; the example sziksznó-sparnis 'bat' was mentioned on p 25. These stems are usually treated like stems in -o- galva-žudỹs and galv-žudỹs 'murderer' from galvà 'head'. vasarã-sziltis 'warmth of summer'. barzd-skutỹs 'beard-shaver, barber' from barzdà 'beard'. nugar-kaulis 'backbone' from nugarà 'back'. bal-ùpe 'moorland stream' from balà 'moor, marsh', vasur-augis 'this year's shoot' from vasarà 'summer', like vēn-ākis; ep. on the other hand Pruss. deina-algenikamans dat. 'to day-labourers' from deina-n acc. f. 'day' (Lith. nom. dēnà).

Feminines in -1a -c -1 are treated like the -10- stems. girparszis 'little wild pig' from giria gire 'wood' bažnýt-kėmis (also bažnýcz-këmis, see Rem. 1) 'village with a church' from bažnýczia 'church' (borrowed from Slav) žém-skire 'landmark, field-boundary', žem-obūlŷs 'carth-apple' from žēmė 'carth'. mart-merge 'bridesmaid' from marti, gen. marcziōs, 'bride'. An example with -a- is kregžd-a-žole 'swallow-wort' from kregždė 'swallow'. In Prussian, the feminines which correspond to the Lith. feminines in -ė show -e- and -i-, the equivalents of Lith. -e-, e. g. ape-witwo 'river-willow, osier' from ape, Lith. ùpe 'stream', wosi-grabis 'spindle-tree' from wosee 'goat' (Lith. *ože, cp. masc. ožỹ-s).

Stems in -1-. tri-rāžis 'three-pronged'. In words of more than one syllable -1- is rare, e. g. nakti-kovis 'roving at night'. The forms are usually without -i-, as ak-mirkis 'twinkling of an eye, moment' from aki-s 'eye', ánt-kiauszis 'duck's egg' from ánti-s 'duck'; cp. Pruss. perst-lansta-n 'dust-window, window-shutter' beside O.C.Sl. prūstī f. 'dust'. Here and there we have -a-, as ugn-ā-vētē 'fireplace' from ugni-s 'fire' (cp. darbā-vētē).

Remark 3. These stems may have first followed the analogy of stems in -o- (ugn-a-) and then dropped the -a- (ak- ant-), or else the -i-, where it does not occur, may have tallen out by regular phonetic change, leaving the forms to be remodelled by the analogy of compounds like darbā-vētē. In any case this group of compounds also (see Rem. 2) must be compared with diminutival formations like ak-ūžē 'little eye' ugn-ūzīs 'little fire' eto

Remark 4 aky-mojis = akiu mojis 'moment, twinkling of an eye' aky-moju 'instantaneously' (which we can scarcely suppose to have been influenced by forms like aký-ti aký-ta-s etc.) may perhaps contain the nom acc du used as the dual stem, aki for *aki, see I § 664 p. 523. Cp the retention of the original i in trý-lika 'thirteen' Whether ie in Bretken's alie-mirksnis 'moment' (Bezzenberger's Beitr zur Gesch. d lit. Spr 270) stands for ia is doubtful — It may be asked in passing how we should how regard the y in aby-pusei 'on both sides', which contains the dual abi pusi, where abi comes from *abé. Should we compare (in spite of the different accentuation) the relation of apy- to api- apē, of piy- to pri- prē-v

Stems in -u-. -u- was on the whole rather better preserved than -a- and -i-. alù-daris 'brewer' from alù-s 'beer'. virszù-galvis 'upper part of the head, crown' from virszù-s 'upper (part)'. The loss of -u- (-2u-) and the intrusion of -a- in its stead appear to be connected with the partial transition of u-stems into the o-decl.: pēt-valgis 'midday meal' from pētūs pl. 'midday', žmog-žudỹs 'murderer of men' žmog-edỹs 'devourer of men' from žmogù-s 'man', gyr-pelnỹs 'ambitious person, braggart' from gŷriu-s 'fame', pig-ā-kalbis beside pig-kalbis 'proficient in speaking' from pigù-s 'easy, cheap'. The form placz-kojis beside plat-kójis 'broad-foot' (platù-s 'broad') is explained by reference to the cases which have -2o-, as dat. sing. placziá-m, cp. bažnýcz-kemis beside bažnýt-kėmis p. 79.

(from môte, gen. moters, 'woman') shows the strong form of the stem, in contrast to the original type.

Class II. Of this class there is no trace in Baltic.

Class III. pra-mūtas 'named': Skr. prá-mata-s 'contrived, uttered'. pér-pintas 'planted crosswise' O.C.Sl. prě-petŭ 'drawn outwards, outspread', pér-jūstas 'girt over, girt about': Gr. περί-ζωστος 'girt about'.

pér-galve 'that which is laid over or around the head, hood': cp. Gr. περι-κέφαλον περι-κεφαλαία 'head-covering'. apý-vakaris 'the time towards evening' (apê vākara). pa-stalē 'drawer under the table (pō stalù)'.

āt-laikas āt-lēkas 'remnant': OC.Sl. otū-lēkū. sán-dora 'concord', sá-szlavos pl. 'sweepings' ep O.C.Sl. sa- Skr. sam-

ne-kàs 'scarcely any one, hardly any one'. ne-vëna-s 'not only one, not alone', but Pruss. ne-ams ni-ams 'no one', cp. Lat. noenu-m non

('las IV. dù-szimtu 'two hundred' trỳ-szimta 'three hundred' (for *trys-szimtai according to 1 § 664, 6 p 524) beside dù szimtù = trỹ(s) szimtaĭ trý-lika 'thirteen' keturió-lika 'fourteen' no doubt contain the nom. acc pl neut. Accusative forms. szĩ-mēt 'this year', szĩ-nakt 'this night', anã-syk 'that time' for szĩ mēta, szĩ nākt, anā syk We have no doubt instrumentals in szè-pus 'on this side' anà-pus 'on that side' from pùsé 'half'. aby-puseī 'on both sides' is formed from abì pusì 'both sides' (cp. Rem. 4). Du. nom masc. jã-du fem jē-dvi, dat. instr. masc. jēm-dvēm fem. jóm-dvēm, from jìs 'he' and dù 'two', similarly du. pacziù-du from pùts 'self', with other forms of the same sort.

In some dialects we find kas-vākaras adj. 'every evening' kas-mēts adj. 'every year', originally subordinate relative clauses, i. e. 'which ever evening (year) it may be' (the Author, Lit. Volksl u. March. 320, and for a similar usage in Slavonic see Miklosich, Vergl. Gr. II 376, IV 87). In other dialects the analogy of accusatives of time like $t\bar{q}$ ($s\bar{z}i$) $v\bar{a}karq$ 'in the evening (this evening)' gave rise to kasvākarq, kasmētq, similarly kasdēna 'daily' and other forms; and, with loss of the

ending, kasmēt kasdēn etc.; and further, derivatives like kasdēnis kasdēnims 'daily'. Cp. Lat. quotannīs § 36 p. 63.

Compounds having a dependent genitive for their first member are rare; e. g. szuns-ûdēgius ('dog-tailed person') 'flatterer, fawner' from szū, gen. szuns, 'dog'. There are more examples in Lettic, as femes-mûte 'earth-goddess' from feme = Lith. žēmē 'earth'.

Remark 5. How are we to regard bits-ange 'house-door' (bita-s 'house'), and Lett. gads-kárta 'time of year' (gads 'year', stem gada-) which seems to be a form of the same kind? Was there a stem *butes-? (No great importance perhaps should be attached to the Prussian form buttas-taws beside buttan-tāws and butta-tawas 'house-father').

Further, what is the origin of the y in karsztýmetis 'hot time' (kárszta-s 'hot', kaïszti-s m 'heat'), brangýmetis 'dear time, dearth' (brangù-s 'dear'), darbýmetis 'work-time' (dárba-s 'work'), vasarýmetis 'summer time' (vasarà 'summer')? Should we start from the nom. pl. karszti mētai (ep aby-pusei from abi pusi, Rem 4) or a form *karsztýmmētai? For the general use of the ending -ymetis op Gr. -npógos -nyerýs § 29 Rem. p. 47.

kits kita 'one another' is now regarded so much as a single word that the first part retains its masculine form even when the subject is feminine. In Bretken (16th century) we still find moteriszkes gedója prész kità kita 'the women sang against each other'.

§ 47. Slavonic. Class I. Many of the following examples are not popular combinations, but a scholar's translations of Greek compounds.

Stems in -o-. The stem has -o-, whether the second member begins with a consonant or a sonant. O.C.Sl. bogo-rodica 'mother of God' from bogū 'God', črīno-vlasū 'black-haired' from črīnū 'black', črīno-okū 'black-eyed', bogo-izbranū 'chosen of God'. bogo-učenū 'taught of God'.

Forms with -ze- from -io- (I § 84 p. 80): voje-voda 'leader of a host' from voji pl. 'warriors, soldiers', lŭže-prorokŭ 'false prophet', from lūžī 'lying, false', gnoje-imenitŭ 'κοπρώννμος' (nickname of a Byzantine emperor) from gnojī 'dung', maže-ubijīca 'homicida' from mažī 'man'. Through the preponderance of the forms with -o-, this sound often took the place of pr.

Slav -e- in later Slavonie, e g Serv konjo-zobica ('equum nutriens') 'bag of fodder'.

Stems in -a- always show the ending of the o-stems vodo-nosh 'water-vessel' from coda 'water', rako-păsanije ('xeigó-zoagov') 'bill of debt, bond' from raka 'hand'; rako-obycină 'accustomed to the hand, tame'. zemlje-měrije 'land-measurement, geometry' from zemlja 'land', zmije-nožínă 'snake-footed, with feet of or like snakes' from zmija 'snake', duše-gubīnā 'destroying the soul, annihilating' from duša 'soul', zmije-obrazīnā 'having the form of a snake', duše-ubijīca 'murderer of souls'. Serv. zmijo-glav 'snake-headed' for the older and true form zmije-.

Stems in -i-. tri-ząbū 'trident' from tri 'three'. Many examples have -o-, following the analogy of o-stems. as gosto-ljubivũ 'hospitable' from gosti 'stranger, guest', zvēi o-vudīnũ 'having the appearance of a wild beast' from zvěrī 'wild beast', sũmi ito-nosaiù 'death-bringing' from sũmi it' 'death', zvěro-obrazīnú 'having the form of a wild beast'. We often find -e-(but this is late), e g. zvěre-vudīnũ beside zvěro-vudīnũ, zvěre-imentinũ beside zvěro-imentinũ beside zvěro-imentinũ 'named after an animal', pate-vočdī 'guide'.

Remark. It is a question whether in the latter examples -e- is the i of the stems in -10- (rop- etc.), as Osthoff assumes (Verb in d Nominale 213), or the e of forms like patent for patimi (I § 36 p 36, Leskien, Handb. 2 p. 21 ff.) Osthoff's view seems to be the true one

Stems in -n- have -o-. syno-tvoryenize viodsola, reception into the position of a son' from synü 'son'. medo-točinŭ 'sweet-streaming' from medŭ 'honey': ('ompare the transference of u-stems to the o-declension, which is found in the very carliest authorities; such forms as synochū instead of synüchū (I § 52 p. 44, and Leskien, Handb.² p. 21 ff), need hardly be taken into account, see the last Remark As regards medvēdī see § 12 p. 26.

krūv-o-politije 'bloodshed' from the stem krūv- 'blood', gen sing krūv-e, Idg. stem *qruu- *qrū-, cp. Gr. λχθν-ο-φάζος. Yet the forms with -o- may not have sprung up until after some

of the cases of the word had been formed afresh in the i-declension, as non. kriw-i.

Stems in -n-. kamen-o-vidină 'having the appearance of a stone' from kamy 'stone'. imen-o-nosină 'bearing a name' from ime 'name'. The original types of formation seem to have completely disappeared.

Stems in -r- matere-dosaduteli and matere-ubiji a 'matricide' like zrčre-vidină (see p 84 above). Beside these we have, without -o-, četvrč-gubă 'quadruplus' for *četver-gubă

Stems in -s-. Generally -o- appears instead of -es-; čudo-točinň 'sending forth wonders, spreading them abroad' from čudo 'wonder', oko-izmetinů 'casting out the eye' (on the other hand Russ, and Serv have oče-, Russ oče-vidnyj 'appearing to the eye') from oko 'eye'; compare the transference of forms from the es-declension to that of o-stems, as instr. sing. nebomi beside nebesimi. More rarely we find -es-o-, as čudes-o-točinů beside čudo-točínů, nebes-o-podražatelinů 'imitating heaven', cp. loc. pl. nebesěchů instead of nebesíchů.

Of Class II no examples remain in Slavonic

Class III. pro-strītă 'outstretched'. cp. Skr. prá-stīrna-s 'stretched forth, outspread' u-vestă 'crowned' u-vesta 'to crown': cp Pruss. au-klipt-s 'hidden' Skr. áva-hata-s 'struck back, driven off, slam'. iz-etă 'taken out' iz-eta 'to take out' Lith. isz-imta-s isz-imta

pri-morije 'the region by the sea' (pri mori). na-glavije 'turban' (that which is on the head [na glavě]). Cp. Miklosich, Denkschr. d. Wiener Ak. XIII 19 f.

są-logŭ 'consors tori' · cp. Gr. α-λοχος, Idg. *som- *sηι-'together, with'. pa-dŭšti 'step-daughter': Lith po-dukra.

Class IV. bratŭ-sestra 'brother and sister'; this was inflected like the nom du. of an o-stem, hence bratŭsestroma, compare the dimin. bratŭsestrīca. Jisusŭ-Christosŭ has gen. Jisusŭ-Christosa. dŭva-desetīnŭ 'twentieth' (beside dvo-desetīnŭ), derived from dŭva deseti ('two decades') 'twenty'. Many similar examples occur in modern Slavonic dialects; e. g. in Polish wielka-noc ('great night') 'Easter' has gen. dat. wielkanocy.

polu-nošti 'in the middle (loc.) of the night (gen.), at midnight', and similarly polu-dine 'at midday'; compare polu-noštije 'inidnight' polu-dinije 'midday', polu-noštijë adj. 'of midnight' polu-dininë adj. 'of midday' obonëpolinë 'situated on the further bank', derived from obë onë polë 'on that side, on the further bank'. peti-na-desetinë 'fifteenth', derived from peti na desete ('five on ten') 'fifteen'. With -o-, the 'vowel of composition', inserted: osmo-na-desetë 'eighteenth', cp. Gr. καλο-κάγαθία § 30 p. 51. Compare on this subject Baudouin de Courtenay in Kuhn-Schleicher's Beitr. IV 204 ff.

krūvi-prolitije (beside hruv-o-prolitije, see above) 'bloodshed', gen. of krūvī 'blood'. domu-zakonīnikū 'house-manager', gen. or loe. of domū 'house'. bratu-čęda (beside brato-čęda) 'brother's daughter', dat. (possessive dat.) of bratū 'brother', bogu-mrīzūkū (beside bogo-mrīzūkū) 'hated of God' bogu-milū (beside bogo-milū) 'dear to God' (proper name), dat. of bogū 'God'. doma-čędīcī 'domi natus, vernaculus' doma-živīcī 'living at a place, inhabitant', doma adv. 'at home' from domū. As the special meaning given by the case of the first member became obscured, there sprang up formations like Czech. Bohu-sud on the analogy of Bohu-mil, ep. O.C.Sl. bogo-sądīnē adv. 'dei indicio'.

The -i- appearing in the cases of the i-stems (kriivi-prolitive) was connected in popular usage with verbs in -iti and treated as having an imperatival force. Such a form, for instance, as Misti-drugü (Czech. Msti-druh) was properly 'ultionis socius', misti being gen. of misti 'vengeance'; but since misti was also 2. sing. impv. of mistiti 'to avenge', the word came to be regarded as meaning 'ulciscere socium'. This change of meaning produced a large number of compounds which were either formed on the new type, or altered to suit it, e. g. Serv. Ljubi-voj (love the warrior', ljubiti 'to love') instead of *Ljubo-voj, cp. Ljubo-brat 'qilaishqos'. See Osthoff, Verbum i. d. Nom. p. 209 ff. Cp. § 30. 41.

NOUN COMPOUNDS CONSIDERED IN RESPECT OF THEIR MEANING.

§ 48. In Stem-Compounds of the proethnic Indo-Germanic type (e g. Skr. aśva-hayá-s Gr. iππό-βοτο-ς) the nature of the relation which the first member of the compound bore to the second was quite undefined to start with. It was implied solely in the particular meaning which happened to be assigned to any one such combination. The logical relation between the two parts must naturally have assumed a different character in different cases. If the parts of a compound meant 'sun' and 'moon' respectively, the logical connexion between them would not be the same as if they meant 'sun' and 'beam': 'sun and moon' in the first case, 'beam of the sun' in the second. If words meaning 'man' and 'slaying' were compounded, they would be related in one way ('slaying a man'), words meaning 'spear' and 'slaying', in another ('slaying with the spear'). A number of compounds whose parts had the same logical connexion would form a group, and many such groups arose in the proethnic Indo-Germanic period. Hence even the proethnic compounds of noun-stems may be arranged in a series of Classes according to their meaning. These Classes, we shall find, need no serious extension to include all the compounds of this kind formed at later times in the separate languages.

The compounds whose initial member was a definite inflexional form have a different history. From the first this inflected form gave to the relation between the parts a perfectly defined meaning, e. g. Skr. divi-jā- 'born in heaven', divō-rūc- 'shining from heaven'. It must be observed, however, that in later times the special meaning attached to the inflexional ending of the initial member was often forgotten. Cp. § 17 p. 32 f.

The native grammarians of India and modern students of language in Europe have devoted much labour to the task of classifying compounds according to their meaning.

Remark. It must be confessed that in these attempts at classification scholars have almost from first to last allowed too much influence to a

desire for logical symmetry, and too little to the true historical method, which abstains from all criticism that is merely a priori and that is not directly suggested by and limited to the nature of the facts to be studied In particular it is often forgotten that in most compounds the mutual relation of the two parts in the mind of the speaker which the scholar has to reproduce is a conception far too indefinite and variable to be confidently assigned, as too often it is, to this one or that of the numerous classes of meaning. Hence there has often been a needless amount of contention as to whether a compound belongs to one class or the other, whether for example Skr. sakhi-gana- (sakhi-'friend', gana- 'band') is one of the Dependent [Whitney, Skr Gr § 1263] or of the Descriptive [ib § 1279] compounds (whether it is equivalent to 'amicorum caterva' or 'amica caterva'), or whether πατροin marou-more's 'patricide' is to be regarded as genitive or accusative. But as a rule these precise relations of meaning were simply imported into the words by the grammarian - a mistake natural enough where a paraphrase was needed to render the compounds into other languages - whilst the speakers themselves were content with a general impression of the meaning. If the established canons are to be strictly maintained, we must at least allow a large number of intermediate stages, in which the different classes meet

§ 49. There are two leading principles by which we can distinguish the different kinds of compounds, which go back to the proethnic period and which are of primary importance in any attempt to classify the compounds according to their meanings. First 'coordinating compounds, (called in Sanskrit dvandva) are opposed to 'subordinating compounds', and secondly 'non-epithetised' (nicht mutierte) are opposed to 'epithetised' (mutierte) compounds'. But in neither pair were the contrasted classes ever absolutely distinct, there were always various intermediate stages between one class and the other.

In the first of the two contrasted classes, the coordinating compounds, the two members stand side by side on the same level, nothing more being implied than the addition of two items, these may be regarded as joined together by 'and', whence such compounds have been called 'copulative'. In subordinating compounds, on the other hand, one member is defined more closely by the other, the one contains the principal idea, the other is merely an adjunct subordinated to it.

The subordinating compounds certainly formed by far the larger group in the Indo-Germanic period, and so it has remained in nearly all the subsequent developments of the separate languages (Sanskrit is an exception, see p. 90 f.). The way in which one of the two members was defined by the other was shewn in each case by their meaning or grammatical character, and in all periods it has varied between very wide limits. We may instance the following groups of compounds with parallel meanings in the different languages.

- 1 Skr $r\bar{a}ja$ - $r\bar{s}i$ - \bar{s} 'a sage who is a king, royal sage', Gr $l\bar{a}\tau\rho\delta$ - $\mu\alpha\nu\tau\nu$ c' a seer who is a physician', Lat. angur- $p\bar{e}s$ 'having a foot which is a serpent, serpent-footed', O Ir. $r\bar{\imath}g$ -faith 'a prophet who is a king, royal prophet' ban-chu 'a dog which is a female, bitch', Goth. piu-mayus 'a boy who is a servant' (translation of $\pi a\bar{\imath}s$) O II G. yold-riny 'a ring which is gold, gold ring', Lith. old-medis 'a tree which is a pyrus malus old-medis, apple-tree', O.C.Sl old-
- 2. Skr mātṛ-ṣvasar- 'mother's sister', Armen. skesr-air 'mother-in-law's husband', Gr. πατρ-άδελφος 'father's brother', Lat. mūs-cerda 'mouse's dung', O.Ir rīg-thech 'king's house', Goth piudan-gardi f 'king's house', Lath brol-ā-vaikis 'brother's child' O.C Sl bi ato-čçda 'brother's daughter' Cp. compounds containing genitive forms like Skr. mātuh-švasar- 'mother's sister', Armen. haur-eλbair 'father's brother'
- 3. Skr. adhara-hanú-š 'lower jawbone', Armen kaj-air 'valiant man', Gr ἀχοό-πολις 'upper city, upper part of the city', Lat. plēnι-lūmum 'full moon' longi-pēs 'having a long foot', O.Ir find-folt 'having white hair', Goth. hrúinja-hairts 'having a pure heart', O.H.G. junc-frouu a 'young lady', Lith. jử d-varnis 'black raven' rud-kāklis 'having a red neck' O.C.Sl. krivo-nosū 'crooknosed'.
- 4 Skr. saptá-ršay-as pl. 'the seven wise men' (name given to the Great Bear) tri-rātrá-m 'space of time including three nights', Armen. hing-am 'five years, quinquennium', Gr. τρί-πους 'three-legged frame' τέθρ-ιππου 'team of four horses', Lat. bi-pēs tri-noctium, O.Ir. tre-choste 'tripod' Gall. tri-garanus 'provided

with three cranes', O.H.G. zwi-houbit 'having two heads', Lith. tri-rāžis 'having three prongs' O.C.Sl. tri-zabū 'having three teeth'.

- 5. Skr. tamra-dhūmrá-s 'dark tan-coloured', Gr. ω΄γοό-ξανθος 'pale yellow', O.Ir. dub-glass 'dark blue', Mid.H.G. bleich-grüene 'pale green', Lith. jů'd-beris 'black-brown' Russ. světlo-zelenyj 'light green'.
- 6. Skr. vēda-víd- 'knowing the Veda, Veda-knower', Gr. βου-πλήξ 'goading oxen, ox-goad', Lat. jū-dex 'declaring right, judge'.

In this way a large number of categories may be distinguished; but the boundary line between any two is never clearly marked.

The coordinating compounds have nowhere been largely developed except in Sanskrit, and there only in the post-Vedic period. Probably there was a time in proethnic Indo-Germanic when no compounds of this class existed except those which had a case-form for their initial member, e. g. *duō-dekm twelve' (2 + 10). Skr. dvd-daša etc., see § 16 p. 32; and dvandva compounds with a stem for the initial member only arose when compounds containing a case were re-modelled on the analogy of the older subordinating class, which had the simple stem. This process of conversion may often be traced with certainty in historical times, e. g. Skr parjánya-váta instead of the older form parjánya-váta 'raincloud and wind' (§ 24 p. 41), cp. also Gr. καλο-κάγαθία, νηλιπο-καιβλεπέλαιος, O.C.Sl. osmo-nadesetŭ (§ 30 p. 51), and Skr. pūrva-pūrvas for pūrvas--purvas and the like, § 53. The use of the stem instead of a case cemented the combination more firmly; and such a process would be all the more natural because many compounds of the subordinating class approach very closely to the coordinating compounds in regard to the particular relation subsisting between their parts, and there was never any sharp distinction between the two groups (cp. p. 91).

Whether dvandva compounds were formed with the simple stem in proethnic Aryan is doubtful. Even in the Rig-Veda, coordinating compounds containing the simple stem

occur only rarely by the side of those containing a case; e. g. ajāváyas (aja-aváyas) pl. 'goats and sheep'. The extension of the class is a special development in Sanskrit, spreading only by slow degrees, until in the classical language we find any number of nouns thus strung together into what was grammatically a single word, as mukhabāhūrupādatas (mukha-bāhu--uru-pādatas) 'from countenance, arms, thighs, and feet'. In non-Aryan languages, coordinating compounds containing a stem are, on the whole, comparatively rare. In Greek no clear examples occur until rather late, e. g. λιρ-ασπιδ- 'lyres and shields' seen in τορνευτο-λυρασπιδο-πηγός joining together turned lyres and shields'1), νυνθ-ήμερον 'diem noctemque', λουτρά ἀνδρό--γυνα 'baths for men and women alike', λευνο-μι'λας 'white and black'; in Modern Greek there are many formations of this kind, as γυναικό-παιδα women and children', μαχαιφο-πέφονα knives and forks'. Lat. reci-procu-s, originally 'going backwards and forwards' (§ 86 a), su-ove-taurīlia (the form su-ovi-taurīlia is perhaps more correct) 'a sacrifice in which a pig, a sheep, and an ox are slain'. In Keltic and Germanic I know of no examples except those whose initial member may conceivably be a case, as Mid.Ir. brat-gaisced 'mantle and weapons' gorm-yel 'blue and white' O.H.G. sunu-fatar-ungo Hild. 4 'people of the son and the father' (-unga- is a suffix which denotes 'belonging to' something, cp. § 88) and O.Sax. gi-sūn-fader 'son and father', whose initial member may be nom. sing. (cp. O.C.Sl. bratŭ-sestra, where it is certainly so). Lith. vyr-moterinis 'concerning man and wife, concerning married people', Lett. mi/ch-du/as 'barley and oats'; O.C.Sl. maže-ženu 'having the nature of man and of woman, ἀνδρόγυνος' (Gregor. Naz.), Russ. bčlo-rumjanyj 'white and red' (of the face).

We have already remarked that there is no fixed boundary between coordinating and subordinating compounds. The Greek iargó-µavris, which was placed in the latter class on p. 89, may

¹⁾ This would be a drandra compound even if the scholiast's explanation were correct: οῦ τοριεύουσι λύρας καὶ ἀσπίδας πηγνύουσι.

be also taken to mean 'one who is physician and seer', and similarly there are two possible explanations of such compounds as $\tau \rho a \gamma - \ell \lambda a q o c$ 'goat-stag' $\gamma \lambda \nu \nu \dot{\nu} - \pi \nu \rho o c$ 'bitter-sweet', Lat. dulcacidus, and many more in all the Indo-Germanic languages

§ 50. The distinction between the two classes of compounds which we term 'non-epithetised' and 'epithetised' (other terms widely used are 'primary' and 'secondary', compounds of 'lower' or of 'higher order', the second class is called by the Sanskrit grammarians bahuprthi) depends upon a certain change of meaning in the compounds, developed in proethnic Indo-Germanic, and since that time constantly repeated in new-examples. For instance, *dus-menes- 'evil mind' (ummutatum) acquired the meaning 'an evil-minded person' (mutatum) (nom. sing. Skr. durmanās Gr. δυσμετής), and in Modern German dick-kopf 'thick-head' means 'a thick-headed person' [cp. Eng redbreast etc.] essential point in this process is the conversion of a substantive into an adjective, the concrete meaning was disregarded, so that the idea remaining in the word was solely that of the quality or qualities which belonged to the concrete person or thing. This development of meaning is one which may often be traced even in uncompounded substantives, and it will often meet us again in the course of our investigation. The substantival origin of these forms is still sometimes shown in the deficient expression of their adjectival function, e. g in Greek pododártvlo-'rosy-fingered' was used in spite of its -o- for the fem as well as the mase., and χρῦσο-νόμη- 'golden-haired' in spite of its -nfor the mase, as well as the feminine. But extended formations were very soon developed to give fuller expression to the adjectival character of the compounds; for instance the adjectival -yo- had come to be used as a convenient affix in the proethnic period: cp. Skr. dáša-mās-iya- 'happening every ten months' etc., § 63, 2. It is probable, as we saw in § 19 p. 35, that there was even then a difference in accentuation between the mutata and the immutata.

The student must be on his guard against the idea that every epithetised compound in the Indo-Germanic languages

has passed through this course of development for itself. By far the greatest number were formed with the derived sense, on the model of older forms.

Both subordinating and coordinating compounds containing substantives are found with the epithetised meaning, e. g. Gr. πολύ-οινος 'having much wine' and ανδρό-γυνος 'intended for men and women' (lovrgor). Examples have been given in the preceding section, and to these a few may be added from the group of subordinating compounds. Skr. híranya-kēša-s 'golden-haired', Armen. hast-a-bazuk 'strong-armed', (ir. hevrώλενος 'white-armed', Lat. magn-animus, ().Ir. nocht-chenn 'barcheaded', Goth hráma-hairts who has a pure heart', Lith minksztgalvis 'who has a weak head' = 'soft-headed' O.C' Sl. crinovlasu 'black-haired'. cp. the non-epithetised compounds Skr. adhura-hanú-š 'lower jawbone', (†r ἀνρό-πολις 'upper city' etc. p. 89. Skr. a-putrá-s 'who has not a son, sonless' Armen. an-kin 'who has no wife, widower', Gr. a-nais 'childless', Lat. im-berbis, Mod.Cymr an-mwedd 'endless, unending' (from Mid.Cymr. duved 'end' = () Ir dead); in Germanic and in Balto-Slavonic there is no group of epithetised compounds with *n- 'un-', but cp. Mod II.(i. eine verfolyte unschuld = 'innocent person', lit. 'persecuted innocence', Lith ne-kalbà 'no-speech' = 'who says nothing'. Parallel to these are the non-epithetised compounds, Skr. á-kumāra-s 'no boy (any longer)', Lat un-unīcu-s, O.H.G. un-chruft 'weakness', etc

Finally we must observe that even between mutata and mmutata no sharp line can be drawn. Take for example the Greek ἄδωρα διῦρα 'gifts that are no gifts' (Soph. Aj. 665). Here άδωρα may be regarded equally well as a substantive or an adjective; so also πόλις νεόπτολις (Aesch. Eumen. 690) and similar instances. In these the feeling of the language may be as undecided as it is e. g. in the Mod.H.G. phrases es ist not 'there is need of it, it is needed', er ist schuld 'he is the guilty cause, it is his fault' and the like. Speaking generally, no sharp distinction between substantive and adjective can be drawn in the Indo-Germanic languages (§ 138).

REDUPLICATED NOUNS 1)

- § 51. We distinguish three groups:
- I. Forms in which the first element of the reduplication is a more or less complete form of the root, e. g. Skr. gár-gar-as 'eddy';
- II. Forms in which it is a noun-stem, e. g. Skr. sukha-sukhēna (instr.) very gladly,
- III. Forms in which it is a case-form, e. g. Skr. dwé-dwē 'daily, day by day' (loc.).

With the second group should be compared such compounds as Skr. sukha-svāpa-s 'pleasant sleep'; with the third, compounds like Skr. divō-já-s 'child of heaven' (§ 10 ff.).

§ 52. Class I. A number of the words belonging to this class may have been either formed directly as nouns, or derived from older reduplicated verbal forms. No certain line of distinction can be drawn, and though we shall here take no account of verbal nouns in the strict sense, i. e. participles etc. (e. g. Gr. $\varkappa \varepsilon - \varkappa \varrho \bar{\alpha} \gamma - \iota \omega' \varepsilon$), yet we must include many nouns which were certainly formed in connexion with the verbal system (e. g. Gr. $\varkappa \varepsilon - \varkappa \varrho \bar{\alpha} \gamma - \mu \omega' - \varepsilon$).

As regards forms with 'broken reduplication' see § 6 p. 13.

1. Many reduplicated forms derived from roots beginning in a consonant stand in more or less clear connexion with intensive verbal formations, as Skr. dár-dar-ti 'rends asunder, shatters'.

Skr. gár-gar-as 'eddy', Gr. γαρ-γαρ-εών 'uvula' γέρ-γερ-ο-ς 'throat, gullet', Lat. gur-gul-iō gur-g-es, O.H.G. quer-chal-a quer-ch-a O.Icel. kver-k 'throat' (for the interchange of r and l see I § 282 p. 225 f.): cp. the Skr. intensive verbal forms, part. jár-gur-aṇa-s and 2 sing. jal-gul-a-s. Skr. bam-bhar-a-s 'bee', Gr. πεμ-φρ-ηδών a kind of wasp: *bhem-bh(e)r- for *bher-bher-, see I § 282 p. 226. Gr. τή-θη 'grandmother' τη-θί-ς 'aunt', Lith. dē-dē 'uncle' O.C.Sl. dē-dū 'grandfather'.

¹⁾ The authorities on this subject are cited on p. 11, footnote 2.

Skr. gad-gad-as 'stammering', beside gád-a-ti 'pronounces'. can-cal-cas 'moving to and fro' beside 3. sing. can-cal-ya-tē. Avest. ra-rem-u- 'resting, reposing', from \(\sigma rem-\) rem-. Skr. r\(\bar{e}-rih-\) -\(\alpha \) 's 'licking' \(\bar{e}-vij-\alpha \) 'hastening'.

Gr. $\beta\acute{a}\varrho$ - $\beta a\varrho$ - $o_{\mathcal{G}}$ 'speaking unintelligibly': Lat. bal-b-u-s, cp. Skr. bal-bal-a- $kar\bar{o}mi$ 'I stammer'. $\gamma o_{\mathcal{T}} - \gamma \acute{v}\lambda$ -o- ς 'round', beside $\gamma av\lambda\acute{o}$ - ς 'milk-pail, vessel'. $\pi a\iota$ - $\pi \acute{a}\lambda$ - η 'flour-dust', beside $\pi \acute{a}\lambda$ - η 'flour-dust, dust', Lat. pollen.

Lat. quer-quer-u-s 'cold, so as to make one shiver'; compare perhaps Goth. faŭrht-s 'timid' (Bezzenberger in his Beitr. XII 77, and above, I § 444 p. 329). Mar-mar (Song of the Arval Brethren): Gr μάρ-μαρο-ς 'gleaming, shining'? (Pauli, Altital. Stud. IV 56 ff.). derbiōsu-s 'full of scabs or sores' for *der-d-u-(I § 170 p. 150): Skr. *dar-dr-u- dar-d-ū- 'eruption on the skin'. can-cer (I § 269 p. 217): Gr. ναρ-κ-ίνο-ς Skr. kar-kaṭa-s 'crab'.

O.Ir dor-d 'susurrus' (cp. 3. sing. mid. derdrethar 'there is a sound, a cry'). Gr. $\tau \epsilon \rho - \delta \rho - \epsilon l \bar{\alpha}$ 'empty chatter' $\tau \sigma r - \delta \rho - \epsilon l \bar{\alpha}$ 'murmur'. graig 'drove of horses' for *gra-qn-?: Gr. $\gamma \epsilon \rho - \gamma \epsilon \rho - \alpha \epsilon l \bar{\alpha}$ Hesych., $\gamma \alpha \rho - \gamma \alpha \rho - \alpha \epsilon l \bar{\alpha}$ 'swarm, heap' $(\gamma \alpha \rho - \gamma \alpha l \rho \alpha \epsilon l \bar{\alpha})$, Lat. grex stem gre-g-; cp. § 160 Rem. 1.

Mid H.G mur-mer mur-mel 'murmur, growl, dull sound' (O.H.G. mur-mur-ōn mur-mul-ōn 'to murmur'): Skr. mar-mar-α-s 'roaring, roar', Lat. mur-mur, cp Gr. μορμέρω for *μορ-μυρ-μω 'I murmur, roar', Lith. mùr-m-ιυ 'I growl'. O.H.G. muo-ma 'mother's sister': Lith. mo-mà O.C.Sl. ma-ma 'mother'.

Russ. pele-pel-ka pere-pel (1 § 251 Rem. 2 p. 224 f.) Lith pė-pal-a (or pė-pal-a) Lat pái-pal-a Pruss. pen-pal-o 'quail' · ep. Lat. pul-pul-āre pul-p-āre 'cry, shriek' (of birds)? O.C.Sl. gla-gol-ŭ 'noise, word' for *gol-gol- (loc. cit.): Skr. gar-gar-a-s a musical instrument, Gr. γαρ-γαρ-ί-ς θόρυβος Hesych. (cod. γαργαρής). Lith. kaň-kal-a-s 'bell' kaň-kl-ys 'guitar' O.C.Sl. kla-kol-ŭ 'bell' for *kol-kol- (loc. cit.): Skr. kar-kar-i-š 'sound'. Serv. vje-ver-ica Mod.Slov. vĕ-ver-ica Lith. vo-ver-ē vaĭ-ver-i-s Lett. wâ-wer-i-s Pruss. we-war-e: Mod.Pers. var-var-ah Mod.Cymr. gwy-wer 'squirrel'. Mod.Slov. Mod.Bulg. pa-prat Pol. pa-proć

Russ. pa-porot and Lith. (borrowed?) pa-parti-s 'fern', cp. O.H.G. var-n 'fern'.

2. In other nouns from roots beginning in a consonant the form of the reduplication must be compared with that seen in verbal forms with Idg. e, such as Gr. δέ-δορχ-α χέ-κλ-ετο; and there is no doubt that in some cases there is a direct connexion between the verbal and nominal forms.

Skr. ba-bhr-ú-ş adj. 'brown', (when used as a subst. it means a large kind of ichneumon) Avest. ba-wr-i-š 'beaver', O.H.G. bibar (cp filu 'much' ground-form *pelu) Lith. bēbru-s O.C.Sl. bebrū 'beaver', Idg. *bhe-bhr-u-, Gall. Bibrax and Lat. fiber belong to 3 (infr.), so also perhaps Corn. befer 'beaver' (which however may very possibly be a word borrowed from A.S.). Skr. ca-kr-á-m 'circle. wheel' Avest. ca-xr-e-m 'wheel', A.S. hweo-wol hweól 'wheel', Idg *qe-ql-o-, ep. also Gr rv-xl-o-s vol. I § 427 p 314 and the unreduplicated O.C.Sl. kolo (stem koles-) n. 'wheel'.

Skr. va-vr-i-\$ 'covering' va-vr-ú-s' hiding oneself' Avest.-vaoiri-husk' (for *va-vr-1, 1 § 160 p. 144), cp. the Skr. perfect stem va-vr- from var-'cover over'. Skr. cá-hr-i-\$ 'effecting' ca-kr-u-\$ 'accomplisher', cp. the perfect stem ca-kr-Skr da-d-i-\$ 'giving' dá-dh-i-\$ 'bestowing', cp the present and perfect stems da-d-, da-dh-. With these compare Ved. sā-sah-i-\$ 'victorious', with the perfect stem sā-sah-. Skr du-dhṛṣ-á-s 'bold, courageous'. Avest. za-zar-an- 'raging'.

Gr. $\tau \dot{\epsilon}$ - $\tau \alpha \nu$ - σ - ς 'tension of the limbs', from \sqrt{ten} -. $\tau \dot{\epsilon}$ - $\tau \alpha \dot{\epsilon}$ probably 'guineahen', beside $\tau \dot{\epsilon}$ - $\tau \rho \dot{\alpha} \zeta \omega$ cackle'. $\kappa \dot{\epsilon}$ - $\kappa \rho \dot{\alpha} \varphi$ - $\alpha \lambda \sigma \dot{\varsigma}$ 'net-headdress, hood', beside $\kappa \dot{\epsilon}$ - $\kappa \rho \dot{\alpha} \varphi$ - α . $\beta \dot{\epsilon}$ - $\beta \eta$ - $\lambda \sigma \dot{\varsigma}$ 'accessible, profanus', beside $\beta \dot{\epsilon}$ - $\beta \eta$ - $\nu \alpha$. $\kappa \dot{\epsilon}$ - $\kappa \rho \dot{\alpha} \gamma$ - $\mu \dot{\sigma}$ - ς 'cry', beside $\kappa \dot{\epsilon}$ - $\kappa \rho \dot{\alpha} \gamma$ - α . $\kappa \dot{\epsilon}$ - $\pi \sigma \dot{\omega} \gamma$ - $\sigma \dot{\varepsilon}$ - $\tau \dot{\omega} \dot{\omega}$ - $\tau \dot{\omega}$ -

Lat. me-mor: cp. Gr. μέρ-μερ-ο-ς 'noteworthy, horrible' and Skr. perf. sa-smára (Osthoff, Paul-Br. Beitr. VIII 549 f.).

fe-br-i-s, compare Skr. bhur-á-ti 'is unquiet, throbs'. sēd-ēs for *se-zd-, \sqrt{sed} -, cp. I § 314 Rem. p. 253.

O.H.G. zittar-oh A.S. teter 'pustular eruption', pr. Germ. *te-tr-u-: Skr. da-dr-u- Lith. de-der-vine 'pustular eruption', cp. Lat. der-b-iosu-s etc. formed on the type of 1, p. 95.

Lith. tē-tervina-s 'heathcock' O.C.Sl. te-trēvī 'pheasant': Gr. τέ-τριξ τέ-τραξ τε-τράων a kind of fowl, ep. also Skr. ti-tttri-ξ ti-ttirá-s 'partridge'. O.C.Sl. pe-pelŭ (beside po-pelŭ) 'ashes', ep. Czech. plá-pol 'flame'. Lith. te-tà O.C.Sl. te-ta 'aunt, nurse': Gr. τέ-ττα 'little father, dad', ep. Skr. tā-tá-s, a word used by parents in addressing children and vice versa, Lat. ta-ta, Lith. tē-ti-s 'little father'.

3. In another group of formations from stems beginning in a consonant, the reduplication resembles that of verbal forms with Idg. 1, such as Gr. 1-στη-μι, and there is no doubt that sometimes they stand in direct connexion with them. On the whole, however, such forms are rare.

We have no doubt a genuine Indo-Germanic example in Skr. $\dot{s}i-\dot{s}ir-a-s$ 'cold, frost; cold (adj.)' (ground-form * $\dot{k}i-\dot{k}ll-o-$), with which Bugge (Arkiv for nord. filel. II 355) connects O.Icel. $\dot{h}\bar{e}la$ f. 'rime' for pr. Germ. * $\chi i-\chi l-\bar{o}n$, and possibly another in Skr. $\dot{s}i-\dot{s}u-\dot{s}$ 'young creature, child' if it is identical with Gr. $\chi \bar{i}-\chi v-s$ 'strength' (compared with Skr. $\dot{s}v\bar{a}$ 'to swell out', Gr. $\chi v\dot{s}\omega$)?

Skr. ci-ktt- 'comprehending, aware', cp. pres. cikēt-ti. ši--šay-a-s 'driving onwards'. ši-šnátha-s 'grasp'. ci-kur-a-s 'hair of the head', beside Lat. cirru-s?

Gr. τ_i - $\vartheta\eta\nu\eta$ τ_i - $\tau\vartheta\eta$ 'nurse' τ_i - $\tau\vartheta\sigma$ - ε 'mother's breast', beside $\vartheta\eta$ - $\lambda\eta$ 'mother's breast'. β_i - $\beta\alpha\sigma_i\varepsilon$ a kind of dance (late), beside β_i - $\beta\dot{\alpha}\zeta\omega$. i- $\sigma\tau\dot{\sigma}$ - ε 'weaver's beam, mast', beside τ - $\sigma\tau\eta$ - μ . i- $\alpha\chi\eta$ 'cry' beside i- $\dot{\alpha}\chi\omega$ for * f_i - $F\alpha\chi\omega$. δ_i - $\delta\alpha\chi\eta$ 'instruction' beside δ_i - $\delta\dot{\alpha}\sigma\lambda\omega$ (for the χ cp. $\delta\varepsilon$ - $\delta\dot{\epsilon}\delta\alpha\chi\alpha$). γ_i - $\gamma\alpha\varphi$ - $\tau\sigma$ - ν 'grape-stone', beside Lat. $g\tau\alpha$ - ηu - η

Remark. In τι-δύμαλο-ς 'wolf's-milk' (a plant), Τι-τυο-ς a giant (cp. Skr. tū-tu-mά-s 'strong') and the like, it is possible that that come from u, as in πι-νυ-τό-ς, see I § 48 p. 41.

Lat. qui-squil-iae, beside Gr. rο-σχυλ-μάτια 'shreds of leather'. ci-cer, compare no doubt Skr. kar-kar-a-s Gr. κάρ-καρ-ο-ς (Hesych.) 'hard'. ci-cōnia, Praenest. cōnia ci-cind-ēla, beside candeō.

- O.H.G. fi-faltra (fī-faltra? ep. Mid.H.G. vī-valter) A.S. fi-foldara O.Icel fi-frildi 'butterfly'. O.H.G. wi-wint 'whirlwind', beside a present *ui-vir-mi? O.H.G. wiumman 'to swarm' for *wi-wimman (Kogel, Literaturbl f. germ. und rom. Phil. 1887 n. 3).
- 4. Even nouns derived from roots beginning in a sonant stand side by side with parallel reduplicated forms in the verb.

Skr. ul-ul-i-i ululabilis' or 'ululatus', Gr. $\ddot{o}\lambda$ - $o\lambda$ -v- ς 'howler, womanish man' $\ddot{o}\lambda$ - $o\lambda$ - $\ddot{c}\gamma\dot{\eta}$ 'shrick, ery of mourning', Lat. ul-ul-a 'httle sereechowl', cp also Skr. ar-ar- \ddot{e} used as a sudden call, Gr. Dor $\ddot{a}\lambda$ - $a\lambda$ - \ddot{a} 'battle-ery', Mod.Bulg. ol-el-e, an exclamation of sorrow. Skr. Ved. viy-an- $a\dot{s}$ -i- \dot{s} 'piercing', Gr. πod - ηv - ϵx - $\eta \dot{\varsigma}$ 'reaching down to the feet', beside Skr perf. an- $a\ddot{s}$ -a Gr. $\dot{\epsilon}v$ - ϵv - ϵ

Skr. ar-ar-i-s ar-ar-i-s 'leaf of a folding-door', no doubt from \sqrt{ar} 'to arrive at anything, fit oneself in' Gr. $a\varrho-a\varrho-i\sigma\kappa\varepsilon$ 'he fitted on'. $a\dot{s}-i\dot{s}-i\dot{s}u-\dot{s}$ 'hungry' beside the desiderative $\dot{a}\dot{s}-i\dot{s}-i\dot{s}ati$ 'he wishes to eat'.

Gr. $\dot{\alpha}s$ - αs - $\dot{\alpha}$ 'acacia' $\dot{\alpha}r$ - ωs - $\dot{\eta}$ 'point, edge', beside $\ddot{\alpha}r$ - αv - σ - σ 'thorn' part $\dot{\alpha}s$ - $\alpha \chi$ - $\mu \dot{\epsilon}v$ - σ - σ 'pointed'. $\dot{\alpha}\lambda$ - $\dot{\alpha}\lambda\alpha \chi \xi$ η $\pi\lambda \dot{\alpha}v\eta$ Hesych, beside $\dot{\alpha}\lambda$ - $\dot{\alpha}\omega u\alpha$ 'roam about'. $\dot{\alpha}\gamma$ - $\alpha \gamma v \dot{\varphi}\tau \eta v$ $\dot{\alpha}\gamma \dot{\varphi}\tau \eta v$ Hesych., cp. $\pi \alpha v$ - $\dot{\eta}\gamma v \dot{\varphi}v$ - σ 'general assembly'. $\dot{\alpha}\gamma$ - $\omega \gamma$ - $\dot{\sigma}$ 'leader' $\dot{\alpha}\gamma$ - $\omega \gamma$ - $\dot{\eta}$ 'guidance', beside aor. $\dot{\alpha}\gamma$ - $\alpha \gamma$ - $\dot{\epsilon}v$. $\dot{\epsilon}\lambda$ - $\eta \delta$ - $\dot{\omega}v$ $\varphi \alpha \gamma \dot{\epsilon}\lambda \dot{\omega}u \alpha$ Hesych, $\dot{\epsilon}\lambda$ - $\omega \delta$ - $\dot{\eta}$ 'food', beside perf. $\dot{\epsilon}\lambda$ - $\dot{\eta}\delta$ - $\dot{\epsilon}\omega$ part. $\dot{\epsilon}\lambda$ - $\eta \delta$ - $\dot{\omega}\sigma$. $\dot{\epsilon}\alpha$ - $\omega \pi$ - $\dot{\eta}$ 'sight' $\pi \alpha \varphi \partial \tau v$ - σv - τv - τ

Lat. up-up-a 'hoopoe': Gr $\dot{\alpha}n-\alpha\varphi-\dot{\delta}-\varsigma$ and $\dot{\epsilon}n-o\psi$. The vocalism of these words seems to have been influenced by analogy: ảπαφό-ς was no doubt popularly connected with animal names in -αφο-ς (§ 78), ἔποψ with adjectives in -οψ like αἶθ-οψ.

§ 53. Class II. This class is scantily represented; and although it is probable a priori that such forms should have come into use in the same period of the proethnic language in which stem-compounds like Skr dvi-pád- Gr. δί-ποδ- had arisen (§ 10. 11. p. 22 ff.), yet all extant examples seem to have come from compounds consisting of repeated case-forms (Class III), which were afterwards re-modelled. This latter would be the same process as we assumed for coordinating stem-compounds such as Skr. parjánya-vátā (§ 49 p. 90), which these reduplicated forms approach very closely in usage as well as in form.

Skr. uttarōttara-s for *utara-utara-s 'always increasing' uttarōttara-m adv. 'ever higher and higher' sukha-sukhēna instr. 'very gladly' (Pānini). pūrva-pūrva-s 'he who from time to time is first, precedes', superl. pūrvapūrvatama-s, instead of which in the Veda we have pūrva-s-pūrvu-s. ēkūika-s 'one at a time' for *aika-aika-s, comp. ēkūikatara-s, instead of which in Vedic we have ēka-ēka-s = *ēkō-ēka-s, pr Ar. *aika-s-aika-s (I § 556 p. 411 f., § 647 p. 491).

Armen. mec-a-mec 'very great' car-a-car 'very bad', with the same -a- as e. g. dr-a-kw § 28 p. 45, which would not prevent our assuming that the first part was originally a case-form, see p 46, under Class IV.

Gr. (late) avr-avro-s with the meaning of avrocaros and of Lat. ipsimus ipsissimus, ep. O.H.G. selb-selbo § 54.

A Keltic form which should no doubt be mentioned here is O.Ir. al-aile 'alius', from which ar-aile arose by dis similation; also Cymr. ar-ail (Zeuss² 359. 402), further the form alaaili with indala n-āi in Zeuss, p. 360.

§ 54. Class III. It may be assumed that this type dates from the proethnic period of Indo-Germanic. It is however difficult to say how far the words of this class in the separate Indo-Germanic languages were merely analogical formations modelled upon older forms already existing, and how far they

arose from an actual repetition in which the repeated word was still independent (e. g. poor poor child). In all languages and at all periods such doubled forms might very naturally arise. Moreover it must be once more observed that the boundary line between a phrase consisting of a word used twice in succession (as Lat. mé mé, Vergil Aen. IX 427) and a new single word (mémē, tétē, sésē) cannot be regarded as constant.

Skr. tvá-tvam 'thou', a strengthening of tvám, Lat. mē-mē tē-tē sē-sē, Mid Cymr mi-vi for *mi-mi, a strengthening of mi 'l', ti-di for *ti-ti, a strengthening of ti 'thou', ni-ni a strengthening of ni 'we'. Skr yád-yad 'whatsoever', yáthā-yathā 'howsoever', like Lat. quid-quid quā-quā quantus-quantus. Cp. also Skr prá-pra and Gr. πρό-προ (Hom. προπρο-χυλίνδομαι) 'on and on, ever forwards'1).

In Sanskrit we frequently meet with doubled forms like ahar-ahar 'day by day', padē-padē 'step by step, at every step', damē-damē 'in every house', priya-s-priya-s 'very dear'.

Gr. $n\dot{a}\mu$ - $na\nu$ 'entirely' · cp. Skr. $\dot{s}\dot{a}\dot{s}vaccha\dot{s}vat$ 'on and on, ever anew' for * $\dot{s}\dot{a}\dot{s}vat$ - $\dot{s}\dot{a}\dot{s}vat$ (I § 352 p. 274), $\dot{s}\dot{a}$ - $\dot{s}vant$ - Gr. \ddot{a} -navr- see I 166 p. 147, § 384 p. 289.

In Latin we find only the pronominal forms; such as $m\bar{e}$ - $m\bar{r}$, quis-quis and the adv. jum-jum. ips-ipsus (for *ips(e) ipse) is uncertain (Wolfflin, Gemin. p. 472). In later times were developed such forms as Fr. bon-bon 'sweetineat' jou-jou 'toy'; Ital. tututto 'entirely' stands for *tuto-tuto (tutto tutto) through syllabic dissimilation (I § 643 p. 481 ff.).

Mod.Ir. mor-mhor 'great, chief, principal'. Mod.Cymr. mwy-vwy 'more and more' gwell-well 'better and better'.

O.H.G. selb-selbo 'idem spse'. Mod.H.G. dial. áll-all 'complete, at an end' wé-we (Rhine-Fr., i. e. weh-weh) n. 'small wound'.

¹⁾ The comparison of Skr. sq-sam 'together' with Mod Bulg. sŭ-s Russ. so-s 'with' is certainly not warranted. I regard the latter as a contaminated formation, occasioned by the phonetic changes of pr. Slav. sŭ, which in certain positions became s Similarly we have Mod.Bulg. vŭ-v 'in'. See the Author, Morph. Unters. III 71.

Cp. also O.H.G. $s\bar{o}$ -so, a strengthening of $s\bar{o}$ 'so' (possibly instr. of *suo-).

Lith. jį-jį jō-jo from jį 'eum' jō 'eius', and the like.

NOUNS CONTAINING FORMATIVE SUFKIXES 1

GENERAL REMARKS.

§ 55. We have already remarked (I p 16 ff., II p. 3 ff.) that no sharp line of distinction can be drawn between what is

¹⁾ Besides Bopp's Vergleich Gramm III, Schleicher's Compendium, and the grammars of single languages by Whitney (Skr Gram) Spiegel (O Bactr Gram and O Pers cuneifoim Insor), Justi (Hdb der Zendspr) Leo Meyer (Vergl Gramm der gr und lat Spr II), Kuhner (Ausf Gramm d gr Spr I und Ausf Gramm d lat Spr I), Pezzi La lingua greca antica), Zeuss (Gram Celt), Glimm (D Gram. called the root-portion of a word and the formative suffixes. Some of the elements which are treated here as formative suffixes may have originally been the last sound or sounds of a root, that is, of a word which does not owe its existence to composition; and this may be true of the whole group of sounds of which the suffix consists, or it may be only its initial part which belonged to the root. I must exclude all conjecture as to which of the particular Indo-Germanic suffixes had this origin.

In the following pages only those suffixes are discussed which had already become suffixes in the strict sense at the time when the separate Indo-Germanic languages began to be developed.

§ 56. Many formative suffixes whose meaning is simple can be resolved into distinct elements, c. g. -tro- into -tr- + -o-, cp. Skr. ari-tra- m n 'oar' beside ari-tar- ari-tr- m. 'oarsman' (§ 62), -isto- into -is- + -to-, cp Skr. náv-ištha- 'novissimus' beside náv-yas- 'novior' (§ 81)

Generally speaking we find that compound suffixes of this sort in the later periods of the history of language are due to either one or other of three causes.

Works which treat of a single suffix will be cited below in the sections devoted to the separate suffixes

See also the lists of authorities on the history of case-formation.

First, a word or a group of words may have been transferred from one declension to another. The formative suffix is then amplified at the extremity nearest the ending of the This enlargement of the stem was usually brought about by the coincidence of two declensions in one or more forms; these similarities gave rise to new analogical formations. e. g. the origin of the Avestic participial suffix -ant-u- (nonsing. baranto, gen. barantahe) was that the accusative termination -em (barant-em cp Gr. φέροντ-a) was placed on a level with that of aspe-m (stem aspa-) and similar forms, the origin of the Gothic suffix for names of kindred, -tr-u- (nom pl. broprius), was that the dative termination -trum (bropru-m: cp Skr. mstr. bhráty-bhiš) was placed on a level with that of sunu-m (stem sunu-). In this way nouns which at first had no formative suffix often came to possess one; as c. g Goth. $f\bar{o}t$ -u- was due to such case-forms as the acc. sing. $f\bar{o}t$ -u = * $p\bar{o}d$ -m (see § 159).

Secondly: a suffix sometimes coalesces so completely with a part of some word to which it is added that the point of junction can no longer be perceived, and accordingly when it is used afterwards, the suffix appears in new words with part of this preceding word attached, as though it were a single element in the formation. Thus in High German the suffix -(i)nārja-(e. g O.H.G. sculd-ināri 'debtor'), which is found parallel to -ārja- (e g O.H.G. mād-āri Mid.H.G. mādære 'mower, reaper') and has the same meaning, came from words like gartin-āri 'gardener' (garto gen. gartin 'garden') ueidin-āri 'hunter' (weidinān 'to hunt'), and in Greek the feminine formative suffix -αινα in λύκ-αινα κάπρ-αινα and so forth, came from words like γείταινα i. e. *γειταν-μα (from γείτων), λέαινα 1. e. *λεΓαν-μα (from λέων); see § 110.

Thirdly: two elements used in forming derivatives, which are nearly allied in meaning, are combined into one (contaminated). An accumulation of suffixes like this often arises simply from the attempt to give fuller or more distinct expression to the characteristic meaning (such as that of comparison, or a diminutival

sense and so forth). Thus we have comparatives and superlatives like Skr. jyéštha-tama-s from jyéštha-s, Gr. ἀμεινό-τερος ἐλαχιστό-τατος, compared with ἀμείνων ἐλάχιστο-ς, Lat. super-ior extremissmus from superu-s extrēmu-s, O.H.G. hinter-ōro from hintero, Goth. hindum-ists from *hinduma, the H.G. diminutive-suffix -l-īna- in kitz-lein kind-lein and the like (O.H.G. chizz-ila and chizz-īn), the (rare) Skr abstract-suffix -tvá-tā as in puruṣa-tvátā- 'mortality, the manner of men' (parallel forms are puruṣa-tva- and puruṣá-tā), the Lat -n-eo- in adjectives of material, such as aēneu-s pōpulneu-s (beside these we have aēnus pōpulnus and aereu-s pōpuleu-s) with other examples.

It may be assumed without hesitation that the second and third processes gave rise to compound suffixes even in the Indo-Germanic period. In the second class should be placed e. g. -nī- beside -ī- in *pot-nī- 'lady' (Skr. pátnī Gr. πότνια), which came from such forms as *teksn-ī- (Skr. takšnī-Gr τέκτωνα), the fem. of *tekson- 'carpenter' (Skr tákšan-Gr. τέκτων); see § 110. To the third class belong the superlative-suffix -t-ημπο- (§ 73), the abstract-suffix -tā-tī- (§ 102), and others of the same sort.

§ 57. The original meaning of a suffix used in forming nouns can only be decided in instances where it became a suffix in the course of the development of the separate languages c. g in the case of Mod.H.G. -lich, Fr. -ment. In the case of the proethnic suffixes, their etymological origin, and therefore their original meaning is altogether obscure. In order to keep within safe limits, we shall confine ourselves to determining where and how these suffixes were employed at the period when the parent language split up into its different branches, beyond this we cannot go with any hope of certainty.

If a suffix becomes fertile (see § 5), the direction in which its meaning developes is often decided not by the idea which it properly and originally contained, but by the meaning of the complete word or group of words on the analogy of which the new words are formed. Special stress must be laid

on this point because it is seldom sufficiently recognised in attempts to establish the original meaning of the proethnic suffixes, and because it helps to show the great difficulty of such an undertaking.

In Latin, for example, juven-ta 'time of youth' (Goth. junda, common ground-form *iuun-ta) suggested senec-ta 'time of old age', and septentrion-alis 'northern' gave rise to meridionalis 'southern'; in A.S. \overline{\overline{a}} f-en 'evening' was formed in imitation of morz-en, while on the other hand in Mod.H.G we find a dialectic form morg-end like abend; in O.H.G. hief-altra 'hip-tree, wild dog-rose' (from hiufo), mazz-altra 'maple tree' were formed in imitation of affal-tra aphol-tra 'apple-tree'; and in Greek κάπρ-αινα (fem. of κάπρο-ς 'boar'), λύκ-αινα (fem of λύκο-ς 'wolf') in imitation of Léana 'lioness' (for *LeFav-1a). Here then we have examples of suffixes denoting time of life (Lat. -ta-), the points of the compass (Lat. -10nali-), time of day (A.S. -en) and so forth in course of developement. The specialising process has gone further in the case of c. g -40- (§ 64) in Latin and Germanic as a suffix for forming names of colours, Lat. helvo-s, gilvo-s, fulvo-s, furvo-s, flavo-s (2), O.H.G gelo 'yellow', salo 'black, dirty', falo 'fallow, pale', AS baso 'purple', O.Icel. hoss 'gray', O.H.G. grāo 'gray' and others (Kluge, Nom. Stammb. 81), which perhaps arose simply from the two forms *qhel-uo-(Lat. helvo-s O.H.G. gelo) and *pol-uo-O.H.G falo O.C.Sl. plavă) Cp. further the Greek -αyo- used as a suffix for names of animals, § 78. In all these instances the special meaning of the suffix is imported into it, and not a natural outgrowth of its original meaning, in the same way it is certainly due to a secondary analogical development that -en- so often recurs in words denoting parts of the body which can be traced back to the parent language, as in the words for head (Skr. šīrš--án-, Gr. augi-xoāvos 'two headed', O.Icel. hjarse), for eye (Skr. akš-án- Goth. áug-an-, cp. I § 444 Rem. 3 p. 331), for ear (Goth. aus-an-, Gr. of aτ- for *ovσ-aτ- *ous-n-t- and so forth; see § 114.

In the same way many functions of the proethnic suffixes

are no doubt derived (even where it cannot be distinctly proved) from analogical extensions of their use, with which the meaning originally inherent in the suffix had nothing whatever to do.

Remark Thus I think it probable that the use of the suffix -a- to denote female sex (e g Idg * kuā- 'marc': Skr asrā- Lat. equa Lath aszra) did not spring from the original meaning of the suffix, but that some one or some few words in a, perhaps *gna- *gnna- *gena 'woman' (Bkr quá- etc, see I § 428 p 315 f § 437 p 325) and *māmā 'mother' (Lat mamma O.H G muoma Lath momd etc) - in which the feminine gender was sufficiently implied by the root-part of the word, just as much as in 'mater - 'mother' (Skr. mata etc) - gave the suffix its special function, the expression of female sex; and that these forms were then followed by new formations like *ekuā- beside *ekuo- Many things whose names contain an a-suffix assumed in the popular consciousness the shape of female beings though they have nothing to do with animal sex, e. g Gr aelijen 'moon' In these words we shall generally find that the gender to begin with was purely 'grammatical', and that the \bar{a} -suffix by which the word was associated with words like *eliva, was the real cause of the fancy which represented the imaginary personality as a woman and not as a man conversely, for example, the Greeks imagined υπνος as a male being, solely because of connexion of the word in form with male names in -o-e, such as Seos The notion that primitive man was endowed with so marvellous a wealth of fancy as to regard the great majority of things devoid of life and things immaterial as persons, nay more as persons belonging to one of two distinct sexes, and that the whole system of gender in nouns sprang from this source, is a one which by this time should surely have been abandoned Cp the Author, 'Das Nominalgeschlecht in den indogerman Spruchen', Techmei's Internation. Ztschr f. allg Sprachwiss IV p 100 ff

§ 58. Following the example of the Sanskrit grammarians, scholars divide the suffixes used in noun-formation into Primary and Secondary. The former are employed in deriving words from roots or verbal stems, the latter in derivatives formed from noun-stems. Thus e. g. -tor- is a primary suffix in nom. pl. Skr. da-tár-as Gr. δώ-τορ-ες Lat. da-tōr-ēs 'givers', Skr jani-tár-as Gr. γενέ-τορ-ες Lat geni-tōr-ēs 'begetters', Skr. bōdhayı-tár-as 'awakers' Gr. ήγή-τορ-ες 'leaders' Lat. arā-tōr-ēs 'ploughers', but -ī- is a secondary suffix in Skr. vṛk-t Mid.H.G. wulpe 'she-wolf' (beside Skr. vṛka-s Mid H.G. wolf 'wolf') and in Skr vɪduṣ-ī- Gr. iδvĩa f. 'knowing' (beside the masc. Skr. vɪdván Gr. εἰδώς perf.

part. from \sqrt{ueid} -'see, know'). Occasionally secondary suffixes are added even to inflected case-forms, e. g. -tero- in Skr. uccāis-tara- and so forth; see § 13 p. 29 above.

In an historical account of the development of the Indo-Germanic languages, this difference furnishes us with no useful basis of classification. In the first place, it is to say the least very questionable whether every suffix was originally restricted to one of these two functions. In any case the distinction hardly applies at all, even in the earliest times, to many of the most widely used suffixes, e. g. -io- -110-; cp. Skr. yaj-ya-s 'venerandus' Gr. ἄγ-ιο-ς 'holy', and Skr. pitr-iya-s Gr. πάτρ-ιο-ς Lat. patr-iu-s 'fatherly, father's'. Again, we often find that suffixes which were at first restricted to the primary or the secondary use change their function in the course of their history (for other instances besides those which will be discussed below see Whitney, Skr. Gramm. § 1139 and Osthoff, Verb. in der Nominal composition p. 116 ff.), and this change sometimes seems to have taken place even before the separation of the languages. One example of this is -ies- -ies- -is-, the suffix of the comparative (§ 135), which, originally primary, seems to have become secondary even in proethnic Indo-Germanic, the comparatives formed by its means being regarded as derived from the corresponding 'positive' forms (cp. Skr. svåd-īyān Gr. ηδ-των beside spād-ú-š ηδ-ύ-ς). In later formations however found only in the separate languages, such as bráhm-tyan from brah-mán-, Lat. amīc-ior from amīcus, -1es- is undoubtedly a secondary suffix

1. Suffixes in -o and -a.

§ 59. The o-suffixes uniformly show the ablaut $o \cdot e$ (escries, I § 311-314)¹). o c. g. in the nom. acc. sing., -o-s,

¹⁾ As we are accustomed to cite the suffixes whose vocalism assumes the various forms of the e-series in their e-form (-es--ter-ctc.), we ought consistently to speak of the suffixes -e--ter-ue-instead of -o--to--ue-and so forth, but as this point is in itself of little importance, I am unwilling to depart from the usual nomenclature. It will be enough to have drawn attention to the inconsistency.

-o-m. e in the voc. sing. -e, gen. -e-sto, instr. -ē, loc. -e-t; the last three cases also have o -o-sio, -o, -o-z. Parallel to these must further be assumed an 'unaccented weak-grade form', where the suffix disappears altogether, if we suppose that a case-suffix -ad is contained in the pr. Balt-Slav. gen. (abl.) *uilqad 'of a wolf' (Lith. vilko · O.C.Sl ilika), and a case-suffix -a in the nom. acc. pl. neut. *jugā (Ved. yugā) (see I § 113 Rem. p. 107, p. 108 footnote), if secondary formations like *eliu-izo- 'equinus' from *ekwo- 'equus' lost the final of the stem by some regular phonetic change (see § 63 Rem 3), and the -i- of the Lat. Cornel-1-s Lith. med-1-s etc. was the weak-grade form of -ze--20- (see the beginning of § 63) It is hardly possible from the data at our command to trace the connexion between these phases of vowel gradation and the variation of the accent is nothing to prevent our assuming that e stood originally in the syllable which bore the principal accent, and o in the syllable which followed it, whilst the case-suffixes -ad and -a themselves took the principal accent (cp. I § 311 p. 248 f.). These phonetic relations were afterwards obscured by many different kinds of analogical developement.

The a-suffixes show the ablaut $a \cdot a$ (a-series, $1 \le 318$): $a \cdot c$. g. in the nom. acc sing, -a, -a-m, a in the voc. sing. -a, nom. acc du. -a-g, cp. also instr sing. Skr -aya O.C.Sl. -oya. By the side of these the 'unaccented weak-grade form' perhaps occurs in such words as (ir $\tau i \mu$ -m-g from $\tau i \mu n$) pr. Gr. and Dor i i- μa (see § 63 Rem 3). Here also the recorded accentuation shows no variation from which we can reconstruct the original connexion between Ablaut and Accent.

In proctime Indo-Germanic the o-stems were all masculine or neuter, the a-stems all feminine. And the process of differentiation (technically called Motion) of Masculine stems to express the variation of gender in substantives and adjectives had come into regular use for o-stems in the same period, e. g. *ekuo-s 'horse' fem. ekua 'mare' (Skr. áśva-s ášvā Lat. equo-s equa), masc. *rudhro-s fem. *rudhrā neut. *rudhro-m 'red' (Skr.

rudhirá-s -irá -irá-m Gr. ἐρυθρό-ς -ρά -ρό-ν, Lat. ruber rubra rubru-m O.C.Sl. rŭdrŭ rŭdra rŭdro¹).

But the original differences in gender did not always remain unchanged in the separate languages. A number of o-stems became feminine in Greek and Italic, that is, they were constructed with feminine forms in attributive or predicative combinations, as Gr. ή φηγός, ὁοδοδάκτυλος ηως, Lat. haec fagus, a change of usage which was introduced in different ways (see A. R. Lange, De Substantivis femininis Graecis secundae dechnationis. Lips. 1885). On the other hand, in the classical languages and in Slavonic 2 a-stems became masculine, words of abstract meaning formed with a being used to denote male persons; as Gr. rεāνία- 'young man' orig. 'youth', ἔτη- 'kinsman' orig. 'kinship', Lat agri-cola 'husbandman' orig. 'husbandry', O.C.Sl. junota 'young man' orig. 'youth'. In Lithuanian, neuter substantival stems in -o assumed in the nom. and acc. the masc. form, e. g. nom. sing. άr-kla-s 'plough' beside Gr. άρο-τρο-ν, and so forth.

The o- and a-stems form by far the largest of the Indo-Germanic declensions. Nowhere have these classes suffered any serious loss except in Armenian and in Germanic. In Armenian it would seem that the a-declension wholly died out, and in Germanic many o- and a-stems passed into the n-declension (§ 112 ff.).

§ 60. The Suffix -o- -a-3).

From the earliest period, the suffixes -o- and -a- were used for many different purposes. Besides their use to denote physical sex we way notice in particular the following functions:

1. -o- is found in certain abstract root-nouns (nomina actionis)

¹⁾ See \S 57 Rem. p. 106, and the Author's Essay on Gender cated there.

²⁾ Ed. Wolter, Razyskanija po voprosu o grammaticeskom rodje, Petersburg 1882 (see the notice of it by H. Haupt, Berlin. philolog. Wochenschr. 1885 p. 312 ff)

³⁾ H. Zimmer, Die Nominalsuffixe a und ä in den german. Sprachen, Strassburg 1876. F. Miklosich, Das Suffix & im Altslovenischen, Kuhn-Schleicher's Beitr. I 222 ff. 273 ff.

(the root-syllable usually bears the accent), e. g. *gón-o- 'a begetting, coming into being' Skr. jána-m 'birth, origin' Gr. γόνο-ς 'birth', also concrete 'offspring', Gr. χεόμ-ο-ς 'noise, murmur, neighing' O.C.Sl. grom-ŭ 'thunder', Goth. ga-fāh-s in. 'capture' (ground-form *pánko-s) dragk n. 'drink'. 2. -o- is found in certain nomina agentis (the accent falls usually on the suffix), e. g. *tor-ό- 'he who penetrates' Skr. tārá-s Gr. τορό-ς, Lat. procu-s 'suitor' (beside precārī), Goth. piufs, gen. piubis, 'thief' (ground-form *teupó-s). 3. -ā- is found in certain abstract root-nouns (nomina actionis), e. g Gr quy-ή Lat. fug-a 'flight', Gr. βληχ-ή 'bleating, cry' O.H.G. chlag-a 'lament', Skr. bhid-ā 'separation', Goth. bid-a 'request, prayer'.

Differentiation of Adjectives (Motion): e. g. masc. * $n\acute{e}u$ -o-s neut. * $n\acute{e}u$ -o-m fem. * $n\acute{e}u$ - \bar{a} · Skr. náva-s náva-m návā, Gr. $r\acute{e}o$ -g $v\acute{e}o$ -r $v\acute{e}\bar{a}$, Lat. novo-s novo-m nova, O.C.Sl novũ novo nova.

In most of the Indo-Germanic languages we find more or less frequently the transference of stems that do not end in o or a, e. g. stems ending in explosives, into the o- or adeclension, without any modification of meaning. The change in any particular case may be due to any one of a large number of causes; indeed, to any association either of sound or of sense. Analogy of form, for example, produced in Sanskrit a nom. dánta-s (cp. p. 111) beside acc. dánt-am (stem dánt- 'tooth'), and in Greek την κάρην (Callim.) beside nom acc. neut. κάρδ 'head' (for *γαρασ-α, a neuter subst like αλείφ-α). On the other hand, the change was due to an association of meaning when in Latin auror-a ('dawn') and Flor-a were substituted for *auros -oris (§ 133) and flos -oris (§ 134); so in O.H.G. pl. tohter-a 'daughters' for the older form tohter, in Lith. dukr-à 'daughter' for dukte -ers, and in Pruss, swestr-o O.C.Sl. sestr-a 'sister' heside Lith. sesu -ers (§ 122). Often both principles may have been at work together, e. g. when in Prākrit mādā 'mother' and duhidā 'daughter' (Idg. -tē(r)) passed over to the ā-declension (cp. § 122 Rem. 1). The attraction to the o- or to the adeclension often affects only single cases, e. g. Gr. dial. dat. pl. $\pi \dot{\alpha} \dot{\sigma} - oig$ (like $\lambda \dot{v} \dot{v} - oig$) for πooi , acc. pl. $\pi \dot{\alpha} \dot{v} r - \alpha \dot{v}_{s}$ (like $\pi \dot{\alpha} \dot{v} \sigma \dot{\alpha} - \dot{v}_{s}$) for $\pi \dot{\alpha} \dot{v} r - \alpha \dot{c}_{s}$, and there is perhaps an example of such a transference into the o-declension even in the proethnic language, where the genitive ending $-\bar{o}m$, which comes from -o-om, was used with other stems than those in -o-. With regard to all these processes we must remember that the speaker had no clear consciousness of the point of junction between stem and case-ending, least of all where vowel-contraction had taken place (vol. I p. 106 ff)

Idg. Masc. *ulq-o-s 'wolf' (\sqrt{uelq-'tear'}). Skr. vfka-s Armen. gen sing. gailo-y (ep I § 455 p. 336) Gr. λύπο-ς (Lat. lupu-s) Goth. dat pl. vulfa-m Lith. vilka-s O.C.Sl. instr. sing. vlüko-mi. Neut *jug-ó-m 'yoke' (\sqrt{jeug-'yoke, put to'}): Skr. jugá-m Gr ζυγό-ν Lat jugu-m Goth dat. pl. juka-m O.C.Sl. instr. sing igo-mi Fem *gen-ā- *gņn-ā- *gn-ā- 'woman' (\sqrt{gen-}): Skr. gnā- Gr Att. γυνή Boeot. βανά O.Ir. nom. ben gen. mnā Goth qinō O.Icel. kona (in Germ. it has passed over to the n-declension) O.C.Sl. žena.

Aryan. Skr. ghóṣ-a- m. 'sound, noise' Avest. gaoṣ-a- m. 'ear' O.Pers. gauṣ-a- m. 'ear', noin sing. pr. Ar. *ghauṣ-a-s. Skr bhág-a-s m 'distributor, bestower of blessings' Avest. baγ-a-m. 'God' O.C.Sl. bog-ŭ 'God'. Skr. nīd-á-s 'resting-place, couch, nest' Armen. nist 'position, seat, possession', Lat. nīdu-s, O.Ir. net O.H.G. nest 'nest', Idg. *ni-zd-ó-s 'settling-place'. Skr. mēh-a-n. 'urine' Avest gao-maez-a- n. 'cow's urine'. Skr. pad-á-m 'standing-place, place, position': Gr. πέδ-ο-ν 'ground, field', Lat. Ped-u-m, oppid-u-m. Skr. jy-ά- Avest jy-ā- 'bowstring': Lith. giy-à 'string, cord'. Skr. jangh-ā- 'upper part of the foot': cp. Lith. pra-žang-a 'transgression' (\sqrt{ghengh-}). Skr. mud-ā- 'joy'. Avest. derez-ā- 'bundle, basket'

Adjectives. Skr. $d\bar{\imath}rgh$ - \acute{a} -s- \acute{a} -m- \acute{a} Avest. $dar^{\it o}\gamma$ - $\bar{\it o}$ -e-m-a O.Pers. darg-a-a-m-a 'long': Gr. $do\lambda(\chi$ - \acute{o} - ς - \acute{o} -r- $\acute{\eta}$.

In Aryan, transference into the o-declension is common. In many cases no doubt this must have taken place in proethnic Aryan; cp. e. g. Skr. más-a- Avest. månh-a- with Skr. más-month' (cp. § 134), Skr. nár-a- Avest. nar-a- with Skr. nár-

'man' (Gr ἀνερ-), Skr. pád-a- Avest. pād-a- beside Skr. pad'foot'. In other cases however, it belongs to the developement
of the separate dialects: e. g. Skr. Ved. pūšán-a-s from pūšán-,
name of a god, Prākr. part. nom carant-ō gen. carant-assa etc.
instead of Skr. cárant- 'going, moving' (and so often in the popular
dialects); Avest. loc. sing. vīs-ē O.Pers. instr. pl. vīp-aibiš from
vīs- vīp- 'village', Avest. gen. sing. stār-ahē from star- 'star',
dat. sing. airyaman-āi from airyaman-, the personified spirit of
prayer, part. nom. sing. jaidyant-ō etc. 'beseeching'. The point
of contact from which this metaplastic process sprang was the
phonetic similarity of the accusative endings -am = Gr. -a and
-a-m = Gr. -o-ν- (p 110)

In Sanskrit there is a large group of denominative adjectives formed with -o- -a-, with the meaning 'related to, or connected with' that which is denoted by the noun from which they are derived, especially with the meaning, 'sprung from'. The first syllable of the word usually has what is called the vrddhi grade, that is the second or 'highest' form of the strong or 'high' grade. E. g. mānas-á-s 'related to the mind (mánas-)', sāvitr-á-s 'sprung from the sun (savitár-)', sāindhav-á-s 'sprung from the Indus (sindhu-\$)'. If the contained stem is itself an o-stem, the adjective is formed without modifying the suffix; e. g. āmtrá-s 'hostile' from amitra-s'foe'. Similar derivatives are found, though more rarely, in Iranian; as O.Pers. margav-a-'inhabitant of Margiana' from margū-š'Margiana', Avest. ār'zva (or ārzava) 'good works' from er'zu- 'just, right', kavay-a- 'kingly' from kavı-š 'king', temanh-a-'dark' (-wh- for -s-, see I § 558 p. 414) from temah- 'darkness' (cp. Skr. tāmas-a- from táma-s), airyav-a- 'offspring of Airyu'. Although the particular forms that furnished the type for this category of nouns in Aryan, and the origin of the vriddhistrengthening, which occurs also in other derivative nouns (cp. § 93), are still undiscovered, yet it is at least probable that the class took its rise in such o-stems as had undergone a modification of meaning similar to that which we find in the epithetised compounds (see § 50), and that o- was then added to other stems in imitation of these. The use of

the suffix was extended by the desire to render easier the Differentiation (or modification to express gender) of adjectives; and we find an unmistakable parallel in the treatment of the final members of compound words; compare -tamas-a- from támas- 'darkness', -ašman-a- from ášman- 'stone', -bhruv-a- from bhrū- 'eyebrow', and especially instances like dašangulá-m 'length of ten fingers' from angūli-š 'finger' (Whitney Skr. Gr. § 1315 b), which are on a level with formations like nāirytá- 'belonging to niryti-'.

Remark 1. Cp. von Bradke, Über die Vyddhi in der secundären Nominalbildung, Ztschr der deutsch morgenländ. Gesellsch. XL, 361 ff. — The suggestion that Lat συο-m 'egg' is related in the same way to αυί-s, and means 'that which proceeds from a bird', is unsatisfactory. Rather we may compare such instances as Gr. ηνεμόεις beside ἄνεμο-ς, ἀμφ-ήριστο-ς beside ἔρίζω. Doublets that had arisen with different grades of ablaut in the root-syllable were in Aryan adapted to convey two distinct meanings, while in Greek they subserved a particular principle of rhythm. In either case, our endeavour must be to discover the oldest forms which gave the type for the whole series

Armenian. orb, gen. orbo-y, 'orphan': Lat. orbu-s, Gr. ὀρφο-βότης 'one who brings up orphans'. gorc, gen. gorco-y, 'work': Avest. var'z-a- m. 'working, action', Gr. ἔργο-ν Ο.Η.G. werc n. 'work'. Adj. hin, gen. hn-o-y, 'old': Skr. sán-a-s Gr. ἕν-ο-ς O.Ir. sen Lith. sẽn-a-s 'old'.

The a-declension, as we have already remarked in § 59 p. 109, was entirely lost.

Greek. $\varphi\eta\gamma$ -ó- ς 'oak': Lat. fag-u-s 'beech'. olx-o- ς 'house': Lat. $v\bar{\iota}c$ -u-s. $\pi \acute{o}\varphi$ -o- ς 'a penetrating, passing through, passage' $\pi o\varphi$ - \acute{o} - ς 'penetrating' ($\acute{o}doi\pi\acute{o}\varphi o\varsigma$ for * $\acute{o}doi\pi o\varphi o\varsigma$ - ς , I § 676 p. 542 f.): Skr. $p\bar{a}r$ -a- 'navigation, passage by sea' $p\bar{a}r$ - \acute{a} -s 'transporting'; $\imath\acute{o}\mu$ -o- ς 'cut, slice' $\imath o\mu$ - \acute{o} - ς 'cutting, sharp'; $\grave{a}\gamma$ - \acute{o} - ς 'guide, leader': Skr. aj- \acute{a} -s 'driver'. $\zeta v\gamma$ - \acute{o} -v 'yoke': Skr. yug- \acute{a} -m. $\pi\lambda\eta\gamma$ - $\acute{\eta}$ 'blow': Lat. plag-a. $\acute{\varphi}o\acute{\eta}$ Corcyr. ϱho - $f\acute{a}$ 'stream, flowing' from $\acute{\varphi}\acute{\epsilon}\omega$: Lith. srav- \acute{a} 'a flowing, bleeding'. $\sigma\pi ov \emph{d}$ - $\acute{\eta}$ 'zeal, earnestness' from $\sigma\pi s\acute{v}\acute{\delta}\omega$. $\varphi o\varphi \not{\beta}$ - $\acute{\eta}$ 'nourishment' from $\varphi\acute{\epsilon}\varphi \not{\delta}\omega$.

Adject. $\vec{\omega}\mu$ - \acute{o} - ς $\vec{\omega}\mu$ - \acute{o} - ν $\vec{\omega}\mu$ - $\acute{\eta}$ 'raw': Skr. $\vec{a}m$ - \acute{a} - \vec{s} - \acute{a} -m- \acute{a} 'raw'. Observe that $\lambda \epsilon \vec{\omega} \varsigma$ 'people' stands for $\lambda \vec{\alpha}(f)$ - \acute{o} - ς ($\Lambda \vec{\alpha} F$ o- $\kappa \acute{o} F \omega \nu$ is preserved by Priscian); see I § 611 p. 462.

The endings of o-cases are often transferred to other classes of stems; as one in $\pi o \delta$ -oiv -oiv, -oic in $\pi o \delta$ -oic for $\pi o \sigma l$, -ov in $\pi o \lambda t \pi$ -ov.

Italic. Lat. popul-u-s popl-u-s, Umbr. popl-o-m acc. 'populum'. Lat. dol-u-s Osc. dolud abl 'dolo'. Gr. δόλ-ο-ς 'wile' Lat. dom-u-s. Gr. δόμ-ο-ς 'house'. Lat. unc-u-s: Skr. ank-ά-s 'hook', Gr. ὄγκ-ο-ς, 'something bent or bowed out, hook, extended circumference'. Lat. for-u-m, Umbr. furo 'forum': Skr. dvar-a-m 'door, entrance, exit' (d- instead of dh-, see I § 480 p. 354), O.C.Sl. dvor-ŭ m. 'enclosure'. Osc. ter-o-m 'terra, territorium'. Lat porc-a, fem. of porc-us, Umbr purk-a porc-a 'porcas'. Lat. lump-a (lymph-a, cp. I p. 42 footnote), Osc. Diump-aís 'Nymphis'. Lat. deiv-a dīv-a (fem. of deiv-o-s), Osc. deív-aí dat. 'divae' Lat. līr-a 'furrow, ridge between two furrows': O.H.G. wagan-leis-a 'cart-track, road' O.C.Sl. lĕch-a 'ridge of earth'.

Here should also be mentioned the Umbr.-Samn. infinitives in -o-m, as Umbr erom Osc. ezum 'esse', Umbr. a-ferum a-fero 'circumferre', Osc. deicum 'dicere' moltaum 'multare' (cp. § 156).

. Adject. Lat. rōb-u-s -u-m -a, Umbr. acc. pl. masc rof-u 'rufos' fem. rof-a 'rufas': Goth ráup-s ráup ráud-a 'red'.

Old Irish. Masc. dia, gen. dē, 'God' pr. Kelt. *deiu-o-s: Skr. dēv-á-s Lat. deiv-o-s deu-s (I § 172 p. 152) Lith. dēv-a-s 'God', cp. Skr. div- Gr Δι-- 'heaven, god of heaven'. orc 'pig': Gr. πόρκ-ο-ς Lat. porc-u-s O.H.G. farh farah Lith. parsz-a-s 'pig, sucking-pig'. O.Ir. at-trab n- Mid.Ir. ait-treb n- 'possession, dwelling' no doubt to be compared with Goth. paurp 'field, land' O.H.G. dorf 'village'. Fem. ben, gen. mn-ā, 'wife': O.C.Sl. žen-a etc., see p. 111 above. coss, pl. coss-a, 'foot': Lat. cox-a, O.H.G. halis-a 'hollow of the knee'. ferg ferc, gen. ferge, 'wrath': Gr. δογ-ή 'impulse, passion'

Adject. caech m., caech n- n., caech f. 'blind'. Lat. caecu-s-u-m -a, Goth. háih-s háih háih-a 'one-eyed' $\bar{o}g$ 'integer', from \sqrt{avg} .

Germanic. Goth. snáiv-s O.H.G. snēo m. 'snow': Lith. sněg-a-s O.C.Sl. sněg-ŭ 'snow', \sqrt{s} sneggh-. Goth. dag-s O.H.G.

tag m. 'day': Skr. ni-dagh-á-s 'hot season', Lith. dāg-a-s 'harvest'. O.H.G. teig m. O.Icel. deig n. 'dough': Skr. dēh-a-s 'body', Gr. τοῖχ-ο-ς 'wall', \sqrt{dheygh} - 'besmear, cement'. O.Icel. draug-r m. 'ghost': Skr. drōgh-a-s 'injury inflicted deceitfully'. Goth. juk O.H.G. joh n. 'yoke': Skr. yug-á-m etc. Goth. dal O.H.G. tal n. 'valley': Gr. θόλ-ο-ς 'cupola, dome', O.C.Sl. dol-ŭ 'valley'. Goth. ahv-a O.H.G. ah-a 'water': Lat. agu-a. Goth. gib-a O.H.G. geb-a 'gift', beside Goth. giban 'to give'. Goth. stáig-a 'path, way', beside steigan 'to climb'.

Adject. Goth. lagg-s lagg lagg-a O.H.G. lang 'long': Lat. long-u-s -u-m -a. Goth. luf-s luf lub-a O.II.G. liob 'dear, beloved': O.C.Sl. ljub-ŭ -o -a.

Transference into the o-declension is frequent, into the a-declension more rare; e. g. nom. sing. Goth. frijonds O H.G. friunt 'friend' gen. sing. frijondis friuntes and other forms with terminations of the o-declension, contrasted with the nom. pl. Goth. frijonds O.H.G friunt etc. which have not modified the original -nt- stem (§ 126), O.H.G. nom. pl. tohterā 'daughters' dat. pl. tohterōn beside the older pl tohter = Gr. Svyarto-sç (§ 122).

Balto-Slavonic. Masc. Lith. mūs-a-s 'film (on liquids)' O.C.Sl. mūch-ŭ 'moss'. O.H.G. mos n. 'moss'. Lith. āt-lēk-a-s O.C.Sl. otŭ-lēk-ŭ 'remnant, remainder': Skr. ati-rēk-a-s 'remnant, excess' Gr. λοιπ-ό-ς 'remaining'. Lith. úž-valk-a-s 'outside covering, bed-covering' O.C.Sl. oblak-ŭ 'cloud' (for *ob-vlak-ŭ, ep. I § 184 p. 160): Gr. όλx-ό-ς 'a drawing, thing drawn'. O.C.Sl. glagol-ŭ 'sound, word' (for *gol-gol-ŭ, ep. I § 281 p. 224): Skr. gargar-a-s, a musical instrument. Neut. O.C.Sl. igo 'yoke': Skr. yug-á-m, O.C.Sl. tŭ-o 'ground'. Skr. tal-a-s 'surface, ground' (\sqrt{tel-}); in Lith. the masc. termination is found in the nom. acc.; e. g. jùng-a-s 'yoke', a modification of the Idg. *jug-ó-m. Fem. Lith. vaps-à 'gadfly' O.C.Sl. vos-a 'wasp' (I § 545 p. 399): O.H.G. wafs-a 'wasp'. Lith. rank-à O.C.Sl. rak-a 'hand', beside Lith. rēnkù 'I gather, collect'.

Adject. Lith. saūs-a-s saus-a saus-à O.C.Sl. such-ŭ -o -a 'dry': Skr. śōṣ-a-s -a-m -a 'drying, parching' (ś- for s-, I § 557, 4 p. 413), Gr. Ion. αὖ-ο-ς αὖ-ο-ν αὖ-η 'dry'.

Remark 2. It may not be premature to notice here that the Lith. neuter form in -a arose from -o-d and not from -o-m, and is therefore a pronominal termination See R Garbe, Litau. und lett. Drucke des 16. u. 17. Jahrh., IV p. XLI.

§ 61. The Suffix -ty-o--ty-a-(-tuy-o--tuy-a-).This is an extension of -tu--tey- (§ 108).

Originally it was no doubt primary, and used to form adjectives (cp. e. g. Skr. kár-tuva-s kár-tva-s 'faciendus', beside the inf. kár-tu-m) whose neuter and feminine forms were used as abstract substantives, on the analogy of which derivative abstract substantives were also formed from nouns (§ 158).

The accentuation of Sanskrit formations like *dēva-tvá-m* 'divinity', and the *d* of the Goth. *piva-dv* 'servitude' (see I § 530 p. 386 f.), shew that *-tuó-m was the form assumed by the suffix in these secondary abstract substantives in Indo-Germanic.

Compare Ar. -tvana- Gr. -ovvo- § 70.

In Aryan, the suffix is frequent. In Skr. it appears in gerundives like kár-tuva-s kár-tva-s 'faciendus' ján-tuva-s jani-tva-s 'procreandus'. The neuters of these gerundives are often used substantivally, as kár-tva-m 'task, work to be done'. Compare also Avest. varš-tve-m 'work, action' (beside ver'z-yē-mi 'I do'), stao-pwe-m 'prayer' (beside stao-mi 'I praise, pray'). Secondary formations in *-tuó-m: Skr. dēva-tvá-m 'divinity' (dēvá-s 'god'), šatru-tvá-m 'enmity' (śátru-š 'enemy'), rakšas-tvá-m 'demoniacal nature' (rakšás- 'monster, demon'), Avest. anhu-pwe-m 'lordship, might' (anhu-š 'lord'), fratema-pwem 'a being first, nobility' (fratema- 'first').

As to the interchange of -tva- and -tuva- in Sanskrit see Edgren, Journal of the American Orient. Soc., XI 82 sq.

In Latin it is rare. We can scarcely count mor-tuo-s (for *mg-tuo-s): O.C.Sl. mri-tvii 'mortuus' as an example, cp. I § 170 p. 150; see § 64 Rem. 3 below. But Fa-tuo-s (soothsayer') and ma-tuo-s no doubt belong here (with the suffix in the form -tuuo-); see I § 170 p. 151.

Benfey, Indeg. Part. Perf. auf tua oder tva, Nachr. der Gött. Gesellsch. d. Wissensch., 1873, n. 7.

In Germanic it is not common. Goth. vaurstv n. 'work' for pr. Germ. *yurx-s-tya-n, whose -s- must be compared with that of -s-tro- (§ 62), -s-lo- (§ 76), -s-ti- (§ 100), -s-tu- (§ 108), -s-men- (§ 117) 1). ·ahtvo f. 'morning twilight' for *uny-tyo-(transferred to the n-inflexion), ground-form * pq-tua-, compare directly Skr. aktú-š 'brightness' for *199-tu-s, and less immediately Skr. ahj-i-š 'ointment, adornment'. vah-tvo or vah-tva (only the dat. pl. vahtvom is actually found) watch, guard, from vakan to watch'. A.S. læs, gen. læswe, f. 'letting blood' for *lēsuō- i. e. * $l\bar{c}t + t\mu\bar{o}$ -, beside Goth. $l\bar{c}tan$ 'to let', $r\bar{c}s$, gen. $r\bar{c}swe$, f. 'counsel' for * $r\bar{e}sy\bar{o}$ - i. e. * $r\bar{e}d + ty\bar{o}$ -, beside Goth. $r\bar{e}dan$ 'to counsel' (cp. I § 527 p. 382). As in all the instances given, so in Goth. frija-bva 'love' and fija-bva 'enmity' from frijon 'to love' and fijon 'to hate' the suffix is to be regarded as primary; yet frija-pva (in imitation of which fija-bva was afterwards formed) was originally a secondary formation, from the adj. frija- ('fre)'e, which in the prehistoric period had meant 'dear', cp. Skr. priva--tvá-m 'a being beloved' from priyá- 'dear, beloved'. Goth. biva-dv n. 'servitude' from biu-s 'servant'.

In Slavonic it is frequent. Primary: Masc.: O.C.Sl. mri-tvŭ 'mortuus'? (see above), O.C.Sl. rybi-tvŭ 'fisher'; Neut. Russ. jas-tvo 'food', Russ. ši-tvo 'sewing', O.C.Sl. čuvi-tvo 'organ of sense'; Fem. O.C.Sl. jas-tva 'food' že-tva 'harvest' moli-tva 'prayer' goni-tva 'pursuit'. Secondary -(i)s-tvo (cp. the suffix -iskŭ § 90): zelistvo 'violence' (zelŭ 'violent'), detistvo 'childhood (dete 'child); probably this form of the suffix started from stems in -i-, cp. tatistvo 'theft', from tati m. 'thief', bledistvo 'boasting, bluster' from bledi f. 'deceit, farce' (cp. -iba § 78). In Lithuanian Leskien is probably right in tracing this suffix in the group of names of tools formed with -tuva-, such as kosz-tùva-s 'strainer, filter' (kósziu 'I filter'), rēs-tùva-s 'roller for winding yarn' (rēcziù 'I roll, wind'), karsz-tùva pl. 'woolcarder's comb' (karsziùvilnas

Goth. gáidv n. 'lack' no doubt belongs rather to √gheidh- 'desire' (O.H.G. gīt 'eagerness, greed') than to gei-gan, 1. e. it should be analysed gáid-v, not gái-dv.

'I card wool'), min-tuva pl. 'a machine for breaking flax, brake' (minù linùs 'I tear flax'). Cp. also Pruss. pre-artue 'ploughshare' and ar-twes 'ship's voyage'.

§ 62. The Suffix -tr-o- -tr-a-, -tl-o- -tl-a¹). This is an extension of -ter- -tor- (§ 119 ff.), cp. e. g. Skr. ari-tra'oar' from ari-tar- 'rower'. Perhaps l arose from r by some process or processes of assimilation or dissimilation (partly in proethnic Indo-Germanic, partly in the separate languages), cp. I § 282 p. 225 f. ²).

The meaning is generally that of the instrument or the place of the action.

Indo-Germanic. Skr. bhari-tra-m 'arm' (that with which one bears), Gr. φέφε-τφο-ν φέφ-τφο-ν 'litter, bier', Lat. prae-feri-culu-m 'wide sacrificial dish' (regarded as the instrument for carying something offered) fer-culu-m 'litter, bier'. Skr. m. n. ari-tra- O.H G. n. ruo-dar Lith. lr-klu-s 'oar', cp. also Gr. 'Εφέ-τφ-ια 'Oarstown'. Skr. má-trā Gr. μέ-τφο-ν 'measure' (or should we follow de Saussure, Mém de la Soc. de lingu. VI 248, in assuming this to stand for Idg. *metro- 1. e. *med + tro-?).

Aryan. Skr. kṣ̄a-trá-m Avest. xṣ̄a-pre-m O.Pers. xṣ̄a-ṣ̄a-m 'lordship'. Skr. vás-tra-m Avest vas-tre-m 'garment, vesture'. Skr. dhár-tra-m 'support' Avest. dare-pre-m 'an upholding, holding fast'. Skr. vahi-tra-m 'ship': Lat. vehi-culu-m. Skr. hō-trā Avest. zao-pra 'libation, offering': Gr. χν'-τοᾱ 'pot' χν'-τλο-ν 'libation'.

Armenian. arōr araur, gen. arauro-y, 'plough' for *ara-tro- (I § 360 p. 276, § 483 p. 357): Gr. ἄρο-τρο-ν 'plough', Lat. arā-tru-m, O.Icel. ar-pr m. 'ploughing', Lith. ár-kla-s 'plough'.

¹⁾ S. Bugge, Bemerkungen über den Ursprung der lateinischen Suffixe clo, culo, cro; cla, cula, cra, Kuhn's Ztschr. XX 134 ff G J. Ascoli, Die lateinischen Formen des ursprunglichen Instrumentalsuffixes -tra (1867), Krit Stud. 123 ff H. Osthoff, Die mit dem Suffixe -clo-culo--cro-gebildeten nomina instrumenti des Lateinischen, Forsch. im Geb der, nomin. Stammbildung I 1 ff.

²⁾ In I p 226 l 5 instead of 'the nominal suffixes -tro- and -tlobeside -dhro- and -dhlo-', read 'the nominal suffixes -tlo- and -dhlo- beside -tro- and -dhro-'

aλaur-i 'mill' (from aλam 'I grind') was a secondary extension of a tro-stem: cp. Gr. ἀλέ-τρ-ιο-ς 'belonging to grinding' ἀλε-τρ-ενίω 'I grind to powder' ἀλετρίβανος for *άλετρο-τρίβανο-ς 'pulverising by grinding, pestle'.

Greek. ἐόπ-τρο-ν 'tambourine, lever of a trap' A.S. ræf-ter m. 'beam'. ἔλν-τρο-ν 'covering, that which contains': Skr. varú-tra-m 'upper garment'. λέκ-τρο-ν 'couch, bed': O.C.Sl. lātr 'lair of wild animals' pr. Germ. *laχ-tra-. δέλε-τρο-ν 'bait, lure', compare no doubt O.H.G. quer-dar 'bait, lure' (J. Schmidt, Kuhn's Ztschr. XXV 153). νίπ-τρο-ν 'water for washing'. ἐή-τρα 'agreement, treaty'.

ἄν-τλο-ν ἄν-τλο-ς ἄν-τλη 'bilge-water, dead-water, baling scoop' · cp. Skr *úma-tra-m* 'vessel, jug, drinking-cup' (Lat. exantlāre ex-anclāre is the Greek ἐξ-αντλεῖν borrowed, cp. I § 367 p. 278). ἐχέ-τλη 'plough-tail'.

Italic. Lat. cas-tru-m and fem. cas-tra; in Umbr.-Samn. the word has passed into other declensions, Osc. castrovs gen. 'fundi' castrid abl 'fundo' Umbr. kastruvuf 'fundos'. Lat. rõs-tru-m (rōdō 'I gnaw'), arā-tru-m, fulyē-tru-m fulgē-tra. Umbr. kle-tram 'lecticam'. Goth. hlei-pra 'hut, tent', $\sqrt{kle_{k}}$.

-tlo- became -klo- in proethnic Italic, except where s preceded (I § 366 p. 278). Lat. piā-clu-m -culu-m, Umbr. piha-klu 'piaculorum'. Lat. sae-clu-m -culu-m: Lith. se-klā 'seed'. Lat. ind-ā-cula sub-ā-cula Avest. ao-pre-m 'sandal', Lett. áu-kla a kind of string (in Lith. the declension has changed, au-klē 'bandage for the feet'). Umbr. eh-vel-klu 'edictum, decretum', mantrah-klu 'mantele'. Osc. sakara-klúm 'sacrum'. -tlo-is kept after s in Osc. pes-tlú-m 'sacellum, templum': Umbr. pers-clu pes-clu 'supplicatione'. -clo- became -cro- in Latin by dissimilation where an l preceded (I § 269 p. 217): lavā-cru-m: Gr. λοε-τρό-ν λουτρό-ν 'bath, water for washing', Gall. lau-tro 'balneo', O.Icel. lau-đr 'soap', lu-cru-m; un-volū-cru-m

Rarely we find -s-tro-, as mon-s-tru-m capr-s-tru-m (cp. the Germanic); whence also nouns in -aster -astra -astru-m, like formaster, oleastru oleastru-m (see Seck, Archiv f. lat. Lexicogr. I 390 ff. Schnorr von Carolsfeld, ibid. 404 ff.).

Old Irish. lō-thor lō-thur n. 'alveus, canalis' Gall. lau-tro 'balneo': Lat. lavā-cru-m etc., see above. tara-thar n. 'boring tool, gimlet': Gr. τ΄:ρε-τρο-ν 'gimlet'. cruathar n. 'sieve': O.H.G. hrī-ttara 'sieve'? (see the end of the section, p. 122). ara-thar n. 'aratrum': Armen. arōr etc., see p. 118. bria-thur f. 'word'. cētal n. 'song' (cētlo- for *can-tlo-). With regard to the developement of -thar from *-tro-m and from *-trā, and of -tal from *-tlo-m, see I § 623 Rem. 1 p. 469 and § 634 p. 475.

cenēl n. 'family, race' O.Cymr. cene-tl. scēl n. 'narration, tale' Mod.Cymr. chwedl for pr. kelt. *sky-e-tlo-n, √ seq 'say'. anal f. 'breath' Mod.Cymr. ana-dl. Cp. I § 110 p. 104, § 518 p. 371 f., § 620 p. 467.

Germanic. The \$\bar{p}\$ of the pr. Germ. -\bar{p}ra--\bar{p}la-\ \text{indicates}\$ that the sonant next preceding it bore the principal accent (I \ 529 p. 384 f.). O.H.G. \(log{ho}\)-dar A S. \(log{he}\)-\(\bar{d}\)or 'sound, noise', pr. Germ. \(log{he}\)-\bar{p}ra-: Skr. \(\sirta\)-\(log{t}\)-tra-m 'hearing, ear'. Goth. \(sin\)-\(log{t}\)-tra' 'tent'. Umbr. \(k\) \(log{t}\)-tram 'lecticam', \(\sigma\) \(kle_k\)-. O.H.G. \(sta\)-dal m. 'shed, \(bar'\): Skr. \(sth\)-\(log{t}\)-tr\(a\)-m 'standing-place, position'. O.H.G. \(wa\)-dal \(we\)-dil m. n. 'fan, tuft', \(\sigma\) \(u\)\(\vec{e}\)- 'blow'. Goth. \(n\)\(\vec{e}\)-\(log{p}la\) and \(n\)\(a\)-dla 'needle (cp. Bremer, Paul-Br. Beitr. XI 5. 277 f.).

O.H.G. $b\bar{\imath}hal$ n. 'hatchet' pr. Germ. * $b\bar{\imath}pla$ -, Idg. * $bhe\bar{\imath}tlo$ for * $bhe\bar{\imath}d + tlo$ -, $\checkmark bhe\bar{\imath}d$ - 'findere' (is O.Ir. bail, gen. $b\bar{e}la$,
'hatchet' connected with this?); O.H.G. sedal n. m. 'seat' pr.
Germ. *sepla-, Idg. *setlo- for *sed + tlo-, \checkmark sed- 'sit'. I follow
de Saussure, Mém. de la Soc. de lingu. VI 247. 255 ').

After spirants, t is kept (thus the original accent cannot be determined): Mid.H.G. wes-ter f. 'baptismal robe' Skr. vástra-m 'garment'; Goth. gilstr n. 'tribute' from gild 'tribute' \checkmark gheldh-; O.H.G. bluostar n. 'offering' (Goth. derivative blostreis 'offerer') beside Goth. blotan 'offer'; O.H.G. ruostar n. and riostra f. 'plougshare' beside Mid.H.G. riuten 'root out'; O.H.G. hlahtar n. O.Icel. hlattr m. 'laughter'.

¹⁾ Germ. *bipla-, like Gr. φιτρό-ς 'log, piece of wood', which de Saussure similarly derives from bheid-, might certainly be connected with O.C.Sl. bi-ti 'strike' u-boj-t 'deathblow'.

Pr. Germ. -dra--dla- indicate that this suffix bore the accent (cp. Skr. as-trá-m da-trá-m etc.), see I § 530 p. 386 f.; yet these pr. Germ. suffixal forms may also represent Idg. -dhro--dhlo-, see p. 122. Idg. -tro- is probably seen e. g. in Goth. fo-dr 'scabbard' O.H.G. fuo-tar A.S. fo-ddor n. 'case, sheath': Skr. pa-tra-m 'that which contains, vessel'.

-s-tra- is fairly frequent; as O.H.G. gal-s-tar n. 'song' from galan 'sing', compare A.S. zeal-dor n. O.Icel. gal-dr m.; Goth. huli-s-tr 'eovering' from huljan 'cover'. Cp. Osthoff, Über das eingedrungene s in der nominalen Suffixform -stra-, Kuhn's Ztschr. XXIII 313 ff., and -s-tuo- (§ 61), -s-to- (§ 76), -s-ti- (§ 100), -s-tu- (§ 108), -s-men- (§ 117).

Balto-Slavonic. -tro- is found only in a few uncertain examples, as Lith. vě-tra 'storm' O.C.Sl. vě-trü 'air, wind'. The uncertainty is caused by the possibility of a later transference into the o- or ā-declension, which has undoubtedly taken place in O.C.Sl. bratr-ŭ 'brother' sestr-a 'sister'.

-tlo- occurs only in Baltic, where it appears in Lith. and Lett. as -kla- (I § 377 p. 285 f.). Pruss. *sen-tla- 'token, sign' in the partic. eb-sentliuns 'having betokened, marked' Lith. *én-kla-s' token, sign'. cp. Skr. jñā-tra-m 'ability to recognise' O.H.G. be-cnuodelen 'give a sign of recognition' ir-chnuodilen 'become perceptible'; from which we may deduce a pr. Germ. form *knō-pla-. Pruss. sper-tla-n 'cushion of the toes', beside Lith. spir-iù 'strike with the foot'. Lith. se-klà Lett. se-kla 'seed': Lat. sae-culu-m. Lith. bā-klà 'home' bu-kla-s (ā?) 'lair of an animal': Skr. bhavi-tra-m 'world' (this meaning is not certain) A.S. bold (for *bodl) O.Icel. bōl 'house' pr. Germ. *bu-pla-. In Slav. -tlo- was replaced by -dhlo-, see below.

In the European branches, -dhro- dhlo- are found side by side with -tro- -tlo-, and with the same meaning; and the former often displace the latter. Cp. e. g. Gr. γένε-θλο-ν γενέ--θλη 'origin, race, scion, birthplace': Skr. jani-tra-m 'birthplace'. ἔδε-θλο-ν 'seat': Lat. sedi-culu-m, Lett. séde-kli-s 'seat' (with the addition of the suffix -io-). Lat. tere-bra: Gr. τέφε-τρο-ν O.Ir. tara-thar n. 'borer'. Lat. sta-bulu-m: O.H.G. sta-dal 'barn'.

Pr.Germ. -dra- -dla- is ambiguous (see p. 121): is for example O.H.G. hrī-ttara 'sieve' connected with O.Ir. cria-thar or with Lat. crī-bru-m? In Slav. only -dhlo- occurs, as Czech rá-dlo O.C.Sl. ra-lo ora-lo 'plough': Lat. arā-tru-m etc. (see p. 119), Czech by-dlo 'dwelling' Pol. by-dlo 'cattle, means': Lith. bū-klà 'home'. Cp. § 77.

§ 63. The Suffix -io--ia-, -iio--iza-1).

With regard to the fluctuation between -i\(\tilde{i}o\)- and -i\(\tilde{o}\)- see I § 117 p. 110. § 120 p. 111 ff. A parallel form -\(\tilde{\ell}_io\)- is also found (e. g. Skr. $t_{7}t$ - $t_{9}a$ -s Gr. $\pi\rho\sigma\vartheta\bar{\nu}\mu$ - $t\eta$), whose relation to the two other forms is obscure; it resembles the Skr. -\(\tilde{\ell}_yas-Gr. - $t\omega\nu$ (§ 135), forms of the comparative suffix.

In the nom. sing. we find in different languages -n- or -i-instead of and parallel to -io-. Thus Goth. har-ji-s, brūks for *brūk-i-s, haird-ei-s; Umbr. Trutit-i-s 'Truttidius' (also in the acc., Fisim 'Fisium' and neut. terti 'tertium'), Osc. Viínikiís 'Vinicius' (i), Púntiis 'Pontius' (ī or -ii-), Heirennis 'Herennius' (also neut. medic-i-m 'magisterium'), O.Lat. Cornēl-i-s (and acc. Cornēl-i-m, cp. also voc. fīlī), Lith. mēd-i-s and gaid-ỹ-s²).

From the earliest period this suffix was both primary and

¹⁾ H. Kern, Le Suffixe ya du Sansent classique, 1a de l'Arien, Mém de la Soc. de lingu. II 321 ff. F G. Benseler, De nominibus propriis et Latinis in is pro 1115 et Graecis 15 17 pro 105 107 terminatis, Curtius' Stud III 147 ff. G F Aly, De nominibus 10 suffixi ope formatis, Berol. 1873 J. Akens, Über die Adjectiva auf \$\alpha \cdot 0.5, \eta 10.5, \eta 10.5, \text{ 0105}, \text

²⁾ In I § 84 Remark 1 p. 80, I assumed the existence of -14- as a form of the Idg suffix beside -10-. As my pupil Prof. W Streitberg has recognised, it is preferable to assume -1- -5- as the original forms (-i-:

secondary, and its neuter and feminine forms are frequently used as substantives (§ 158).

Three chief functions of this suffix may be distinguished.

1. It forms verbal adjectives with the meaning of the so-called fut. pass. participles or participles of necessity, or with a simple participal meaning, active or passive. In Sanskrit, but nowhere else, these adjectives appear as a class of forms in active and extensive use. The neuter and the feminine are often used as abstract substantives (see above).

Idg. Skr. $y\acute{a}j$ -ya-s Gr. $\acute{a}\gamma$ -io-s 'venerandus', fem. $y\acute{a}j$ - $y\ddot{a}$ $\acute{a}\gamma$ - $l\ddot{a}$, \checkmark $ya\ddot{g}$ - 'revere'. Skr. $s\acute{a}c$ -iya-s 'whom one must help, must value', Gr. $\acute{a}o\sigma\sigma\eta\tau\acute{\eta}\varrho$ 'helper' from * $\acute{o}\sigma\sigma\sigma$ - which stands for *sok*- $\acute{q}o$ -, Lat soc-iu-s, \checkmark seq- 'be together with, follow'.

Aryan. In Skr.-io-appears as a living participial suffix; e. g. dfś-ya-s dárś-iya-s 'visible, worth seeing' cét-iya-s 'perceptible'. Examples of substantival usage are: neut. vác-iya-m vác-ya-m speech, word', fem. vid-yá 'knowledge'. For the fluctuation between -ya- and -iya- see Edgren, Journal of the Amer. Orient Soc. XI 74 ff.

Following a root ending in a short vowel the suffix assumes the form -tyo- instead of -io-, as kf-tya-s 'faciendus' kr-ty-am

-i- == -10- · -120-), so that this form represents the weak-grade phase of the suffix which we are discussing, in the same way as -i- represents that of -1ē- (§ 109). Streitberg is certainly right in laying especial stress on Gothic forms like brūks un-nuts The form -11- arose through the -1being added from cases which had -20- -2e-. Just so we have in Lith. ji-s jī for *i-s *ī on the model of jo etc Such forms as Lith. mo-ji-s are of the same kind as O C.Sl ladi-n § 110 and Skr. svadhā-yin- § 115. Beside the Idg stems formed with -zo- -ze-: -i- (-izo- -ize-: -i-) there probably existed from the pr Idg. period onwards invariable -10- stems which never had -1-. To these however we must not refer nominative forms like Skr. yáj-y-as Gr äy-10-5 Lat. exim-iu-s, which were new formations (op Goth. brūks), and similarly Skr yá-s Gr. 5-5 (cp. Lith. fl-s). I do not believe that the late Greek nouns ending -is -iv instead of -ios They were created on the model of personal names belonging to the classical period, such as Δλεξις Ζεύξις (cp. R. Wagner, Quaestiones de epigrammatis Graecis, Lips. 1883, p. 96).

'business' kr-tyd 'infliction, bewitchment', a new formation based upon such stems as -kf-t- 'faciens' (§ 123).

In Avest. -ya- is rarer, e. g. dar's-ya- 'visible', vairya-'worth choosing or desiring', išya- 'desired, dear'.

Armenian. Here no doubt should be classed *li*, gen. *lioy*, 'full' from *plē-jo-.

Greek. $\sigma r \dot{\nu} \gamma - \iota \sigma - \varsigma$ 'abominable, odious'. $\pi \dot{\alpha} \gamma - \iota \sigma - \varsigma$ 'established, firm, durable'. $\sigma \phi \dot{\alpha} \gamma - \iota \sigma - \varsigma$ 'slaying, killing'. Substantival usage: $\epsilon \rho s \iota \pi - \iota \alpha$ pl. 'ruins, debris', $\sigma \phi \dot{\alpha} \gamma - \iota \sigma - \nu$ 'offering, victim for offering'.

Italic. Lat. exim-iu-s 'eximendus, exceptional, distinguished'. In-fer-iu-s 'presented, offered': cp. Avest. bairya- 'presenting'. Substantives: frag-iu-m 'breach, fracture', stud-iu-m 'zeal, eagerness, desire', exuv-iae pl. 'clothing, cast-off skin'.

Old Irish. Subst. fem. in-sc-e 'speech' \sqrt{seq} , neut. suide 'seat', \sqrt{sed} , frecre for *frith-gaire (I § 514 Rem. 2 p. 376) 'answering, answer' \sqrt{gar} .

Germanic. Adjectives with the meaning of the fut. partic. pass. are commoner than in other European languages. Goth. brūkja- (nom. brūks) O.H.G. prūchi 'useful, serviceable'. Goth. un-nutja- (nom. un-nuts) 'useless' O.H.G. nuzzi A.S. nyt 'useful'. Goth. un-qēpja- (nom. un-qēps) 'unutterable'. O.H.G. gi-fuori suitable, useful'. Here perhaps should be classed Goth. havi, 'gen. háujis, O.H.G. hewi n. 'hay' pr. Germ. *\tau_ni_ia-n. i. e. 'that which is to be cut'. Abstract nouns: neut. O.H.G. gi-fuori 'suitability, usefulness' compared with the adj. gi-fuori; Fem. A.S. nyt O.Icel. nytr 'use' compared with adj. A.S. nyt, Goth. brak-ja 'fight' (originally 'breach') with brikan 'to break'.

Balto-Slavonic.

In Lithuanian there are only a few adjectives; e. g. sriau-ja-s 'flowing swiftly', žala-s žale-s (Pruss. acc. saligan with g=j) 'green', properly being verdant', from žėl-ti 'to be verdant'. The following may be adjectives used substantivally: $v \dot{e}$ -ja-s 'wind' (he who blows'), $gaid-\tilde{y}$ -s 'cock' (he who crows'), from $g\ddot{e}d$ - $t\ddot{e}$ 'crow'), etc., all masculine. Forms formerly neuter used as substantives: $t\ddot{e}d$ - $t\ddot{e}$ 'word' (cp. Skr. $t\ddot{e}d$ - $t\ddot{e}d$), $t\ddot{e}d$ - $t\ddot{e}d$ 'bite', $t\ddot{e}d$ - $t\ddot{e}d$ 'cut or blow' with a cutting instrument (Skr. $t\ddot{e}d$ - $t\ddot{e}d$)

'to be hewn or cut off') and other such forms; feminine forms used as substantives are pradžià 'beginning' for *pra-d-iā beside pra-dč-ti 'begin' (\sqrt{dhē}), žin-ià 'knowledge' and others.

Slavonic. Adjectives which should no doubt be classed here are lust 'deceitful' for *lug-it. O.H.G. luggi lukki O.Sax. luggi 'deceitful' pr. Germ. *luz-ia-; also vēždī 'knowing, aware' for *ved-it and other examples. Substantival usage: luša 'lie' for *lug-ia. O.H.G. lugī 'lie' which implies a form *luz-iō, jašda 'food, victuals' for *ēd-jā: Lat. in-ed-ia Skr. ad-ya-s 'eatable' O.Icel. ētr 'eatable' for *at-ja-z; sta-ja 'position, standing-place, stall'; dažda 'gift' for *dād-jā from the reduplicated form da-d-'give'.

Remark 1. There is often room for doubt whether an -io-form should be classed here, or whether it be a secondary formation (2). Thus, for example, Gr. $a\varphi\dot{a}\gamma_{-io-\varsigma}$ may also have been formed from $a\varphi\dot{a}\gamma_{-i}$'s slaying, offering', O.H G luggi lukki from lug m. 'lie' It should further be observed that the popular conception of the meaning of a word was very liable to change; a form which was originally primary might be regarded as a derivative, and vice versa. Thus e. g. Lat. $r\bar{e}g$ -iu-s, which the Romans certainly looked upon as derived from $r\bar{e}x$. may very well have been primary to start with cp. Skr. $r\bar{a}j$ -iyd-s, subst $r\bar{a}j$ -iyd-m, beside $r\dot{a}j$ -'king' and $r\dot{a}\dot{s}$ -ii $r\dot{a}j$ -a-ii 'shines forth, is conspicuous, rules, governs'; the verbal stem from which $r\bar{e}g$:u-s was originally derived died out in Latin, and thus the form was firmly established in the popular conception as a derivative of the noun $r\bar{e}x$. Cp. Rem. 3 p 132.

2. -io- as a secondary suffix, forming adjectives which denote possession, origin, and other ways in which one thing may be connected with another. In these adjectives as well as in the former group the neuter and the feminine were often used as substantives with abstract meaning, and then -io-m and -ia- were taken to form substantives of this kind even where there was no corresponding adjective in -io-.

It is specially important to notice that in compounds with epithetised meaning, the so-called bahuvrīhi (§ 50), and also in adjectival compounds containing a governing preposition (§ 15 p. 30, f.), -io- is often the sign of the adjectival character of the word; e. g. Gr. όμο-πάτρ-ιο-ς beside όμο-πάτωρ 'from the same father', Skr. άnv-antr-ya-s 'situated in the intestines'.

Idg. *pstr-ijo-s 'belonging to a father' from *pster- 'father':

Skr. pitriya-s Gr. πάτριο-ς Lat. patriu-s. When the suffix was added to o- and ā-stems, the final vowel of the stem was dropped (cp. Rem. 3 p. 132); examples are *eku-ijo-s 'equinus' from *ekuo-'equis': Skr. άἐνιγα-s Gr. ἵππιο-ς, *aḡr-ijo-s 'situated in the fields' from *aḡ-ro- 'field': Skr. aϳrίγα-s Gr. ἄγριο-ς ('wild').

Substantives: Skr. svápnya-m Lat. somniu-m O.C.Sl. sŭnije sŭnije 'dream' beside Skr. svápna-s Lat. somnu-s O.C.Sl. sŭnii 'sleep'. *ghņt-3ā 'a slaying' seems to be an Idg. fem. of this kind; Skr. hatyā 'killing' O.Sax. gūđea 'fight' Lith. ginczià 'strife', beside the part. pass. *ghņ-tó- (Skr. hatá-) 'struck, slain'.

In adjectival compounds. Skr. dáša-mās-iya- Avest. dasa-māh-ya- 'lasting for ten months' (beside Gr. $\delta \epsilon . \dot{\alpha} - \mu \eta \nu o - \varepsilon$), Skr. $\dot{\alpha}$ - $\mu \eta \nu o - \varepsilon$ (beside $\dot{\epsilon} \mu - \mu \eta \nu o - \varepsilon$) 'running its course in a month' $\dot{\epsilon} \pi \iota - \mu \dot{\eta} \nu - \iota o - \varepsilon$ 'calculated for a month, lasting for a month', Gr $\dot{\alpha} \mu o - \pi \dot{\alpha} \tau \rho - \iota o - \varepsilon$ O.Icel. samfedr' from the same father' (compare O Pers hama-pitar- Gr. $\dot{\alpha} \mu o - \pi \dot{\alpha} \tau \omega \rho$).

Aryan Skr. gáv-ya- Avest. gao-ya- 'bovinus' from gav'bos': Armen. kog-i 'butter' (see below). Skr śravas-iya- 'glorious'
from śrávas- 'glory' Avest manah-ya- 'spiritual, invisible' from
manah- 'spirit': cp. Gr. τέλειο-ς 'complete, having reached
its end' for *τελεσ-μο-ς beside τέλος n. 'end, goal'. Skr. márt-iyaAvest. maš-iya- O.Pers. mart-iya- 'mortal, a man' beside Skr.
márta-s 'a mortal, man': cp. Gr. ἀ-μβοόσ-ιο-ς 'immortal' (I § 120
p. 112). Skr. bhēṣaŋ-yà-¹) Avest. baṛṣaz-ya- 'containing healing
power, medicinal' from bhēṣaj-á-m baeṣaz-e-m 'healing power,
medicine'. Skr. grām-iyá- 'belonging to a village' from gráma-s
'village, small community', kṣatr-iya- 'holding lordship, lord from
kṣatrá-m 'lordship', sén-iya- 'provided with missiles' from sénā
'missile'.

The group of participles in -tav-ya- was a new formation in Sanskrit, which did not become at all common until the post-

For typographical reasons the svarita accent is represented in this volume by the sign of the grave accent, and not as it was in vol. I p. 589.

Vedic period: e. g. kar-tav-yà- 'faciendus' from the nomen actionis kár-tu-.

Substantives. Neut. Skr. kṣatr-iya-m 'lordship, sovereign might', dūt-iya-m 'message, duty of a messenger' (dūtá-s 'messenger'), Avest. sāsn-ya- 'announcement, dictate, command' (sāsna-'word, announcement'). Fem. Skr. pád-yā 'footstep' (pád-ya-'relating to the foot') '), śārav-iyā 'bowshot' (beside śārav-yà-m 'goal of the arrow', from śāru-ṣ 'arrow').

In adjectival compounds the suffix is rare. Skr. su-hást-iya- (beside su-hásta-) 'with beautiful hands' mádhu-hast-iya- 'holding sweetness in the hand' ádhn-gart-iya- 'situated on the driver's seat', Avest dēušmanah-ya- 'cherishing evil sentiments, evil-docr' (ep. Skr. dur-manas- Gr. δυσ-μενής).

Armenian. This suffix appears to be contained in the nouns in -i. kog-i 'butter' ('coming from the cow') with g for μ (I § 162, 2 p 145) from kov 'cow': Skr. gáv-ya-. To this group no doubt belong the further examples gin-i 'wine', i. e. 'that which comes from the grape' (cp. Gr. olvo-5 Lat. vīnum; for the suffix cp. Lith. ap-vy-n-ȳ-s 'hops'), orj-i 'not castrated' mi-orj-i 'μόνορχις' from orj 'male', etc.

Greek. νά-ιο-ς νή-ιο-ς 'belonging to a ship', from ναῦ-ς 'ship': Skr. νάν-iya- 'navigable'. δῖο-ς 'heavenly, glorious' for *διF-ιο-ς from $ΔιF-\cdot$ Skr. div-yά-s 'heavenly'. πεζό-ς 'going on foot' for *πεδ-χο-ς beside πον'ς ποδ-ός 'foot': Skr. pάd-ya-s 'relating to the foot'. ϑοῖο-ς 'early, eastern' for *-οσ-χο-ς, from ϑαίς 'rosy dawn': Skr. ušas-ya-s 'dedicated to the dawn'. γομφ-ίο-ς 'molar tooth' (orig. an adj. joined with οδονίς) from γόμφο-ς 'plug, peg': ep. Skr. jάmbhya-s 'molar tooth' or 'incisor tooth' from jámbha-s 'bite'. Lesb. χέλλιοι Ion. Att. χείλιοι (χίλιοι) 'thousand' for *χεολ-ιοι from *χεολο- (ep. δεχά-χῖλοι): Skr. sa-hasr-iya-s 'thousandfold' from sa-hásra-m 'thousand'; parallel to this is Dor. -κατ-ιοι Arcad. -κασ-ιοι in δια-κάτιοι 'two hundred' from ξ-κατό-ν 'hundred'.

²⁾ With this Gr. $\pi \kappa \zeta a$ 'bottom, extremity, edge, border' is usually compared. Perhaps we should assume the existence of an original subst. *ped- $\chi \bar{a}$.

σωτήρ-ιο-ς 'saving, delivering' from σωτήρ 'saviour'. $\lambda ειμών$ -ιο-ς 'belonging to the meadows' from $\lambda ειμών$ 'meadow'. Ion. (and other dial.) $\beta ασιλή(F)$ -ιο-ς 'kingly' from $\beta ασιλεύ-ς$ 'king' and the like (Att. -ειο-), whence the ending - η ιο-ς spread to other stems, e. g. $\alpha v \delta \rho$ - $\dot{\eta}$ ιο-ς, $\pi ο\lambda εμ-\dot{\eta}$ ιο-ς. $\tau \dot{\iota}$ μ-ιο-ς 'held in honour' from $\tau \bar{\iota}$ μή 'honour'.

Remark 2 There remain certain groups of nouns, ending in -aco-5 -oco-5 -oco-5, and retaining the c (e.g. diraco-c, alloio-5, olreio-5), which occur in several extensive classes of formations; but their origin and development is still in many respects obscure, in spite of many attempts to investigate the subject thoroughly (see p. 122 footnote 1) They cannot be directly connected with Sanskrit forms like hiranyá-ya-s 'golden' from hiranya-m 'gold', gavyá-ya-s 'bovinus' from qavyá-m 'bovinum', nor with Lith vasaró-fi-s 'field sown with spring-corn' from vasarà 'summer'. alloio-5 etc. may well have been formed on the analogy of noio-5 roio-6, which probably arose from -02-20-s. Thus -aco-eco- (the latter only in some words) perhaps, go back to -a1-20 -e2-20-. Have they any connexion with Skr. -ēya-?

θελετήρ-ιο-ν 'delight, magic charm' from Substantives. θελκτήρ-10-ς 'enchanting' θελκτήρ 'charmer' αίδοῖο-ν 'pudendum' from aldoto-5 'he before whom one feels shame', aldw's 'shame, modesty'. After the time of Homer neuter forms like these often assumed a diminutival meaning, as dovt9-10-v 'little bird', έταιρίδ-ιο-ν little mistress', ἀσπίδ-ιο-ν 'little shield' (hence -ιδιο-ν broke off as an independent suffix: ἀδελφ-ίδιο-ν 'little brother' ξιφ-ίδιο-ν 'little sword'); the intermediate stage between these two meanings was that of belonging to a kind; cp. the suffix -īno- in Germanic (§ 68). σωτηρ-ία 'deliverance' from σωτήρ-ιο-ς. ξεν-ία 'hospitality' from ξέν-ιο-ς 'hospitable'. ήσυχ-ία 'quietude' from noux-10-5 'quiet'. The endings mentioned in Remark 2 were also used in the same way in substantives; e. g. Ion. ἀναγκαίη 'necessity' from ἀναγκαῖο-ς 'necessary' (compare ἀνάγκη 'necessity').

Adjectival compounds: ἐννεά-βο-ιο-ς 'worth nine oxen', παν-ημέρ-ιο-ς (beside παν-ήμερο-ς) 'lasting the whole day', ψενδ-όρχ-ιο-ς (and ψενδ-ορχο-ς) 'forsworn'. Where the compound contains a preposition which, in sense, governs the latter part, -io- is fairly regular; e. g. ὑπ-ασπίδ-ιο-ς 'situated under a shield', παρα-θαλάσσ--ιο-ς 'situated near the sea' (§ 31 p. 53).

Italic. Lat. Jov-iu-s 'belonging to Juppiter' Umbr. Iov-iu abl. 'Jovio' Osc. Iúv-iia 'Joviam'. Lat. cēnsōr-iu-s from cēnsor. praecōn-iu-s from praecō. lucr-iu-s from lucru-m. nox-iu-s from noxa.

Substantives. Lat. augur-iu-m beside augur-iu-s from augur, dēversōr-iu-m beside dēversōr-iu-s from dēversor, hērēd-iu-m from hērēs (stem. hērēd-), collēg-iu-m from collēga. nox-ia beside nox-iu-s from noxa, custōd-ia from custōs (stem custōd-), famil-ia Umbr. fameř-ias nom. 'familiae' beside Lat. famulu-s; Osc. medikk-iaí loc. of medikk-iā- 'function of a medix' (cp. Lat. vindic-ia from vindex).

Adjectival compounds. Lat. acu-ped-iu-s 'swiftfooted', falci-ped-iu-s: cp. A.S. ān-fēte 'one-footed' (cp. below under Germanic); falsi-jūr-iu-s; centi-nōd-iu-s; in-vīn-iu-s. Where there was a governing preposition, other adjectival suffixes were generally employed, cp. ante-lūc-ānus-, extrā-ordin-āriu-s and similar compounds.

Old Irish. Besides the adjectives in -de -te, which shew an extension of the suffix (as dal-te 'forensis' from dal 'forum', daur-de 'quernus' from daur 'quercus'), it can hardly be said that any derived adjectives remain which are formed simply with -io-. But manyof the substantives connected with these adjectives have been preserved; e. g. aue ōa 'grandson' = O.C.Sl. u-jī Pruss. awi-s 'uncle', beside Lat. avo-s 'grandfather'. Neut. orbe orpe 'inheritance, heritage' = Goth. arbi 'heritage', common groundform *orbh-izo-m (I § 139 p. 124 f., § 335 p. 267, § 524 p. 380), beside Armen. orb 'orphan' Lat. orbu-s 'set free, bereft, orphaned' (the original meaning therefore of the Irish and German word was probably 'something, i. e. property, bereft, left behind'), cenēle 'genus' from cenēl 'genus' (cp. Gr. svvalo-v svvalā beside εὐνή 'couch', ἀναγαίη beside ἀνάγκη 'necessity', οἰκίο-ν οἰκία beside olno-5 'house', O.C.Sl. ognište n. 'fireplace, hearth' for *-isk-je beside Pol. ognisko n., and the like). Fem. lane 'plenitudo' from lan 'plenus', oge 'integritas' from og 'integer', galarche 'aegritudo' from galrach 'aeger'.

Cp. also Gallic proper names like Cintugnat-iu-s beside Cintugnatu-s, Tout-iu-s beside Toutu-s (cp. Gr. 'Αντιγένε-ιο-ς, Τελαμών-ιο-ς).

Germanic. In the adjectival use it is no longer a living suffix, its place having been taken by -īna- -za- etc.; but it is frequently retained in substantives. Goth. nip-ji-s 'cousin, kinsman' O.Icel. niā-jar pl. 'descendants, offspring' A.S. niāāas pl. 'men' for *ne(p)t-jo- (I § 527 p. 382) beside O.H.G. nefo 'nephew, kinsman', Idg. stem (in the weak form) *nept-: Avest. napt-iya- 'kinsman', Gr ἀνεψ-ιό-ς O.C.Sl. net-ijī 'first cousin' Goth. hairdeis O.H.G. hirti 'herdsman' ('he who belongs to the herd') pr. Germ. *zirā-iza-, beside Goth. hairda O.H.G. herta 'herd'. Goth. gupblöstr-ei-s 'offerer' beside O.H.G. bluostar 'offering'. O.H.G. ouwa O.Icel. ey (pl. eyjar) 'marshy land, island' ('watery' f. scil. 'earth', cp. Gr. πολεμία 'enemy's land') for *a(z)u-jó (I § 444 c p. 330), beside Goth. ahva O.H.G. aha 'water'.

Neuter and feminine forms used as substantives. Goth. reik-i O.H.G. rihh-i n. 'realm, lordship' beside Goth. reik-s 'lord, ruler': Skr. rāj-iyá-m, yet cp. Rem. 1 p. 125. Goth. andbaht-i n. 'service' from andbahts 'servant', piub-i n. 'theft' from piufs 'thief'. Goth. háuhisti n. 'the highest height' from háuhists 'highest': cp. Skr. jyāiṣṭh-ya-m 'highest power' from jyēṣṭha-s 'most powerful'; Goth. unháili n. 'illness' from unháils 'ill'. O.H.G. diub-(i)a f. 'theft' beside Goth. piubi n. Goth. ga-riud-jō f. 'shame' (transferred to the n-decl.), beside ga-riud-i n., from ga-riups 'modest, chaste'.

It is probable that some of the adjectival compounds of West-Germanic (and Norse) like O.H.G. heig-muot-i 'hot-tempered, passionate' lang-līb-i 'longaevus' are old 20-stems (cp. Kluge, Nom. Stammb. p. 77. 104). We must certainly class here Goth. uf-dip-ei-s 'under an oath, bound by oath', and the Goth. substantival neuter forms făura-daŭri 'that which is before the door, street' anda-naht-i 'the time close on night'.

Balto-Slavonic. In Lithuanian the suffix is no longer in use to form adjectives; but it often occurs in groups of compounded suffixes, as -in-i-s (med-in-i-s 'wooden').

Masculine forms used as substantives. arkl-ỹ-s horse from árkla-s plough. To this class also belong musū-ji-s he who is ours from gen. musū our (cp. O.C.Sl. našī our for *nās-jī beside the gen. nasū), Prūsaicsiū-ji-s he who belongs to the family Prūsaicsiai, and the like.

Some masc. forms are derived from substantival neuters: ilg-1-s 'length' from ilga-s 'long', szalt-i-s 'coldness' from szálta-s 'cold' etc. (cp. the Slavonic below).

This -io- appears in adjectival and indeed in most other compounds; e. g. tri-rāš-i-s 'three-pronged' from rāša-s 'prong', minkszt-galv-i-s 'soft-headed' i. e. 'weak-headed' from galvà 'head', apý-vakar-i-s 'the time towards evening' (an adj. used as a subst.). The general practice of forming compounds with -io- may have sprung from this group of words.

In Slavonic it is still living as an adjectival formative suffix (-je- = orig. -20- and -1je- -ije- = orig. -ijo-, I § 36 p. 37), forming adjectives from the names of living beings, e. g. materi motherly from mati, clovect human from clovect, ovici and oviciji oviciji ovium from ovica, synovi filii (for the l see I § 147 p. 132) from synii (synov-, cp. Skr. išav-yà- relating to an arrow from išu-, Gr. adveso-ç for *factef-10-ç town-like from a ovo, boè-iji boè-iji 'divine' from bogu, deviji deviji 'maidenly' from deva.

Neuter forms used as substantives: ostrije 'sharpness' from ostrii 'sharp', lakomije 'greediness' from lakomii 'covetous, greedy' (cp. Lith. ilgi-s and the like), polizije 'usefulness, use' from poliza 'useful', znamenije 'designation, mark, token' from zname 'mark, token' and (with collective meaning) kamenije 'stone-work, stones' from kamy 'stone', dražije 'timber-work, beams' from dragii 'beam', and so forth. Feminine forms: suša 'dryness' from suchii 'dry', arožda 'folly' from arodii 'foolish', bratrija bratija 'brotherhood, brothers' (cp. Gr. apazola). In all these instances the adjectives from which the substantives came have fallen 'out of use.

Only isolated examples of adjectival compounds have this suffix; e. g. bez-otici 'without a father, fatherless' (otici 'father')

bez-umli 'without sense, unintelligent' (umu 'sense') like Lith be-tévis be-prôti-s.

Remark 3. The fact that in many cases we cannot tell whether -10- is primary or secondary (see Rem. 1) naturally suggests the question, whether its use as a secondary suffix may not be wholly due to a relation accidentally established between 10-formations which originally were primary, and nouns containing the same root, as for instance between *reg-120- and *rēĝ- 'ruler, king'. In this case it would be questionable whether the disappearance of the -o- and $-\bar{a}$ - of the stem was a real phonetic process, or whether, which is far more probable, some originally primary formation, e. g. *jug-to- () jeug- 'yoke to, unite') was brought into connexion with a noun like *jugo-m 'yoke', and that this alone caused the apparent loss of the stem-final wherever it takes place. Such instances as Skr. bhuran-yá-ti 'he is active' derived from bhurana- 'active', Gr µeillagw for *µeilly-jw from melliyo-c must also, no doubt, be taken into account I must content myself here with directing attention to these questions, which are still unsettled -On these points the student may now be referred also to Windisch, Über die Verbalformen mit dem Character R, p. 55 f

3. There are some adjectives in which -20- appears to have had a comparative meaning (cp superl. *medh-nmo-s § 72 beside *medh-20-s 'medius'), so that -2es- -1s- (e. g. in Skr. compar. náv-yas- superl. náv-1š-tha-, § 81. 135) may be regarded as an extension of -20- by an s-suffix.

*al-10-s 'alius': Armen. ad, Gr. άλλο-ς Lat. aliu-s O.Ir. aile Goth. alji-s, cp. Ar. *an-2a- 'alius' (Skr. anyá- Avest anya-O.Pers. aniya-), which is derived from another root but is similarly formed. *medh-20-s 'medius': Skr. mádhya-s 'medius', Armen. mēj, gen. mijoy, 'midst', Gr. μέσσο-ς μέσο-ς, Lat. mediu-s, Gall. Medio-matrici, O.C.Sl. fem. used substantivally meždu 'boundary' for *media (cp. O.Sax. middea O.Icel. miðja — a weak fem. — 'midst'). *neu-20- beside *neu-0-s 'new, young' (cp. Skr. mú, Gr. m) etc.): Skr. návya-s, O.Ir. nūe (Gall. Novio-dūnu-m), Goth. niuji-s, Lith. naūja-s. Skr. sav-yá-s O.C.Sl. šu-jī 'left' (cp. I § 185 p. 161). Gr. δεξ-ιό-ς 'right'.

Certain possessive pronouns with -io- should be placed in this group; e. g. Lat. meu-s for *me-1o-s (I § 134 p. 121) Pruss. mais (stem ma-ia-) O.C.Sl. mo-ji 'my', Osc. tiium 'tu' Umbr. tiu tiom 'te', properly 'tuum', Pruss. twais

(stem twa-ia-) O.C.Sl. tvo-ji 'thy', and further Skr. mad-tya-s 'my' tad-tya-s 'his, eius'. Then e. g. *me-io- would be related to *mo- (Avest. ma- Gr. ἐμό-) as Gr. ὑμέ-τερο-ς to ὑμό-ς.

We should also include certain ordinal numerals with -jo-. Skr. pūrv-iyá- pūrv-iya- 'previous, first', Avest. pavirya- 'first', Gr. πρώην 'lately' for *πρωβ-ιᾶ-ν (I § 306 p. 242). Skr. dvit-tya-Avest. bit-ya- 'second'. Skr. trt-tya- Avest. prit-ya- Lat. tert-iu-s Goth. prid-ja-n- Lith. trēczia-s for *tret-ya-s O.C.Sl. tret-tjt' 'third' beside Gr. τρίτο-ς. Skr. túr-ya- tur-tya- Avest. tūrya- 'fourth' for *ktur- (I § 471 p. 343).

This third function of the suffix -20- appears also in active use in some of the separate Indo-Germanic languages. E. g. Goth. fairners O.H.G. firm 'old' and Goth. alpeis 'old' may have been formed on the model of nuji-s

§ 64. The Suffix -wo--wa-, -uwo--uwa-. This is both primary and secondary, it is found in substantives and adjectives, but no special meaning can be assigned to it. In Latin and German we must notice its frequent use in forming adjectives to denote colour, a function it acquired simply by analogical extension. In these and in some other languages -wo-appears still as a living suffix.

Idg. *ek-uo-s 'horse', fem. *ek-uā (often referred to Skr. āṣ-ú-ṣ Gr. ἀπ-ύ-ς 'swift' Lat. acu-pediu-s, but it is difficult to reconcile the vocalism): Skr. āṣvā-s áṣvā, Gr. ũππος (the fem. perhaps survives in Ἰππη-μολγοί 'milkers of mares'), Lat. equo-s equa, O.Ir. ech, Goth. athva- seen in athva- tundi 'βάτος', Lith. aszvà. *gĕ-uó- 'living' (√ gez- 'to be astir, to live'): Skr. jīvá-Lat. vīvo-s Mod.Cymr. byw Goth. qiu-s (stem qiva-) Lith. gýva-s O.C.Sl. živū. *uıdheuo- -eua- beside Skr. vidh- 'become empty, lack': Skr. vidháva-s 'unmarried' vidhávā 'widow', Gr. γίθεο-ς 'unmarried' (the explanation of the η- is doubtful; see Wheeler, Der greech. Nominalacc. 110), Lat. viduo-s vidua, O.Ir. fedb Mod.Cymr. gweddw (I § 174 p. 154) Goth. viduvō (n-stem) O.C.Sl. vidova 'widow'; the word should no doubt be analysed *uidhe-uo- and compared with words like Skr. yaj-a-tá-s darś-

-a-tá-s Gr. έρπ-ε-τόν λάχ-ε-σι-ς, containing the -e- of thematic verbal stems (§ 79. 100), cp. Lat. vac-uo-s etc. below.

-μο- occurs as a secondary suffix in *poty-μο- *poty-μο- and *poty-μ-io- (a derivative form with -io-) 'father's brother, uncle': Skr. pityvya- Gr. (Ion. Cret.) πάτρως for *πατρω-fo-ς (ρω- = -f-, I § 306 p. 241 f.) Lat. patruo-s O.H.G. fetiro and fatureo (*faduruia-n-); for the Avest. tūirya- see Bartholomae, Bezzenberger's Beitr. X 271 f.

In the form -uyo-. Skr. dhr-uvá- 'firm' beside O.C.Sl. sŭ-dravŭ zdravŭ 'sound, healthy' for *-dor-vŭ.

Aryan. Skr. viś-va- Avest. O.Pers. vīspa- (I § 159 lp. 142) 'all' (in Skr. it also means 'containing or pervading all'), beside Skr. viś- enter, penetrate, take possession of' (orig. 'completely filled' or 'filling', cp. Skr. śa-śvant- Gr. $n\tilde{a}_{\varsigma}$ § 126). Skr. rk-vá- 'praising'. Skr. pak-vá- 'ripe' (from pac- 'to cook'). We have already noticed that Skr. dhruvá- 'firm' should be classed here, i. e. dhr-uvá-with the dissyllabic form of the suffix, cp. O.C.Sl. $s\tilde{u}$ - $drav\tilde{u}$ - 'sound, healthy' for *-dor- $v\tilde{u}$ 1).

The suffix is also denominative in some instances; e. g. Skr. kēša-vá-s 'long-haired' from kēša-s 'hair', rāsnā-vá-s 'provided with a girdle' from rásnā- 'girdle', anji-vá-s 'slippery, smooth' from anji-š 'unguent', rājī-vá-s 'striped' from rājī- 'stripe'.

In some cases it is doubtful whether the suffix is primary or denominative: Skr. pūr-va-s 'former, earlier' Avest. pourva-O.Pers. parūva- (read parva-) 'earlier': Gr. *πρω-fo- seen in Dor. πρῶν 'formerly' for *πρω-fά-ν and in πρῶνο-ς Dor. πρῶνο-ς 'first' for *πρω-f-aro-ς (I § 306 p. 242), O.C.Sl. pri-vy-jờ 'first'. Similarly Avest. ae-va- O.Pers. ai-va- 'unus': Gr. ol-fo-ς olo-ς 'alone', ep. *οj-no- in Lat. oino-s anu-s etc.

Armenian. kea-, seen in kea-nk (gen. ken-aç) 'life' and other words, seems to have been developed from *kiva- and accordingly to belong to the stem *g*-uo- (see above). Compare Hübschmann, Armen. St. I 35.

¹⁾ Elsewhere -uva- for -va- in the Rig-Veds is 'a sporadic and doubtful exception'. See Edgren, Journ. of the Amer. Orient. Soc. XI 82.

Greek. ορθό-ς 'upright' for *ορθ-Fο-ς: Skr. #rdhoá-s' upright', Lat. arduo-s, O.Ir. ard (ardd art) 'high, great, noble'; with which we may compare Arduenna silva, Idg. *fdh-yó-s. κόρ-Fā (in Thessal. ? inscr.), Ion. κούρη Dor. κώρā Att. κόρη 'girl' (I § 166 p. 146 f.). λαι-(F)ό-ς 'left': Lat. laevo-s O.C.Sl. lēvā 'left'; compare no doubt Germ. *slai-ya-z 'weary, weak, dull, slow' (O.H.G. slēo A.S. slāw O.Icel. sljōr), so that this word for 'left' would represent the opposite of the universal Indo-Germanic word for 'right', Skr. dákšina- Gr. δεξιό-ς etc., in as much as the original meaning of the latter involved the notion of strength, ability, or eleverness, as is shewn by the Skr. dákša- 'strong, able, skilful'. *κεν-Fό-ς 'empty' Lesb. κέννος Ion. κεινό-ς 'Att. κενό-ς '); the by-form κενε-Fό-ς, represented by Cypr. κενεν-Fόν Ion. κενεό-ς, is parallel to ιε-ρό-ς beside ι-ρό-ς, and similar pairs of forms.

-fo- as a secondary suffix is no doubt to be traced in verbal adjectives ending in -τέο-ς, which stands for *-τε-fo-ς, as διωπτέο-ς to be pursued', and in adjectives in -αλέο-ς, standing for -αλε--fo-ς, as ὁωγαλέο-ς 'fragmentary, torn': these are based on stems in -το- and -αλο-.

Remark 1 Hesiod's gareio-c either represents an extended stem formed with -10-, *-re-f-10-c, or (which seems to me less likely) is a later corruption of a true Hesiodic form gareio-c.

The Skr. accent in $k\bar{e}\bar{s}a-v\dot{a}-$ etc. (see above) suggests the conjecture that $-\tau\dot{e}o-\varsigma$ in dactylic words came from $*-\tau\dot{e}o-\varsigma$ (cp. I § 676 p. 542 f.), and that $-a\lambda\dot{e}o-\varsigma$ afterwards conformed to the same type.

-fo- as a secondary suffix is perhaps also to be recognised in ἴσο-ς Cret. Fίσfo-ς 'equal', since the word may be referred to *wit-s-, a weak from of the stem of *weid-es- είδ-ος (cp. § 132); the pr. Gr. form will then have been *fixo-Fo-ς, cp. Umbr. mersuva from *med-(e)s- cited below. ἴσος has already been connected with εἴδομαι by Bechtel, Philolog. Anzeiger 1886 p. 15, who also gives the pr. Gr. form as '*fiδσfoς', but suggests no satisfactory explanation of the σ.

In the Att. κενότερος κενότετος the use of σ instead of ω (contrast σορώτερος) is a reminiscence of the older form *κεν. For. Cp. § 75.

Here too we should no doubt class ξέν Fo-ς 'strange, foreign' Ion. ξεῖνο-ς Att. ξένο-ς (I § 166 p. 146); yet it is not clear whether -Fo- is primary or secondary.

Italic. Lat. ar-vo-m, Umbr. arvam-en 'in arvum': Mod.Cymr. er-w 'cultivated land' Bret. er-v 'furrow'. Lat. sal-vo-s, Umbr. salvom salvom 'salvum' salvam 'salvam': compare Skr. sár-va-s Gr. οὐλο-ς ὅλο-ς (*όλ-fo-ς) 'all, whole'. Lat. vī-vo-s Osc. bivus nom. 'vivi': Skr. jī-vά-s etc., see p. 133 above Lat. cal-vo-s: Skr. kul-va-s 'bald'. Lat. scae-vo-s: Gr. σκαι-(f)ό-ς 'left', and add O Icel. skeika 'go awry, go wrong' (*skaikō- for *skayva-, see S. Bugge, Paul-Br. Beitr. XIII 515). In words denoting colours hel-vo-s. O.H.G. gelo 'yellow', common ground-form *ghel-vo-s; gil-vo-s, ful-vo-s, fla-vo-s (for *bhī-vo-s, compare O.H.G. blāo 'blue'?), ra-vo-s, fur-vo-s (I § 569 p. 426). Such forms as vacuo-s, nocuo-s, perspicuo-s, assiduo-s may be of the same kind as viduo-s; vacuo-s, for instance, will then have come from *vace-vo-s, the intermediate stage being *vacouo-s (I § 65 p. 52).

The suffix is secondary in *Minerva* for *menes-yā beside Skr. mánas- Gr. μένεσ- n. 'mind, sense' (cp. Skr. manas-vin-having sense, intelligent'); Umbr. mersuva abl. 'solita' for *meřs-uā(d), i. e. *med(e)s-yo- from meř-s 'ius'. Also in Lat. annuo-s from annu-s, strēnuo-s beside Gr. στρῆνο-ς 'strength', cernuo-s from *cerno- (or *cernā-) for *cers-no- 'head', cp. Gr. πράννα πρήνη (ἀμφί-πράνο-ς) for *πράσ-να; here too we should probably place the examples of -uo-s from *-e-yo-s, cp. Skr. kēša-vá-s Gr. δωντέ-(f)o-ς.

Remark 2. Do the adjectives in -īvo-s, as captīvo-s furtīvo-s sēmentīvo-s nocīvo-s cadīvo-s, come from feminine forms in -ī- (cp. Skr. rājī-vá-s), or from derivative verbs in -īre (*nocīre), like Lith. dalý-va-s from dalý-ti, Slav. chodi-vū from choditi (see below)? In either case there must have been a change of usage, from the primary to the denominative or vice versa

Old Irish. tar-b Gall. tar-vo-s Mod.Cymr. tar-w 'ox', usually compared with Gr. ravo-c, which is said to stand for *rav-fo-c (I § 639 p. 479). mar-b Mod.Cymr. mar-w 'dead', compared with \sqrt{mer} - 'die' (cp. Rem. 3).

Remark 3. Osthoff regards marb as modelled on the form of its opposite *gi-uo-s, O.Ir. bin beo Mod.Cymr. byw, whilst Bréal (Mém de la Soc. de lingu. VI 127) holds that even the Lat.-Slav. *mṛtuo- 'dead' (Lat. mortuo-s O.C.Sl. mrštvū) was originally *mṛto- and that it was altered on the same analogy. This seems to me not unlikely; and I would also suggest that possibly the Kelt.-Germ. *deks-uo- 'dexter' (O Ir dess O.Cymr. dehou, Goth. taihsva) may owe its suffix to one of the two words for the opposite idea, *laz-uo- *skaz-uo- (see pp. 135, 136) (op. Gr. detireed-s on the analogy of dexter, and many similar examples, Ber. der sächs Gesellsch der Wiss., 1883, p. 191 f)

Germanic. Goth. hlái-v n. O.H.G. hlēo, gen. hlēwes, 'grave-mound' ground-form *kloz-yo-: Lat. clī-vo-s, \sqrt{kle} : 'lean, incline'. A.S. earo O.Icel. orr 'swift' from which Finn. arvas is borrowed: cp. Skr. ár-van- 'hasting, swift'. O.H.G. rāwa ruowa 'quietude, rest' pr. Germ *rē-yō- *rō-yō-: Gr. $l_{QW}(F)\eta'$ 'letting loose, cessation, rest'. Words denoting colour; O.H.G. gelo: Lat. helvo-s, O.H.G. salo 'black, dirty', O.H.G. blāo 'blue' (compare Lat. flāvo-s?), A.S. baso 'purple' etc. (Kluge, Nom. Stammb. 81).

Balto-Slavonic. Lith. pỹ-va-s 'beer' O.C.Sl pr-vo 'draught, intoxicating drink', compared with pī- 'to drink' (O.C.Sl. pi-ti 'to drink' Skr. pī-ti-ṣ 'draught' Gr. πi-νω 'I drink' etc.); and since this is no doubt identical with pī- 'swell, be fat' (Osthoff, Morph. Unt. IV 41. 167), the word must be closely related to Skr. pī-va-s Gr. πī-(f)ο-ς 'fat'. Lith. paī-va-s O.C.Sl. pla-vū 'yellowish white, tawny' (it is possible that the Lith. word was borrowed from the Slav.): O.H.G. falo 'fallow, tawny'. Pruss. sy-va- O.C.Sl. si-vū 'gray': related to Skr. śyā-va- 'dark brown'. Pruss. pel-wo O.C.Sl. plē-va 'chaff', beside Lith. pelaī pl. 'chaff'. Lith. piī-va-s 'belly'; kaī-và 'hillock' (from kēl-ti 'to lift'). O.C.Sl. krava 'cow' for *kor-va (Lith. kárvē, containing a further suffix), compare Lat. cer-vo-s; gri-va 'mane'. Skr. grī-vā 'nape, neck'.

In Lithuanian it occurs in adjectives in -y-va-s, connected with verbs in -y-ti, as dalý-va-s 'sharing in' (dalývu búti be a sharer in') from dalý-ti 'to divide', aký-va-s 'provided with eyes, inquisitive' from akýti 'to get eyes, become porous' (cp. akýla-s 'observant'). In Slavonic there are adjectives in -i-vū -a-vū,

connected with verbs in -i-ti -a-ti, as chodi-vũ 'moving' from chodi-ti 'to go', ljubi-vũ 'loving' from ljubi-ti 'to love', laska-vũ 'coaxing, flattering' from laska-ti 'to flatter', déla-vũ 'effective, active' from déla-ti 'to effect, work'. These adjectives in -y-va-s -i-vũ are parallel to the Latin adjectives in -īvo-s; see Rem. 2.

§ 65. The Suffixes -no- -nā-, -pno- -nna- and -eno- -enā-, -ono- -onā-1).

With regard to the relation of -yno- to -no-, see I § 227 p. 193 f.

It is often maintained that the first vowels of -eno -onoare the same as the verbal thematic vowels e and o, so that e. g. the stem of Skr. bhárana-m 'act of bearing' is to be divided into bhára-na-, and compared with the bhára- of the 3. sing. bhára-ti; and that of Goth. bairan 'to bear', into baira-na-, and compared with the baira- of the 1. pl. baira-m. analysis cannot be justified by reference to forms like *dono-m 'act of giving' (Skr. dána-m, Lat. dōnu-m) beside *bhereno-m *bherono-m 'act of bearing', or to such as part. pass. *dhēno-s seen in O.H.G. gi-tān 'done' O.C.Sl. o-děnŭ 'done round with, set round with, clothed' beside O.H.G. gn-zog-an 'drawn' (-ono-) O.C.Sl. nes-enu 'borne' (-eno-). In these forms it is very far from certain that the suffix is -no- (stem * $d\bar{o}$ no- = $\sqrt{d\bar{o}}$ -+ suffix -no-, and so forth), since there is good reason for believing that the initial vowel of the suffix was contracted with the vowel of the root in proethnic Indo-Germanic, in just the same way as, for instance, the 3. sing. conj. *doti (Skr. dáti) from *dō-e-ti (see I § 115 p. 107). Now if we consider that it is just in tenses which have no thematic vowel that -eno- -ono- has firmly established itself as a participial suffix (Skr. bibhid-aná-s Goth. bit-an-s from V bheid- 'split, bite'. Goth. fulg-in-s 'hidden', O.C.Sl. nes-enŭ 'borne', Skr. dviš-aná-s beside the indic. dviš-té, dviš- 'hate', Avest. yn-ana- beside the indic. yn-ē, jan- 'slay') it will be seen that for our purpose it

Schnorr von Carolsfeld, Das lat. Suffix ānus, Archiv f. lat. Lexicogr. I 177 ff.

is absolutely necessary to regard -eno- -ono- as a simple indivisible suffix. From its usage it is clear that this suffix is very closely related to -no- -yno-; and there is nothing to prevent our assuming that -no- -yno- are the weak-grade forms corresponding to -eno- -ono-, just as we have side by side -mno- (-myno-?), -meno- -mono- (§ 71) and -tro- -tyro-, -tero- -toro- (§ 75). The assumption of this ablaut-relation, i. e. that -no- arose from -eno- (-ono-), would still hold good even though we regarded -eno- as ultimately divisible into two elements (-e-, -o-+ -no-), cp. *rudyt- the weak-grade form beside *rudo-nt- (§ 125).

This n-suffix formed chiefly verbal nouns, partly adjectives and partly substantives; the latter especially in the neuter and feminine, with abstract meaning (see § 158).

The suffix -(e)no- is characterised by its fertility as a participial and infinitival suffix in several languages, and some of the groups of adjectives and participles which it formed were very extensive.

As a secondary suffix it did not spread far until the Indo-Germanic languages had begun their separate developement, and then only in a few branches.

Remark. Sometimes it is not easy to distinguish whether in any particular word we have the suffix -(e)no- or an en-stem extended by the suffix -o-, i. e. an example of transference into the o-declension. The latter is undoubtedly the case e.g. in Skr. $\dot{a}\dot{s}n$ -a-s beside $\dot{a}\dot{s}an$ - m. 'stone', $p\bar{u}\dot{s}\dot{a}n$ -a-s beside $p\bar{u}\dot{s}\dot{a}n$ - name of a deity (§ 60 p. 112), Gr. $\dot{s}\dot{s}\dot{s}\dot{s}a$ -, 'young stag' for * $\dot{s}\dot{s}_{s}a$ -o-; beside O.C.Sl. $\dot{s}_{s}e$ -n- 'stag', $\dot{s}_{s}\dot{s}o$ - η 'whetstone' beside Skr. $\dot{a}\dot{s}an$ -, Lat. pullu-s for *puln-o-s beside Goth. fulin- 'foal', Lith. $\dot{s}_{s}e$ n-os pl. 'liver' beside Skr. yakn-. On the other hand it is doubtful whether Lat. $r\ddot{e}g$ nu-m contains the suffix -no-, or is an en-stem which has passed over to the o- declension, and is therefore identical with Skr. $r\ddot{a}\dot{s}\dot{a}n$ - 'government, regimen'. Cp. § 71 Rem., § 94 Rem

§ 66. 1. The Suffix in the form -no--pno-. The form -no- is found especially in verbal adjectives, which, like those in -to- (§ 79), were made from the verbal stem (not from a particular tense-stem). In Sanskrit these adjectives formed a fairly large class of participles by the side of the to- participles and of similar character. They are chiefly passive in meaning.

Besides these there are numerous substantives, many of which can be shown to have existed in the proethnic language, of different genders and generally abstract in meaning.

The form -uno- has on the whole the same value as -no-. Yet it must be observed that not -no-, but only -uno- appears to occur as the medial participial suffix of non-thematic present forms.

The nouns formed with -no--yno-, when used as adjectives (participles), have almost always the weak grade of ablaut in the root-syllable (the suffix bearing the accent, e. g. *pf-nó-'filled' \sqrt{pel} -, Skr. $p\bar{u}r$ -ná-), but as substantives more commonly the strong grade form (c. g. *qoz-nā 'requital', \sqrt{gei} -, Gr. $\pi o \cdot \nu \dot{\eta}$). Differences like *sup-no- *suep-no- 'sleep' are indications that the strength of the root-syllable varied within the case-system of the same word.

Idg. *pl-nó- *pl-nó- 'filled, full', from √ pel- 'fill': Skr. parná-s Avest. per na- Gr. perhaps nolloi 'many' (see I § 306 p. 242), O.Ir. lan, Goth. fulls pr. Germ. *fulna-z, Lith. pilna-s O.C.Sl. plunu; cp. Skr. pūr-tá-s Lith. pìl-ta-s 'filled'. *plē-nó- 'filled' from plē-'to fill': Skr. prāná-s Lat. plēnu-s; cp. Skr. prā-tá-s Lat. ım-plē--tus 'filled'. Skr. ánna-m 'food' for *ad-na- (I § 477, p. 352) Gr. έδ-ανό-ς 'catable' έδ-ανό-ν 'food' (with -nno-, see below), Ved-'eat'. Avest. per'nā- f. Goth. fullo f. (which has passed over to the n-declension) 'fullness'. *qoz-nā- f. 'requital' from \sqrt{qez} -(Skr. cay- Gr. τεκ-): Avest. kaenā- 'punishment', Gr. ποινή 'requital, punishment, reward', O.C.Sl. cena 'price'. *sup-no-*suep-no- suop-no- m. 'sleep, dream': Skr. svápna-s, Arm. kun (*suop-no-, I § 162 p. 145, § 201 p. 169) Gr. υπνο-ς, Lat. somnu-s (probably *suep-no-, 1 § 172 p. 152) O.Ir. suan O.Cymr. hun (cp. 1 § 339 Rem. p. 269), O.Icel. svefn, Lith. sapna-s O.C.Sl. sunu.

*leuqsno- or *louqsno- 'shining': Avest. raoxšna- 'shining', Lat. lūna O.Lat. inscr. losna for *loucsnā, O.Ir. luan 'moon', Pruss. lauxnos pl. 'stars', compared with leuq-s- in Skr. rukšá- 'shining', Lat. illūstri-s for *in-loucs-tri-s, A.S. lūxan lūxan 'give light' for *liuhs-jan, from \$\sqrt{leuq}\$-; on the other hand, without -s-, O.Sax. log-na (o probably short) 'flame'. Words

of this kind with -s- gave rise to a form -sno-, regarded as a single suffix, which occurs in a few words; see below. Cp. -s-ni- § 94.

Pres. medio-pass. part. with -nno- (beside this is found -ono-, cp. § 67). *kei-nno- 'lying' beside the indic. Skr. šε-tē Gr. κεῖ-ται: Avest. say-ana- 'lying' (Skr. upari-sayaná-m 'resting-place'), Gr. 'Ω-κεανό-ς 'he who surrounds' (cp. Skr. ά-śētē; von Fierlinger, Kuhn's Ztschr. XXVII 477). Gr. ἐδ-ανό-ς 'eatable' beside the indic. Skr. άd-m; ἐανό-ς 'dress, cloak' for *Fεσ-ανο-beside the indic. Skr. νάs-tē.

Remark This view of Ar -ana- and of Gr. -avo-, so far as they have the same meaning as -mana- -mna- and $-\mu evo$ -, cannot be called certain. As my pupil Herr H. Hirt reminds me, they may be regarded as having arisen from *- ηno -, just as the participal Ar -ana- can be referred to $-\eta no$ -; see § 67, b. Rem. p 152.

The meaning of -no- is not clear in *oμ-no-s 'unus': Gr. οἰνό-ς οἰνή 'ace on a die', Lat oino-s oenu-s unu-s O.Ir. oen Goth. dins Lith. vēna-s O.C.Sl. mū.

Aryan. Skr. ū-ná- 'where something is lacking, defective' Avest. $\bar{u}na$ - 'empty' from \sqrt{ey} - (Gr. $\varepsilon \bar{v}$ -v-g 'needing, bereft'). Skr. kši-ná- 'diminished, vanished, waning': compare perhaps Gr. φθι-νό-καρπος 'with fruit vanishing or vanished' (cp. Fick, Worterb. I3 236, Osthoff Morph. Unt. IV 115). Skr. dīrná- 'torn to pieces, scattered, beheaded' Avest. dare-nā- f. 'cleft, ravine': O.H.G. zorn A.S. torn n. 'indignation, anger', properly 'a torn or rent condition of the temper' (ground-form *dr-no-m). di-ná- 'bound' (dā- 'bind'), bhug-ná- 'bent' (bhuj- 'bend'), bhinnú-'split' for *bhid-na- (bhid- 'split'), thus it frequently appears as a living participial suffix. Skr. uš-ná- 'hot', also subst. m. and n. as well as f. (uṣ-nā-) 'heat'. Skr. bradh-ná-s 'pale', O.C.Sl. bronu 'whitish' for *brod-nu. Skr. tuna-s 'sheath, quiver', ground-form *th-no-s, V tel- (Gr. τελαμών etc.) Skr. yaj-ñá-Avest. yas-na- in 'worship, sacrifice', Viag- 'to honour' (for the -s- of the Avest. form see 1 § 403 Rem. p. 298): Gr. άγ-νό-ς 'revered, hallowed, pure'. Skr. praś-ná- Avest. fraś-na- m. 'question', \(\square\) prek-. Skr. sthuna- 'post, pillar' for *sthur-na-, Avest. stūnā- in hazamrō-stūna- 'with 1000 pillars', ground-form *stl-nā-: Gr. στήλη, see p. 143.

With -s- between root and suffix: Skr. tik-šná- 'sharp' (cp. tig-má- 'sharp'), krt-sná- 'whole, complete', and other examples.

The existence of Aryan -ana- = -nna- is hard to verify, because of its coincidence in form with orig. -eno-. Besides examples like Ved. yaj-aná- beside yaj-ná- (I § 227 p. 193 ff.) and the above mentioned medio-pass. pres. part. (cp. also Avest. aoj-ana- beside impf. indic. aox-ta, hu-nv-ana- beside pres. indic. hu-nū-itē and others), we should perhaps add here Sanskrit oxytone adjectives like krōś-aná- 'screaming', rōc-aná- 'shining' jar-aná- 'perishable', with the abstract substantives śvēt-aná 'the dawning' jaraná 'old age' (cp. Gr. oxsyaró-ç and oxsy-árn); the palatal sound instead of the guttural in rōcaná-sacaná- and other words was taken from such forms as rōcatē (see I § 448 Rem. p. 333). Cp. -anı- = -ynı- § 95, and -anu- = -ynu- § 106.

It is only occasionally used as a secondary suffix. Skr. strāi-ņa- 'female' from strī- 'woman', pāus-ná- 'male' from puṣ- 'man', purā-ná- 'former, old' from purā adv. 'formerly' Here also come vadhasná-m 'deadly weapon' beside vadhá-s and vádhar, of similar meaning, and karásna-s 'forearm' (cp. kará-s 'hand'), if they contain -as-stems, cp. Goth. hláivasnōs pl. f. 'grave' beside neut. hláiv with similar meaning; the Sanskrit ending is in most cases explained as -a-sna-.

Armenian. Run 'sleep' from *suop-no-, see p. 140 above. gi-n, gen. g-no-y, 'cost' from *yes-no- or *yēs-no-: Skr. vas-ná-s Gr. dvo-s dvn' 'sale-price, value' for *Fwo-vo- -vā-, Lat. vēnu-m for *ves-no- or *vēs-no-. Perhaps we should add vasn 'on account of' (beside O.Pers. vaš-na- and Avest. vas-na- 'will, favour', \(\sigma\) yek-; the Avest. form is for *vašna- through the influence of the pres. vas'mi), and the derivative un-ain 'empty' (beside Skr. u-na-; Armen. u- for Idg. ey-, cp. Gr. e\(\delta\)-v-\(\sigma\).

Greek. στυγ-νό-ς 'hated'. σπαρ-νό-ς 'scattered, rare, thin', beside σπείρω. σεμνό-ς 'revered' for *σεβ-νό-ς, √ tjeg- (I § 492 p. 362). στεγ-νό-ς 'covered, covering'. σμερδ-νό-ς 'terrible'. περκ-νός 'sprinkled, motley, dark': O.H.G. forhana f. 'trout', groundform *pγk-nā. δά-νος n. 'loan' is no doubt based upon a form

*do-no- from \sqrt{do} - 'give' (cp. § 132). λάγ-νο-ς 'lewd, wanton': cp. Lat. lēna for *lēx-nā (beside laxu-s). lix-vo-ç 'dainty, greedy': cp. O.H.G. lecchon 'lick', for pr. Germ. *likkona-n from stem *liz-na-I \$ 538 p. 394. apr-ro-c apr-rn 'toad': O.H.G. bru-n 'brown'. 90-vo-c 'throng, battle': Skr. dhū-na-s 'violently moved'. ol-vo-c 'wine' oi-un 'vine' oi-vo-v 'vine-leaf, vine-branch': Lat. vi-nu-s vi--nu-m and the derivative Armen. gi-n-i 'wine' (§ 63 p. 127), from √ yej- 'to wind', and hence we should place in the same group Russ. ven 'wreath' and the derivative O.C.Sl. ven-ici Lith. vain--lka-s 'wreath'. πύρ-αυνο-ς -αυνο-ν 'that with which fire is held, fire-tongs, coal-pan' for *-ανσ-νο- (see Osthoff, Zur Gesch. d. Perf. 488), to which add possibly xeq-avvo-s 'lightning flash'. τέκ-νο-ν 'child' ('that which is begotten', from τεκεῖν): O.H.G. degan m. 'boy, servant' pr. Germ. *pez-ná-s. στέρ-νο-ν 'breast': Skr. stir-ná- 'outspread', cp. also O.H.G. stirna f. 'star' groundform *ster-n-ja, √ster- 'spread'. *δεμ-νο-, whence δέμνιο-ν 'bedstead', as being a 'place built' for a bed, from \sqrt{dem} . $\kappa \lambda t - m$ 'couch, bed': O.H.G. li-na le-na 'support', V klej- 'acclinare'. στήλη Lesb. στάλλα 'sepulchral pillar' for *στάλ-να ground-form *stl-nā- (by-form στήλλη = *σταλν-μ-ā?): Skr. sthūnā 'post, pillar' see above p. 141. ζώνη 'girdle' for *ζωσ-να, √ jōs-. φερ-νή 'dowry' πόρ-νη 'whore' beside πέρνημι 'I sell', ground-form *por-nāor *pf-na-.

-ανο- = -ηνο-. There are a considerable number of participial words besides those given above on p. 140. στεγ-ανό-ς beside στεγ-νό-ς. $\pi \cdot \theta$ -ανό-ς 'easily persuaded, persuasive'. στέφ-ανο-ς -άνη 'wreathing, wreath'. $\chi \cdot \delta \theta$ -ανο-ς 'buttocks' (from $\chi \cdot \xi \zeta$ -ω). $\theta \rho \cdot \theta$ -ανο-ν -άνη 'sickle'. $\theta \cdot \chi$ -ανο-ν -άνη 'shield handle' (from $\theta \cdot \chi$). $\theta \cdot \eta$ -ανο-ν -άνη 'whetstone'. $\theta \cdot \chi$ 'covering' (beside $\theta \cdot \chi$). $\theta \cdot \eta$ -ανο-ν 'pestle, hatchet'. $\theta \cdot \chi$ ' $\theta \cdot \chi$ 'enclosure'.

As a secondary suffix it is not uncommon:

First should be mentioned the words in -εσ-νο- (Lesb. -εννο-, Ion. Att. -εινο-, Dor. -ηνο-) and -ασ-νο- (Lesb. -αννο-, Ion. Att. -ηνο-, Dor. -ανο-). ἀλγεινό-ς 'paining, painful' from ἄλγος n. 'pain'. φαεινό-ς 'shining' from φάος n. 'light', etc. Homeric (Lesb.) ἐραννό-ς 'lovely' beside ἔρως (see Solmsen, Kuhn's Ztschr.

XXIX 70. 109). σελήνη 'moon' (Lesb. σελάννα) from σέλας n. 'brightness'. In the oldest adjectives of this sort, which were participles of denominative verbs, -no- may have been primary; compare ποθεινό-ς κοτεινό-ς with ποθέσαι κοτέσαι (*ποθεσ-σαι *κοτεσ-σαι) and έρασ-ιό-ς beside έραννό-ς.

Further, under this head come adjectives of time like $\hat{\epsilon}a\varrho\nu\hat{\epsilon}\sigma$, $\hat{\gamma}a\varrho\nu\hat{\epsilon}\sigma$ (misspelt $\hat{\epsilon}\hat{\epsilon}a\varrho\nu\hat{\epsilon}\sigma$) 'vernus', $\hat{\gamma}\mu\epsilon\varrho\nu\hat{\epsilon}\sigma$ 'daily' $\nu\nu\kappa\tau\epsilon\varrho\nu\hat{\epsilon}\sigma$ 'nocturnus' $\kappa\epsilon\varrho\nu\sigma\hat{\epsilon}\sigma$ ' from last year, a year old'. These appear to have been formed from locatives, $\hat{\epsilon}\alpha\varrho\nu$, $\kappa\hat{\epsilon}\varrho\nu\sigma$ (cp. also $\hat{\gamma}\mu\alpha\varrho$, $\nu\hat{\nu}\kappa\tau\omega\varrho$). Then $-\nu\sigma$ - broke off and became an independent suffix, hence $\delta\epsilon\nu\lambda$ - $\nu\hat{\epsilon}\sigma$ - of the evening', and the like. For analogous adjectives in Italic, see below.

With -avo- as a secondary suffix: $\pi \delta \pi \rho$ -avo- ν 'stool' $(\pi \delta \pi \rho \sigma - \varsigma)$, Ed ρ -avo- ν 'seat' (Fd $\rho \bar{\alpha}$) and others. Was the suffix -davo- taken from $\sigma \bar{\nu} \tau \iota \delta a \nu \dot{\sigma} - \varsigma$ 'useless' = $\sigma \bar{\nu} - \tau \iota \delta - \alpha \nu \dot{\sigma} - \varsigma$ (* $\tau \iota \delta$ = Lat. $q \iota i d$)? Cp. - $\delta - \alpha \pi \sigma - \varsigma$, taken from $\pi \sigma \delta - \alpha \pi \dot{\sigma} - \varsigma$ and the like (§ 16 p. 32).

Italic Lat. plē-nu-s Umbr. plener 'plenis': Skr. prā-na-s, see p. 140 above Lat. cānu-s for *cas-no-s, Osc. Pelign. casnar 'senex' (extended by an r-suffix). Lat. vī-nu-s -nu-m, Umbr. vinu 'vinum' Volsc vinu abl. 'vino'. Lat. urna for *urc-nā, Umbr. urnasier 'urnariis, feriis'. Lat. fānu-m for *fas-no-m, Umbr. fesnaf-e fem. pl. 'in templum', Osc. físnam físnam fem. acc. 'templum', Pelign. fesn. (abbreviated) 'templum', beside Lat. fēs-tu-s fēr-iae, in the ē-series of Ablaut.

 *u\(\bar{\textit{f}}\)-n\(\alpha\): Skr. \(\bar{u}r\)-n\(\alpha\) (wool' Gr. \(\overline{v}\)\(\lambda\)-\(\sigma\)-\(\varepsilon\)-\(\varepsilon\)-\(\sigma\)-\(\varepsilon\

With -s-: Lat. annu-s for *at-sno-s: cp. Goth. apn; penna .O.Lat. pesna for *pet-sna, \sqrt{pet} 'fly'), and other examples.

Lat. -ino- unaccented = -qno-. It is of course hard to say what forms are to be classed here, since unaccented -no- may equally well represent Idg. -qno-, -eno- or -ono-. The words we have to deal with are such as dom-inu-s pag-ina sarc-ina, probably also verna for *ves-inā (\sqrt{ues-'live'}).

As a secondary suffix it is not uncommon.

Lat. aēnu-s for *aes-no-, Umbr. ahes-nes 'aenis', beside Lat aes, aeris, Skr. áyas-n. 'metal, iron'. Lat. tāgnu-s for ilec-no-from ālex, salīgnu-s from salix (the ending was referred by popular etymology to \sqrt{gen} , cp. abiēgnu-s, fabāginu-s and so forth), acer-nu-s from acer, ebur-nu-s from ebur; the final vowel of the stem has been lost in pōpulnu-s from pōpulu-s, quernu-s for *querc-nu-s from quercu-s etc. Besides these we have pater-nu-s, māter-nu-s; alter-nu-s, īnfer-nu-s, exter-nu-s. Stems in -a seem to have given rise to -anu-s: silvānu-s (silvā) īnsulānu-s (insula) Capuānu-s (Capua); hence in other local adjectives, urbānu-s, cismontānu-s Rhēnānu-s etc.

vērnu-s, nocturnu-s, hībernu-s, vesperna and the like are parallel to Gr. δαρινό-ς, νυπτερινό-ς, χειμερινό-ς, δαπερινό-ς (see

¹⁾ Penna must be distinguished from pinna. The latter, with pannus Gr. $\pi\tilde{\eta}_{PO^-}$; (common ground-form "p\vec{\eta}_-no_-, see I \ 253 p. 206 f.) belongs to A.S. finn Mod.H.G. finne 'fin', a Germanic word which Müllenhoff (Altertumskunde II 54) connects in an interesting way with the name of the Fenne, although he is certainly wrong in taking a ground-form *pet-n\vec{a} as his starting-point. The words most nearly akin to it are O.H.G. spannan 'to stretch', Goth. fana 'cloth, rag' (Mod.H.G. fahne), O.C.Sl. pin\vec{a} 'I stretch, hang' o-pona 'curtain'. On $\sqrt{}$ spen- and pen-, see I \ 589 p. 445 f. The bird's wing and the fin therefore received their name as being something 'out-stretched'.

p. 144), and perhaps in Latin also -no- was added to the locative in -i, and this vowel afterwards lost 1).

Umbr.-Osc. *kom-no-m 'ro' xouvo'v' from kom 'cum', Umbr. kumne loc. 'in comitio' Osc. comenei loc. 'in comitio' comono pl. 'comitia' (for the Oscan anaptyxis cp. I § 627, p. 471). Osc. amnod 'circuitu' from am- 'amb-'. Lat. pronu-s no doubt for *prod-no-, compare pro(d).

Lastly, there are the distributive numerals derived from adverbs, like Lat. bīnī from *bis-no-, trīnī from *tris-no-, ter-nī, quater-nī.

Old Irish. la-n 'full'. Skr. pūr-ná-s etc., see p. 140. slan 'whole, sound, complete, full' may be for *sl-no-, as Lat. sal-vo-s for *sl-uo-. cloe-n 'awry, unjust, bad'. cp. Goth. hlái-n-s 'hill', \(\shi \text{klei-} 'to lean', whence also Gr. γλī-νη O.H.G. li-na (p. 143). suan O.Cymr. hun sleep: Skr. sváp-na-s etc., see p. 140. uan Mod.Cymr. oen 'lamb': Gr. άμνό-ς etc., see p. 144. domun m. 'world', Gallic Dubno-rix 'world-king', with this should probably be compared fu-domain 'deep' Mod Cymr. dwfn 'deep' (I § 520 p. 378). O.C.Sl. duno n. 'ground' for *dub-no-, Lith. duqua-s 'ground' (with g for b, I § 346 p, 271) ēn m. 'bird' (I § 518 p. 377 f.), O.Bret. etn 'bird': cp. Lat. penna for *pet-sna p. 145, √ pet- 'fly'. fēn m. 'waggon' (I § 526 p. 381): O.Icel. vagu m. 'waggon', \quad yegh- 'vehere'. \quad d\bar{u}-n\ n. 'walled stronghold', Gall. -dūnū-m in place-names like Novio-dūnu-m 'New-castle, Newtown': O.Icel. tū-n n. O.H.G. zū-n m. 'fence, hedge'. rū-n f. 'secret': Goth. O.H.G. rū-na f. 'secret', with which, in a different grade of Ablaut, cp. O.Icel. rau-n f. 'attempt, proof, test, experience'. This suffix, though less clearly discernible, appears to be contained in bond bonn 'solea': Skr. budh-ná-s 'ground' (I § 221 p. 189).

Pr.Kelt. -ano- = -no-. Since this, if unaccented, became in Irish identical with orig. -ono-, it is hard to say which of the examples should be classed here. Perhaps lethan O.Cymr.

¹⁾ Does $h\bar{\imath}bernu$ -s stand for *h $\bar{\imath}brino$ -s, as in-certu-s for *in-crito-s (I § 33 p. 33 f)? The word is undoubtedly connected with hiems, but the b has never been explained

litan 'broad': cp. Gr. πλάτανο-ς 'plane' (named after its broad leaves, compare πλατύ-ς). Infinitive nouns like blegon m. 'milking' may also perhaps be referred to -yno-.

As a secondary suffix it is found in Gall. Arebrig-nu-s (pagus) 'lying on a hill' compared with Arebrigiu-m, beside O.Ir. bri, gen. breg, 'hill'. Also no doubt in Keltic words in -er-no-ar-no- (Zeuss-Ebel G.C. 774), as Gall. Tigerno-, isarno- 'iron', O.Ir. iarn O.Bret. hearn (I § 576 p. 431), whence perhaps were borrowed Goth. eisarn O.H.G. isarn 'iron' (the suffix in O.H.G. diorna 'wench' Goth. viduvairna 'one bereaved' etc. cannot be held to prove that this is a real Germanic word.)

Germanic. Goth. fulls O.H.G. vol (gen. volles) 'full', pr. Germ. *ful-na-z: Skr. pūr-ná-s etc. see above p. 140. Goth. alls O.H.G. al (gen. alles) 'whole, all' (beside ala-) ground-form *al-no-s, beside alan 'to grow up, increase' (cp. Gr. nãç 'whole, all' compared with Skr. sva- 'swell out', § 126, and Lat. omni-s for *op-ni-s beside ops, § 95); Osc. allo is the same word if it is to be translated 'tota' and not 'alia' (Fick, Bezzenberger's Beitr. I 170; Danielsson, Pauli's Altital. Stud. III 177 f.). Goth. 1b-n-s O.H.G. eban 'flat, even'. O.H.G. scī-n 'visible, shining', as subst. m. 'visibility, brightness, sheen'. Goth. us--lūk-n-s 'opened, open'. Goth. faihu-gair-n-s 'avaricious' O.Icel. gjarn 'greedy'. O.H.G. mei-n 'false, treacherous', as subst. 'falseness, wickedness'; Lith. mai-na-s 'barter' O.C.Sl. mě-na 'change, exchange', common ground-form *moi-no- nā-, cp. *moi-ni- § 95. O.H.G. loc (pl. loccha) O.Icel. lokkr m. 'lock' pr. Germ. *lug-ná-s (I § 534 p. 391): Lith. lug-na-s 'bent'. O.H.G. sker-n m. n. 'jest'. Goth. ap-n n. 'year': cp. Lat. annu-s for *at-sno- p. 145. Goth. haur-n O.H.G. horn pr. Norse horna n. 'horn': Gall. κάρνο-ν acc. 'trumpet' (Hesych.) beside Lat. cornu (also corno-, § 106). Goth. bar-n 'child' ('that which is born'): Lath. bér-na-s 'servant', dimin. berněli-s 'little boy' (cp. a similar change of meaning in Gr. τέχνο-ν: O.H.G. degan). Goth. láu-n O.H.G. lō-n n. 'wages', beside Gr. ἀπο-λαύω 'enjoy' O.C.Sl. lovi 'prey, booty'. O.H.G. zeihhan O.Sax. tēkan n. 'token' pr. Germ. *tajk-na- (compare Goth. táikns f., stem táik-ni-, 'token'), from

√ deik- deig- (Goth. ga-teihan 'point out'). O.H.G. feihan O.Sax. fēkan n. 'deceit' pr. Germ. *faik-na-, from √ peik- peig- (Goth. fáih n. 'deceit'). O.H.G. loug-na O.Icel. lau-n f., in O.H.G. also lougan (subst. m.) 'giving the lie, denying': the root has a different grade of ablaut in Goth. lug-n n. 'lie'. O.Sax. log-na (o probably short) 'flame': cp. Lat. lūna for *lougsnā etc. p. 140.

Germ. -uno- = -uno- cannot be identified with certainty.

In secondary use the suffix only occurs in Goth. jái-n-s 'that, yonder' from loc. *lok (beside it stands a pr. Germ. *kī-na- from the locative form *lek in A.S. bē-zen m. 'both' according to Holthausen, Paul Braune's Beitr. XIII 372. 590), unless Goth. hlái-vasnōs pl. f. 'grave' from hláiv n. 'grave' and arhvazna f. 'arrow' beside A.S. earh n. 'arrow' are to be classed here, as derivatives from es-stems, cp. Skr. vadhasná- p 142.

Balto-Slavonic. Lith. pil-na-s O.C.Sl. plū-nū 'full': Skr pūr-nā-s etc., see p. 140 above. A few other adjectives of this kind occur in Baltic, as Lith. kil-na-s 'lofty' beside kėl ti 't' raise' (kālna-s 'hill' should perhaps be divided kal-n-a, see the Author in Morph. Unt. II 173), silp-na-s 'weak, powerless' beside silp-ti 'to grow weak', lūd-na-s 'sad' beside lūsti 'to grow sad', Lett. wif-n-s 'glimmering' beside wif-ėt 'to glimmer', Lett. tāis-n-s 'straight, right' beside Lith. taisýti 'to direct'. Lith. de-na f. adj. of cows 'in calf'. Skr. dhi-nā 'milch cow', from $\sqrt{dh\bar{c}_{i}}$ 'suckle' (I § 150 p. 136).

Lith. pet-na-s 'merit' O.C.Sl. ple-nă 'booty': Skr. pana-s 'wager, stipulated wage' for *par-na (I § 259 p. 211 f.). Lith. var-na-s 'raven' var-na 'crow' O.C.Sl. vra-nă 'black, raven' vra-na 'crow', possibly to be compared with Skr. var-na-s 'colour'. There seems to be some connexion between the roots of Lith. szē-na-s O.C.Sl. sē-no 'hay' (the Lith. word was no doubt originally neuter) and Skr. sya-na-s 'grown dry' sī-na-s 'curdled'. Lith. szal-nà O.C.Sl. sla-na 'rime', beside Lith. szál-ta-s Skr. st-sir-a-s adj. 'cold'. Pruss. spoay-no f. 'foam' or 'scum' O.C.Sl. pē-na 'foam': Skr. phē-na-s 'foam', cp. also Lat. spāma for *spoi-mā (for the initial, see I § 599 p. 445 f.)

With -s-; Lith. lëp-s-nà 'flame', varsnà 'length of a furrow' for *vart-sna (cp. varsma-s 'length of a furrow' for *vart-sma-).

Lith. spar-na-s 'wing': Skr. par-ná-m 'wing', \scale sper- 'strike away, push off, jerk'. skut-nà 'shaved place'. žar-nà 'intestine': O.Icel. garnar pl. 'intestinae'. dai-nà 'folk-song': Avest. dae-nā-f. 'law, teaching, faith'.

O.C.Sl. trī nữ 'thorn'. Skr. tṛ-na-m 'grass-stalk', Germ. with -nu- Goth. paúr-nu-s 'thorn'. synữ sunữ 'tower' no doubt stands for pr. Slav. *sūp-no- *soup-no- 'that which is piled up', cp. sũpą 'I pile' sũpữ 'heap'. ċlěnữ 'limb' for *ċel-no-. trĕs-nữ 'fimbria' for *trĕsk-nữ, beside trĕskữ 'noise' trĕsnati 'to strike'. stĩg-no 'shank'. ru-no 'fleece', beside rữv-q 'evello'. sukno 'woollen garment', beside sukati 'to twist'. vẽno 'dowry' for *vĕd-no-: Gr. ĕð-va ĕsð-va 'bridal gifts', v yedh- yed- 'lead, lead home' (I § 469, 8 p. 346 f.). vlữ-na 'wave': O.H.G. wella 'wave' ground-form *yel-nā, with -ni- Lith. vul-nì-s 'wave'. sli-na 'spittle', beside Mid.H.G. A.S. slī-m 'slime'. strana 'side, region' for pr. Slav. *stor-nā, 1. e. Idg *stṛ-nā (Skr. stīr-nā- 'outspread') or Idg. *stor-nā, v ster- 'spread out'. stē-na 'wall'. Goth. stán-n-s O.H.G. stei-n m. 'stone'.

Lith. -ina- Slav. -ino- = -yno- may perhaps be traced in Lith. kùp-ina-s 'heaped up', tēk-ina-s 'running', O.C.Sl. do-kos-inŭ 'that can be touched or held' do-stiž-inŭ 'that can be reached', etc.

-no- in secondary use. Lith. jáu-na-s O.C.Sl. ju-nŭ 'young from jaŭ ju 'already', just like Skr. náva-s Gr. véfo-ç beside Skr. nú nú etc. 'now': from the same adverb come also O.C.Sl. ju-tro u-tro 'morning', see § 75. It is doubtful how far, if at all, the common secondary suffix Lith. -ina- Slav. -ĭno- represents Idg. -yno-.

§ 67. 2. In the form -eno--ono-. This is almost entirely primary, and it occurs chiefly in participles and abstract nouns. It is used to form classes of words with special meanings, most commonly in Aryan, Germanic and Slavonic. -eno- is in active use as a participial suffix in A.S., Norse (O.Icel)

and Slavonic, as an abstract nominal suffix in Aryan; -ono- is a participial suffix in Aryan, Gothic and High German, and an abstract nominal suffix (infin.) in Germanic.

The suffix bears the accent where the root-syllable has the weak grade of ablaut; e. g. Skr. vavpt-and-s O.H.G. gi-wort-an (I § 530 p. 387).

a. -eno- added to stems ending in a consonant:

Indo-Germanic. *ueih-eno-, vueih- 'vehere': Skr. vah-ana-s 'carrying' váh-ana-m 'act of carrying', O.C.Sl. vez-enŭ 'carried' *ed-eno-, ved- 'cat': Skr. ád-ana-m 'food, fodder', O.Icel. et-enn 'eaten'. *uert-eno-, vuert- 'vertere': Skr. vart-ana-s 'setting in motion' várt-ana-m 'a turning', O.C.Sl. vrět-eno n. 'spindle'.

Aryan. cét-ana-s 'visible', jún-ana-s 'begetter', túp-ana-s 'afflicting'; O.Pers. drauj-ana-'lying'. Skr. cét-ana-m 'an appearing, appearance', jún-ana-m 'a begetting' and other substantives of the same kind. Avest. hav-ane-m 'pressing, pressure': Skr. súv-ana-m; O.Pers ham-ar-ana-m 'encounter, fight', Ar. \sqrt{ar} 'go'. In Avestic we find the masc. zav-ana- 'call, summons'; contrast Skr. neut. háv-ana-m.

Armenian. jaune-m 'I offer, dedicate' from the noun stem *jauno-, which must stand for *jau-eno- (Skr. hav-ana-m 'offering'), or for *jau-ono-.

Greek. Here perhaps should be classed Aeol. φερένα 'dowry' (φέρενα, if it be the more correct reading, would at all events imply a form *φερένα) beside φέρ-νη: op. Skr. bhár-ana-.

Remark. -evo- may perhaps be traced also in èvervo-; (with spurious diphthong) Dor. π_{170}^{2} -; 'that' for *($\hat{\epsilon}$) x_{12} - ϵv_{10} -; from èvei 'there'. Similarly Dor. τ_{170}^{2} - ϵ_{15} is iste, ille' would stand for * τ_{120} - τ_{170} - ϵ_{15} from τ_{12} i; or it might be analysed τ_{17}^{2} - τ_{170}^{2} - ϵ_{150} and derived from the instr. * τ_{170}^{2} (op. Goth, π_{16} - π_{180}) § 66 p. 148). It must be admitted that -eno- is not elsewhere used in this way as a secondary suffix.

Italic. beno- (in bene, benīgnu-s, bellu-s for *ben-lo-), the by-form of bono-, duono-, should be classed here, if it stands for *du-eno- and belongs to the root seen in Skr. dúo-as n. 'reverence, honour' and other words, so that the original meaning would be 'that which is held in honour, enjoys recognition'

(see Osthoff, Morph. Unt. IV 370 ff.). dom-inu-s (cp. Skr. ddm-ana-s 'horse-tamer') and the like are ambiguous; see § 66 p. 145.

Old Irish. I know of no noun-formations which fall under this head.

Germanic. Goth. fulg-in-s 'hidden' (beside filhan 'to hide'), with the accent on the suffix in pr. Germ. (I § 530 p. 386). O.Icel. tig-enn 'distinguished' (\$\sqrt{deik}\$- 'show'). O.H.G. sceff-in 'sheriff', also sceffino, which has passed over to the n-declension; its original sense was no doubt 'arranger, orderer', compare O.H.G. scaffen 'to shape, set in order'. Add such participles as A.S. bund-en O.Icel. bund-enn 'bound'; cp. below, under -ono-. Goth. áig-in O.H.G. eig-in n. 'property', the original sense being no doubt 'the having for one's own'. Skr. ts-ana-m 'rule, control'. Goth. rag-in n. 'counsel, decree'; if it belongs to Skr. rac-ana-m 'an arranging, regulating', we must assume, as in the case of Goth. fulg-ins, that the suffix originally bore the accent. O.H.G. lug-ina f. 'lie', O.Sax. drug-ina f. 'treachery' stul-ina f. 'theft' thec-ina f. 'covering, roof'.

Balto-Slavonic. Here should be classed certain Lettic adjectives like glud-en-s 'smooth', (compare glöd-en-s 'blind-worm') beside glaud-ét 'to stroke'; slidd-en-s 'smooth, where one slips', beside slidd-ét 'to slip'; slepp-en-s 'secret' beside slép-t 'to hide'. Were the Lithuanian verbs in -enù, like gab-enù 'I bring', developed from noun-stems of this kind, in the same way as kruv-inù 'I make bloody' from krūv-ina-s 'bloody'?

In Slavonic we have the common past part. pass. in -enü, as nes-enü 'carried' (from nes-ti 'to carry'), za-büv-enü 'forgotten' (from za-byti; cp. Skr. bhúv-ana-m 'being, thing, world'). The neut. vrēt-eno: Skr. várt-ana-m has been already mentioned on p. 150.

b. -ono- added to stems ending in a consonant.

ldg. Pres. or aor. part.: *qr-ono- from qer- 'make', beside indic. Skr. á-kar: Skr. kr-aná-s 'working, eager, busy' (frequent epithet of deities), Gr. Ko-óvo-s; *gus-ono- from geus- 'taste', beside the indic. Skr. á-juṣ-ran (3. pl. med.): Skr. juṣaná-s Goth.

kusan-s. Part. perf. *bhe-bhid-onó-s from bheid- 'split, bite' beside indic. Skr. bibhéd-a Goth. báu: Skr. bibhid-aná-s (Goth. bit-an-s).

Remark. This view of the Aryan forms with $-\bar{u}na$ -cannot be called certain. As a participal suffix of the middle we may (with Hirt) refer $-\bar{u}na$ - to *- ηnno -, as the analogous -ana- to *- ηnno - (see § 66 Rem. p 141). The same $-\eta nno$ - may also be concealed in Gr $n\tau dro$ -s $n\tau \eta vo$ -c 'fiedged' (op Osthoff, zur Gesch des Perf. 409) and the adjective $\bar{e}aro$ -c (or is this for * $\bar{\eta}aro$ -c?). In the Ar $-\bar{u}na$ - it is possible that $-\bar{\eta}no$ - and -ono- have coalesced. The considerations urged by Frohde (Bezzenberger's Beitr. VII 322 ff.) against my comparison of Koo'ro-c with $kr\bar{u}na$ -s are not sound. The different accent of Koo'ro-c is explained by the fact of its being a proper name. See what is said below in the Greek section on xho'ro-c etc.

Aryan. Pres. aor. med. pass part. Skr. duh-āná-s dúh-āna-s, also dúgh-āna-s, the gh being phonetically regular (I § 445 p. 331, § 452. 453 p. 335), beside dōgdhi 'he milks', μίην-āna-s beside μι-hō-ti 'he offers', su-nv-āná-s beside su-nō-ti 'he presses out', and so forth Similarly Avest μη-āna- beside μάin-ti 'he slays', and the like. Skr. τ̄s-ānā-s 'having for one's own, possessing, rulei' Avest. is-āna- 'ruling, mighty' beside Skr. τ̄s-t̄s 'he possesses, rules': O.H G. eig-an 'own', beside Goth. áih 'he has', cp. Skr. τ̄s-ana-m Goth. áig-in p. 151). Perf. med. pass. part. Skr. riric-ānā-s beside rirēc-a 'he let loose, removed, abandoned'. O.H.G. gi-liw-an, √ leig-; Avest. vāver'z-āna- beside indic. med. Gāthie vāver'z-ōi from var'z- (yerḡ-) 'work'.

It is an open question whether the denominative Skr. -ana-, as in vásav-āna-s 'possessing goods' from vásu n. 'goods', falls under this head (cp. Goth. piud-an-s).

Armenian. Perhaps jaune-m, see above p 150.

Greek. Besides $K\varrho$ -óvo- ς (see above) we should probably class here $\varkappa\lambda$ -óvo- ς 'stir, turmoil', beside $\varkappa\epsilon\lambda$ -o $\mu\alpha$, $\vartheta\varrho$ -óvo- ς 'seat, throne' from *dher*-'hold, support', $\varkappa\varrho$ -óvo- ς 'time' orig. 'a limit of time which contains, span', beside $\varkappa\epsilon\varrho$ -; for the meaning cp. $\ddot{\varepsilon}\mu\epsilon\tau$ o- ς 'a vomiting' beside $\dot{\varepsilon}\mu\epsilon\tau$ o- ς 'vomited' and the like, § 158.¹) Of

The accent may have been assimilated to that of γόν-ο-ς λόχ-ο-ς τρόπ-ο-ς and similar words Fröhde's assumption (in the article cited in the Remark above) that θρόνο-ς χρόνο-ς stand for *θορνο-ς *πολνο-ς, cannot be justified on phonetic grounds, in spite of Cret. θόρναξ.

feminine forms we should perhaps class here $\dot{\eta}\delta$ -or $\dot{\eta}$ 'joy', but in $\pi\epsilon\rho\dot{\sigma}\nu\eta$ 'clasp, buckle' $\sigma\varphi\epsilon\nu\delta$ - $\dot{\sigma}\nu\eta$ 'sling' and others we must recognise -on-a, an extension of -on- by -a-, cp. $\dot{\alpha}\varkappa\dot{\sigma}\nu$ - η 'whetstone' beside Skr. $\dot{\alpha}\dot{s}an$ - 'stone'.

Italic. Lat. b-ono- must ultimately be classed here; as to beno-, see p. 150. dom-inu-s and the like are ambiguous, see § 66 p. 145.

Old Irish. On account of the coincidence of -uno- and -ono- in Irish there are no examples that can be assigned with certainty to this section.

Germanic. O.H.G. erg-an, see above, p. 152. Goth. v-an-s O.H.G. w-an 'wanting, lacking', Vey- (Gr. ev-14-5, Skr. ū-ná-s). O.H.G. offan A.S. opan 'open', O.H.G. wes-an 'decayed', O.Sax. fag-an 'glad', the accent being on the suffix in pr Germ., cp. Goth. fah-ēps f. 'joy'. Participles like Goth. vaurp-an-s (the regular phonetic form would be *vaúrdans, 1 § 530 p. 387), O.H.G. gi-wort-an 'having become'. Skr. vavrt-aná-s; Goth. gum--an-s O.H G. gi-kom-an 'having come': Skr. jagm-aná-s; Goth. fra-vitan-s 'avenged': Skr. vid-aná-s; Goth. ana-budan-s 'commanded, enjoined O.H.G. gi-botan: Skr. budh-aná-s. Instead of this we find in other dialects -ina- = 1dg. -eno-. We may conjecture that in Germanic -eno- and -ono- were originally distinguished as in Sanskrit. When the reduplicating syllable in the perfect fell off, the two types were no longer clearly separated, and -eno- drove out -ono- in one part of the Germanic area We have -ana- in secondary use in Goth. bind-an-s 'king', from pruda 'people' (cp. Skr. vásuv-ana-s?).

-ono- occurs as an abstract suffix in the Germanic infinitives formed with pr. Germ. *-ana-m, as Goth. áih-an O.H.G. eig-an 'possess, have', Goth. vit-an O.H.G. wizz-an 'know', Goth. bair-an O.H.G. ber-an 'bear, bring, forth'.

Balto-Slavonic.

Lith. álk-ana-s (fem. alk-anà) 'rather hungry, fasting' from álk-ti 'to hunger', úk-ana-s 'gloomy, overclouded' (úkanos dēnos 'gloomy days') beside ük-stýti-s 'to become gloomy, cloud over', Lett. plakk-an-s 'flat' from plak-t 'to grow flat' etc. Lith.

dov-and Lett. daw-ana 'gift' beside du'-ti du-t 'to give', Lith. tik-ana 'mass of cloud, cloudy sky'.

Whether Slavonic forms like Mod. Sloven. jah-on 'fortis equitator', beside jahati 'vchi' (Miklosich, Vergl. Gr. II 140) should also be classed here, is doubtful. We cannot analyse O.C.Sl. zvonti 'sound' as zv-onti (cp. zov-q zv-ati 'to call') and compare it with Skr. kr-aná-s etc. (cp. Fick, Wtb. 1° 84, Osthoff, Morph. Unt. IV 373), unless we allow that the whole verbal base zvenin Slavonic (O.C.Sl. sviněti 'to sound') has been developed out of a noun formed with -eno--ono-

c. -eno- -ono- added to stems ending in a vowel. It has been already remarked on p 138, that the contraction was complete even in proethnic Indo-Germanic.

Skr. sōma-dhāna-s 'containing soma' vasu-dāna-s 'giving good' vi-māna-s 'traversing', like cēt-ana-s. dāna-m 'a giving' (Lat. dōnu-m), sthāna-m 'a standing, standing-place' (Avest stāna- m. 'position', Gr. δύστηνο-ς 'in a bad position, unhappy', Lith. stóna-s O.C.Sl stanā 'position'), yāna-m 'a going, moving' like cēt-ana-m. Pres. med. pass part yāna-s beside indic. yātī 'he goes', like dūgh-āna-s Perf. med. pass part. jajāānā-s beside indic. jajāānā 'he knew' (Slav part. po-znanā 'known'), like riric-ānā-s.

Gr. δύστηνο-ς, see above. *εὔ-θηνο-ς in good position whence εὐθηνέω am in good position. add also El. συν-θηναι pl. 'compact' (Collitz' Samml. d. gr. Dial.-Inschr. no. 1168).

Ital. Lat. donu-m, Umbr. řunu Osc. dúnú-m Mars. duno-m 'donum', see above.

Ir. Perhaps ban 'white, pale', from \sqrt{bha} -, Skr. bhá-ti 'he appears, shines' bhána-m 'an appearing or growing visible'.

German. O.H.G. perf. part. gi-tān 'done' (O.C.Sl. o-dēnŭ part. of o-dēti, 'to put round, clothe'), like gi-wort-an. O.H.G. inf. tōn tuon 'do' gān 'go', like ber-an.

Balt.-Slav. Lith. stóna-s O.C.Sl. stanů, see above. Lith. klóna-s 'space behind the barn' beside kló-ti 'to spread out. O.C.Sl. perf. part. po-znanů (see above), danů 'given' beside dati, sčnů 'sown' beside sčti, like nes-enů.

In some of these vowel-stems we may conjecture that forms with -no- and forms with -eno- -ono- once existed side by side. It is no longer possible to ascertain exactly how far this was the case.

§ 68. The Suffixes -ino- -ina-, -īno- -īna-, and $-a^{x}ino - -a^{x}in\bar{a}$. These suffixes are found side by side with practically the same meaning. They are used especially to form secondary adjectives, with such meanings as 'made or consisting of', 'springing from', 'belonging to the same kind as' that which is denoted by the noun from which they are derived. They are used very much in the same way as the secondary suffix -io- (§ 63, 2), compare e. g. Lith. av-ýna-s with Pruss. aw-i-s O.C.Sl. u-ji 'uncle' beside Lat. avo-s 'grandfather', the meaning of these words being 'he who is descended from the grandfather'. Whether it bears any very close relation to the termination of Gr. ¿aouvo-g Lat. vērnu-s and the like (§ 66 p. 144), and what etymological relation subsists between the initial sounds of the three forms -ino- -īno- -a'ino- (cp. Osthoff, Morph. Unt. IV 357) I cannot here decide. The connexion in sense (compare e. g. Gr. Joú-wo-5 'of oak' - Goth. triv-ein-s 'wooden' - Avest. drv-aen-i- 'wooden'), combined with their connexion in point of sound, justifies us in discussing the three suffixes together.

1. -ino-.

Idg. *deks-ino-'dexter': Skr. dákšina-s Avest. dašina- O.C.SI. desĭnŭ, in Lith. extended by a further suffix deszin-ẽ 'the right hand': cp. Gr. δεξιό-ς Lat. dex-ter O.lr. dess Goth. taihs-va 'dexter'; the word is closely allied to Skr. dákš-a-s 'able, strong'. Skr. aj-ina-m 'skm' O.C.Sl. az-ino beside Skr. ajá-s 'he-goat' ajá 'she-goat', Lith. ožỹ-s 'he-goat', cp. also Lith. ož-ini-s 'belonging to a he-goat'.

In Aryan -mo- was not fertile. Forms like Skr. maliná'spotted' (mala-m 'dirt') Avest. nom. raocah-inō 'shining' (raocah'light') can scarcely be classed here: it is most probable that they

only arose in later times through a transference of -in-stems to the o-declension (cp. § 60 p. 111 f).

In Latin Idg. -ino- can hardly be distinguished from Idg. -ino- -eno- -ono- (§ 66. 67) Here should be placed adjectives like fag-inu-s (see above), laur-inu-s, junc-inu-s, lentisc-inu-s, which are not very numerous.

Keltic Perhaps Gall. Mor-mī pl., name of a scaboard tribe (cp. Lat. mar-īnu-s), and others to be found in Zeuss-Ebel G. C. 772.

In Germanic the suffix cannot be traced.

Balto-Slavonie

In Lithuanian adjectives of material, origin, kind, are only rarely formed with -ina-s, usually with -ini-s, which shows the further suffix -io-: áuks-ma-s 'golden' from áuksa-s 'gold', sidabr-ini-s 'silvern' from sidābra-s 'silver', med-ini-s 'wooden' from mēdi-s 'tree, wood', žem-inė bitis 'humble-bee' from žēme 'eaith', rūksztīnis óbūlas 'a sour kind of apple' from rūksztas óbūlas 'some apple'.

Slavonic -inŭ · želëz-inŭ 'of iron' from želëzo 'iron' (Lith. gelež-ini-s 'of iron'), medv-inŭ medov-inŭ 'of honey, like honey' from medŭ 'honey', zem-inŭ 'earthly' from zemlja 'earth'. Further, some of the adjectives in -ini may belong to this section.

2. -Ino-. The accentuation of the suffix was original, as shewn by the Sanskrit accent and by O.H.G. magat-In beside magad.

Indo-Germanic. Cp. Lat. filr-inu-s, O.H.G. bibir-in of

beaver' beside Avest. bawr-aeni-š Lith. bebr-ìni-s 'of beaver. Lat. su-īnu-s, Goth. sv-ein n. 'swine', O.C.Sl. sv-inŭ 'suinus'. Lat. haed-īnu-s, Goth. gáit-ein-s 'of goats, relating to goats'. Skr. nav-īna-s 'new', O.C.Sl. nov-ina f. 'newly ploughed land, fallow'.

Aryan. In Sanskrit it forms adjectives whose meaning implies relation to something, without specifying the nature of the relation. sqvatsar-ina-s 'yearlong, yearly' from sqvatsar-ina-s 'year'. prāvṛṣ-ina-s 'belonging to the rainy season, rainy'. visvajan-ina-s 'containing all sorts of people, ruling over all people, blessing all the world' from visva-janá-'all the world'. sat-īná-s 'genuine' from sánt-'true' (cp. ålnə vó-ç and O.H.G. wār-īn). kan-ina-s 'young' from kaná f. 'young girl, maiden' (cp. O.H.G. jung-īn). nav-ina-s 'new' from náva- 'new'. añjas-ina-s 'leading straight on' from añjasa- 'direct, immediate'. Extended formations with -īna-from adjectives of direction in -añc- are especially common; e. g. apāc-ina-s 'leaning back' from ápāñc-, pratīc-ina-s and pratīc-īná-s 'turned towards' from pratyáñc-.

Greek. Here we have adjectives and substantives derived from adjectives, implying more or less clearly the meaning 'possessing the character or attributes denoted by the original noun'. ἀγχιστ-ῖνο-ς 'very near together' from ἄγχιστο-ς. ἐρυθρ-ῖνο-ς, 'red mullet' (ep. Mod.H.Germ. rötling 'rudd'). κορακ-ῖνο-ς 'a sea fish black as a raven', also 'young raven', from κόραξ 'raven'. κεστρ-ῖνο-ς a kind of fish, from κέστρα a kind of hammer, 'pick'. τυφλ-ῖνο-ς a kind of snake, from τυφλό-ς 'blind'. γελασ-ῖνο-ς 'laugher' from γέλασι-ς; ἐλεγξ-ῖνο-ς 'blamer' from ελεγξι-ς (cp. Goth. ga-lάub-ein-s 'believing' O.H.G. huor-īn 'libidinosus'). πολυποδ-ΐνη a small kind of polypus. βολβ-ΐνη a kind of bulb. δελφακ-ΐνη from δέλφαξ 'swine, sucking pig' (cp. O.H.G. sw-īn beside sū). χοιρ-ΐνη, a kind of sea mussel, from χοῖρο-ς 'sucking pig'.

Italic. The suffix is frequently used to indicate material, origin, kind, that to which anything belongs. Lat. capr-tnu-s from caper capra, Umbr. cabriner gen. 'caprini'. Lat. equ-tnu-s from equo-s, Umbr. ekvine loc. 'equini' (borrowed from the Lat.? I § 431 p. 320). Lat. bov-tnu-s, can-tnu-s, vulp-tnu-s,

columb-īnu-s, noctu-īnu-s; dīv-īnu-s, fūr-īnu-s, sūtr-īnu-s, sobrīnu-s for *sosr-īno- from soror (I § 570 p. 428); mar-īnu-s,
vīc-īnu-s (cp. Lith. kaim-ýna-s 'neighbour'), cisalp-īnu-s, peregr-īnu-s, Lat-īnu-s, Umbr. Ikuvinus pl. Iguvini', Osc. Nuvkirinum 'Nucermorum'. A few neuter substantives occur like
terg-īnu-m 'whip of leather'. Feminine substantives are more
numerous, as capr-īna 'goat's-flesh' haed-īna 'kid's flesh', su-īna
'pig's flesh' (cp O.C.Sl. bībrov-īna 'flesh of beaver', Lith. ož-čnà
'goat's flesh'); sal-īna 'salt works, salt mine', moletr-īna 'mill',
pisc-īna 'fishpond', cēp-īna 'onion field', rāp-īna 'turnip field' (cp.
Lith. aviž-ēnà 'oat-field' and Skr. āúm-īna-m 'flax-field' from úmā
flax); cp. § 154.

Keltic. Here perhaps may be classed Gall. Tīc-īnu-s name of a river, ground-form *tēq-īno-, \sqrt{teq} - 'run, flee, flow' (O.Ir. techim 'flee', Inth. tek-mē 'small river', O.C.Sl. tokŭ 'stream').

In Germanie it forms numerous adjectives denoting material, origin, and quality. Goth. gulp-eins O.H.G. guld-īn 'golden' from gulp gold n. 'gold'. Goth. stdin-eins O.H.G. stein-īn 'of stone' from stdins stein m. 'stone'. Goth. airp-eins O.H.G. ird-īn 'earthen, earthly' from airpa erda 'earth'. Goth. bariz-eins 'of barley', pdurn-eins 'of thorn'; rigiz-eins 'dark'. O.H.G. rindir-īn 'of cattle'; swīn-īn 'suillus'. Goth. sunj-eins 'truthful' from sunji-s 'true'. O.H.G. wār-īn 'truthful' from wār 'true' (cp. Skr. sat-īnd-s). O.H.G. huor-īn 'wanton, dissolute'. Goth. div-eins O.H.G. ēw-īn 'everlasting'.

-īno- was added to adjectives formed with an l-suffix, e.g. luzzil-īn from luzzil 'little', whence there arose in O H.G. an independent suffix -ilīn -alīn, as in huor-ilīn 'wanton' (beside huor-īn), luog-alīn 'spying, lurking'.

The neuters of adjectives of material, used substantivally, gave rise to diminutives in Germanic; from the meaning belonging to another thing in respect of kind it is only a short step to that of 'subordination', of 'having its attributes only to a limited extent' (cp. Gr. -10-12 § 63 p. 128). So Goth. gáit-ein O.H.G. geiz-īn 'kid' from gáit-eins geiz-īn 'haedinus', Goth. gum-enn 'mannikin' qin-ein 'little woman' from guma 'man' qinō

'woman', O.H.G. magat-īn A.S. mæzd-en 'little maid, girl' from O.H.G. magad 'maid, girl'. It is doubtful whether the diminutival sense ever existed in Goth. sv-ein O.H.G. sv-īn 'swine', which strictly belongs to this class of neuters: it would seem that it was isolated in form by the accentuation of the suffix (which in a monosyllable could not but be regarded as part of the root), and so separated from the others in point of meaning.

Balto-Slavonic.

Lith. kaim-ýna-s 'neighbour' from kēma-s 'precinct, court' (I § 84 Rem. 2 p. 81), cp. Lat. vīc-īnu-s. Old neuter forms appear to be represented by saldum-ỹnai pl. 'sweetmeats' from saldùma-s 'sweetness', kartum-ỹnai pl. 'bitter things' (kartù-s 'bitter'), and also by collectives like aužūl-ýna-s 'a number of oaks standing together, oak grove' from áužūla-s 'oak', krūm-ýna-s 'thick shrubbery' from krúma-s 'bush', akmen-ýna-s 'heap of stones' from akmū 'stone', ang-ýna-s 'nest of adders' from angì-s 'adder'. In these latter cases, the special meaning seems to have been developed through the contrast of the idea of the species with that of the individual thing.

In Slavonic we find adjectives of kind and connexion, like mater-inŭ 'motherly, of the mother', neprijazn-inŭ 'devilish, of the devil', zvěr-inŭ 'bestial'. Also feminine substantives like zvěr-ina 'flesh of wild beasts', bšbrov-ina 'beaver-flesh' (cp. Lat. capr-īna, Lith. ož-enà); vlūč-ina 'wolfskin', ovčč-ina 'sheepskin'; medov-ina 'an intoxicating drink' from medŭ; mėsęč-ina 'moonlight' from mėsęcč (cp. Lith. mėnes-ėnà), and others of the same sort, op. § 154.

3. $-a^{x} + no$ can be traced with certainty only in Aryan and Baltic.

In Sanskrit we find only sāmidh-ēná-s 'relating to fire-wood' from samidh- 'firewood'; no doubt, however, it is contained in the suffix -ēnya- (an extension of it by -io-): vīr--ēnya-s 'manly, heroic' from vīrá-s 'man, hero', prāvṛṣ-ēnya-s 'rainy' beside prāvṛṣ-ēna-s (see above, p. 157).

-aena- is common in Avestic to denote material, origin and the like, as ayanh-aena- 'of metal, iron' from ayah-, zaran-

-aena- 'golden' from *zarana- = Skr. hirana- n. 'gold', er'zat--aena- 'silvern' from er'zata- (cp. Lat. Argent-īnu-s), temanh--aena- 'dark, murky' from temah- 'darkness'; neut. fravāxš-aene-m 'woodwork, pieces of wood, beams' from fravāxša- m. 'branch, twig'. Transferred to the 1-declension it becomes -aeni-, as zaran-aeni-š.

Lithuanian. -ena- is common in names of inhabitants, to denote their belonging to or springing from a place, as Tilž-čna-s a man from Tilsit (Tilže). Subst fem.: ož-ėnà 'goatsflesh', jaut-ënà 'beef', žąs-enà 'gooseflesh (cp. Lat. capr-īna, O.C.Sl. zvěr-ina), aviž-enà 'oat-field', rug-enà 'rye-field', mėž-ėnà 'barley-field' (cp. Lat. cēp-īna), menes-ënà 'moonlight' from mėnů 'moon' (cp. O.C.Sl. měsęč-ina), and other examples.

Remark It is a point for further investigation whether Lat. aliënu-s, teri ënu-s belong to this group. The Slavonic adjectives of material in -ènŭ-like di èv-ènŭ 'wooden' olor-ènŭ 'leaden' must in any case be left out of consideration, since the change of -iė- to -iū-, as in droždijanŭ 'of yeast' for *droždij-enŭ proves that their -è- represents Idg -è-, see I § 76 p. 66.

§ 69. The Suffix -tno- -tnā-, -tyno- -tynā-.

1. This appears in Sanskrit, Latin, Lithuanian, (and Greek?) in adjectives formed from adverbs of time, and in Sanskrit also in some cases from stems with similar meaning.

Sanskrit. From adverbs: pra-tná-s 'former, old' from prá 'before', nú-tna-s nú-tana-s 'present' from nú 'now', sanā-tána-s 'not transient, constant, lasting' from sánā 'from the beginning', prātas-tána- 'in the morning, early' from prātáh 'early', divá-tana-s divā-tána-s 'diurnus' from divā 'by day', cirán-tana-s ciran-tána-s 'coming from olden time' from cirá-m 'long ago', svas-tana-s 'of to-morrow' hyas-tana-s 'of yesterday'. Formed from stems: saná-tna-s beside sanā-tána-s, cira-tná-s beside cirán-tana-s.

Greek. $\partial \pi \eta \varepsilon - \tau \alpha \nu \delta - \varsigma$ 'lasting for ever'? The etymology of the word has not been satisfactorily explained.

Latin. diū-tinu-s, prīs-tinu-s, crās-tinu-s, sērō-tinu-s, prīmō-tinu-s.

Lithuanian. dabar-tina-s 'present' from dabar 'now'.

2. Further, it is a primary suffix in Aryan, Latin and Balto-Slavonic, in participles and infinitives, being probably an extension of -to- (§ 79) by a secondary suffix -no- (cp. O.C.Sl. -enini beside -tini).

Old Persian shows infinitives in -tanaiy, as car-tanaiy from kar- 'do, make', katanaiy (read kantanaiy, see I § 197 Rem. p. 166) from kan- 'dig'; with these Persian infinitives Bartholomae connects Avest. aiwi-šōrpnē 'for dwelling in'. To these should no doubt be added Skr. cyāu-tná-m 'preparation, undertaking' Avest. šyao-pna- m. 'deed, work' beside Skr. cyáv-a-tē 'bestirs itself, moves', perhaps also Skr. pát-tana-m 'city', orig. 'stronghold', compare pad- in pi-bd-aná- 'standing fast, firm', cp. also Lat. op-pid-u-m')

In Italic tno- appears in the form -ndo- after vowels,2) in the gerund and gerundive, as *piza-tno-, Lat. piando-, Umbr. phaner 'piandi' Osc. úpsannam 'operandam' (for the assimilation of -nd- to -nn- -n- in Umbr.-Osc. see I § 506 p. 371). Lat. dando- for *da-tno-, im-plendo- for *-plē-tno-. So -bundo- in vagābundus tremebundus etc. for *-fū-tno- = Lith. bū-tina-s, cp. vagā-bor. secundo- for secū-tno-, cp. secū-tu-s (J. Schmidt, apud Bersu, Die Gutturalen und ihre Verbindung mit v im Lat. p. 134), rotundus for *rotō-tno- from a verbal stem rotō- 'to rotate'. Further, we have the group of forms in -cundu-s, as rubi-cundu-s, irā-cundu-s, fā-cundu-s, fē-cundu-s for *-cō-tno-, derived from adjectives in -co-, such as *rubico- (whence rubicāre, Rubicō) etc. With the forms in -ō-tno- compare aegrō-tu-s from aegro-, Gr. xovrw-rō-g and the like. The change to -ndo- was impossible in forms coming from verbal stems which ended in a consonant (e. g.

¹⁾ In Greek only a few uncertain examples have survived, e. g. βέπτανο-ς ἀπτάμενο: (Hesych.), which may perhaps be identified with Lith. dèktina-s (\sqrt{dhegh} -).

²⁾ Cp. Lat. pandō for *patnō, beside pateō, and tendō, Umbr. ostendu 'ostenduto', for *te-in-ō, \sqrt{ten-}. That the d of tendō is not the 'root-determinative' d (dh), as in fren-dō cū-dō clau-dō, is shewn by ten-tu-s contrasted with fre(s)su-s, in-cūsu-s clausu-s. This 'determinative' was in fact used to form not present stems but verbal stems. tēnsu-s was formed later by analogy.

*vectno- or *vecteno- = Lith. vesztinu-s, beside veho Lith. vesú), and this gave rise to a variation in form, which was removed by a process of levelling; on the analogy of the relation of piando- to mans piantis, of dando- to dans dantis, of implendo- to im-plens -plentis etc., ferêns produced a gerund-stem ferendo-, faciens the stem faciendo- and so on. The Umbr. an-ferener 'circumferendi' makes it probable that this developement was complete in proethinc Italic. The Latin by-forms with -o- (-u-) like ferundo- faciendo- eundo- must be explained as imitations of the variation -ent- -ont- in the present participle, as e. g. in ièns euntis, flexuntès and the like (§ 126).

Lith. Participia necessitatis in -tina-s. sùk-tina-s'torquendus' beside inf. sùk-ti. jëskó-tina-s'quaerendus' beside jëszkó-ti. miné-tina-s 'memorandus' from miné-ti. véry-tina-s 'credendus' from véry-ti Without the implied meaning of necessity we have bú-tina-s 'being, remaining, actual' from búti 'to be': Lat. -bundu-s In Slavonic we have -tīno-, au adjectival suffix, e. g. pri-jetīnū 'pleasant' (we also find -enīno-, as ne-iz-d-rečenīnū 'inexpressible').

There was therefore in Indo-Germanic a verbal adjective in -tno--tyno-, whose neuter was used as an abstract substantive (nomen actionis). The adjectival meaning appears in Latin and Lithuanian, the substantival in Old Persian and Latin. Cp. § 158.

Remark Compare the Author, 'Der Ursprung der lat. Gerundia und Gerundiva', American Journal of Philology VIII (1887) p 441 ff. In his recently published dissertation 'Die Etymologie der sogen. Gerundivformen' (Königsberg 1888), A. Döhring connects the Latin-ndo-forms with the Gr. nouns in -arfo-; -irfo-ç-vrfo-ç-vrfo-ç-vrfo-ç-as äxarfo-ç äiyirfo-ç, and accordingly argues for an original Idg. -ndho-But besides the fact that these Gr. words show no connexion in meaning with the Lat gerund and gerundive, the Umbr-Osc. forms with -nn- (-n-) can hardly be reconciled with this theory. By the phonetic laws hitherto discovered in the Italic dislects the forms in -nno- can be referred only to pr. Ital -ndo-, not to -nfo-. The most recent theory is that of L. Havet (Mém. de la Soc. de lingu., VI 6 ff) who identifies ferundu-s with Gr. pseópero-c, from *feromeno- by dissimilation he would derive a supposed form *feromedo- (what of ferimini?), from this *feromedo- *ferondo ferundo-; which is simply incredible.

§ 70. The Suffix -tvaná- in Sanskrit and -ovvo--ovva- in Greek1).

These suffixes are no doubt rightly regarded as very closely connected.

Skr. -tvaná- (neut.) is a secondary suffix having the same meaning as -tvá- (§ 61); as vasu-tvaná-m beside vasu-tvá-m 'riches', pati-tvaná-m 'married state', martya-tvaná-m 'the manner of men'. In Avestic -pwana- is primary in a-stao-pwane-m 'praise, guerdon'.

Gr. -συνο- is secondary in adjectives like δουλό-συνο-ς 'serving', $\gamma\eta\vartheta\dot{\sigma}$ -συνο-ς 'glad, joyful', $\vartheta\dot{\alpha}\rho\sigma\nu\nu\sigma$ -ς 'confident' for * $\vartheta\alpha\rho\sigma\sigma$ -συνο-ς (I § 643 p. 482), and in substantives like δουλο-σύνη 'service', κλεπτο-σύνη 'thievery', μνημο-σύνη 'memory' (cp. § 158). The ending -σ-συνο- became general, whence we have μαντοσύνη from μάντι-ς, ϑ -εμιστ-σσύνη from ϑ -έμις, ἱεριώσυνα (neut. pl.) and ἱερεωσύνη for *ἱερη(\mathcal{F})-σ- from ἱεριύς (Wackernagel, Philol. Anzeiger 1886 p. 73 f.).

Remark It must be confessed that the phonetic relations of the Greek and Sanskrit suffixes are not clear, since -συνο- cannot be regularly derived from *τυνο- (which would be related to Skr. -tναπα- as ὅπνο-ς: Skr. sνάρπα-ε, an Indo-Germanic variation of ablaut) Should we suppose a doublet in Greek, *-τ-f-ενο- beside *-τ-υνο-, and that the σ-sound which was regularly developed in -τ-f-ενο- (I § 166 p. 147, § 489 p. 361) afterwards invaded *-τ-υνο-? Cp. Att. σύ for τύ because of σέ, Hom πίσυξες beside New-Ion. τέσσεξες (Lith. keiver), G. Meyer Gr. Gr.² p. 258, Osthoff Paul-Br. Beitr. XIII 425 Or may we assume for Skr. -tναπα- and Gr. -συνο- a common ground-form -ίμ-ηπο-? Cp. Gr. Ion. οὐφανό-ς for *f-ος-f-ανο-ς and Skr. κώντιπα-, for which von Fierlinger (Kuhn's Zischr. XXVII 475) assumes *μονμηνο- as the common ground-form (here, indeed, the relation of the Greek and Sanskrit forms would be exactly the reverse); add Skr. ca/ur--thά- and Lith. ketvītta-s for *getyr-io- (I § 155 p. 140).

§ 71. The Suffix -mno--mnā- (-mno--mnā-?) and -meno--menā-, -mono--monā-?).

In proethnic Indo-Germanic, this suffix formed middle (passive) participles from tense-stems containing the thematic

¹⁾ Th. Aufrecht, Das Affix auros, ourn, Kuhn's Ztschr. I 481 ff.

Bechstein, De nominibus suffixo mino (mno-) instructis, Curtius'
 Stud. VIII 378 ff.

vowel, cp. pres. Skr. bódha-māna-s Gr. πευθό-μενο-ς, fut. Skr. bhōtsyá-māna-s Gr. πευθό-μενο-ς, from bheudh-, 'be awake, aware'. We find it in Aryan occasionally, but in Greek universally extended to non-thematic stems, which originally had -pno-eno--ono-; see § 65—67 and observe the Remarks on pp. 141 and 152.

It is now impossible to trace the original distribution of the forms which differ in their grade of Ablaut.

In the Umbro-Oscan dialects, and in Balto-Slavonic, -mo-appears with a similar function: we are hardly justified in regarding this as a regular phonetic variant of -mno- (§ 72, I p. 166).

Remark. Sometimes it is difficult to decide whether a particular form contains this suffix or a later extension of -men- by means of -o--ā-, as must certainly be assumed in e.g. Avest. airya-mana- beside airya-man-, Gr. νώνυ-μνο-ς beside κοιμα (§ 117), ποί-μνη 'herd' beside ποι-μην 'herdsman', ἡγε-μώτη 'leader' (f) beside ἡγε-μώτ, Lat colu-mna beside colu-men, Goth μα-mna- (dat pl μαπηα-m) beside namō. Cp. § 65 Rem. p. 139.

Aryan.

in Sanskrit only -māna- occurs. Pres. bhára-māna-s beside indic. míd. bháratē (bhar- 'bear'), jušá-māna-s beside indic. míd. jušá-tē (juš- 'taste, enjoy'), kriyá-māna-s beside indic. pass. kriyá-tē (kar- 'make'). Fut. yakšyá-māna-s beside indic. míd. pass. yakšyá-tē (yaj- 'revere'). The Ved. perf. part. sasz-māná-s beside sasz-aná-s, from indic. med. pass. sasz-é (sar- 'flow') is unique.

In Avestic we find -mna- and -mana-; the latter should no doubt be referred rather to -meno- than to -meno-, since the forms vary merely in accordance with the requirements of the metre. Pres. yaza-mna- beside indic. mid. yazaite (yaz-'revere, praise'), bar'ze-mna- bar'ze-mana- 'being great or high', anha-mana- beside indic. mid. anheite = Skr. ásya-tē I § 558 p. 415 (ah- 'throw'), vaedaya-mna- beside indic. mid. (caus.) vaedayeite (vid- 'know', causal 'make to know, show'). Fut. var'sya-mna-beside indic. mid. pass. var'syeite ground-form *yerk-sie-tai I § 401 p. 296 f. (var'z- 'work'). Sometimes also in non-thematic stems, as saya-mna beside say-ana-, from indic. mid. sae-tē (say- 'lie').

Greek. As a living participal suffix only -μενο- occurs. Pres. φερό-μενο-ς beside indic. mid. pass. φέρε-ται (φερ- 'bear'), γιλεό-μενο-ς φιλούμενο-ς beside indic. mid. pass. φιλέται φιλείται (φιλέω 'I love'); side by side with these we find Delph. Locr. ναλείμενο-ς Arcad. ἀδικήμενο-ς, and similar forms elsewhere, whose ending presupposes a form *-ε-με-μενο-ς. Fut. δωσό-μενο-ς beside indic. mid. δώσε-ται (δω- 'give'). -μενο- also established itself in all non-thematic tenses; contrast e.g. pres. τιθέ-μενο-ς beside indic. mid. pass. τίθε-ται with Skr. dádh-ana-s (\$\square\$ dhē- 'set, lay'), perf. γεγενμένο-ς for *γεγενσ-μενο-ς beside indic. mid. pass. 1. s. γέγεν-μαι with Skr. γιίμιδ-aṇά-s O.H. (β. partc. -koran (\$\sqrta \) ĝεμε- 'taste'). The accentuation in the perfect- (Att. -μένος) was no doubt originally -μενός, see I § 676 p. 542 f.

The form -μνο- (cp. the last Remark) perhaps occurs in certain formations no longer felt to be participial, as βέλε-μνο-ν 'missile' (τὸ βαλλόμενον) beside βέλος, στά-μνο-ς 'crock' beside 7στημι 'I place'.

In Latin we must refer to this suffix the ending of the 2. pl. -minī, as legi-minī (sc. estis) = $\lambda \epsilon y \acute{o} - \mu \epsilon v o$. omission of estis, which a priors would be somewhat remarkable. is easily explained if (with Wackernagel, Verhandl. der 39. Philologenversammlung p. 281 f) we compare the imperative form legimini with the Greek infinitive $\lambda \epsilon \gamma \epsilon \mu \epsilon r - \alpha i$ (§ 117); the indic. legiminī representing both λεγόμενοι and λεγόμεναι, caused the imperat. legiminī to be used only as plural and as mid.-pass.; so conversely, when legimint representing λεγέμεναι had been so established in the imperative system it caused the omission of the copula in the indicative, -mint being regarded as the ending of the 2nd. pers. The suffix occurs also in fe-mina, i. e. she who suckles' (cp. Gr. 3-1/2-1/2 'giving suck, female'). clēmēns according to Osthoff (Wolffllin's Archiv IV 463) came from *clēmenos for *clei-e-meno-s, cp. -clīno: Skr. śráya-mana-s. is doubtful whether this old Lat. -meno- was originally -muno-. -meno-, or -mono-.

-mno- is seen perhaps in Lat. alumnu-s, Vertumnu-s, Volumnu-s and similar forms (cp. the last Remark).

Pruss. po-klausi-mana-s (1) part. 'becoming heard' beside Lith. klausý-ti 'to hearken' is the only form of this kind in the Baltic dialects.

§ 72. The Suffix -mo--mā-, -mmo--mmā-.

There are three classes of forms:

1. -mo- occurs as a participial suffix in Umbro-Samnitic and in Balto-Slavonic, with the same meaning as -meno- (§ 71). It may be related to the -mo- in adjectives like Avest. tā-ma-'strong', Gr. Θερ-μός Lat. for-mu-s 'warm' (see below, 3). At the same time it is perhaps a possible alternative to refer it to -mno- (cp. I § 219 p. 187).

In the above-named Italic dialects, the suffix is found in imperative forms like Umbr persnih-mu 'precamino, supplicato' Osc. censa-mu-r 'censemino'.

In Balt.-Slav. -mo- 18 a living suffix in the pres. part. pass., in Lith. in the fut. part pass. also, though this is now obsolete. In Pruss. we have -mana- instead, see § 71

Lith. pres. $v\tilde{e}zu$ -ma-s 'being or capable of being carried', beside the indic. vezu 'veho', $j\delta ja$ -ma-s beside $j\delta -ju$ 'I ride', $j\tilde{e}szko$ -ma-s beside $j\tilde{e}szkau$ 'I seek' (1. pl. $j\tilde{e}szko$ -me). Fut. $v\tilde{e}szi$ -ma-s $j\delta si$ -ma-s $j\tilde{e}szk\delta si$ -ma-s beside indic. $v\tilde{e}sziu$ (ground-form * $ue\tilde{g}h + si\delta$) $j\delta$ -siu $j\tilde{e}szk\delta$ -siu.

O.C.Sl. vezo-mŭ beside indic. veza 'veho', znaje-mŭ beside zna-ja 'l know', chvali-mŭ beside chvalja 'l praise' (1. pl. chvali-mŭ).

2. -mo-nmo- is a superlative suffix in words denoting number, rank, order in space and time, and the like. This suffix is the second element in -tmmo- (§ 73). The corresponding comparative suffix is generally -ero-, as -tero- beside the superl. -tmmo- (§ 75). A possible derivation is suggested in the Remark on p. 167.

Indo-Germanic. *septmó- (*sepdmó- *sebdmó- ? see I § 469 p. 345) sept-ημπό- 'septimus': Skr. saptamá-s Gr. εβδομο-ς (see under Greek) Lat. septimu-s O.Ir. sechtm-ad Lith. sēkma-ş Pruss. septma-s O.C.Sl. sedmy-jī; similarly *deknmó- 'decimus' (see under Aryan) and *oktmó- *oktημπό- 'octavus' (see under Balto-Slavonic). *up-mó- *up-ημπό- 'uppermost, highest': Skr. upaup-s,

Lat. summu-s for *s-up-mo-s (for the s- see I § 568 p. 425), A.S. ufem-est, op. comparative Skr. úpara- Lat. s-upero-. *medh-mmó- midmost' beside *medh-jo-s'medius' (§ 63, 3 p. 132): Avest. madema- 'midmost', Goth. miduma subst. f. 'middle' (cp. § 158) ().H.G. metamo metemo 'mediocris'; beside these are forms which have been readjusted to suit the parallel *medhjo-, Skr. madh-yamá-s 'midmost' and Goth. midjuma- or midjuman- in midjun-gards 'the globe' for *midjum(a)-gards (cp. § 40 p. 69), O.H.G. mittamo m. 'middle' (cp. O.H.G. mittil A.S. middel beside the more archaic O.H.G. metal 'medius' and Gr. velato-ç beside véato-ç, 'novissimus, extremus' from *vefgo *vefo-).

Remark *septymó- may be related to the cardinal *septyn as the Gr. πιαρό-, to πὶαρ, *udró- (Skr udrá-s etc.) to εόλωρ (§ 74). The ordinal numeral appears to have been formed by the addition of -ό-, cp Lat. ποπu-s from *neunnó- from *neun (I § 232 p 197, § 233 p. 198, § 249 p. 205). It is possible therefore that the superlative suffix -mo- was taken bodily from the the ending of the numerals Cp the suffix -to-, which serves in the same way to form both ordinal numerals and superlatives, § 81.

Aryan. Skr. daśamá- Avest. dasema- 'decimus': Lat. decimus O.Ir. dechm-ad, common ground-form *dekmmó-. Skr. ap-amá- Avest. ap-ema- 'most distant, last' beside Skr. ápa 'from, away'. Skr. av-amá- 'lowest, next' from áva 'off, down'. adh-amá- 'undermost' (ground-form *ndhmmó-) beside adhás 'below': the relation of this word to Lat. Infimu-s and Inferu-s is not clear; see Ascoli, Sprachwissensch. Briefe 83, and above I § 389 Rem. p. 292 1). par-amá- 'furthest, last, best' from pára- 'further'.

In Greek it is rare. ξβδομο-ς 'septimus' and Heracl. Delph. ξβδεμήποντα for *ξβδμ- with anaptyctic -o- and -ε- (see I § 626 p. 470): O.C.Sl. sedmy-jī etc., see p. 166 above. πρό-μο-ς 'foremost' from πρό 'before': cp. Umbr. promom, Goth. fra-m. Perhaps

¹⁾ In this Remark there is an error in the translation. The second sentence should read: "we might regard the f as regular in $in\text{-}fund\bar{o}$ confund \bar{o} and thence substituted for h in the uncompounded verb, if there were more evidence for the suggestion that the word infumus infimus arces from an old phrase infumo in humo, etc." [i e. if we could prove that pr. Ital χ in Latin passed through the stage f on its way to h initially, and that the compounds infundo confundo infimus were formed just at that period.]

also $\pi \dot{\nu} \mu$ - $\alpha \tau o$ - ς 'last' (cp. $\dot{\epsilon}\beta \dot{\delta} \dot{\rho} \mu$ - $\alpha \tau o$ - ς beside $\dot{\epsilon}\beta \dot{\delta} \rho \mu o$ - ς , $\tau \rho l \tau$ - $\alpha \tau o$ - ς beside $\tau \rho l \tau o$ - ς), although its base is certainly obscure (in J. Schmidt's derivation from $\ddot{\alpha} \pi o$, as though it came from $^*(\alpha) \pi v$ - μo -(Kuhn's Ztschr. XXVI 24) the v presents some difficulty).

Italic. Lat. decimu-s Osc. dek mannioss 'decumanis': Skr. daśamá- and similar ordinals (see p. 167 above). Lat. summu-s Umbr. somo 'summum' pr. Ital. *s-up-mo-s: Skr. upamá-s 'uppermost, highest'. Lat. prīmu-s Pelign. pris-mu 'primo' or 'primum' beside prius. Lat. īmu-s Osc. imad abl. 'ima'; the word no doubt belongs to O.Ir. īs 'below' īchtar 'the lower part'1). Lat. min-imu-s, plūr-imu-s, brūma (beside brevi-s); formed from adverbs in nē, extrē-mu-s postrē-mu-s suprē-mu-s. Osc. pos-mo-m 'postremum', cp. Lat. pōne for *pos-ne. Umbr. prumum promom 'primum' Gr. noó-uo-c Goth. fra-m; šimu šimo 'ad citina, retro' Umbr nuvime adv. 'nonum', a later formation like Skr. navamá-s and O.Ir. nōma-d 'nonus'. Umbr.-Osc. nesimo- 'proximus' for *necsimo-, no doubt connected with Lat. nectō nexus: O.Ir. nessam 'next' beside the comparative nessa.

-nmo- is probably also to be traced in Lat. superlatives like pulcerrimu-s celerrimu-s facillimu-s simillimu-s (Danielsson, Pauli's Altital. Stud. III 153). *pulcr-is-emo- *facl-is-emo- (-is-is the weakest form of the comparative suffix, cp. pulcr-ior facil-ior) became *pulcrsemo- *pulcersimo- and *faclsemo- *facil-simo- (I § 633 p 473 f) and then pulcerrimo- facillimo- (I § 571 p. 429).

Old Irish. The ordinals in -mmo- appear to be extended by -eto-, as sechtmad 'septimus' for *septymeto-s, dechmad 'decimus' for *dekymeto-s, undoubtedly through the influence of coiced 'quintus' sessed 'sextus' (§ 81); similarly in the other Keltic languages, e. g. Mid.Cymr. seithuet 'septymus'. Cp. Gr. Epdómato-s on the analogy of dérato-s, etc. rem- 'ante, prae', which has lost an initial p (I § 339 p. 268). Goth. fruma Lith. prema-s 'primus', common ground-form *pr-mo-.

¹⁾ See Loth, Mém. de la Soc. de lingu V, 231 f. and d'Arbois de Jubainville, ib. VI 55 f. It is better to refer it to *ik-mo- or *ig-mo-, than to *iks-mo-, from which we should expect in Osc. 1smo-.

In Keltic this suffix was regularly used to form the superlative. In O.Ir. nessam 'next', and some other forms, -am corresponds to Lat. -imo-; see above. On the other hand, -em cannot be identified with -mmo- in e. g. dilem 'pleasantest' (comp. diliu pos. dil) coemem 'fairest' (comp. coimiu pos. coem) toisigem 'first, most excellent' (comp. toisigiu pos. toisech) lugem 'smallest' (comp. laigiu) ōam for *ō-em 'youngest' (comp. ōa) māam for *mā-em 'greatest' (comp. māo). Probably Thurneysen is right in comparing these forms with Latin superlatives like pulcerrimu-s (see above); *dilis-mmo- became *dilisamo- *dilham(o)-, finally dilem¹). To such superlative forms the same -em was sometimes added a second time, as uaislimem 'highest' beside the comp. uaisliu pos. uasal, ep. Gr. -r-aro-s § 81.

Germanic. In proethnic Germanic this suffix passed over into the n-declension in adjectives; the Gothic feminine ended in ei gen. -eins, as in the comparatives in -iz-a (see §§ 110, 135). In Gothic the forms in -uma also acquired a comparative meaning, so that e. g inn-uma was sometimes equivalent to the O.H G. inn-ero (cp., de Saussure, Mélanges Renier 383 ff.). Goth fru-ma 'prior, primus' (whence frum-ists 'primus'), O.H.G fruma f. 'use', advantage' O.Ir. rem- Lith. pir-ma-s common ground-form ** mo-,-contrast with these Goth. O.H.G. fra-m adv. 'forwards', further': Gr. πρό-μο-ς. Goth. aúhuma 'higher, highest', compare auh-m-ists and auh-um-ists 'highest', A.S. umest = Goth, authorists Goth inn-uma inner, innermost A.S. inn-em-est 'innermost'. Goth. spēd-um-ists 'latest, last' beside spēd-ists. Goth. hleid-uma 'left, ἀριστερός', compare no doubt O.H.G. (h)lī-ta 'slope, declivity' Gr. xlī-rv-: 'hıll', A.S. sīd-em-est 'latest' beside sid-est, laet-em-est 'latest'; nord-m-est 'northernmost' sūđ-m-est 'southernmost'.

^{1) &}quot;The loss of an s is indicated both by the medial h of O.British hinham 'eldest' for *senisam-, and later *heniham- (= Ir. *sinem), and by the retention of the older tenuis before this suffix in Cymric, as in the superlative rhataf for *rai-ham beside the pos. shad 'cheap' Whether Gall. Belisama (a goddess) and Trigisamo- (the river 'Treisam') belong to this group is doubtful." Thurneysen

In Balto-Slavonic the suffix is rare. Lith. äszma-s Pruss. acc. asma-n O.C.Sl. osmy-ji 'octavus' pr. Balt.Slav. *oš(t)-mo-: Skr. aštamá- Avest. aštema- O.Ir. ochtm-ad: this word, in spite of the agreement of several languages, can scarcely have been formed until after the separation of the Indo-Germanic families, as was Skr navamá- Umbr nuvime. Lith. pir-ma-s Lett. pir-má-is Pruss. pir-moss 'primus'. O.Ir. rem- 'Goth. fruma.

3. -mo- with other functions. It forms substantives, and adjectives. There are only a few groups of words which by their parallelism in form and meaning constitute a special class, as e g the Greek abstract substantives in $-\mu \acute{o}$ -s. The substantives are generally masculine, more rarely feminine, and the neuter very seldom appears

-mo- 14 used as a denominative suffix in several languages, but this use is on the whole rare and no doubt a secondary development

Where the suffix is primary, the root syllable, from the very carliest period, varies between the weak and the strong grade of ablaut; in the latter case, in roots of the e-series, the o-form seems to have been regular in the proethnic and later periods. It is common to find forms of the strong and weak grade in the same word, e. g Gr. λι-μό-ς: λοι-μό-ς, Skr. dhū-má-s: O.H.G. tou-m, Gr. χι-uό-c. Skr. hō-ma-s, Skr. idh-má-s: Avest. aṣs-ma-(I § 94 p 88); this indicates an original variation of ablaut within the same paradigm (cp. Osthoff, Morph. Unt. IV 127 f.).

In a large number of cases -mo- is closely connected with -men- (§ 117). In e-roots, where both suffixes are found side by side and the root-syllable has e, as in Gr. κενθ-μό-ς beside κενθ-μών 'hiding-place', O.C.Sl. zi-ma 'winter' beside Gr. χει-μών 'storm, winter', the presumption is in favour of the greater antiquity of the men-formation. In many instances there has obviously been a confusion of the two. In compound words, the mo-form was substituted for men- both in the Indo-Germanic period and later (§ 12 p. 27) 1).

¹⁾ For this process of substitution in the use of the suffixes a reference may now be added to J. Wackernagel, Kuhn's Zischr. XXX 296 ff.

Idg. *dhū-mó- 'ebullition, smoke': Skr. dhūmá-s, Gr. θυμό-ς ('spirit, passion'), Lat. fumu-s, Lith. pl. dúmai, O.C.Sl. dymu. add O.H.G. tū-mon 'to turn one's self in a circle'; beside this we have *dhou-mo- in O.H.G. toum 'vapour, fume'. *tu-mo- *tu-mofrom Vteu- 'swell, grow strong': Skr. redupl. tū-tumá- Avest. tūma- 'strong', Mod.Cymr. twf 'vigor' (a borrowed word?), O.C.Sl. tuma f. 'great number' (there are many extended formations from the -mo-stem, as Skr. túm-ra- 'fat, strong', Lat. tumeo, O.H.G. dumo m. 'thumb'), with these compare *toy-mo- in O.H.G. thaum down 'vapour', which was confused with town. *f-mó- 'arm, something bowed or bent' Skr. īrmá-s Avest. ar ma-Armen. arm-ukn Lat. armu-s O.H.G. aram O C Sl. ramo. *ghi--mo- *ghi-mā. Skr. himá-s 'cold' hi-mā 'winter' Avest. zima- m. 'winter', Armen. 1m-ern (gen im-eran) 'winter' for *jim-er- (for the suffix compare amarn 'summer'), Gr dive-yeur-s 'exposed to dangerous storms, fearful', Lat. bīmu-s for *bi-himu-s (I § 510 p. 374 § 604 p. 458); the vocalism of Idg *ghei-men- (Gr. χει-μών) appears in Lith. žėmà O C.Sl. zima 'winter', and we can trace the form *ghiem- *ghiem- in Avest zyå, gen. zim-ō 'winter's frost' Gr. zuúr 'snow' Lat. hiems (§ 160, 2) *stī-mó- (cp. Skr. stya-'curdle, thicken', also connected with Goth. stái-n-s): Skr. stīmá-'lazy, creeping' pra-stima- 'pressed, heaped', Mid.H.G. stim m. 'bustle, confused mass' O.Icel. stīm n. 'wrestling, trouble' (Lith. stymas and styma 'shoal of moving fish' are no doubt borrowed from Scandinavian, cp. Swed. stim 'tumult, shoal of tumbling fish'); Mid.H.G. ster-m 'turmoil' shows a stronger form of the root. *ghor-mó-s (√ gher-): Skr. gharmá-s 'heat' Avest. garema- 'warm' gar'me-m 'warmth' (see especially I § 78 p. 69, § 445 p. 331), Lat. formu-s, O.H.G. warm 'warm', Pruss. gorm-e 'heat'; beside these, with e, Armen. Jerm 'warm', Gr. θερμό-ς 'warm' θέρμη 'warmth'. *01-mo- 'way' (γ e2-): Skr. é-ma-s 'way, path' Gr. ol-μο-ς ol-μη 'path, tract'.

For its use as a secondary suffix there seems to be only one example which we can regard as proethnic: Skr. dru-ma-s 'tree' Gr. δρυ-μά pl. 'wood' δου-μά-ς 'woodland', beside Skr. dru-Gr. δρυ- 'wood'.

Aryan. In Sanskrit it is nearly always masculine. Skr. sa--má-m 'milk, water', sóma-s Avest. hao-ma- 'sap, soma-drink'. from su- 'press'. Skr. iš-má-s īš-má-s 'god of love' Avest. aeš-mam. 'chiding, wrath'. cp. Gr "luego-s 'longing, desire'. Skr. bha--ma-s 'light, sheen' Mod. Pers. bam 'light' Avest. bamya- 'shining. clear'. Skr. tok-ma-s 'green stalk of corn' O Pers. tauma- 'family' for *tauxma-, cp. Skr. tok-man- n 'green stalk of corn' (older than tok-ma-s) Avest. taox-man- r 'seed, kernel, offspring'; the O.Pers. tau-mā- however should perhaps be explained otherwise, see § 117 under Arvan. Skr. áj-ma-s 'path, course' (beside áj-man- j-mán-, which mean the same) Gr. őy-uo-ç 'path' (with prothetic 6-?). Skr. #-ma-s 5-ma-s 'helper, companion' beside ō-mán- 'help, support', compared with áva-ti 'he helps'. bhī--má-s 'terrible', cp. Lith. bái-m-c 'fear'. tig-má-s 'sharp'. ruk-má-s 'shining, ornament'. yudh-má-s 'fighter' cp. Gr. voutrn 'fight, battle' from *v9 + ou- (cp. p. 173). yuq-má- 'even, forming a pair' neut. subst. 'pair'. dar-má-s (beside dar-mán-) 'he who shatters'. dhár-ma-s (beside older dhár-man- n.) 'order, law, institution'.

It is secondary only in Skr dru-ma- (see above p. 171) and dyu-ma- 'clear, shining' from dyu- div- 'brightness, day'.

Armenian. arm-ukn 'elbow', jm-ern 'winter', jerm warm, see above under Idg, p. 171

Greek. $\lambda \bar{\tau} - \mu \dot{o} - g$ 'hunger' $\lambda \sigma - \mu \dot{o} - g$ 'plague, pestilence': cp. Skr. sri-ma-s 'nightly spectre' from $\sqrt{sle_{\ell}}$ 'hurt'. Substantives with the strong-grade of the root-syllable are not uncommon: $\delta g - \mu \dot{\eta}$ 'onset': Skr. $s\acute{a}r-ma-s$ 'flow, flowing' perhaps also O.H.G. stur-m 'storm, fight' (stur- for $s_{\ell}r$ -, cp. I § 580 p. 433 f.); $r\acute{o}g - \mu o - g$ 'what is bored, a hole'. O.H.G. dar-m O.Icel. far-m-r 'intestine' (i. e. 'that which goes right through the body', or 'the channel through which the food passes'); $g\acute{\lambda}o\gamma - \mu\acute{o} - g$ 'brand' $(g\acute{\lambda}\acute{e}\gamma\omega)$; $\pi \grave{\lambda}o\chi - \mu\acute{o} - g$ 'lock of hair' $(\pi \grave{\lambda}\acute{e}\kappa\omega)$; $\acute{o}\acute{e}-\mu o - g$ 'cylindrical body, mortar' $(\ell \grave{\lambda}\acute{\nu}\omega)$; $\acute{o}\acute{e}-\mu o - g$ 'cord, necklace' (cp. $\ell \acute{e}\mu \alpha$); $\grave{\lambda}\acute{o}\chi - \mu \acute{o}$ 'thicket, bushes' $(\grave{\lambda}\acute{e}\chi o g)$. Further we have examples with weak vocalism: $\kappa g \rlap{v}\mu\acute{o} - g$ 'frost' (for * $\kappa g \rlap{v}\sigma - \mu o - g$ 'sneeze'. In forming abstract verbal nouns $-\mu\acute{o}$ - was very fertile,

e. g. μυγ-μό-ς μυχ-μό-ς 'groan' (beside μύζω μέμτκα), ἰν̄γ-μό-ς 'shriek' (beside ἰτ΄ζω), ὀδυ ρ-μό-ς 'lamentation' (beside ὄδτρομαι), ἀρπαγ-μό-ς 'plundering' (beside ἀρπάζω), κηρῦγ-μό-ς 'calling out' (beside κηρύσσω — for the γ see I § 486 Rem. p. 359), μερισμό-ς 'division' (beside μερίζω — for the -σ- see below). Feminines of the same kind are πυγ-μή 'fight with fists', τι-μή 'estimation, honour', χάρ-μη 'joy of battle, battle', ἀκ-μή 'edge, sharpness', γνώ-μη 'intent, opinion', μνή-μη 'memory', ἐπι-στή-μη 'science'.

Sometimes we find $-\tau - \mu o$ - (cp. $-\tau - \mu \varepsilon v$ - § 117): $\xi \rho \varepsilon - \tau \mu \acute{o} - \varepsilon$ 'oar' beside $\xi \rho \acute{e} - \sigma \omega$ $\xi \rho \acute{e} - \tau \eta \varsigma$, $\xi \rho \varepsilon \tau \mu \acute{\eta}$ 'injunction' beside $\xi \phi - \acute{e} - \tau \eta - \varepsilon$ $\xi \phi - \acute{\eta} \mu \mu$, etc., cp. O.S. brahtum and the like, p. 175. More frequently $-\vartheta - \mu o$ - (cp. $-\vartheta - \mu \varepsilon v -$ § 117): $\acute{a} \varrho - \vartheta \mu \acute{o} - \varepsilon$ 'number' (no doubt connected with O.H.G. $r\bar{\iota} - m$ 'orderly succession, number'), $\grave{a} \varrho - \vartheta \mu \acute{o} - \varepsilon$ 'tie', $\sigma \tau \alpha - \vartheta \mu \acute{o} - \varepsilon$ 'standing-place, stall, posts' $\sigma \tau \acute{a} - \vartheta \mu \eta$ 'plumb-line', $\grave{\varrho} v \vartheta - \mu \acute{o} - \varepsilon$ 'rhythmical motion', $\varkappa \lambda \alpha v - \vartheta \mu \acute{o} - \varepsilon$ 'crying' $\varkappa \eta \lambda \eta - \vartheta \mu \acute{o} - \varepsilon$ 'bewitching', $\mu \eta v \bar{\iota} - \vartheta \mu \acute{o} - \varepsilon$ 'wrath' etc., cp. $-\vartheta - \varrho o - -\vartheta - \lambda o - ($ § 77).

-s-mo- according to Morph. Unt. I 81. occurs in δασμό-ς 'division' beside δατέσμαι, ωσμό-ς 'push' beside ώθέω, ἀφλοισμό-ς 'foam' beside πέψλοιδα, ὀσμή beside older ὀδ-μή 'smell', σχισμό-ς 'split' beside σχίζω, and in substantives in -ισμό-ς and -ασμό-ς connected with derivative verbs in -ίζω άζω, as μερισμό-ς άχοντισμό-ς ενθουιασμό-ς. Yet it may also be assumed (cp. Solmsen Kuhn's Ztschr. XXIX 123) that in such forms there was originally only -mo- (which would give us *δατμό-ς *ωθμό-ς οδμή); that then, where perfect forms in -oual -oueda -ouevo-c (the o came from -σται, δέδασμαι being formed on the model of δέδασται) occurred in the paradigm of the verb, the σ from these forms took the place of the explosive; and that afterwards, on the analogy of such words, the explosive was replaced by σ in other instances (e. g. δδμή). The occurence of -μο- and -σμο- side by side in derivatives of these dental stems led to the substitution of $-\sigma$ - for ϑ in several of the forms in $-\vartheta\mu\sigma$ - mentioned above, as ὁυσμό-ς instead of ὁυθ-μό-ς, δυσμή instead of δυ-θμή, θεσμό-ς for (Lacon. and other dial.) θε-θμός. Cp. -σμεν- § 117.

-mo- is secondary in δρῦ-μό- (p. 171), and also in the adjectives in -ιμο-ς, which were derived from i-stems; as φύξιμο-ς 'protecting, whither one can flee' (from φύξι-ς 'flight'), βάσιμο-ς 'that can be traversed, safe' (from βάσι-ς 'a going'), λύσιμο-ς 'that can be ransomed' (from λύσι-ς 'ransom'); on the model of these were formed ἄλκιμο-ς 'strong', νόστιμο-ς 'relating to one's return', νόμιμο-ς 'lawful' and others. It occurs also in ἔτυ-μο-ς ἐτήτυ-μο-ς 'true, genuine' (cp ἐτεός for *ἐτε-Γο-ς).

Italic Lat lī-mu-s crooked lī-mu- crossway, dividing line, boundary, Osc. liímítú[m] limitum: the Oscan word cannot have arisen from *lixmo- (cp. lixula) which would have become *lismo- in Oscan, and if this derivation is correct, it must have been borrowed from Latin. Osc eg-mo res, stem eg-mā-.

Lat. lī-mu-s 'grease, slime, mud'. O.H.G. lī-m 'glue' lei-m 'loam'. fi-mu-s fi-mu-m: no doubt connected with Gr. θν-μο-ν 'scented plant' (see I § 49 p. 41 f.). ann-mu-s ann-ma: Gr. ἄνε-μο-ς 'wind', cp. also O.Ir. anim, dat anmain, 'soul'. fā-ma: Gr. φή-μη 'news, rumour'. for-ma: cp. Skr. dharn-mán 'figure'. spūma for *spoi-mā: O H.G. fei-m m. 'foam' (cp. § 66 p. 148).

Lat. dūmu-s (dusmo in loco Paul. Fest.), rāmu-s no doubt for *rād-mo- ground-form *ūr̄d-mo-, beside rādix, with other examples. The neuter is rare: pō-mu-m, ar-ma. There are a fairly large number of feminines: lī-ma, rū-ma (beside rū-men), rī-ma, gem-ma etc.

-mā- is secondary in lacru-ma lacri-ma: cp. Gr. δάκον 'tear'. Old Irish. le-m m. 'elm' ground-form *ʃ-mo-): Lat. ul-mu-s, O.H.G. el-m O.Icel al-m-r 'elm'. lā-m f. 'hand': Gr. παλά-μη Lat. pal-ma O.H.G. fol-ma 'hand, flat hand'. rī-m f. 'number', aram f. 'number, counting' for *ad-rīmā (cp. I § 623 Rem. 1 p. 469, § 634 p. 474 f.): cp. O.H.G. rī-m Gr. ἀρι-θμό-ς p. 173. O.Ir. gor-m 'blue' Mod.Cymr. gwr-m 'dusky': Skr. ghy-nō-mi 'I shinc'? (see Curtius Grdz. 5 494). O.Ir. lua-m 'celox': cp. Lith. plaŭ-s-ma-s 'raft'.

Infinitival nomina actionis are formed with -ma-; as cretem 'faith, believing', sechem 'a following'.

Germanic. O.H.G. bodam m. 'bottom': cp. Gr. πυθ-μήν

'ground, bottom', (cp. Kauffmann, Paul-Braune's Beitr. XII 537). Goth. hái-mōs pl. fem. 'villages, market-towns', O.H.G. hei-m 'dwelling': Lith. ke-ma-s 'village, farm' kaim-ýna-s 'neighbour'. O.Icel. strau-m-r O.H.G. strō-m 'stream': we should doubtless add (with orig. ou) Lett. strau-m-e f. 'stream', and (with a) Thrac. Στρύ-μη a town on the Lissos; compare with these *srey-men-(§ 117). A.S. far-m 'a going, pressing forward' O.H.G. far-m 'boat': cp. Gr. πορ-9-μός 'ferry'. O.H.G. halm 'stalk' O.Icel. hal-m-r 'straw': Gr. κάλα-μο-ς 'reed, stalk', Lat. cul-mu-s, Lett. sal-m-s O.C.Sl. sla-ma f 'stalk', pr. Germ. *xalmo- may represent either *kol-mo- or *kl-mo- (I § 306 p. 242 f). O.H.G. fadam m. 'fathom, ulna' A.S fathmos pl. 'both outstretched arms' O.Icel. fadmr 'cord, fathom, embrace': cp. O.Cymr. etem 'fathom'. Goth. do-m-s O.H.G. tuo-m 'sentence, trial, standing, worth': Gr. θω-μό-ς 'stack', from $\sqrt{dh\bar{e}}$ - 'set, place'; beside it we have *dh\bar{e}-men-(§ 117).

Goth. $r\bar{u}$ -m-s 'room, roomy' ().H.G. $r\bar{u}$ -m m. 'room': ep. Avest. rav-ah- 'road, free way'. O.H.G. $sc\bar{u}$ -m m. O.Icel. $sk\bar{u}$ -m n. 'foam'. Forms with the 'high' grade of ablaut (o-grade in -e-roots) are far commoner. We may add O.H.G. bar-m O.Icel. bar-m-r 'womb' ('that which bears', \sqrt{bher} -); O.H.G. zou-m O.Icel. tau-m-r 'bridle, rein' pr. Germ. *tau3u-má- 'that which pulls or is pulled', \sqrt{deuk} - 'ducere').

A smaller number of forms have e in the root syllable; von Bahder (Verbalabstr. 136 f.) assumes that these were originally men-stems, as O.H.G. melm m. 'dust' beside O.Icel. malmr 'metal' and Lith. melmū, gen. melmens, 'nephritic stone'. Cp. further O.H.G. atum A.S. athom 'breath' pr. Germ. *Ep-ma-(for the history of the original tenuis in Germanic see Kögel, Literaturbl. f. germ. u. rom. Phil. 1887 no. 3) beside O.Fris. Ethma 'breath', Skr. at-man- 'breath, soul'.

Several instances of -t-mo- occur (cp. Gr. -τ-μο p. 173), as Goth. mái-pm-s A.S. mē-thom 'present, jewel' beside Gr. μοῖ-το-ς 'thanks, payment', Lat. mū-tuo-s, Lith. maī-na-s 'barter'; O.Sax. brah-tum 'noise' beside O.Sax. O.H.G. braht 'noise'; O.H.G. brā-dam 'vapour, steam, exhalation' beside A.S. brā-ā

f. 'vapour' (cp. Bremer, Paul-Br. Beitr. XI 279); O.H.G. kra-dam 'shriek' beside O.H.G. hano-krāt 'cock-crow' (cp. Bremer loc. cit.); Mid.H.G. bladem 'wind' beside O.H.G. bla-t 'breath, fulness'.

Remark. The different explanation of the latter forms given by von Bahder, Verbalabstr 144 does not convince me.

Balto-Slavonic. Lith. pl. dú-mai O.C.Sl. dy-mű 'smoke': Skr. dhū-má-s etc., see p. 170 above. Pruss. irmo 'arm' (perhaps nom. sing. of an n-stem, like Lith. -mů) O.C.Sl. ramo beside ramę 'shoulder'. Skr. īr-má-s etc., see p. 171 above. Lith. szál-ma-s 'helmet' (Pruss. salmi-s): Goth. hilm-s O.H.G. helm 'helmet', Skr. śár-man- n. 'shelter, protection, armour'; may we therefore assume Idg. *kol-mo- and *kel-men-? O.C.Sl. sramů 'shame' O.H.G. haram O.S. harm 'insult, outrage'

Lithuanian. Masculines are rare, szár-ma-s 'potash', at-szłai-ma-s 'fore-court' (\$\sigma klei-\ 'clinare')\$. Feminines are more common, as tar-mà (also tarmê) 'statement', szar-mà 'rime, frozen dew', važ-mà 'payment of fare' On the other hand, there are many masculines formed with -s-ma-, as garsma-s 'call' from *gard + sma-\ beside garsa-s 'noise' from *gard + sa-s (gird-mi gird-žiù 'I hear'), varsmu-s 'the length of a furrow' for *vart-sma-, lank-sma-s 'bending', valk-sma-s 'pull, draught', kaŭk-sma-s 'howl', rêk-sma-s 'roar', cp. also -s-mê in drausmê 'training', Lett. drausma 'threat' beside Lith. draudžiù 'I protect, forbid', bausmê 'punishment' beside baudžiù 'I punish', gësinê Lett. d/isma 'song' beside Lith. géd-mi 'I sing', etc. Adj. szir-ma-s Lett. si'r-m-s 'grey'.

-ima-s -yma-s form abstract verbal substantives from any given verb, as sukima-s 'a turning' from sûk-ti 'to turn', sākyma-s 'sayıng' from saký-ti 'to say' How (i. e. from what model) this group of forms took its rise is doubtful; cp. also jaunima-s 'the dance of youth, company of young folks' from jauna-s 'young', minksziima-s 'soft part of bread' from minkszta-s 'soft'.

Secondary: tóh-ma-s'distant' from toll adv. 'afar', árty-ma-s' near' from arti adv. 'near'.

The secondary suffix -uma-s forms abstract substantives.

This arose in forms like gražù-ma-s 'beauty' from gražù-s 'beautiful', on the model of which were formed such words as sausùma-s 'dryness' from saŭsa-s 'dry'. By the side of this we find -umà used to denote some part of the land, as lygu-mà 'a level place' (beside lygù-ma-s 'levelness, the being level') from lýgu-s 'even, level', sausumà 'dry place'.

O.C.Sl. kos-mŭ and kos-ma 'hair'. u-mŭ 'thought, understanding', no doubt connected with Skr. av- Lat. avēre and therefore similar in formation to Skr. ō-ma-s 'helper' (p. 172). ylu-mŭ 'sport, scena' glu-ma 'licentiousness'. -s-mo- is the suffix in usmŭ usma 'indumentum, corium', if the word is connected with ob-u-ti 'to cover the feet'.

§ 73. The Suffix -tmmo-tmma-, forming superlatives. We may analyse it as -t-mmo-, and the second element -mmo- is itself a superlative suffix (§ 72, 2 p. 166 ff.). As a single indivisible suffix, -tmmo- must have been rare in the Indo-Germanic period.

-t-ηmo- is linked with the comparative -tero- (§ 75) in the same way as -ηmo- with -ero-, cp. Goth. af-tuma: O.H.G. aftro aftero and Skr. ap-amá-s· Skr. áp-ara-s Goth. afar, further Skr. ut-tamá-s: Skr. út-tara-s Gr. ὕσ-τερο-ς and A.S. ūt-em-est (an extension of an original *ūt-ema): Skr. ud-ará- ūd-ara-('belly') O.H.G. ūz-ro. -tero- however had become an independent suffix earlier than -t-ηmo- and it appears from the evidence of the different languages that it was widely used even in the proethnic period.

Indo-Germanic. *trīkmt*-tmmo- or *trīkmt*-tmmo- 'trī-cesimus': Skr. trīsāt-tamá-s (ε for ī is hysterogenous) Lat. trīcēn-simu-s trīcēsimu-s (-s- for -ss-, see I § 501 p. 367 f.): compare (and contrast) Gr. τριᾶκοστό-ς i. e. τριᾶκοντ+το-. Similarly Avest. vīsastema- (Skr. višati-tamá-s) 'vicesimus' Lat. vīcēnsimu-s vīcē-simu-s: compare and contrast Gr. Att. εἰκοστό-ς Boeot. Γικαστό-ς (I § 238 p. 199 f., § 501 p. 367 f.).

Skr. án-tama-s 'innermost, nearest, intimate', Lat. in-timu-s: cp. the comparative Skr. án-tara-s 'inner' Gr. ĕv-тερο-v 'entrails', Lat. inter-ior, beside Gr. ἐv and Lat. in; beside these we Brugmann, Elements II

have Gr. ἐν-τός Lat. in-tus, so that we may fairly compare the relations of Skr. adh-amá-s: ádh-ara-s: adh-ás and *pṛ-mo-(Lith. pɨrma-s Goth. fruma): *pṛr-ós (Skr. purás Avest. parō Gr. πάρος). Avest. ni-tema- 'lowest, smallest', A.S. neo-đem-est 'lowest, undermost': cp. the compar. Skr ni-tarām A.S. ni-đer-ra.

Skr. ka-tamá-s 'which (of several)?', Lat. quo-tumu-s beside quo-tu-s: cp. compar. Skr. ka-tará-s Gr. πό-τερο-ς.

Aryan. Skr. pra-thamá-s Avest. fra-tema- O.Pers. fra-tama- 'primus' (the th of the Skr. form follows cathur-thá-and the like) beside the compar. Skr. pra-tará-m Avest. fra-tara-, (fr. πρό-μο-ς Umbr. pro-mo-m Goth. fra-m § 72, 2 p. 167 show a more ancient formation. Skr. sahasra-tamá-s Avest. hazaprō-tema- 'millesimus', Skr. śata-tamá-s 'centesimus', ašīti-tamá-s 'octogesimus' etc. The feminines of these numerals have in Sanskrit -tam-i instead of -tamā.

Skr. ut-tamá-s 'highest, uppermost, best' Avest. us-tema-'outermost', beside Skr. úd 'up, out' compar. úttara-· cp. Gr. ὕστ-ατο-ς 'latest' compar. ὕσ-τεφο-ς.

Even in proethnic Aryan -tama- was the regular superlative ending for adjectives whose comparative was formed with -tara-. Where it was added to a-stems, their final -a- was in Avestic almost entirely replaced by -ō-; cp. the same phenomenon in compounds, as daevō-dāta-, § 25 p. 42. Skr. yajūiya-tama-Avest. yesnyō-tema- 'most honourable', Skr. ugra-tama- Avest. uyrō-tema- 'strongest, mightiest'. Some words however have -a-in Avestic, e. g. aiwyāma-tema- 'most helpful'. Skr. vāhni-tama- 'carrying best', Avest hubaoiāt-tema- 'with sweetest scent or perfume'. Skr. ama-vat-tama- Avest. ama-vas-tema- 'most violent, strongest, mightiest'. Skr. mīḍh-uṣ-ṭama- 'most gracious', Avest. jaymuṣ-tema- 'most helpful'. Skr. vṣṣan-tama- 'manliest, strongest'.

-tama- is sometimes added as an intensive suffix to superlative forms in (Ar.) -ištha-, as Skr. śréštha-tama- from śréštha-'brightest, most glorious', Avest. vahištō-tema- from vahišta-'best'.

It was affixed to substantival stems, as Skr. mati-tamamost motherly', Avest. daevō-tema- 'most devilish'. Skr. ka-tamá- 'which (of several)' beside ká-tara- 'which (o-two)', interrogative. ya-tamá- 'which (of many)' beside ya-taráf 'which (of two)', relative.

Italic. vīcēsimu-s trīcēsimu-s, see p. 177 above. Later analogical forms are cent-ēsimu-s mill-ēsimu-s mult-ēsimu-s.

in-timu-s, ex-timu-s, ci-timu-s, ul-timu-s. dex-timu-s, sinis-timu-s. mari-timu-s, fīni-timu-s, lēgi-timu-s, originally meaning 'most closely connected with the sea, with a boundary, with law'. op-timu-s, in inser. also opi-timu-s (differently regarded by von Fierlinger in Kuhn's Zeitschr. XXVII 478, who derives it from a verbal stem σ-pet- 'strive after, wish'). sollis-timu-s. Umbr. hon-domu 'infimo' beside compar. hon-dra 'infra' Osc. hu[n]truis 'inferis', beside Lat. humu-s, see I § 207 p. 174.

-simo- occurs as well as -timo-, but its -s- cannot be derived from -t- merely by phonetic change. maximu-s, archaic ōximē (beside ōcissimē), medioximu-s (cp. medioc-ri-s). The most common ending is -is-simu-s (cp. sollis-timu-s), which no doubt drove out an older -is-to-s (§ 81), as pot-issimu-s, alt-issimu-s. -issimo-was also added to superlatives with intensive force, especially in later times, e. g. postrēm-issimu-s, minim-issimu-s. It is added to the stems of substantives in the language of the comedians, as patru-issimu-s. But it is doubtful whether the formation with -simo- -issimo- is in any way connected with tmmo-.

Remark. In Morph. Unt. III 135 I explained these forms as modelled upon the -ens(s)imo- of the numerals. We might also with Osthoff (Zur Gesch. d Perf. 542) regard pessimu-s beside pējor as another form that served as a type for the new development in -issimo-, since the ss in this word as well as in the numerals arose by a regular phonetic process, whether we accept Corssen's or W. Schulze's derivation (see Osthoff loc. cit., Schulze, Kuhn's Ztschr. XXVII 426, Stolz Lat. Gr. p. 220). On the other hand, Stolz (loc. cit.) holds that -simo- was taken from *plūsimo-(plūrimo-) before the law of rhotacism came into operation. According to § 72 p. 168 we could also regard forms like *pulcr-is-emo *pulcrsemo- as prototypes of the formation. Danielsson on the other hand (Pauli's Altital. Stud. III 153. 192) starts from the two words maximus, oxime, which he analyses macs-imo- ōcs-imē, regarding the first elements as comparative stems for *mahis-, *ōcis- (op. ploir-umē plūr-imu-s and the like § 72 p. 168), and supposing that it was these forms which led to the analogical

change of -1stimo- to -1ssimo-. Danielsson compares with these forms Umbr. Osc. nesimo- O.Ir. nessam 'next' (beside the compar. O.Ir. nessa). But the assumption of syncope, which is required by the supposed forms in -1s-nimo- (*mah-1s-nimo-, *vc-1s-nimo-) cannot be allowed without considerable hesitation (see p. 168), hence it is very doubtful whether Danielsson's explanation of maximu-s etc. can be allowed. Can *neks- and Lat. *max- contain the weak form of an old es-stem (cp. Skr. máhas-'greatness' mahás- 'great')? The whole question needs further investigation.

Germanic. What was said of -uma- (§ 72, 2 p. 169) also applies to the inflexion of -tuma- and its meaning in Gothic. Goth. af-tuma 'hinder, hindmost, latter, last', A.S. æf-tem-est 'hindmost'. Goth. hin-dum-ists 'outermost' A.S. hin-dema 'hindmost, last'. Goth. if-tuma 'next': Gr. šπι 'on, to'. A.S. neođem-est, see p. 178 above.

§ 74. The Suffix -ro- -rā-, -rro- -rrā-1)

On the variation between -ro- and -ro- see I § 287 p. 229. This suffix was both primary and secondary from the earliest period; but the latter use is comparatively rare.

In its primary use the root syllable has generally the weak grade of ablaut; as we should therefore expect, the accent falls on the suffix, e. g. *spɔ-ró-. Sometimes we have a variation of ablaut in the root, as Skr. chid-rá-s 'perforated': Lith. sked-rà 'splinter'; Gr. ið-agó-ç 'clear, bright': aið-oā 'bright weather'; Gr. ið-oó-: Lett. swid-ri pl. 'sweat', O.H.G. bitt-ar: Goth. báit-r-s 'bitter'; O.H.G. munt-ar 'cheerful': O.C Sl. mqd-rū 'wise'.

In some words -ro- seems to be connected with the $-\tau$ - $\bar{\tau}$ ending of the nom. acc. neut. (§ 118), cp. e. g. Idg. *ud-ro-: Gr. $\tilde{v}\partial$ - $\omega\rho$ O.H.G. wazz-ar; Gr. $\pi \bar{\iota}\varepsilon$ - $\rho\delta$ - ε $\pi \bar{\iota}\alpha$ - $\rho\delta$ - ε 'fat': $\pi \bar{\iota}\alpha\rho$ 'fat' (subst.); $\dot{\eta}\mu\dot{\varepsilon}$ - $\rho\bar{\alpha}$. $\ddot{\eta}\mu\alpha\rho$ 'day' (cp. also Armen. aur, gen. avur, 'day'); Gr. $\dot{\omega}$ - $\rho\sigma$ - ε Goth. $j\bar{\varepsilon}$ -ra- 'year': Avest. $y\bar{\alpha}$ -r- 'year' (for further examples see Morph. Unt. II 232). It is also connected with -er- (§ 119), cp. e. g. Idg. *us-ro- Skr. $u\dot{\varepsilon}$ - $\dot{\alpha}$ r- 'early light' Gr. $\ddot{\eta}\rho$ - ι 'in the early time' from * $\ddot{\alpha}us$ -er-; Gr. $a\dot{\imath}\vartheta$ - $\rho\bar{\alpha}$: $a\dot{\imath}\vartheta$ - $a\dot{\imath}\vartheta$ -

¹⁾ H. Osthoff, Über -ra- -la- als instrumentales suffix der indogerm. Sprachen, Forschungen I 157 ff. G. Curtius, De adjectivis Graecis at Latinis l'litterae ope formatis, Leipz. 1870.

'the pure light of heaven'; further with the comparative -(t)ero-(§ 75).

This suffix formed adjectives and substantives both in the proethnic and in later periods of Indo-Germanic, the substantives were chiefly concrete. In the separate languages -ro- was rarely fertile to any great extent; Gr. - η - ϱ o- in π o ν η ϱ ó- ς etc. is an exception.

Indo-Germanic. *rudh-ró- (in Skr. -rró-) 'red': Skr. rudh--ırά-s, Gr. ἐρυθ-ρό-ς, Lat. ruber rub-ra, O.Icel. rod-ra f. 'blood', (), C.Sl. rŭd-rŭ. *sk(h)id-ró- and -rró- Skr. chid-rá-s 'perforated' chid-rá-m 'hole, interruption, break' chid-irá-s 'axe, sword', Gr. σκιδ-αρό-ς 'thin, weak, breakable', O.H.G. scet-ar 'thin, defective', Lith. (with a different grade of ablaut) sked-rà 'splinter'. *spa-rófrom $\sqrt{sp\bar{e}}$ 'to expand' (Lat. spēs spatium &c.): Skr. sphi-rá-'fat, great, rich', Lat. pro-sper -spera (for *-spa-ro-, like réd--dere: dáre, see I § 97 p. 91), O.C.Sl. spo-rű 'rıch'. Skr. iş--irá-s 'quick, lively, fresh', Gr. Hom. foó-s Lesb. Too-s for *lo-ρο- (Lesb lρο-ς beside lρρο-ς, like gen. μην-ος beside μην-ος and the like) and Corcyr. lapó-g Boeot. lapó-g for *lo-apo- lively, fresh, strong, healthy'; for Att. ispó-g, see below. Skr. us-rá-s 'belonging to the morning' beside us-r-iyā 'brightness', Gr. äyy--αυρο-ς 'near morning' (adj.) αυρ-10-ν 'on the morrow' for *αν'σ-ρο-(*aus- or *aus-); cp. also Lith. ausz-rà 'red of the morning', whose sz no doubt was borrowed from auszo 'it dawned' (cp. I § 414 Rem. p 303 f.). *ud-ro- (in Gr. also -rro-) beside Skr. ud-án- 'water': Skr. an-udrá-s 'waterless' sam-udrá-s 'billowy, the sea', Gr. ύδ-αρό-ς 'watery' αν-υδρο-ς 'waterless'; and meaning a 'water-creature', Skr. ud-rá-s 'a creature that lives in water', Gr. i'd-po-s i'd-pā 'watersnake' O.H.G. ott-ar O.Icel. ot-r 'otter', Lith. úd-ra O C.Sl. vyd-ra 'otter'. Skr. vī-rá-s 'man, hero', Lat. vi-r, O.Ir. fe-r Goth. vai-r Lith. vý-ra-s 'man'. *aĝ-ro-s 'pasture, level meadow, field' from $\sqrt{a\hat{g}}$ - 'drive': Skr. αj -ra-s Gr. $\alpha \gamma$ - $\rho \phi$ - ς Lat. ag-er (gen. ag-rī) Goth. ak-r-s.

-ro- in secondary use. *temps-ro- 'dark' (the neut. or fem. can be used as an abstract subst., see § 158) beside Skr. tám-as- n. Lith. tam-s-à f. 'darkness': Skr. tamis-ra-m támis-rā

'darkness, dark night' Avest. $tq\bar{p}$ -ra- for *tams-ra- *tansra- 'dark' 1), Lat. teneb-rae pl. (cp. I § 570 p. 429), Mid.Dutch deemster (-2s-ro) O.H.G. dinstar (-3s-ro-) 'dark' with parasitic -t- (I § 580 p. 433 f.), Lith. tims-ra-s 'light bay coloured' of a horse (the root has the weak grade of ablaut).

Beside Skr. pt-van- Gr. nt-(f)wv 'fat' (adj.) and Skr. pt-vasn. 'fat' (noun) we must recognise Idg. *pī-ye-ro- 'fat' (adj.): Skr. pīva-rá- Gr. $\pi \bar{\iota} = \rho \dot{o} - \varsigma$ (fem. $p\bar{\iota} va - r\dot{\iota}$, $\pi \dot{\iota} = \rho \dot{o}$ for * $\pi \bar{\iota} = \rho \dot{o} - \iota a$), cp. also Gr. πιό-της πιό-τερο-ς; for πιαρό-ς see below. Similarly Gr. η-μέ-ρα 'day' compared with the stem η-μεν- implied in the pl. η - μa - τa . For the -e- of these compound suffixes - μe -ro--me-ro- cp. Gr. φοβε-ρό-ς 'fearful', from φόβο-ς, etc. (Skr. phēna--la-s 'foamy' from phéna-s 'foam'). But -ro- can hardly be secondary in Gr. nr-s-00-v 'feather, wing' Skr. pat-a-rá- 'flying' Avest. pat-a-ra-, which is implied in hu-patareta- 'well winged', (contrast *petrā 'feather' in O.Icel. fjoar O.H.G. fedara); it is far more likely that here, as in Skr. pát-a-tra-m 'wing', -eis the 'thematic vowel' (cp. Gr. $\pi \tau - \dot{\epsilon} - \sigma \vartheta \alpha \iota$, $\pi \dot{\epsilon} \tau - \epsilon - \sigma \vartheta \alpha \iota$); cp. also Gr. $\sigma_{x-\varepsilon-\rho\rho'-c}$ 'continuus' beside $\sigma_{x-\varepsilon-\tau\rho'-c}$ $\sigma_{x-\varepsilon'-c}$ $\sigma_{x-\varepsilon'-c}$. It is quite possible that originally -e-ro- was always a primary suffix, and only became secondary when it was popularly connected with nominal e-: o-stems.

Aryan. Since Idg. r and l are indistinguishable in the Aryan languages (I § 254 p. 207 f.), it is often difficult to separate -ro- and -lo-. In some cases the meaning vouches for -lo-, e. g. vrša-lá-s 'mannikin, small man' (see § 76). Often the other languages give us a criterion, since in them Idg. l and r remained distinct.

Skr. śú-ra- Avest. sū-ra- 'strong, grand': Gr. ă-xūço-ç 'weak, ineffective'. Skr. jī-rá- 'lively, quick, active' Avest. pouru-jīra- 'very active' daema-jīra- 'quick of eye, with quick

¹⁾ If this explanation of the Avestic word is correct, we might compare the \bar{p} with the same sound in $aiw_1 - \bar{p}\bar{w}ra_-$ from $s\bar{w}ra_-$, (see Bartholomae Hdb. § 144). No other example of $-msr_-$ - nsr_- appears to occur, and thus there can be little serious objection to our assuming that it was just in this group of consonants that \bar{p} was regularly developed.

eyes': Lat. vi-reō 'be fresh, strong, green', O.C.Sl. ži-rā 'pasture', Lett. d/i-ras pl. f. 'banquet'. Skr. ud-rá- Avest. ud-ra- m. a water animal: Gr. vo-qo-ç etc., see p. 181 above. Skr. cit-rá- 'shining, glorious, wonderful' Avest. cip-ra- 'wonderful': O.H.G. heit-ar 'shining, clear, bright'. Skr. śubh-rá- 'shining, fine': Armen. surb 'pure'; no doubt the suffix is the same in Skr. śuk-rá śuk-lá- 'clear, pure' Avest. sux-ra- 'flaming, red' O.Pers. pux-ra- proper name. Skr. váj-ra-s Indra's thunderbolt, Avest. vaz-ra- 'club' O Pers. vazra-ka- 'great, mighty', beside Skr. vája-Avest. vaza- m. 'strength': cp. O.H.G. wahh-ar O.Icel. vak-r 'lively, quick, fresh, alert' and Goth. vōk-r-s 'profit' O.H.G. wuohh-ar 'increase, gain, profit'. Skr. am-lá- and ambla- (I § 199 p. 167 f.) 'sour': Dutch amper 'sharp, bitter' O.Icel. apr 'sharp' O.H.G. ampfaro 'sorrel' (adj. used as subst.) no doubt for pre-Germ. *am(b)-ro-, cp. also Lat. am-aru-s.

Skr. śith-irá- śith-ilá- 'loose, unsteady': Gr. καθ-αφό-ς 'open, free, pure'. Skr. mand-irá-m 'lodging, dwelling, room, house' Gr. μάνδ-φā 'fold, pen, stall'; Skr. mand-urá 'stable' either has -urā- for -γrā- (cp. however I § 290 p. 231 f.) or may be an extension of a stem *mandu-.

With Skr. pata-rá- 'flying' (see p. 182) compare drava-rá- 'running', ny-ōca-rá- 'suited to, belonging to a place'.

-ro- in secondary use: Skr. tamıs-ra-, pīvará-, see above, p. 181 f. vy-ad-vará- 'gnawing, rodent' beside ad-van- 'eating': cp. Hom. ἔδΓαρ (εἰδαρ), gen. ἔδΓατος, 'food'.

Examples of Aryan words with -ra- -la-, which, so far as we can tell, may represent either -ro- or -lo-, are given in § 76 Rem. 1.

Armenian. surb, gen. srboy, 'pure' for *sub-ro-s (I § 263 p. 214): Skr. subh-rá-s. kirtn, gen. krtan 'sweat' for *kitr-an-: Gr. iδ-ρό- Lett. swid-ri pl. 'sweat'. tu-r 'gift': Gr. δω-ρο-ν O.C.Sl. da-rū 'gift'.

The -aro- of adjectives in -ar, which no doubt comes from -rro-, appears to be sometimes primary, sometimes secondary. It is primary e. g. in dal-ar 'green, fresh' (cp. Gr. θαλε-φό-ς), and secondary e. g. in ard-ar 'just' (cp. Skr. r-tá-). mecar-em

'I exalt, praise' a denominative verb like Gr. μεγαίρω 'I rate highly, admire' (from *μεγαρο-, cp. μέγαρο-ν 'large space, chamber').

Greek. ελαφ-ρό-ς 'light, brisk' · O H.G. lung-ar 'quick, active', common ground-form *ligh-ro-s ax-00-5 'pointed' ax-00-v ax-0a 'point, peak': Skr. catur-asra- four-cornered', O.C.Sl. os-t-ru 'sharp'. ζω-ρό-ς 'unmixed' (of wine), 'ένεργής, ταχύς' (Hesych.): no doubt to be compared with O.C.Sl. ja-ru 'amarus, iratus' Serv. jara 'heat of a stove'. aq-qó-g 'foam': Skr. abh-rá-m 'cloud' (cp. also Lat imber gen imbris in the i-declension), common ground-form *mbh-ró-; beside this ομβ-ρο-ς 'rain' with Idg b like Skr. ámb-u- 'water', see I § 469, 8 p. 346 f. κάπ-ρο-ς 'boar': Lat. cap-er cap-ra, (). Icel. haf-r 'he-goat'. νεφ-φό-ς 'kidney, testicle'. Ital. Praenest nefr-on-es, Lanuv, nehr-undin-es 'kidneys testicles', O H.G. mor-o 'kıdney, testicle' O Icel. nyr-a n. 'kidney' (I § 443 p. 329), common ground-form *negh-ró-. εδ-ρα 'seat': O.Icel. set-r n. 'seat'. $\lambda \alpha \mu \pi - \rho \delta - \varsigma$ 'shining'. $\sigma \alpha \pi - \rho \delta - \varsigma$ 'rotten'. φαιδ-ρό-ς 'beaming, happy', νεκ-ρό-ς 'corpse', τάφ-ρο-ς 'ditch, trench'. $\varkappa \delta \pi - \varrho \sigma - \varphi$ 'dung'. $\tau \delta \varphi - \varrho \bar{\alpha}$ 'ashes'.

-gro-. iaρό-ς beside iρό-ς see p. 181 above. λιπ-αρό-ς 'fat': cp. Skr. rsp-rá-m 'smear, stain, impurity' σιν-αρό-ς beside σιν-δ-ρό-ς (for the δ, see I § 204 p. 170) 'harmful', and other examples

-ro- is secondary in Att. (Aristoph) $ol\zeta v - \varrho \dot{o} - \varsigma$ 'woeful' from $ol\zeta \dot{v}_{S}$, gen. $ol\zeta \dot{v}_{O}\varsigma$ 'woe, and similarly in $\lambda \iota \gamma v - \varrho \dot{o} - \varsigma$ beside $\lambda \iota \gamma \dot{v} - \varsigma$ 'clear, ringing' and $\mu \omega \lambda v - \varrho \dot{o} - \varsigma$ beside $\mu \dot{\omega} \lambda v - \varsigma$ 'enfeebled', unless these are derived from * $\lambda \iota \gamma v \lambda o - \varsigma$ * $\mu \omega \lambda v \lambda o - \varsigma$ (cp. $\pi \alpha \chi v - \lambda \dot{o} - \varsigma$ § 76) by dissimilation (I § 266 p. 215). Further, in many adjectives in $-\varepsilon - \varrho o - \varsigma$; e. g. $\varphi o \beta \varepsilon - \varrho \dot{o} - \varsigma$ 'terrible' from $\varphi o \beta o - \varsigma$, $\delta \varrho o \sigma \varepsilon - \varrho \dot{o} - \varsigma$ 'dewy' from $\delta \varrho \dot{o} \sigma o - \varsigma$, whose termination $-\varepsilon \varrho \dot{o} - \varsigma$ was regarded as an independent suffix, and added to other than o-stems, as $\sigma \omega \varepsilon \varrho \dot{o} - \varsigma$ 'shady' from $\sigma \omega \dot{\alpha}$, $\kappa \varrho \omega \tau \varepsilon \varrho \dot{o} - \varsigma$ 'strong' from $\kappa \varrho \dot{\alpha} \tau o \varsigma$ n.; cp. p. 182.

-qo- can be considered either a secondary or a primary suffix in adjectives in -α-qo-, as οδυνηφό-ς Dor. οδυναφό-ς 'painful'

beside ὀδύνη Dor. ὀδύνα and ὀδυνάω, ἀσηρό-ς Lesb. ἄσᾱρο-ς 'causing disgust, disagreeable' beside ἄση Lesb. ἄσᾱ and ἀσάω, and in those in $-\bar{v}$ -ρο-, as Hom. ὀιζ \bar{v} -ρό-ς 'woeful' beside ὀιζ \dot{v} ς and ὀιζόω (Att. ὀιζ \bar{v} ρό-ς, see p. 184 above), ἰσχ \bar{v} -ρό-ς 'strong' beside ἰσχ \dot{v} -ς and ἰσχ \dot{v} ω.

Remark. The relations of -ego- and -ago- are not quite clear in such instances as $ieg\dot{a}-\varsigma$ $iag\dot{a}-\varsigma$ (Skr. $i\ddot{s}-ir\dot{a}-s$); $a\pi_i eg\dot{a}-\varsigma$ (from $a\pi_i\dot{a}$): $a\pi_i ag\dot{a}-\varsigma$; $\pi_i teg\dot{a}-\varsigma$ (Skr. $p\bar{v}var\dot{a}-\gamma$): $\pi_i teg\dot{a}-\varsigma$ (see Morph. Unt. II 241 ff.) I should compare $\pi\bar{i}ag\dot{a}-\varsigma$ (and also $\pi\dot{i}a\lambda a-\varsigma$) with $\pi_i ta\dot{v}w$ for * $p\bar{v}ug-\dot{v}\bar{o}$, exactly as $\mu_i ag\dot{a}-\varsigma$ 'defiled' is to be derived from $\mu_i air\dot{w}$, so that the relation is the same as that of $\pi_i ug\dot{a}-\dot{v}-\dot{v}-\dot{v}$ (1 e * $\pi_i ug\dot{a}-\dot{v}-\dot{v}-\dot{v}$) Aurualia. Then new formations arose, $ieg\dot{a}-\dot{\varsigma}$ (modelled upon $\pi_i eg\dot{a}-\dot{\varsigma}$ areg $\dot{a}-\dot{\varsigma}$) on the one hand, $\pi_i ug\dot{a}-\dot{\varsigma}$ (modelled upon $\mu_i ug\dot{a}-\dot{\varsigma}-\dot{\varsigma}$) on the other

Italic. Lat. rub-er rub-ra, Umbr. rufru 'rubros' rufra 'rubras'. Gr. 2009-00-5 etc., see p. 181 above. Lat. vi-r gen. vi-rī, Umbr. verro 'viros' · O Ir. fe-r Skr vī-ra-s etc., see p. 181 above Lat. cap-er cap-ra, Umbr. kaprum 'caprum': Gr. κάπ--go-s etc., see p 184 above. Lat. ag-er gen. ag-rī, Umbr agre gen. 'agri': Skr. áj-ra-s etc., see p 181 above. Lat. sac-er sac-ra, Falisc, sacru 'sacrum', Umbr. sakra 'sacras', Osc. σακ-ορο 'sacrum' sak-arater 'sacratur' (1 § 627 p. 471). Lat. mac-er mac-ra: Gr. μακ-ρό-ς 'long, lean, far', O.H.G. mag-ar O.Icel. mag-r 'lean' pr Germ. maz-rá- Lat. ob-scūru-s 'dark', properly 'covered over': O.H.G. skū-r 'shelter, covered place, lodging'. Lat. plē-ru-s plērī-que: Gr. πλήρ-ης 'full', which is a modification of an older form $*\pi\lambda\eta$ - $\rho\sigma$ - (cp. $\pi\lambda\eta\rho\delta\omega$), but its accent, in contrast to the analogous υδαρής (: υδαρό-ς), followed that of compounds in -ήρης like διήρης. Lat. pū-ru-s. dī-ru-s. clā-ru-s. gnā-ru-s (cp. I § 253 p. 207). in-teger (cp. intactu-s). nig-er. glab-er (we may conjecture that the original form of the stem was *gladh-ro- or *glədh-ro-, cp. O.C.Sl. gladŭkŭ 'smooth'). scab-er. stup-ru-m. lab-ru-m 'lip'. scalp-er and scalp-ru-m. flag-ru-m. At the same time in words where an l occurs before the suffix -ro-, it must be remembered that the latter may have come from -lo-, cp. lu-crum for *lu-clum I § 269 p. 217. Sabin. cuprum 'bonum' Cupra 'bona dea', Umbr. Cubrar gen. 'Bonae deae', beside Lat. cup-iδ.

No certain examples of -rro- can be found; perhaps it may be traced in Lat. camur camura, cp. Gr. καμάρα 'vault'.

-e-ro- occurs in Lat. līber lībera O.Lat. loeber-tātem, which is usually compared with Gr. ἐλεύθ-εφο-ς (see I § 49 p. 42, § 65 p. 52), puer gen. puerī, gener gen. generī.

The relation of Lat. amā-ru-s: Skr. am-lá-'sour' is obscure.
-ro- in secondary use. teneb-rae: Skr. tamis-ra- etc., see above p. 181 f. cerebru-m for *ceres-ro-, cp. Skr. širas- 'head'. fūnebri-s instead of *fūnes-ro-, transferred to the i-declension, beside fūnus fūnes-tu-s, see I § 570 p. 423, II § 93 under Italic. membru-m membr-āna for *mēms-ro- O.Ir. mīr 'piece of flesh' from pr. Kelt. *mēns-r., beside Skr. māsá- Goth. mimza-O.C.Sl. meso- 'flesh' (I § 570 p. 428, § 574 p. 430, § 585 Rem. 3 p. 440).

Old Irish. sī-r Mod Cymr hi-r 'lasting long' (comparative O.Ir. sia): Lat sē-ru-s, common ground-form *sē-ro-, beside Skr. sāya-s 'late time, end'. lā-r Mod.Cymr. llaw-r 'flooring, floor'. A.S. flō-r 'floor' Mid.H.G. vluo-r 'level, floor'. ar Mod.Cymr. aer 'battle, fight' for *ag-ro- (1 § 523 p. 380): Skr ghāsē-ajra- 'attractive to the taste, creating appetite' Gr. áy-oā 'game, prey', from \sqrt{ag} - 'drive', cp. Idg. *ag-ro- 'place where cattle are driven, field' which was formed from the same root, p. 181. bod-ar (acc. pl. bod-ra): Skr. badh-irá- 'deaf'. mā-r mō-r Mod.Cym. maw-r 'great' Gall. -māro- in Virido-māru-s and other proper names, beside the compar. O.Ir. māo mō 'greater': Gr. ɛ̄yxeal-μω-oo-ç 'great or distinguished in throwing the spear', and the like (Bechtel, Uber die Bezeichn. d. sinnl. Wahrnehm. 101; Osthoff, Paul-Braune's Beitr. XIII 431 ff.), common ground-form *mō-ro-. uar Mod.Cymr. oer 'cold' pr. Kelt. *og-ro-.

-ro- is secondary in O.Ir. mīr, see above.

Germanic. O.H.G. sū-r O.Icel. sū-r-r sour, 'bitter': Lith. sū-ra-s 'salt' (adj.) O.C.Sl. sy-rū 'raw'. O.H.G. munt-ar 'fresh, lively, hasty, Goth. mund-r-ei 'goal, object': O.C.Sl. mad-rū 'wise' (Lith mand-rū-s 'conceited, overbearing' instead of *mand-ra-s). Goth. gáu-r-s 'troubled, sorrowful' beside gáu-nōn 'to sorrow, lament': Skr. ghō-rá-s 'horrible'. O.H.G. weig-ar 'teme-

rarius' pr. Germ. *yazz-rá-, beside Goth. veihan 'to fight': Lith. vik-rù-s 'brisk, lively' instead of *vik-ra-s. Goth. jē-r O.H.G. jā-r n. 'year': Gr. ω-ρο-ς 'year' ω-ρα 'season' O.C.Sl. ja-ru ja-ra 'springtime', by the side of which we find Avest. yā-r' n. 'year', cp. Skr. yā-ti 'he goes, travels'. O.H.G. fed-ara O.Icel. fjoā-r f. 'feather' pr. Germ. *feb-rō-: cp. Gr. πτ-ε-ρό-ν etc., see p. 182 above. Goth. skei-r-s A.S. skī-r 'pure, clear' (: Russ. ščiryj 'pure', see I § 414 Rem. p. 303 f.). Goth. fag-r-s 'suitable' O.H.G. fag-ar 'fair' pr. Germ. *faz-rá-, \sqrt{pak} -: cp. Umbr. pacrer pl. 'propitii' § 98. O.H.G. hē-r 'grand, exalted, sublime' pr. Germ. *yai-ra-, no doubt to be compared with Goth. hái-l-s 'healthy'. O.H.G. sē-r 'painful, sore' O.Icel. sa-r-r 'sore, bad', Goth. sái-r O.H.G. sē-r n. 'pain' pr. Germ. *sai-ra-. O.H.G. zang-ar 'biting, sharp' pr. Germ. *tang-rá-, cp. O.H.G. zanga 'tongs' Skr. dáś-ana-m 'a biting, bite'. O.H.G. ba-r m 'dwelling' O.Icel. bū-r n. 'room, storehouse', beside O H.G. bū-an 'build upon'. O.H.G. scob-ar m. 'stack, piled up heap of corn', √ skeup- skeub- 'shove, push': Lith. skub-rù-s 'hasty'. Goth. skū-ra f. 'shower, storm' O.H.G. scū-r m. 'shower', O.H.G. zunt-ra zunt-ara f. O.lcel. tund-r n. 'tinder' beside O.H.G. zant-ro zant-aro m. 'glowing coal' O.Icel. tand-re m. 'fire' (pr. Germ. *tand-r-en-). Goth. lig-r-s m. O.H.G. leg-ar n. 'couch'. O.H G. zimbar n. 'timber, dwelling' A.S. timbar n. 'building', West Germ. *timbra- for *tim-ra-, Goth. tim-r-jan 'to do carpenter's work', \sqrt{dem} . O.H.G. eit-ar n. O.lcel. eit-r n. 'poison', beside Gr. old-og old-ua swelling.

-pro- pr. Germ. -ura- occurs perhaps in O.H.G. ebur A.S. eofor O.Icel. joforr (pl. jofrar) 'boar': cp. Lat. ap-er gen. ap-rī, O.C.Sl. vep-rī (stem vep-r-je-) 'boar'. -e-ro- is even more difficult to identify in Germanic.

-ro- is secondary in O.H.G. dinstar Mid.Dutch deemster 'dark': Skr. tamis-ra- etc., see above, p. 181 f.

Balto-Slavonic. Lith. asz-t-rù-s asz-ru-s, instead of *-ra-s, O.C.Sl. os-t-rũ 'sharp' (for the -t- see I § 544 p. 398 f., § 545 p. 400): Gr. αx - ρo - ρc etc., see p. 183 f. above. Lith. $p \dot{u}$ -rai pl. 'wheat' O.C.Sl. p y-ro n. 'spelt': Gr. $n \bar{v}$ - $\rho \dot{o}$ - ρc 'wheat'. Lith. denomin. szvit-r-inčti

'to glimmer' szvyt-r-å'tı 'to glenn'. Skr śvit-rá-s 'white'. Lith. kup-rà 'knob, boss'. O.H.G. hov-ar A.S. hof-er m. 'knob'. O.C.Sl. ved-rŭ 'clear, bright' ved-ro n. 'fair wather': O.H.G. wet-ar n. 'weather', common ground-form *uedh-ro-. O.C.Sl. dob-rŭ 'good': O.H.G. taph-ar Mid.H.G. tapf-er 'heavy, weighty, fast'. O.C.Sl. da-rŭ 'gift': Armen. tu-r Gr δŵ-ρο-r 'gift'.

Lith bud-rù-s instead of *-ra-s O.C.Sl. bùd-rù 'watchful'.

-ra-s is seldom kept in adjectives in Lithuanian (e. g. tìk-ra-s 'suitable'); they generally passed over into the u-declension; cp. § 107. In O.C.Sl we have only a few adjectives, cp. besides those quoted above, pistrù 'gay' for *pis-rù (like os-t-rù) from $\sqrt{pe_kk}$.

Lith. stumb-ra-s 'aurochs'. stamb-ra-s and stemb-r-ŷ-s 'stalk'. gaïs-ra-s gaɪs-rà 'distant gleam on the horizon', beside gɪs-tu 'exstinguor' (cp. Leskien, Der Ablaut der Wurzelsilben im Lit. 65). O.C.Sl. pi-ri 'convivium'. ra-rū 'sonitus'. mē-ra 'measure'. reb-ro 'rib' (beside O.H G rippi n 'rib', pr Germ. *rib-2a-).

-ro- in secondary use: Lith tims-ra-s 'light bay coloured' (of a horse). Skr tamis-ra- etc., see p 181 f. above. Lith. vidurỹ-s 'middle', no doubt = vidu-r-ja- a derivative of vidù-s 'the inside', similarly duburỹ-s 'depth' from dubù-s 'deep and hollow'. It seems to me doubtful whether we should compare with these the -ro- of Lith. nas-raī pl. 'throat' ().C Sl. noz-dri pl. 'nostrils' (beside Low Germ. nuster 'nostril' and Idg. *nas- 'nose'), and of O.C.Sl. mez-dra 'fine skin on a recent wound, the fleshy part of anything' (beside meso 'flesh'), cp. I § 585 p. 439.

§ 75. The Suffixes -ero- -erā- and -tero- -terā-, forming Comparatives.

These are closely parallel to the superlative -mo--nimo-(§ 72, 2 p. 166 ff.) and -timo- (§ 73 p. 177 ff.).

-(t)ero- shows a close etymological relation to the adverbs in -(t)er and (loc.) -(t)er-ι, e. g. *upero- beside Gr. ὑπὲρ Skr. upári, *en-tero- beside Lat. in-ter Skr. antári-kṣa-. On the other hand -(t)ero- is often connected with -ro- (see § 74). Per Persson's suggestions for its etymology (Studia Etymologica, Upsala 1886,

p. 94 ff.) are more extensive, but for the most part exceedingly hold.

Beside -(t)ero- is found -(t)oro-, e. g. Avest. ka-tara- Goth. hva-par O.C.Sl. ko-tory-j̄̄̄, -(t)ro-, e. g. Skr. an-trā-m Gr. ἀλλό-τρ-ιο-ς Lat. in-trō O.C.Sl. je-tro, and -(t)gro-, e. g. Gr. νε(f)-αρό-ς A.S. eafora 1) The original distribution of these different grades of ablaut can no longer be traced; the difference of accent however should be noticed, e. g. Skr. án-tara- an-trá-an-tári-kṣ̄̄a-.

-tero- shows the greatest fertility in Aryan and Greek, where it was a regular comparative suffix for adjectives.

Indo-Germanic. *upero-, beside Skr. upári 'above' Gr. ύπερ, ύπειρ (1. e. *ύπερι, see I § 645, 2 p. 489) Lat. s-uper O.H.G. ubir 'over' (compare further Skr. úpa 'towards' Gr. űπο 'under' etc.): Skr. úpara- 'nearer, behind, under' Avest. upara- 'upper', Gr. űπερο-ς űπερο-ν 'pestle' ὑπέρα 'upper rope', Lat. s-uperu-s s-uprā s-uprē-mu-s, A.S. ufer-ra 'upper' (-ra = Goth. -iza); cp. superl. Skr. upamá-s Lat. s-ummu-s. *ydhero- 'lower' beside Avest. aðairi 'under' and Skr. adhás 'below': Skr. ádhara- 'lower', Goth. undarō adv. 'underneath' O.H.G. undaro undero 'lower'; cp. superl. Skr. adhamá-s.

*en-tero- 'inner', subst. n. 'intestines', beside Lat. in-ter Skr. antári-kṣ̄a- 'that which lies in between heaven and earth, sky': Skr. ántara-s 'inner, dearer, more intimate' antrá-m āntrá-m 'intestine', Armen. ender-k pl. 'intestines' (possibly borrowed from the Greek), Gr. έντεφο-ν 'intestine', Lat. inter-ior intra intrō, O.Ir. eter etir 'between', O.C.Sl. je-tro n. 'liver', cp. superl. Skr. ántama-s Lat. intimu-s. *ni-tero- 'lower': Skr. nitarám 'downwards, down', O.H.G nidaro adj. 'lower'; cp. superl. Avest. nitema- A.S. neođem-est. Avest fra-tara- Gr. πρό-τεφο-ς 'former,

^{1) -}tr (op. -ter beside -tero-) seems to occur in Skr. sani-túr 'beside, except, without' Gr. α-τάρ 'sed' O.H.G. sun-tar 'by itself, especially, but, however' beside Skr. sanu-tár 'away, aside' Gr. α-τερ 'without' (is the irregular spiritus lenis in ατάρ and ἄτερ due to the influence of αὐτάρ and ἄτεν?) A.S. sun-dir 'except, without'; op also Goth. sun-drō 'separated, alone'. The root-syllable of the Greek and Germanic words is *sp.. Cp-Bugge, Bezzenberger's Beitr. III 120 f.

earlier', beside Osc. pruter-pan 'πρότερον η, priusquam'; compare further Avest. fra Gr. πρό 'before'; cp. superl. Avest. fra-tema-.

*qo-tero- from the stem *qo- 'who?': Skr. ka-tará- Avest. ka-tara-¹) Gr. πό-τερο-ς 'which of two?' Umbr. podruh-pei 'utroque', Goth. hva-par 'which of two?' Lith. ka-trà-s 'which of two?' which? who?' O.C.Sl. ko-teri-ji ko-tori-ji 'who?'; cp. superl. Skr. ka-tamá-s, Lat. quo-tumu-s.

It can hardly be an accidental coincidence that several Indo-Germanic languages have a word for 'left' which shows the suffix -tero- added to a stem formed with the comparative suffix -2es -18- (§ 135), and contains the idea of 'goodness' (cp. Gr. εὐωννμο-ς 'left'). Avest. vairyas-tāra-, beside vara- 'desirable, excellent' compar. Skr. várīyas-. Gr. ἀρισ-τερό-ς, beside ἄρισ-το-ς 'best' ageion 'better' (not connected with Ar. vara-). O.H.G. winis-tar, beside wini 'beloved' wunsc 'wish, desire'; cp. also, from the same root, Skr. váma-s 'left', identical with vāmá-s 'worthy, dear, good', from a ground-form *un-mo-s, vuen-. Lat. sinis-ter, which should surely be compared with Skr. sán-īyas-'gaining more' ven- 'to reach a goal (which is striven after or longed for), to succeed' (see Kuhn's Zeitschr. XXIV 271 f.). and not with senior sensu-m (when the intermediate stage of meaning would be 'weak, incapable'); for the i of the first syllable cp. simili-s. One at least therefore of these formations must date from proethnic Indo-Germanic, and at the time of the separation of the peoples must have still retained its original meaning as well as the secondary one of 'left', and so become the model for the rest. Cp. the Author, Rhein. Mus. XLIII p. 399 ff.

Aryan. Skr. ádh-ara- Avest. ad-ara- lower', see p. 189 above. Skr. áp-ara- 'more distant, later, smaller, other', ap-ará-m adv. 'later' Avest. ap-ara- 'the other' O.Pers. ap-ara-m adv. 'afterwards', beside Skr. ápa 'from, away': A.S. af-era eafora O.Sax. abaro m. 'successor, offspring' (Goth. afar 'after' O.H.G. abur avar 'again, anew; on the other hand, however');

¹⁾ The quantity of the \ddot{a} in the syllable ka-, if the law given in I § 78 p. 69 is correct, might be explained by reference to a by-form *katra- in proethnic Aryan (op. the Ital. and Lith. forms).

with which compare O.Pers. apa-tara-m 'further' and Goth. af-tarō adv. 'backwards' aftra adv. 'back, anew, further' O.H.G. aftaro m. 'hinder part' A.S. æftra adj. 'hinder'. Skr. áv-ara-s 'lower' Avest. aora adv. 'down, off' (cp. Avest. naotara- = Skr. navatara- compar. from Skr. náva- 'new'), cp. Skr. áva 'off, downwards'.

Skr. án-tara- Avest. an-tara- 'inner' Skr. an-trá-m ān-trá-m intestine': Gr. ev-tepo-v etc., see p. 189 above. Skr. út-tarahigher, upper' from úd 'up, out': Gr. vorepo-g 'later' vorpo-g 'belly': beside this we have Skr. ud-ará- ūd-ara- 'belly. swelling' Gr. $\delta\delta\epsilon\rho o$ - ς 'belly' Hesych. (probably Cyprian, with o=vas in $\mu o \gamma o i = \mu v \gamma o i$ and other words), O.H.G. $\bar{u} \gamma \gamma \sigma$ outer'. -tara-m is especially frequent in Aryan as an adverbial termination. Skr. vi-tará-m Avest. vī-tare-m 'further' (in Avestic also an adj.) beside Skr. ví 'away, apart': Goth. vi-pra adv. 'against, with-' (in composition); compare also Lat. vi-tr-icu-s 'stepfather', the termination being like that of O.H.G. ent(i)rig 'strange' = *antrizá-s from ander 'other'. Skr. parā-tará-m paras-tará-m 'further away' from párā parás 'away, forth'. Instead of this later Sanskrit has generally -tará-m, as uccāis-tarám 'higher' from uccāiš 'high', sanāis-tarām 'more softly, more gradually', from sanais 'softly, gradually'.

Skr. ka-tará- Avest. ka-tāra- 'which of two?': Gr. nó-τερο-ς etc., see p. 190 above. Skr. ya-tará- Avest. ya-tāra- 'which (of two)' (rel.), beside Skr. yá-s 'qui'. Avest. a-tāra- from the stem a- 'that'.

-tara- was also the regular comparative ending of adjectives in Aryan where -tama- formed the superlative. The same rules of formation hold as for -tama-, see § 73 p. 178. Skr. amá-tara-s 'more raw' from āmá-s: Gr. ἀμό-τερο-ς 'more raw, more rude'; Skr. yajñiya-tara- 'more deserving of reverence'; Avest. aka-tara- 'worse' from aka-, srīrō-tara- 'nobler' from srīra-. Skr. śrēṣṭha-tara- 'more excellent' from superl. śrēṣṭha-, garīyas-tara- 'heavier, weightier' beside compar. gárīyas-, Avest. vairyas-tara- 'left' see p. 190 above; cp. also Avest. fratarō-tara- from fratara- 'more prominent'. Skr. duḥkha-tara- 'more painful, more unpleasant'.

and as subst. n. 'greater pain', from duḥkhá-m 'pain'. Avest. usas-tara- 'easterly' from ušah- 'red of the morning', daoša-tara-westerly' from daoša- 'evening'.

Armenian. nor, gen. noroy, 'new': cp. Gr. νεαφό-ς 'young, youthful' ground-form *neu-rró-s, see p. 189 above; it is doubtful whether *neu-rro- was also the ground-form of the Armenian word. Gen. mer 'our' jer 'your' (nom. me-k' 'we' du-k' 'ye'): cp. O.Ir. possess. ar n- 'our' far n- 'your', Goth. unsar 'our' izvar 'your'; and further Gr. ἡμέ-τεφο-ς ἡμέ-τεφο-ς, Lat. nos-ter ves-ter.

ender-k pl. 'intestines' cannot be quoted without suspicion, as it may perhaps have been borrowed from the Greek (ἐν-τερα), cp. p 189.

Greek. $\dot{v}\pi$ -ερο-ς 'pestle' · Skr. $\dot{u}para$ - etc., see p. 189 above. $\dot{o}\dot{v}$ -ερο-ς 'belly': Skr. $udar\dot{a}$ - etc., see p. 191 above. $\ddot{\epsilon}\nu$ -εροι 'inferi' (properly those within, those dwelling within the earth) from $\dot{\epsilon}\nu$ 'in', cp. also $\dot{\epsilon}\nu\dot{\epsilon}\rho$ -τερο-ς $\nu\dot{\epsilon}\rho$ -τερο-ς 'deeper' beside $\ddot{\epsilon}\nu$ -ερ-τε 'apud inferos' and $\ddot{\epsilon}\nu$ -τερο-ν 'intestine'. ν -εαρό-ς 'young, youthful' · cp. Armen. nor (see above) and Lat. noverca meaning * $\dot{\eta}$ ν -εαρική.

έν-τερο-ν 'intestine', see p. 189 above. νστερο-ς 'later'. νστρο-ς 'belly': Skr. úttara-, see p. 191 above. πρό-τερο-ς 'earlier': Avest. fra-tara-, see p. 190 above. Greek has many new formations modelled upon old comparatives derived, like these, from adverbs. ύπέρ-τερο-ς 'higher' from ύπέρ. κατώ-τερο-ς 'lower' from κάτω. ύψί-τερο-ς 'higher' from ύψι. παροί-τερο-ς 'more prominent' beside πάροι-θε 'before'. μυχοί-τερο-ς 'further back in the corner' (only μυχοί-τατο-ς is actually found) from μυχοῖ in the corner, inside'. παλαί-τεφο-ς 'older' from πάλαι παλαί-τεφο-ς was referred to παλαιό-ς and hence arose the forms γεραί-τερο-ς 'older' from γεραιό-ς, σχολαί-τερο-ς 'more idle' from σχολαΐο-ς, and when -arteo-g further came to be regarded as an independent suffix, it produced the forms ήσυχ-αίτερο-ς 'quieter' from ήσυχο-ς, iδι-αίτερο-ς 'more especially one's own' from iδιο-ς, and many more. With the adverbial termination -τέρω: ἀνω-τέρω from ανω 'up', προσω-τέρω from πρόσω 'forwards', εγγυ-τέρω from εγγύς 'near', and many more.

πό-τερο-ς 'which of two?': Skr. ka-tará-s etc., see p. 191 above. Dor. Boeot. etc. ἄτερο-ς 'one of two, the other' ground-form *sm-tero- from *sem- Gr. εἶς 'unus' (cp. ἄ-παξ etc.); the Attic form ἔτερο-ς no doubt arose through an assimilation to the vowel of έν-, just as έ-κατόν 'a hundred' replaced *ά-κατον for the same reason.') ἑκά-τερο-ς 'each of two' beside ἑκάς, cp. Wackernagel in Kuhn's Ztschr. XXIX 150 f.

ήμέ-τερο-ς 'our' τμέ-τερο-ς 'your': cp. Lat. nos-ter ves-ter.

The form -tro- occurs in ἀλλό-τρ-ιο-ς 'belonging to another, strange'; tis extension by the suffix -ιο- is no doubt due to the form of its antithesis ἴδιο-ς.

Comparatives with ω like σοφώ-τερο-ς wiser', from σοφό-ς, were formed from adverbs in -ω (cp. the Germanic comparatives in -ōz-en- formed from the instr. sing. in -ō § 81, and the Slavonic comparatives in -ē-ȳ which came from the instr. sing. in -ē § 135), and their use became gradually restricted to words in which the ω followed a short syllable. A few remaining examples of the freer use occur in literature, as οἰζυρώτερος (Hom.), δυσποτμώτερος (Eur.) and several others. The -o- of κενότερος στενότερος in later Attic is a reminiscence of the early Attic forms *κενδό-ς *στενδό-ς, see p. 135 footnote.

A different explanation of ἄτερο-ς ἔτερο-ς 15 given by Per Persson, Studia etymol. p. 102; but his arguments do not convince me.

-ωτερο-ς was sometimes grafted upon other classes of stems, e. g. ἐπιχαριτ-ώτερο-ς 'more charming' from ἐπίχαρις.

The termination -εστεφο-ς (ἀληθέσ-τεφο-ς) was very largely extended in use as an independent suffix, e. g. εὐδαιμον-έστεφο-ς 'happier' from εὐδαίμων, ἀκρῶτ-έστεφο-ς 'more unmixed' from ἄκρῶτο-ς, ἐφφωμεν-έστεφο-ς 'stronger' from ἐφφωμένο-ς.

Comparative suffixes were often combined. Parallel to $\dot{a}\varrho$ - $i\sigma$ - τ - $i\varrho$ o-c (see p. 190) arose $\lambda a\lambda$ - $i\sigma\tau$ - $i\varrho$ o-c 'more talkative' from $\lambda \dot{a}\lambda o$ -c, $\lambda \dot{a}$ - $i\sigma\tau$ -i

Comparatives are frequently formed from substantives. νύν--τεφο-ς from κύων 'dog'. βασιλεύ-τεφο-ς 'more royal' from βασιλεύ-ς 'king'. δημό-τεφο-ς 'belonging to the people' from δῆμο-ς 'people', δφέσ-τεφο-ς 'of the mountains' from ὄφος 'mountain' and the like, where the comparative suffix, just as in ἡμέ-τεφο-ς Avest. ušas-tara O.H.G. ni-daro, only served to contrast the words with their opposites (cp. § 139).

Italic. Lat. s-uperu-s s-uprā s-uprē-mu-s Umbr. subra 'supra' Osc supruis 'superis', beside Lat. s-uper, with the byform s-up-ter (written subter), like O.H.G. aftar beside Goth. afar (for the s- of s-ub s-uper see I § 568 p. 425): Skr. úpara-s etc., see p. 189 above. For Lat inferu-s infrā, which are usually connected with Skr. ádhara- Goth. undarō, see § 72 p. 167, under Aryan.

Lat. in-ter-ior in-trā in-trō, Osc. entraí dat. fem. 'intestinae, εμφυλίω': Skr. ún-tara- etc., see p. 189 above. Lat. i-teru-m, the stem of which is contained in Lat. mātertera (quasi mater altera') for *mātēr-iterā, Umbr. etram-a 'ad alteram': Skr. i-tara-s 'other', perhaps also Goth. idr-eiga 'repentance' O.Icel. iāra-sk 'repent'. Lat. ex-ter ex-trā Osc. eh-trad 'extra', beside Lat. ex:

O.Ir. echtr-ann 'foreign, stranger'. Lat. ci-ter ci-trā ci-trō: Goth. hi-drē 'hither'. Lat. pos-teru-s postrī-diē postrē-mu-s Umbr. postra acc. fem. 'posteriores' Osc. pústiris 'posterius', from Ital. pos pos-t; it is perhaps better to analyse the word post-eru-s. Lat. con-trā contrō-versia Osc. contrud 'contra', beside Lat. cum Osc. con. Umbr. hon-dra 'infra' Osc. hu[n]-truis 'inferis', ep. Lat. humu-s, and Umbr. superl. hon-domu § 73 p. 179. Umbr. pretra acc. fem. 'priores', beside Lat. prae-ter.

Lat. u-ter u-tra (I § 431 Rem. 3 p. 321) Umbr. podruh-pei 'utroque' Osc. pútúrús-píd 'utrique' (for *potro-, see I § 271 p. 218, § 627 p. 471): Skr. ka-turá-s etc., see p. 190 above. Lat. al-ter altera altrīn-secus Osc. alltram 'alteram', beside Lat. al-iu-s (cp. § 63, 3 p. 132).

Lat. nos-ter nostra, ves-ter vestra, Umbr. vestra abl. 'vestra', Osc. nistrus 'nostros' (according to Bugge; 'propiores' according to Bücheler)· cp. Gr. ἡμέ-τερο-ς ὑμέ-τερο-ς.

Lat. dex-ter dextera and dextra, Umbr. destram-e 'in dextram': cp. O.Ir. Dechter a woman's name (Zimmer, Kuhn's Ztschr. XXX 214) and Gr. δεξι-τερό-ς 'dexter' (formed like ὁηΐ-τερο-ς). Umbr. nertru abl. 'sinistro': Gr. νέρ-τερο-ς ἐνέρ-τερο-ς 'deeper' beside ενερ-θε (cp. p. 192); as to the meaning 'left', see Bucheler Umbrica p. 76 f.

Here perhaps should also be classed palūs-ter, from palūd-, Nemes-tr-īnu-s, from nemus, Volsc. Veles-trom 'Veliternorum', beside Gr. ελος 'low ground'; so also Lat. campester terrester silvester and the like, which are to be compared with the Gr. ενδαιμον-έστερος (p. 194).

Combinations of comparative suffixes. -is-tero-: Lat. sin-is-ter-tra see p. 190, Lat. magister magistrī Umbr. mestru fem. 'maior', beside Lat. magis Osc. mais 'magis'; Lat. minister ministrī Osc. minstreis 'minoris', beside Lat. minus; cp. § 135. Lat. inter-ior dexter-ior and the like, Osc. pústir-is. Lat. suprē-mu-s extrē-mu-s and the like (cp. § 72 p. 168) and postrē-m-issimu-s (cp. § 73 p. 179).

Old Irish. ar n- far n- poss. 'our, your', orig. gen. pl.

like Lat. nostrum vestrum: cp. Armen. mer jer Goth. unsar izvar.1)

in-a-thar Corn. enederen 'intestines' O.Ir. eter etir 'between': cp. Skr. an-trá-m etc., see above p. 189. ōchtar uachtar n. 'that which is above, the upper part', beside ōs uas 'above'. echtrann 'a stranger' from ech-tar 'extra' (-tar for *-trā): Lat. exteroextrā. air-ther 'former, the east', from ar air 'ante'.

cech-tar 'each of two' from cech adj. 'each'. nech-tar 'one of two' from nech 'one'.

-ther is also found side by side with -iu (§ 135) in adjectival comparative forms, yet it is comparatively much rarer than in Aryan and Greek · luathi-ther from luath 'quick', libri-ther from lebor 'long' and so forth. It occurs also in comparatives formed from substantives: Mid.Ir. mētither 'larger' from mēti f. 'size'.

-is-tero-. sinser 'older, oldest', ground-form *sen-is-tero-, ep. sin-ıu 'older' Lat. sen-ıor. öser 'younger, youngest' ground-form *ia*u-ıs-tero-, ep. öa 'younger' Skr. yáv-īyas- yáv-ıṣ-tha-.

Germanic. Goth. uf-arō 'over' A.S. uf-er-ra 'upper': Skr. úp-ara- etc., see p. 189 above. Goth. und-arō 'underneath' O.H.G. unt-aro untero 'lower' (adj.): Skr. údh-ara- etc., see p. 189 above. A.S. af-era eafora O.Sax. abaro 'offspring': Skr. úp-ara- etc., see p. 190 above. O.H.G. ūz-ro ūzaro ūzero A.S. ūt-ra ūter-ra 'outer': Skr. ūd-ara- ud-ará- etc., see p. 191 above. O.H.G. sīd-ero A.S. sīdra 'later' (adj.), beside O.H.G. sīd 'late, later'.

Goth. uns-ar 'our' fem. unsara, izv-ar 'your' fem. izvara, O.H.G. unser uwer; unsro (nom. pl. fem.) unsrem (dat. pl.) and the like, show the West-Germanic syncope. cp. Armen. mer jer, O.Ir. ar n-, far n-.

Goth. vi-pra O.H.G. wi-dar 'against, with-' (in composition):

^{1) &}quot;ar n- and far n- no doubt stand for *(s)arom *(s)arom, since s disappears before a vowel which precedes the accent (op. i! = *senti). We find in Mid.Ir. sar, accented, in Ps. 2, but nar in Ps. 1. I suppose *sarom *syarom to have arisen in proclitic positions, from forms like the Goth. unsar in a, by loss of the initial sonant (uns- for ns-), just as Romance to came from illum, toro from illum.* Thurneysen.

Skr. vi-tará-m. O.H.G. ni-daro A.S. ni-der-ra 'lower' (adj.): Skr. ni-tarám. O.H.G. for-dro fordaro fordero A.S. furāra 'former' ground-form *pṛ-tero-, beside Goth. faúr faúra 'before'. O.H.G. hin-taro 'hinder' beside Goth. hin-dar 'behind', cp. A.S. superl. hin-dema. Goth. af-tarō 'from behind' aftra 'back' O.H.G. aftro aftaro aftero 'hinder part' beside Goth. afar. Several adverbial terminations derived from -tero- show considerable fertility, e. g. Goth. hi-drē 'hither' (Lat. ci-trō ci-trā) jáin-drē 'thither', jáin-prō 'thence', alja-prō 'from some other place' dala-prō 'from beneath'. With regard to several adverbs in -ar, like Goth. af-ar hin-dar, we cannot tell whether they are acc. sing. neut. (cp. Skr. pratarám Gr. πρόιερον Lat. iterum) or are parallel to forms like Gr. νπὲο Skr. upári.

Goth. hva-par O.H.G. hwedar wedar (wederemo wederan) 'which of two?': Skr. ka-tará-s etc., see p. 190 above. Goth. an-par O.H.G. andar (andremo andran with West Germanic syncope) 'other': Lith. añ-tra-s 'other'.

Combination of comparative suffixes. O.H.G. win-is-tar 'left', see p. 190 above. -(t)ero- + -ies- -is-: O.H.G. unt-arōro beside unt-aro, for-drōro beside for-dro and the like, A.S. ūt--er-ra beside ūt-ra, æfter-ra beside æft-ra, etc. O.H.G. superl. unt-arōsto from unt-aro, for-durōsto from for-dro fordaro, af-tristo from af-tro and the like.

Remark O Icel. aus-tr 'east' O.H.G. ōs-tra ōs-tara f 'Easter' ōstar 'eastwards' (ōstar . ōstana = hintar : hintana), A.S. eástra eásterra 'more easterly', also Goth. Ōstro-gotha· cp Lat. aus-ter austr-āli-s, and further Avest. ušus-lara- 'easterly'. Should we consider the Germanic and the Latin word as the extension of a noun-stem *aus-to- by -ero-, or as derivatives in -tero- from an adverb *aus, or as the regular phonetic representatives of a form *aus-(e)s-t(e)ro-? In Germanic the names for the other quarters of the heavens are exactly parallel to the word for east, so far as their inflexional part is concerned, op. e. g. O.Icel. westr norār suār, A.S. compar. westerra norāerra sūāerra. norār appears to be connected with Gr. végrego-6 Umbr. nertro-. In proper names we find also Ausi- Auri- beside Austro- Austar-, and Wese- Wisi- (Wese-gothae Wisi-gothae) beside Westar-.

Balto-Slavonic. -ero- cannot be identified with certainty. Perhaps in O.C.Sl. sev-eru Lith. sziau-r-y-s 'north wind'?

O.C.Sl. ję-tro 'liver' from Idg. *en 'in', and beside it q-tro-ba

f. 'intestines, belly' q-tr-i adv. 'inside' beside O.C.Sl. vũ for *on, cp. p. 189. O.C.Sl. ju-tro u-tro 'morning' loc. jutre utre 'to-morrow', from ju u Lith. jaũ 'iam' (whence also O.C.Sl. junữ Lith. jauna-s 'young', see § 66 p. 149).

Lith. ka-trà-s 'which of two, which, who?' O.C.Sl. ko-tery-ji ko-tory-ji 'who?': Skr. ka-tarā- etc., see p. 190 above. Lith. añ-tra-s 'other, second' fem. antrà: Goth. an-par; in O.C.Sl. vū-torū, which corresponds in meaning, the form of the root is unexplained. O.C.Sl je-terū 'any one', from the pronominal stem je-: Skr ya-tarū-, relat 'which of two'.

§ 76. The Suffix -lo- -la-, -llo- -lla-.1)

For the variation between -lo- and -lo- see I § 287 p 229. In the proethnic and later periods it is both primary and secondary, forming adjectives and substantives. In its primary use -lo- serves especially to form nouns of the agent and instrument, as a secondary sufficient used especially to form diminutives. In the latter use -lo- was exceedingly fertile in Latin, Germanic and Lithuanian.

In do-Germanic. Skr tn-rá-'mighty, strong' $t\bar{u}$ -la-m'panicle, tuft, reed, cotton' $t\bar{u}$ -la 'cotton plant', Gr. $\tau\dot{v}$ - λo -s $\tau\dot{v}$ - $\lambda \eta$ (also $\tau\dot{r}$ - $\lambda \eta$) 'swelling, lump', Lith. $t\dot{u}$ -la-s 'so many', i. e. 'a good number of' O.C.Sl. ty- $l\ddot{u}$ 'neck', \sqrt{teu} -'tumere'. Skr. $c\iota$ -rá-long', ci-rá-m 'delay, delaying', Goth. hvei-la 'while, time'. Armen. $da\iota$ -l 'beestings', Gr. $\vartheta \eta$ - $\lambda \dot{\eta}$ 'mother's breast', Lat. $f\bar{e}lare$, O.lr. de-l teat', O.H.G. $t\iota$ -la 'woman's breast', Lett. $d\acute{e}$ -l-s (stem $d\acute{e}$ -la-) 'son' Lith. pirm- $d\acute{e}$ -l-e 'one that has borne a child for the first time', $\sqrt{dh\bar{e}(i)}$ -'suck', cp. also Gr. $\vartheta \ddot{\eta}$ - λv -s 'suckling, female' Skr. dha- $r\acute{u}$ -s 'sucking' with -lu- (§ 107). Gr. Lac. $\bar{\epsilon}\lambda\lambda\dot{a}$ 'seat' for * $\bar{\epsilon}\dot{\delta}$ - $\lambda\ddot{a}$ (I § 364 p. 277), Lat. sella for *sed-la (I § 369

¹⁾ Besides the authorities given in the footnote on p. 180 cp Osthoff, Die Suffixform -sla-, voinemlich im German., Paul-Braune's Beitr. III 335 ff.; Vogel, Lateinische Deminutiva auf -ulus, Mitau 1876; Lissner, Über den Suffixcomplex -ti-li- im Lat., Eger 1874; von Paucker, Die [lat.] Deminutiva mit dem Suffix -c-ulus, a, um, Ztschr. f. dsterr. Gymn. 1876 p. 595 ff., and the same writer, Die [lat.] Deminutiva mit doppeltem l (-ellus, -illus, -ullus etc.), Kuhn's Ztschr XXIII 169 ff.

p. 280), Goth. sit-l-s 'seat', O.C.Sl. selo 'fundus' (Lower Sorb. sedlo 'seat' Upper Sorb. sydlo 'abode' Czech sed-l-ák 'peasant') for *sed-lo- (I § 548 p. 402). Idg. *ĝhes-lo- *ĝhes-l-ijo-: Skr sa-hásra-m 'thousand' sa-hasriya-s 'thousandfold', Gr. δεκά-χιλοι 'ten thousand' Lesb. χέλλιοι Dor. χήλιοι Att. χίλιοι 'thousand' from *χεσ-λο- (I § 565 p. 423); for the τ of δεκά-χιλοι and χίλιοι I can now refer to Thurneysen, Kuhn's Ztschr. XXX 353.

Gr. Hom. $\partial_{\mu}i_{\chi}-\lambda\eta$ Lith. mig-la myg-la (also myg-la with the suffix $-i\bar{a}$ -) O.C.Sl. $m\bar{i}g-la$ 'mist'. Skr. aj-ira- 'mobile, quick', compare Lat. ag-ili-s (transferred from the o- to the i- declension), which may represent either *ag-llo- or *ag-lo-.

In Italic, Germanic and Balto-Slavonic we frequently find -s-lo-, which was taken from forms where -s- was the so-called root-determinative, like Lat. āla for *axlā (cp. axilla) O.Sax ahsla O.H.G. ahsala shoulder beside Skr. ākša-s O.H.G. ahsa Lat. axi-s Lith. aszì-s 'axle' for *a\hat{g} + s- from *a\hat{g}- 'drive, set in motion'; O.H.G. dehsala O.C.Sl. tesla 'axe' beside Avest. ta\hat{s}a, axe' Gr \tau\hat{c}\hat{s}-\nu' bow' O.H.G. dehsa' hatchet, trowel' from *te\hat{k}-+s-.

In the same way were formed e. g. Lat. $v \in lu-m$ 'sail' (cp. $v \in lu-m$) O.C.Sl. $v \in lu-m$ ' from * $u \in lu-m$ ' (means of moving'), $v \in lu-m$ ' vehere'

-lo- as a secondary suffix. Skr. nābhīla-m 'pudenda, navel', Gr. ὁμφαλό-ς 'navel, boss of a shield', Lat. umbil-īcu-s, O.Ir. imbl-iu 'navel', O.H.G. nabolo O Icel. nafle m. 'navel', beside Skr. nābhī-š 'nave, navel', Lat. umbō 'boss of a shield', O.H.G. naba 'nave', Pruss. nabi-s 'nave, navel' Lett. nabba 'navel'. Skr. túm-ra-'swelling, fat, strong', Lat. tumulu-s, O.Icel. pumall m. 'thumb', beside Skr. tū-tu-má- Avest. tū-ma- 'strong, powerful' etc., see § 72 p. 171. Skr. bahu-lá- 'thick' Gr. παχν-λό-ς 'rather thick', beside Skr. bahú-š Gr. παχύ-ς 'thick'. Skr. anku-rá-s 'a swelling, tumour', Gr. ὀγκύ-λο-ς 'swollen, proud' (whence ὀγκύλλομαι) ἀγκύ-λο-ς 'crooked' (older accentuation *ὀγκυλό-ς *ἀγκυλό-ς, see 1 § 676, 4 p. 542 f.); we should perhaps also compare O.H.G. angul O.Icel. ǫngull m. 'fishhook, angle', pr. Germ. *angulá-, cp. Skr. anku-śá-s 'hook'. The diminutival sense is clearly marked e. g. in Lat. porculu-s porcul-ia O.H.G. farhel-1 n. Lith.

parszēl-i-s 'little pig, sucking pig' compared with porcu-s farah parsza-s 'pig', Lat. rotula Lith. ratēl-i-s 'little wheel' beside rota rāta-s 'wheel' (the diminutival sense of the l-derivative in Lithuanian is certainly older than the addition of the further suffix -io-, although the latter is also a diminutive suffix, see § 63, 2). Here belong also pet-names like Skr. bhānu-la-Gr. Θρασύ-λο-ς O Ir. Tuath-al Goth. Vulfi-la Pruss. Butil, for which see below.

The termination -e-lo- is exceedingly common and certainly dates from the proethnic period of Indo-Germanic, but in many cases we cannot tell whether the stem to which it is added is verbal or nominal.

Aryan. Skr. sthū-rá- sthū-lá- 'massive, strong, rough, stupid': Gr. στῦ-λο-ς 'pillar'. Skr has-rá- 'laughing', with which Windisch would compare Gr. χεῖλο-ς n. 'lip' for *χεσ-λ-ος. Avest. tiγ-ra- 'point': Goth. stik-l-s, see below. Avest. stax-ra- 'strong, firm': O.H.G. stah-al, see below. Skr. sa-hásra-m Avest. ha-zanere-m 'thousand': Gr. Lesb. χέλλ-ιοι, see p. 199 above. Skr. gō-la-s 'ball', gō-la-m gō-lā 'spherical water-vessel': Gr. γαν-λό-ς 'pail, vessel' γαῦ-λο-ς 'trading ship' (O.H.G. chiol and O.Icel. kjöll 'ship' can hardly be compared with this group of words; their vocalism seems to shew that they come from a different root). Avest. zaf-ra- n. (beside zafar') 'mouth, throat': O.Sax. kaf-l A.S. ceaf-l m. 'jaw' (of animals).

-llo. Skr. ajirá-s; see above. suṣ-irá-s śuṣ-irá-s (see I § 557, 4 p. 413) 'hollow, a reed', n. 'hole, wind instrument': Gr. αὐλ-ός 'reed, pipe, flute' for *σανσ-λο-ς. Skr. άνοgira-, name of divine beings who were regarded as mediators between men and gods: Gr. ἄγγελο-ς 'messenger': the g of the Skr. form implies that the original form was not *άνοgo-lo- (cp. Skr. áνι-la-s 'wind' Gr. ἄνε-μο-ς for *ανο-, beside Skr. áνι-mi), but *áναg-lo-, see I § 445 p. 331, § 450 p. 333 f. We should no doubt add tum-ura- tum-ula- 'loud, noisy' beside tum-ala-, with the same meaning (cp. trpá-la beside trp-rá- 'restless, anxious'): Lat. tumul-tu-s: the word is usually connected, and perhaps rightly, with Skr. túm-ra- 'swelling puffed up' (see p. 198 above.)

-lo- in secondary use. Skr. nabhīla-m, túm-ra- (ultimately also tum-ura-), bahu-lá-, anku-rá-s; see above. Further, with diminutive sense, vṛṣa-lá-s 'mannikin, small man' (vṛṣan- 'man'), śiśū-la-s 'little child' (śiśu-ṣ 'child'), śalaka-lá 'small splinter' (śalāka 'splinter'). Add pet names like bhānu-la- cp. bhānu-datta-, pitṛ-la- cp. pitṛ-datta-, dēvila- cp. dēva-datta-.

Remark 1. We may add here a number of forms from Aryan, in which it is doubtful whether the suffix is Idg. -ro- or -lo-, cp. § 74 p. 182.

Skr. dū-rá- Avest. O.Pers dū-ra- 'distant'. Skr. krū-rá- 'bloody, wounded, cruel, gruesome', Avest. xrū-ra- 'wounding, horrible'. Skr. šrī-lá- 'beautiful' a-šrīrá- a-štīla- 'not beautiful, ugly' Avest. srī-ra- 'beautiful', cp. compar. Skr. šrē-yas- Skr. ug-rá- Avest. uy-ra- 'strong, mighty'. Skr. ág-ra-m Avest. ay-re-m 'beginning' Skr. kšip-rá- 'quick', miš-rá- 'mixed' ā-mišla- 'intermingling', vak-rá-s 'crooked', pā-lá-s 'protector, herdsman', rándh-ra-m 'opening' Avest hix-re-m 'fluid, impurity'.

-pro--llo- Skr. dhvas-ré- (beside dhvas-ré-) 'scattering', mad-iré'gladdening', sar-iré- sal-ilé- 'flowing, undulating', n 'wave, flood', tpd-ilé'perforated, porous'. In Iranian the regular phonetic development reduced
-pro--llo- and -e-ro- -e-lo- to one form -ara-, and they are thus indistinguishable

-ro--lo- in secondaryuse; Skr ásu-ra- Avest ahu-ra- O.Pers au-ra(In aura-mazdāh-) meaning perhaps 'lord', epithet of divinities, compared
with Skr ásu- 'vital spirit'; for the etymology of the word see von Bradke,
Ztschr. der deutsch morg. Ges. XL. 347 ff. Skr. pāsu-rá- 'dusty' (pāsú-s'
'dust'). madhu-ru- madhu-lá- 'sweet' (mádhu 'sweetness, honey'). muška-rá'having testicles' (mušká-s 'testicle'). phēna-lá- 'foamy' (phēna-s 'foam').
In the following words the primary stem has no final -a-: dhūm-rá- 'gray'
(dhūmá-s 'smoke'), rath-irá- 'travelling in a chariot' (rátha-s 'chariot'), phēn-ila- beside phēna-lá- 'foamy'.

The addition of -ra--la- to stems in -ran- is particularly common. The combination -vara- -vala- (cp. p. 182 for Skr. $p\bar{v}vara$ - Gr. $n\iota\epsilon\varrho\acute{o}$ - ς = Idg. * $p\bar{\iota}$ - $u\epsilon$ - $r\acute{o}$ - $s\acute{o}$ - was taken into common use as an independent suffix. Skr. adhvará-s 'festal gathering' (ádhvan- 'way') \imath t-vará- 'going' (\imath tvan- 'going'), and further $v\imath$ - $v\imath$ - $s\acute{o}$

Compare with this -vara- -vala- Skr. admará- 'ravenous' from åd-man- n. 'food', sidhmalá- 'leprous' from sid-man- sid-má- 'leprosy'; further, O.H.G. O.Sax. himil beside Goth himin-s 'heaven', A.S. äymel 'thumb-stall, finger-guard' beside äüma m. (acc. äüman) 'thumb'.

Armenian dai-l da-l 'beestings': Gr. 3η - $\lambda\eta'$ etc., see above p. 198.

Here too no doubt belong infinitives in -l, as ta-l 'to give' (indic. ta-m), bere-l 'to carry' (bere-m), merani-l 'to die' (merani-m).

Greek. στῦ-λο-ς 'pillar': Skr. sthū-rá- sthū-lá-, see above p. 200. πῖ-λο-ς 'felt'. Lat. pi-lu-s 'hair' and the derivative pīleu-s 'felt' (also written pilleus, see I § 612 p. 463 ¹) καν-λό-ς 'stalk': Lat. cau-lae pl. 'cavities' (cp. also Lat. cau-li-s 'stalk'), Lith. káu-la-s 'bone'. ζεύγ-λη 'yoke-ring, thong': cp Lat. jug-ulae pl. 'Orion's girdle of stars'. τυφ-λό-ς 'blind'. στρεβ-λό-ς 'twisted'. ἐκ-παγλο-ς 'awful, terrible' for *ἐκ-πλαγ-λο-ς, from ἐκ-πλαγ-ῆνω, see I § 266 p. 215. φῦ-λο-ν 'stem, race' φῦ-λή 'community' ἄεθ-λο-ς 'dθ-λο-ς 'contest' ἄεθ-λο-ν 'dθ-λο-ν 'prize'. στρέβ-λη 'roll, roller'.

By the side of the adjectives in pr. Gr. $-\eta$ - ϱ o- ς (§ 74 p. 184) there were others in $-\eta$ - λ o- ς , like Hom. $r\alpha r\alpha$ - $\varrho \bar{\iota} \gamma \eta \lambda \delta$ - ς 'making one shudder, terrible' $(r\alpha \tau \alpha$ - $\varrho \varrho \bar{\iota} \gamma \delta \omega$), $\mu \bar{\iota} \mu \eta \lambda \delta$ - ς 'imitative, imitated' $(\mu \bar{\iota} \mu \dot{\iota} \omega \mu \alpha)$, including such substantival nomina agentis as $r\dot{\alpha} \eta \lambda \omega$ - ς 'huckster', Lac $\delta \iota \dot{\iota} \kappa \eta \lambda \omega$ - ς (and the extended form $\delta \bar{\iota} \kappa \eta \lambda \omega \kappa \dot{\alpha}$ - ς 'actor'. Cp. Lat. cicindēla (below, Remark 2) and Lith. $tek\bar{c}$ -ta-s beside $tek\bar{c}$ - $t\bar{t}$ (see below)

πίαλο-ς 'fat', like πῖαρό-ς, from πῖαίνω (see § 74 Rem. p. 185), extended πῖαλέο-ς 'fat' (see § 64 p. 135); like the latter are formed λεμαλέο-ς 'damp', from λεμαίνω, ερῦμαλέο-ς 'frosty', from κοῦμαίνω, δειμαλέο-ς 'timid, terrible' from δειμαίνω, and many other similar words

-llo-. $\varkappa \varepsilon \varphi$ - $\alpha \lambda \dot{\eta}$ beside $\varkappa \dot{\varepsilon} \beta$ - $\lambda \eta$ 'head' Goth. gib-la m. 'spire' ().H.G. gebal m. 'skull, head', \sqrt{ghebh} -. $\pi \dot{\varepsilon} \tau$ - $\alpha \lambda o$ - ε 'outspread' $\pi \dot{\varepsilon} \tau$ - $\alpha \lambda o$ - ν 'leaf'. $\alpha \dot{\varepsilon} \theta$ - $\alpha \lambda o$ - ε 'soot'. $\varkappa o \dot{\varepsilon} \mu \beta$ - $\alpha \lambda o$ - ν 'rattle'.

-lo--flo- in secondary use. $\pi\alpha\chi\nu-\lambda\delta-\varsigma$, $\delta\gamma\kappa\dot{\nu}-\lambda\delta-\varsigma$, see p. 199. $\dot{\eta}\delta\dot{\nu}-\lambda\delta-\varsigma$ 'sweetish' ($\dot{\eta}\delta\dot{\nu}-\varsigma$ 'sweet'), $\delta\varrho\bar{\iota}\mu\dot{\nu}-\lambda\delta-\varsigma$ 'somewhat sharp' ($\delta\varrho\bar{\iota}\mu\dot{\nu}-\varsigma$ 'sharp'), both with shifted accent like $\dot{\delta}\gamma\gamma\dot{\nu}\dot{\lambda}\delta-\varsigma$ (see I § 676, 4, p. 542 f.). $\dot{\delta}\alpha\nu\lambda\dot{\delta}-\varsigma$ 'thickly overgrown' for * $\dot{\delta}\alpha\delta\nu-\lambda\delta-\varsigma$, from $\dot{\delta}\alpha\delta\dot{\nu}-\varsigma$ 'thickly grown', $\dot{\tau}\varrho\alpha\nu\lambda\dot{\delta}-\varsigma$ 'lisping, snarling, stuttering'

¹⁾ In the first sentence of this section of the English edition (p. 462) instead of 'nasal liquid explosive or sonant', read 'nasal liquid explosive or spirant' (Gerauschlaut).

for *toanv-lo-g beside Skr. tršú-š 'brisk, impetuous' (Wheeler, Der griech. Nominalaccent 63). όμ-αλό-ς 'smooth, even', from ομό-: Lat. simili-s, for older *sem-lo- or *sem-llo-. χθαμ-αλό-ς 'low', beside x90r- 'earth' for *x90u- (I § 204 p. 172, II § 160, 2): Lat. hum-ili-s. Words like $\pi \alpha \chi v - \lambda \phi - \zeta$, where $-\lambda \phi$ acts as a diminutive suffix, gave rise to a number of new formations, most of which however appear only in later Greek; as µuxx--ύλο-ς 'small', from μυχό-ς, ἀρχτ-ύλο-ς 'young bear', from ἄριτο-ς; and to extended formations with -yo- like radag-villo-c 'cleanly' (καθαρό-ς 'clean'), to which again a further diminutive suffix was added, e g. $d\nu \vartheta - v'\lambda \lambda - io - v'$ floweret' $(d\nu \vartheta oc)$, $\partial \pi - v'\lambda \lambda - io - v'$ small poem' (επος). Pet names with -λο- are common. 'Ονησί-λο-ς cp. 'Ονησι-γράτης, Τυξί-λο-ς cp. Τυξι-κλης; hence -ιλο-ς became an independent ending, e. g. Σω-ίλο-ς ep. Σω-νράτης. Further, we have names of this kind extended by -10- as Tipyi-llo-5, ep $T_{\epsilon\rho,\mu\nu}$ -λλης; then -ιλλο-ς also became an independent ending, as Δόρ-ιλλο-ς cp. Δορύ-λαος Θρασύ-λο-ς cp. Θρασύ-μαχο-ς, Βαθύ-λο-ς cp. Βαθύ-λαο-ς, hence such forms as 1/2-ύλο-ς Ηγ-ύλο-ς cp. Αγέ--στρατο-ς Πγέ-στρατο-ς; with the -10- extension we have e. g. $Ba'9v-\lambda\lambda_0-\zeta$ beside $Ba'9v'-\lambda_0-\zeta$, hence forms like $Ntx-v\lambda\lambda_0-\zeta$ cp. Ντχο-μήδης.

We may regard either as primary or as denominative formations adjectives in -α-λο-, such as στηλό-ς (Pind. στηάλό-ς) 'silent, quiet' beside στηάω 'I am silent' and στηή 'silence', ἀπατη-λό-ς 'deceitful' beside ἀπατάω 'I deceive' and ἀπάιη 'deceit', cp. -ā-νο- § 74 p. 184 f. The same is generally true of forms in -ε-λο- = Idg. -e-lo-, e. g. *τραπ-ε-λό-ς 'turning' in εν-τράπελο-ς 'turning easily': Lat. torculu-s for *torcu-lo- (I § 431 c p. 320 f.); στνφ-ε-λό-ς beside στνφ-λό-ς 'solid, compact, firm, hard', εἴκ-ε-λο-ς 'like, similar'; μν̄-ε-λό-ς 'marrow'; σκόπ-ε-λο-ς 'rock'; νεφ-έ-λη 'cloud' Lat. nebula, O.Ir. nēl 'cloud' for *neb-lo-, O.H.G. neb-ul m. 'cloud'; ἀγ-έ-λη 'herd' cp. O.Lat. agolo- n. 'pastorale baculum, quo pecudes aguntur' (Paul. Fest). The -λο- of -ε-λο-can be more certainly identified as a secondary suffix in π̄-με-λή 'fat' and θν-μέ-λη 'place of offering', to be compared with ή-μέ-ρā and similar words, but in no other examples.

Italic. Ital. *fē-lo- in Lat. fēl-are fīl-iu-s, Umbr. feliuf fīliu acc. 'lactantes' fel. (abbreviation) 'filius': Gr. 3η-λή 'mother's breast', Lett. dē-l-s 'son' etc., see above p. 198. Lat. sella for *sed-lā: Gr. ἐλλά etc., see above, p. 198 f. grallae 'stilts', compared with gradior. rallu-m (a?) 'ploughshare' beside rādula 'scraper' (is this for orig. *rād-ļlā, or a new formation of later date?) from rādō; also rallu-s (a?) 'close shorn'. caelu-m 'chisel' from caedō. pīlu-m 'pestle' for *pins-lo-m (I § 208 p. 175 f.). exem-p-lu-m (from eximō, 'something taken out', hence) 'specimen, type', tem-p-lu-m (cp (ἐr. τέμνω, 'something cut off', hence) 'holy precinet, temple', with -p- as a glide sound (I § 208 p. 175). assecla, from assequor.

-ulo- ula- are very frequent in Latin. In the forms assecula beside assecla, vinculu-m beside vinclu-m, torculu-s (torqueō), coculu-m (coquō), as in trāgula (trahō), -ulo- -ulā- were developed from -lo- -la- during the Latin period, see I § 269 p. 218, § 431 c p. 320 f., § 509 p. 373. Elsewhere it is doubtful, whether Idg. -lo- or -llo- or -e-lo- was the original suffix; e. g. m the nomina instrumenti, like capulu-s capulu-m ex--cipulu-m (cp. O.H G. hev-ilo 'yeast', the means of making something rise), cingulu-m cingula, tēgulu-m tēgula, copula, rēgula. Further, in substantival nomina agentis, as figulu-s 'potter' legulu-s 'gatherer', and adjectival nomina agentis, which usually imply a culpable tendency to some action, as bibulu-s, crēdulu-s, gemulu-s, tremulu-s, pendulu-s: cp. Goth. sakul-s 'quarrelsome' and the like; see below. In a few cases also it is conceivable that the suffix may represent Idg. -u-lo-. Where there has been a transference from the o- to the i- declension, -ili- appears, instead of -ulo-. Thus we have agili-s: Skr. ajırá-s, see above, p. 199. Similarly bibili-s, fragili-s, facili-s, docili-s. habili-s etc., and by an extension to the to- participle coctili-s. fissili-s, flexili-s, versatıli-s, volatıli-s etc.

-s-lo- is of common occurrence. ala, vēlu-m, see p. 199 above. alu-m 'wild garlic' for *an-s-lo-m, cp. O.C.Sl. ach-ati 'to give forth smell' for *on-s-atī, beside Skr. ani-ti. prēlu-m for *prem--s-lo-m, from premō. palu-s palu-m for *pac-slo- or *pac-slo-,

from pac-īsior, \sqrt{pak} - 'fasten': cp. Gr. $n\acute{a}\sigma\sigma\alpha\lambda\sigma$ -c 'peg, nail' as though from a present * $n\acute{a}\sigma\sigma\omega$, for * $n\alpha\kappa\iota\omega$ (cp. $n\acute{\eta}\sigma\sigma\omega$), and hence to be compared in point of formation with O.H.G. deckel from decken = O.Icel. pekya. scāla for *scantslā, from scandō. For the phonetic changes in these words see I § 208 p. 175 f., § 570 p. 428.

Remark 2. Osthoff (Paul-Braune's Beitr. III 346) would also derive from -s-lo--s-lā- the feminine substantives like fugēla sequēla querēla, and candēla nitēla, referring, -ēla in the former group to *-e-slā (op fuge-re), in the latter to *-ē-slā (op. candē-re), and he compares such Germ. forms as O.H G ruomi-sala f. hruomi-sal n. 'boasting' (see below). This is possible. Still there is nothing to prevent our deriving them from Idg -ē-lā-, and I rather prefer this explanation on account of cicindēla 'glow-worm'. This was the feminine of an adjective *cicindēlo-, which may be compared with Gr. $\mu \bar{\nu}_{\mu} \eta - \lambda \dot{o} - c$ Accordingly we should regard candēla and the other parallel forms as having been originally adjectival

-lo--flo- is secondary in simili-s, humili-s (with change of declension, see p. 203 above); similarly parili-s from pār, pestili-s from pesti-s, herbili-s from herba. nābilu-s from nābēs. angulus, Umbr. anglom-e 'in angulum' for *anc-lo-, compared with Lat. ancu-s; similarly O.Lat. ungulu-s compared with uncu-s; see I § 499 p. 366. Whether -lo- is also secondary in Lat. famul famulus Osc. famel 'servus' famelo f. 'familia' (compare Lat. familia Umb. famer-ias pl. 'familiae') may be left an open question; see Danielsson in Pauli's Altital. Stud. III 178.

This suffix was very fertile in forming diminutives. Lat. catulu-s Umb. katel 'catulus' katlu 'catulum'. Lat. porculu-s porcil-ia beside porcus: O.H.G. farhel-i n. Lith. parszēl-i-s 'sucking pig'. rotula beside rota: Lith. ratēl-i-s. Other substantives are: rēgulu-s, adulēscentulu-s, vīculu-s, scūtulu-m, glandula, nūtrīcula, animula, mēnsula; servolu-s, clavola; fīliolu-s, glōriola, līneo-la. Adjectives: loquāculu-s, valentulu-s, frīgidulu-s, barbātulu-s; helvolu-s; ēbriolu-s, aureolu-s. Umbr. fondlo- 'fonticulus' (fondlir-e 'in fonticulis') for *font-lo-, cp. adro- I § 499 p. 366. Osc. Núvlā- 'Nola' in Núvlanús pl. 'Nolani' corresponds to a Lat. form *novola (beside novo-s). We should notice also as examples of different phonetic changes; Lat. stella for *ster-lā (Gr. ἀστήρ 'star'), puella for *puer-lā, agellus for *ager-lo-s,

nigellu-s for *niger-lo-s, satullu-s for *satur-lo-s, paullu-s paulu-s for *paur-lo-s (Gr. $\pi a \tilde{v} \varrho o_{\mathcal{G}}$ 'small, little'), see I § 269 p. 216, § 633 p. 473 f.; further asellu-s for *asen-lo-s, fēmella for *fēmen-lā, bellu-s for *ben-lo-s (bene), gemellu-s for *gemen-lo-s, suillu-s for *suīn-lo-s, corōlla for *corōn-lā, see I § 208 p. 175; lastly lapillu-s for *lapid-lo-s, see I § 369 p. 280.

In Latin -lo- was often added to these diminutives as a further diminutive suffix, e. g. catellu-s from catulu-s, cistella from cistula, (catello-. orig *cat-lo- = *ager-lo- agello-: agro-), agellulu-s from agellu-s, puellu-la, paullu-lu-s, tenellulu-s, bellulu-s.

Another suffix in which the diminutive sense was doubly expressed, but which in the historical period of Latin was regarded merely as a single diminutive suffix, arose in proethnic Italic through the addition of -lo- to the suffix -ko- (§ 88) 1): Lat. die-cula, Osc. zi-colois 'diebus' zi-culud 'die' (see I § 73 p. 63 f., § 135 p. 123). Other examples from Latin are: mūs-culu-s 'little mouse, muscle' (cp. Skr. muš-ká- 'testicle' mūš-aka-s mūš-ikā 'rat, mouse', Armen. mukn 'mouse, muscle'), jūs-culu-m, corculu-m i. e. *cord+culu-m, mater-cula, latrūnculu-s, corpus-culu-m, melius-culu-s, īgni-culu-s, resti-cula, levi-culu-s.

Old Irish O.Ir. de-l'teat' O.H.G. ti-la etc., see above p. 198. cē-l O.Cymr. coi-l'augurium': Goth. hái-l-s'sound, healthy', O.H.G. hei-l'sound, whole', A.S. hæl O.Icel. heill n. (for *hailiz-) 'luck, favourable omen', Pruss. kail-ūstika-n acc. 'health' O.C.Sl. cĕ-lŭ 'whole, complete'. nēl 'cloud' for *neb-lo-, Cymr. niul' 'cloud': Gr. νιφέλη etc., see p. 203 above. coll m. 'hazel' for *cos-lo-. Lat. cor-ulu-s (corylu-s) for *cos-, O.H.G. hasal O.Icel. hasl 'hazel'. temel 'darkness': Skr. tam-rá- 'darkening'. sī-l n. 'seed', ν sē-. gabul gobul Mod. Cymr. gafl 'forked branch or twig, fork of the thighs'.

-s + lo-. uall f. 'exaltation, haughtness' uasal 'high, exalted, noble' Mod.Cymr. uchel 'high' Gall. \overline{U} xello-dūnu-m 'High-town', compared with O.Ir. $\overline{o}s$ uas Mod.Cymr. uch 'above' for *auq-s-(cp Lith. auksz-ta-s 'high') from \sqrt{aug} - 'increase'; uall there-

¹⁾ G. Curtius (Stud. I 1, 259 ff.) treats this combination as older than the Italic period. I sannot regard this as completely demonstrated.

fore = *auq-s-lā, on the other hand uasal must be compared with Lat. auxiliu-m, which represents a form *auxulo-, cp. famil-ia: famulu-s, Caecil-iu-s: Caeculu-s. ciall Mod.Cymr. pwyll 'wit understanding' orig. *qei-slā-, cp. Skr. ci-kē-ti ci-nō-ti 'observes, finds out'. Perhaps we should add giall 'hostage' pr. Kelt. *gēslo-: O.H.G. gīsal O.Icel. gīsl m. 'prisoner of war, prisoner held as a surety', common ground-form *gheislo-; the etymology of the word has not been explained; the vocalism of the Keltic word is against its connexion with Lat. haereō, which Osthoff considered certain (Z. Gesch. d. Perf. 630).

-lo- occurs with diminutival force in pet names, such as Tuathal ep. Tuath-char; ep also (tall. Teutalu-s, Camulu-s, Toutillu-s, Catullu-s.

Germanic. Goth. fū-l-s ().H.G fū-l 'foul': Lith. pū-lei pl. 'pus, matter', stem pū-l-ja-. ().H.G. suu-la f. 'awl, punch': Lith. siū-la-s 'thread for stitching' suū-l-ĕ 'seam', perhaps also Gr. v-λ-lai pl. 'pieces of leather for shoe soles' (Hesyeh). ().H.G. O.Icel. sei-l n. 'rope' O.H.G. si-lo m. 'straps for draught cattle, harness': Lith. àt-sei-l-i-s 'the iron which joins the connecting rod to the axle, the crank', àt-sai-l-e 'connecting pole between the splinter-bar and the axle'. (Joth. stō-l-s O.II.G stuo-l 'stool, seat': Lith. pa-stō-la-s 'stand', pl. 'carpenter's scaffolding', (Joth. stik-l-s O.H.G. stechal m. 'drinking vessel, goblet' (properly used of drinking horns that run to a point, then of other drinking vessels): Avest. tiy-ra- 'point'. () H (l. hag-al m. O.Icel. hag-l n. 'hail' is presumably to be compared with Gr. xάχλ-ηξ 'small stone, pebble'. O.H.G. stah-al m. O.Icel. stal n. 'steel': Avest. stax-ra- 'strong, firm', Pruss. panu-stacla-n acc. 'steel for kindling fire'.

Goth. ag-l-s 'terrible', beside ōg 'I am afraid'. Mid.H.G. krol, gen. krolles 'in ringlets, curled' pr. Germ. *kruz-lá-, see I § 582 p. 436. O.H.G. zī-la 'line, row', beside zī-t pr. Germ. *tī-đī-'time'. Goth. fug-l-s O.H.G. fog-al m. 'bird', for *fluz-la-?, see I § 277 p. 221. Goth. pvah-l n. 'bath'. Goth. fair-veit-l n. 'stage play'. O.H.G. scūv-ala A.S. sceof-l f. Dutch schoff-l 'shovel', beside O.H.G. scioban 'shove, push'.

The following examples probably contain - lo-: Goth. hakul-s

O.Icel. hokull m. 'mantle' beside O.Icel. hek-la 'mantle'. O.Icel. softull O.H.G. satul m. 'saddle'. O.H.G. snabul m. 'snout'. Adjectival nomina agentis generally imply an inclination to something. Goth. sakul-s 'quarrelsome', slahul-s (beside slahal-s) 'apt to strike', O.Icel. hugull (beside hugall) 'careful, thoughtful', O.Sax. slapol 'lethargic' fluzol 'fleeting' (in O.H.G. -al, as ezzal 'ravenous', sprungal 'saliens'); forms like A.S. hlaz-ol 'inclined to laughing' (beside hliehhan 'to laugh') indicate that the suffix was originally accented. Also in secondary use, as Goth. vein-ul-s 'bibulous' from vein n. 'wine' (O.H.G. wort-al 'talkative' from wort n. 'word').

-s-lo- is frequent; it is nowhere so fertile as in Germanic. O.H.G. ahsala, dehsala, see p. 199. Goth. pressl n. 'distress', from preiha 'I press' for pr. Germ. *prenzō (I § 214 p. 181). Goth. skoh-sl n. 'evil spirit'. Goth. hunsl A.S. husel O.Icel. husl n. 'offering' for *yuunt-sla-, compared with Avest. spent-a- O.C.Sl. svetŭ 'holy', cp. I § 180 p. 158 (where *yuunt-sla-m should be read for *zuunt+tla-m) and § 413 p. 303. O.H.G. wehsal m. O.Icel. vixl n 'change', compared with O.H.G. withan. O.H.G. knuosal A.S. cnosl n. 'family, cp. Gr. γνω-τό-ς 'a relative'. O.Icel. beisl n. 'bit, curb' ground-form *bhoid + slo-, beside Goth. beita 'I bite'. In particular many nouns were formed in -isla- in connexion with verbs in -jan, as Goth. spartize n. blackness, ink beside *spartjan O.Icel. sverta 'to blacken', O.H.G. irrisal 'error' beside irren, truobisal 'affliction' beside truoben 'to trouble', ruomisal and hruomisala 'ostentation, boasting' beside hruomen 'to boast'. Later the suffix was added to noun stems, as in Mid.H.G. twanc-sal 'restriction' from twanc 'force', fluht-sal 'a fleeing, escape' from fluht 'flight'. From the Middle High German period onwards it was regarded as a distinct word in composition. Cp. -s-tyo- § 61, -s-tro- § 62, -s-ti- § 100, -s-tu- § 108, -s-men-§ 117.

Pr. Germ. -ila- is very frequent, and difficult to explain with certainty. If Paul (in his Beitr. IV 235) is right in holding that pre-Germanic -lo- in the proethnic Germanic period passed sometimes into -ula-, sometimes into -ela- later -ila-.

according to the varying intensity of the accent, then some of the forms in -ila- must be added to the examples given above of Idg. -flo- (with pr. Germ. -ula-), and we could derive Goth. mikil-s A.S. mikil O.H.G. mikhil O.Icel. mikell 'great', with Gr. µεγάλο-, from a ground-form *meg-flo-. But this law does not seem to me clearly established. In any case some of the forms with pr. Germ. -ila- are to be referred to Idg. -e-lo-. A certain number may represent an Idg. -i-lo-. If we exclude more or less isolated formations, like the already mentioned mikil-s, Goth. ubil-s O.H.G. ubil 'evil, bad' (perhaps the meaning is 'going beyond bounds, transgressing rules', so that we should compare O.H.G. ubir 'over' Gr. iniq), and Goth. in-ilō f 'excuse, motive' (beside fair-ina f. 'charge, ground of complaint'), pr. Germ. -ila- is found especially in substantival nomina agentis and in diminutives. Hence these two classes may be placed here:

Substantival nomina agentis. O.H.G. brūt-pitil 'wooer, suitor's advocate' O Icel. brūtell 'one who asks'. O.Sax. crupel O.Icel. krypell 'cripple' ('creeper'), beside O.Icel. krjūpa 'to creep'. O.H.G. tripil 'charioteer' ('driver'), putil 'beadle' ('summoner'), tregil 'carrier', drāhsil 'turner'. Names of creatures like O.H.G. wibil O Icel.vifell 'chafer, beetle' (Mid.H.G. webelen weberen, wabelen waberen 'move hither and thither'): cp. Lith. vāb-ala-s 'chafer', O.H.G. tūhhil 'mergus'. Further, names of tools (cp. § 150), like O.H.G. meizil O.Icel. meitell 'chisel' ('cutter'), beside Goth. máitan 'to cut', O.H.G. sluzzil O.Sax. slutil 'key' ('shutter'), O.H.G. slegil 'mallet', stōzil 'pestle, beetle', driscil, also fem. driscila,' flail', spinnila 'spindle'. -ila- occurs also as a secondary suffix: O.H.G. reitil wagan-reitil 'charioteer' from reita 'car, carriage'. We have also examples of nomina agentis without an i preceding the l-suffix: O.H.G. tūhhal beside tūhhil, staphul 'grasshopper', scūvala 'shovel'.

Diminutives. O.H.G. bendil O.Icel. bendell m. 'small band, redimicula' Mod.H.G. dial. (Rh.-Frank.) bendel, which has lost its diminutive meaning. O.H.G. stengil 'stalk' (no longer regarded as a diminutive), from stanga 'pole'. The forms have for the most part passed over to the n-declension: O.H.G. scalchilo m. 'servulus' from scalch m. 'servus', lihhamilo m. 'corpusculum' from

lthhamo m. 'corpus'; Goth. mavilo O.Icel. meyla f. 'httle maiden' beside Goth. mavi f. 'maid, damsel', O.H.G. niftila f. 'niece' from nift f. 'niece', turila f. 'small door' from turi f. 'door'; Goth. barnilo n. 'little child' from barn n. 'child'. Add pet names like Goth. Vulfila O.H.G. Wolfilo cp. O.H.G. Wolf-hart, O.H.G. Gundilo cp. Gund-hart. Examples of diminutives without an i before the l-suffix. Goth. magu-la m. 'little boy' from magu-s m. 'boy', O.H.G. morhala f. 'moril, edible mushroom' from moraha f. 'carrot', O.H.G. Bodulo Bodalo by the side of Bodilo, O.Icel. Sinfjotli by the side of O.H.G. Sintarfizzilo.

The diminutival l-suffix was extended by other diminutival elements. O.H.G. turilī (turilīn) Mid.H.G. turlīn from turila, chindilī (chindilīn) 'little child'; for the origin of this extension see Kluge, Stammbild. p. 29. O.H.G. jungal-ing O.Icel. ungl-ingr 'a youth', O.Icel. myslingr from mysla 'little mouse', which itself is derived from mūs 'mouse'.

Balto-Slavonic. Lith. gai-la-s (and with changed declension gai-lù-s) 'ill-tempered, liable to bite (of dogs)' O.C.Sl. (d)zĕ-lŭ 'violent': O.H.G. gei-l' 'ungovernable, petulant, wanton'. Lith. mig-là myg-là O.C.Sl. mĕg-la 'mist': Gr. Hom. ἀμίχ-λη 'mist'. Lith. ἄk-la-s 'blind'. Lat. aquilu-s. O.C.Sl. strĕ-la f. 'arrow': O.H.G. strā-la f. 'arrow, flash of lightning'. O.C.Sl. si-la 'might, strength' Sloven. si-la 'haste', cp. Pruss. sei-li- 'earnestness, endeavour, diligence' seiliska- 'devotion': it is not clear whether we should compare Skr. śt-la-m 'custom, character' or Lett. si-t 'to bind'. Lith. aū-la-s 'leg of a boot' beside aū-ti 'to cover the feet'. Lett. ē-la 'road', beside i-t 'to go', cp. Lith. ei-l-ē f. Lett. at-l-i-s m. 'series, row'. O.C.Sl. az-lŭ vaz-lŭ 'knot'.

-llo- may perhaps be traced in the following instances. Pruss. sirs-ul-u-s O.C.Sl. strīš-ūlū beside Lith. szirsz-l-ỹ-s 'hornet': Dutch horzel. Lith. sprāg-ila-s 'flail', beside sprag-ēti 'to rustle'. O.C.Sl. koz-ūlū (kozlū) 'he-goat', from koza 'goat'. orūlū 'eagle', beside Lith. erēl-i-s O.H.G. aro m. 'eagle'. O.C.Sl. sedlo n. 'saddle' for *sedīlo (are O.H.G. satul A.S. sadol 'saddle' borrowed from some Slavonic language?). svētlū 'luminous' for *svētūŭ, from svētū 'light'. In considering the last two words itl shoud

be noted that pr. Slav. *sedlo, *světlŭ would necessarily have appeared in O.C.Sl. as *selo, *svělŭ (I § 545 p. 399, § 548 p. 402). Cp. also Pruss. names like Butil (buta- 'house'), Cantil (canta- 'endurance').

-s-lo- is not uncommon (cp. -s-li- § 98). O.C.Sl. tesla veslo, see p. 199 above. Pruss. san-insl-e f. 'girdle' O.C.Sl. sŭ-vęslo n. 'band, fetter' u-vęslo n. 'diadem' for *ŷħ+s-lo-, √ aħħ- 'tie, press tight', cp. O.C.Sl. az-lŭ 'knot'. Lith. mók-sla-s 'teaching', krisla-s Lett. krisl-s 'refuse, fragment' for *krit-sla-; mĕszla-s Lett. mésl-s, both usually in pl., 'dung, sweepings' beside Lith. mĕž-iu Lett. méʃchu 'I cleanse out' (I § 414 p. 303); gý-sla 'vein, sinew', cp. O.C.Sl. ži-la 'vein'; ůsl-ỹ-s 'one who scents out' âsl-ẽ 'nostril' for *ůtsl- beside û'džiu 'I smell': mṛ-sl-ẽ 'riddle'. O.C.Sl. čislo 'number' for *čīt-slo (cp. čismę § 117), pręslo 'gradus' for *prentslo from Slav. prend- or prent- (see Miklosich, Etym. Wörtb. 262), maslo 'oil, salve' beside maz-ati 'to smear' (I loc. cit.).

-e-lo-. In Baltic this is preserved in -e-l-io-, as Lith. did-eli-s 'great' (beside didi-s 'great' like Gr. μεγάλο- beside μέγας), er-ēli-s 'eagle' (cp. O.C.Sl. orŭŭ); usually with diminutive meaning, as in Lith. parszēli-s 'little pig' galvēle 'little head'. Cp. also Pruss. names like Dargelo Dargels (darga- 'dear'). In Slavonic the simple -elo- also occurs, though rarely: e. g. dręselŭ (beside dręsŭkŭ) 'sorrowful, peevish', cvitelŭ 'flower', plēvelŭ 'wced' beside plēva Pruss. pelwo 'chaff'.

-o-lo-, -a-lo- or -o-lo-. In Baltic -ala- is fairly common, as in Lith. mišalaī pl. Lett. misals 'urme', Lith. úž-valkala-s 'bed-cover' (cp. O.C.Sl. oblčklo 'clothing' for *ob-velk-lo), āvala-s 'foot-covering' (cp. aūla-s p. 210), veīkala-s 'business', snaīgala 'snowflake'. In Slavonic it is rarer; O.C.Sl. sokolū 'falcon'.

Remark 3. For the combinations -o-lo-, -a-lo-, -2-lo- I can find no sufficiently certain parallels in the other languages to prove that they are genuine pre-Slavonic suffixes. In the case of -o-lo-, Gr. μαινόλης and the like must be disregarded; on the other hand Skr. karmára- 'smith' vàcāla- 'talkative' and Goth. slahal-s might be regarded as positive evidence. -o-lo- appears in Skr. ani-la-s 'wind' (beside áni-ms).

Balt. -ē-la- -ē-l-ja-. This is derived from a verb in -ē-ti in L1th. tekēla-s tekē-l-1-s 'grindstone, running on an axle' (Lett-tezzel-1-s, usually fem. tezzele), from tekēti 'to run'; and is also found in the numerous nomina agentis, which often imply contempt, e. g. paklýdeli-s 'rover, gad-about' from klyděti 'to wander about', netìkeli-s 'ne'cr-do-weel' (tikti 'to suit'), padūkeli-s 'raving madman' (pa-dūlti 'to go mad') nudēgeli-s 'one runed by a fire' (nu-dēges 'burnt out'). Cp. O.C Sl. part. želē-lū beside želčti 'to wish', vidēlū beside vidēti 'to see'; see below. Examples of -ē-l-ja- as a secondary suffix are kirmēlē 'worm' from O.Lith. kirmi-s, gen. kirmio 'worm', muselē 'fly' from musē 'fly', further, diminutives formed from words of more than two syllables, like avinēli-s 'little ram' from āvina-s 'ram', kepurēlē 'little hat' from kepùre 'hat', hirmelēlē 'little worm' from kirmēlē. The origin of this secondary -ēlja- is not clear.

-ī-lo-. Lith. aký-ta-s 'observant' (beside aký-ta-s 'furnished with eyes' and aky-va-s 'furnished with eyes, inquisitive'), beside aký-ti 'to get eyes, become porous'. Cp. O C.Sl part. chvali-lŭ beside chvali-ti 'to praise'.

In Slavonic the suffix -lo-, which formed nomina agentis, was used very freely, and hence was developed the so-called part. pract. act II, as bi-lū beside bi-ti 'to strike', with jesmī practically equivalent to a perfect, 'I have struck'. Other examples are nes-lū beside nes-ti 'to carry', by-lū beside by-ti 'to be' (ep. Gr. qῦ-λο-ν, qū-λή), zna-lū beside zna-ti 'to know', děla-lū beside děla-ti 'to do, make', želč-lū beside želč-ti 'to wish', chvali-lū beside chvali-ti 'to praise'. Cp. Lat. legulu-s 'one who picks (fruit)' O.H Ġ. ezzul 'ravenous' (O.C.Sl jalū for *ěd-lū), tregil 'bearer', Ġr. σῦγαιό-ς 'silent', μῦμηλό-ς 'imitative', Lith. tekēla-s ('runner') 'grindstone', akýla-s 'observant'.

Diminutives. Lith. -e-l-i-s and -e-l-i-s have been mentioned; with parszēli-s compare Lat. por culu-s porcul-ia O.H.G. farhel-in. 'sucking pig', with ratēli-s, Lat. rotula. ragēli-s 'little horn' may be directly connected with O.C.Sl. rog-l-i Mod.Sloven. rogelj beside rogū 'horn', though in the Slavonic languages the diminutival sense is lost. The pet names, however, in Slavonic belong

to this class; e. g. Serv. Božilo beside Božo Bogo-ljub, Bratilo Brajilo beside Brato Brato-ljub; cp. Pruss. Butil Dargelo p. 211.

§ 77. The European suffixes $-dh-ro--dh-r\bar{a}-$ and $-dh-lo--dh-l\bar{a}-^1).$

In Greek, Italic, Slavonic, and perhaps also in Germanic, these suffixes are found beside -tro--tlo-(§ 61) and -ro--lo-(§ 74, 76) with similar meaning. They are used in substantives mainly to denote the means, or a tool, or a locality. They sprang from the coalescence of the so-called 'determinative' dh (Skr. rá-dh--āmi, Gr. $\pi\lambda\dot{\eta}$ -9- ω , Lat. $p\bar{u}$ -b- $\bar{e}s$, O.C.Sl. i-d-q, cp. § 8 Rem. 2 p. 20) with a following -ro- -lo-, and are therefore parallel to such combined forms as Gr. -9-µ0- (§ 72) and to -s-lo- (§ 76), and others. Cp. Gr. ap-9-po-r joint, limb': ap-9-µó-5 joining, connexion': βά-9-ρο-ν 'step, threshold, seat, foundation': βα-9-μό-ς 'step'; σr-ε-9-ρό-ς 'exact, precise, careful': σχ-ε-9-έμεν 'to hold, have' (0x-e-9- for the normal 0x-e-9- is due to association with ε-σχ-ο-ν and similar forms, cp. I § 496 p 364 f.); κήλη-3-φο-ν 'magic drug': νηλη-θ-μό-ς 'enchantment'; νίνη-θ-ρο-ν 'winnowing fan': xīvn-9-uó-s 'movement'; Lat. sta-b-ulu-m, Czech. stá-dlo Lower Sorb. sta-dlo 'herd, drove': Gr. στα-9-μό-ς 'standing place', O.C.Sl. Pol. sta-d-o Czech stádo 'herd'; Lat. fa-b-er: Gr. τε- $-9-\mu \dot{o}$ - ς $9\epsilon-9-\mu \dot{o}$ - ς 'statute' (for the initial τ - 9- cp. $\sigma \times \epsilon \vartheta \varrho \dot{o}$ - ς σχεθέμεν); Italian (Tusc.) pevera 'a wooden funnel' = Lat. *plē--b-ra (beside Lat. *plē-tra implied in Milanese pidria 'wooden funnel' and other forms, cp. Lat. palpe-bra beside palpe-tra): Gr. $\pi \lambda \eta' - \vartheta - \omega$ 'I am full'2) and many similar examples. With the forms having e, a Lat. e after the root syllable, as Gr. ox-e--9ρό-ς, ἔδ-ε-9λο-ν, μέλ-α-9ρο-ν, κρεμ-ά-9ρα, Lat. illec-e-bra mand--i-bulu-m conduc-i-bili-s should be compared (besides ox-s--θέμεν mentioned above) γηθέω for *γᾱF-ε-θέω = Lat. gaudeō for $*gav-e-de\bar{o}$, $\varphi\lambda\epsilon\gamma-\epsilon-\vartheta\omega$, $\nu\epsilon\mu-\epsilon-\vartheta\circ\mu\alpha$, $\delta\varrho\gamma-\alpha-\vartheta\omega$, $\delta\iota\omega x-\alpha-\vartheta\omega$ etc.

¹⁾ Cp Ascoli's essay cited in footnote 1 on p. 118; and Fr. Hanssen, Die Aktivbedeutung der Adjectiva auf bilis im archaischen Latein, Philologus N. F. I 274 ff.

Add here Gr. πληθρο-ν' είδος μέτρου in Hesychius, if the reading is right.

The great majority of the nouns that belong to this class are certainly later formations which arose independently in the course of the separate growth of the various families of language. Isolated examples may date from older times, cp. Lat. sa-bula, in-sūbulu-m, Czech ši-dlo Pol. szy-dlo O.C.Sl. ši-lo 'punch, awl', common ground-form *siū-dhlo--dhla-; Gr. Hom. $\lambda \dot{v}$ -900- 'contamination', Lat. $d\bar{c}$ -lū-bru-m pol-lū-bru-m, common ground-form *lū-dhro-; Lat. sta-bulu-m (*stə-), Czech stá-dlo (*stā-).

In consequence of their equivalent functions and similar sound -dhro, -dhlo- were in many cases confused with -tro-, -tlo-. On this point see § 62 p. 121 f. In Slavonic the older t-suffix was completely ousted by the dh-suffix; the substitution of the dh for t is especially clear in the word for 'plough' O.C.Sl. ralo oralo Czech. rádlo Pol. radlo, where all the other languages, even Lithuanian, show -tro- -tlo-.

Remark. Some have wished to derive this suffix from -thro-, -thlo-. To this hypothesis, it must be confessed, no phonetic objections can be raised (I p. 407 footnote). But its only object is to re-establish the theory of the original identity of this suffix with -tro, -tlo-, and I do not see how any probable ground can be given for assuming that the latter had split into double forms at so early a period. In other forms the aspirated tenus appears for the tenus in Aryan only (op. I § 475 p. 350 f., § 553 p. 405 ff), and hence we may at least demand evidence for the existence of an Aryan suffix -thra- = -tra-.

To the examples given above a few may be added from the separate groups of languages.

Greek. $\ddot{o}\lambda \epsilon - \vartheta \rho o - \varsigma$ 'destruction', $\lambda \dot{a}\lambda \eta - \vartheta \rho o - \varsigma$ 'talkative', $\mu \nu \lambda \omega - \vartheta \rho \dot{o} - \varsigma$ 'miller', $\tau \dot{\epsilon} \rho - \vartheta \rho o - \nu$ 'end, point', $\pi \lambda - \dot{\epsilon} - \vartheta \rho o - \nu$ ' $\pi \dot{\epsilon} \lambda - \varepsilon - \vartheta \rho o - \nu$ 'acre, hide of land' (cp. $\pi \tau - \varepsilon - \rho \dot{o} - \nu$: Skr. $\rho a t - a - r \dot{a} - p$. 182), $\dot{\rho} \dot{\epsilon} (f) \varepsilon - \vartheta \rho o - \nu$ 'est $\vartheta \rho o - \nu$ 'stream', $\mu \dot{\epsilon} \lambda \pi \eta - \vartheta \rho o - \nu$ 'delight', $\kappa \dot{o} \rho \eta - \vartheta \rho o - \nu$ 'besom', $\dot{\varepsilon} \pi \iota - \beta \dot{a} - \vartheta \rho \ddot{a}$ 'means of climbing, ladder', $\kappa \dot{o} \mu \dot{\eta} - \vartheta \rho \ddot{a}$ 'sleeping-place', $\dot{a} \lambda \iota \nu \dot{\sigma} \dot{\eta} - \vartheta \rho \ddot{a}$ 'place to roll in, place of exercise (for horses)' $\ddot{\nu} - \vartheta \lambda o - \varsigma$ 'cant, empty talk' (from $\ddot{\nu} \dot{\varepsilon}$ it rains'), $\dot{\epsilon} \sigma - \vartheta \lambda \dot{o} - \varsigma$ 'excellent', $\vartheta \dot{\varepsilon} \mu \varepsilon - \vartheta \lambda o - \nu$ 'foundation', $\gamma \dot{\epsilon} \nu \varepsilon - \vartheta \lambda o - \nu$ and $\gamma \varepsilon \nu \dot{\epsilon} - \vartheta \lambda \eta$ 'descent, family, offspring'. Where λ precedes, the form $-\vartheta \rho o - m$ sometimes have arisen from $-\vartheta \lambda o - b \gamma$ dissimilation, cp. I § 266 p. 215.

Italic. In proethnic Italic -dhro- -dhlo- became -fro-, -flo-. These remained in Umbro-Samnitic, while in Latin they passed into -bro-, -blo-. See I § 370 p. 281. For the anaptyxis in Lat. -bulo-, -bili- see I § 269 p. 218. Pr. Ital. *sta-flo-: Lat. sta-bulu-m sta-bili-s, Umbr. sta-flarem 'sta-bularem' Pelign. pri-stafalacirix 'antistita for *-stafla-crīx = Lat. *prae-stabula-trix.

Lat. crī-bru-m, flā-bru-m, ventilā-bru-m. dolā-bra, verte-bra, tere-bra and ē-lece-bra ('enticer', fem.). crē-ber (from crē-scō), candēlā-ber (beside candēlā-bru-m), Mulci-ber (gen. -berī, a new formation instead of *-brī); occasionally the forms have been transferred to the i-declension, as anclā-bri-s, ale-bri-s (beside alı-bılı-s). trī-bulu-m, pā-bulu-m, vocā-bulu-m, medicā-bulu-m, latı-bulu-m, mandi-bulu-m and mandı-bula, fā-bula. Once or twice we find -i-bulu-m as a secondary suffix; for example sessibulu-m (sessu-s sessili-s), tūribulum (tūs). From this suffix are formed a large number of adjectives which have passed into the i-declension, as sta-bili-s, nō-bili-s, mō-bili-s, flē-bili-s, intel-ligi-bili-s, in-vendi-bili-s. In a few cases -i-bili-s is a secondary suffix; e. g. odibili-s (odiu-m), illūtibili-s (il-lūtu-s), flexibili-s (flexu-s), persuāsibili-s (per-suāsu-m).

Just as -clo- became -cro- by dissimilation in lucru-m (for *lu-clo-m) and in other words (I § 269 p. 217), so it may sometimes have happened that after a preceding l, -blo-, -bli-became -bro-, -bri-.

Germanic. The proethnic Germanic forms -dra-, -dla-, e. g. in O.H.G. hrī-ttara f. 'riddle, sieve', may represent Idg. -tro-, -tlo- quite as well as Idg. -dhro- -dhlo-; cp. § 62 p. 121. O.H.G. hrī-ttara may be compared equally well with Lat. crī-bru-m 'sieve' (which contains Idg. -dhro-) or with O.Ir. criathar 'sieve' (Idg. -tro-). I know of no case where the dh-suffix could be identified with any degree of certainty.

Slavonic. O.C.Sl. želo 'point, sting' Pol. žą-dlo. Czech by-dlo Upper Sorb. by-dlo 'dwelling' Pol. by-dlo 'cattle, property, means'. O.C.Sl. čripalo 'scoop' Pol. czerpa-dlo. O.C.Sl. klepalo

'sounding-board (of an instrument), bell' Pol. klepa-dlo. O.C.Sl. cëdilo 'strainer, filter' Pol. cedzi-dlo. O.C.Sl. bëlilo 'means for whitening, white paint'.

§ 78. The Suffix -bho- -bha-.

This suffix was confined to a small area, and it is only in Balto-Slavonic (and possibly Germanic) that it shows any degree of fertility. As a secondary suffix it was no doubt used even in the proethnic period of Indo-Germanic, to form names of animals. To judge from Sanskrit, in this usage it was generally or always accented.

In do-Germanic. Skr. γšα-bhά-s 'bull' points to an Idg. *γṣη-bhό-s (*erṣη-bhó-s) 'bull' beside Avest. arṣ̄an- 'male, man' Gr. ἔρσην άρσην 'male'), and we could at once accept the form as really proethnic, if the suggested connexion of Gr. Εἰραφ-μότη-ς Lesb. Ἐρραφεώτα-ς, a title of Dionysus, with Skr. γṣ̄abhá-s is correct. It does not seem to me, however, that Wackernagel (followed by Solmsen, see Kuhn's Ztschr. XXIX 126 ff. 352 ff.) has satisfactorily removed the difficulty of assuming an assimilation of rs to ρρ in proethnic Greek.

Aryan. Here the suffix is almost confined to names of animals. In Sanskrit besides τ̄s̄a-bhā-s we have with similar meaning τ̄ς̄s̄a-bhā-s, beside τ̄s̄an- 'male, man, bull'. s̄arabhā-s a fabulous creature with eight legs, enemy of the lion and elephant, suggests Gr. rίραφο-ς 'fox', κόραφο-ς a bird, in Hesych. (compare no doubt κορώνη, so that the bird must have belonged to the raven family), κάλαφο-ς ἀσκάλαφο-ς a kind of owl. s̄ērabhaname of a snake. rásabha-s 'ass' (the only Skr. form with the accent upon the root), from ras- 'shriek, roar, bray'.

sthūla-bhá- beside sthūlá- 'large, massive'.

Greek. Εἰραφιότη-ς, κίραφο-ς, κάλαφο-ς ἀσκάλαφο-ς, see above. ἔλαφο-ς 'stag' ground-form *ely-bho-s, beside ἐλλό-ς for *έλν-ο-ς, O.C.Sl. jelen- (gen. jelen-e) 'stag', Lith. éln-i-s 'stag, elk' (cp. § 114). Thus κόραφο-ς too (see above) no doubt stands for *kory-bho-, cp. Lat. corn-tx. κιδάφη σκιδάφη 'fox'. ἔριφο-ς 'kid', with which Stokes would connect O.Ir. herrp erb (pl. herbind) 'capra, damma'; this word however cannot have lost

a vowel beetwen r and b (p) (for the p cp. I § 524 p. 380). $x \acute{o} \sigma \sigma \nu \varphi o - \varphi$ Att. $x \acute{o} \tau \tau \nu \varphi o - \varphi$ 'thrush'.

κόλαφο-ς 'blow with the fist, box on the ear'. κρόταφο-ς 'temple' (of the forehead) beside κρότος κροτέω, (named from the pulsation?). Denomin. ψηλαφάω 'I grope'. κέραφο-ς σκέραφο-ς 'abuse, calumny'. φλήναφο-ς 'chattering', subst. 'chatter'. Εδαφος n. 'base upon which a thing rests', no doubt transferred to the es-stems by assimilation to Εδος n. κορυφή 'peak', cp. κόρυ-θ-'helmet' κόρυ-δο-ς 'tufted lark'. ἄργυφο-ς 'gleaming like silver'.

Other examples of this kind are given in Lobeck Proleg. p. 291 ff.

Italic. Perhaps we should class here Lat. mor-bu-s, beside mor-ior, cp Lith. dár-ba-s and the like (see below).

Old Irish. Perhaps heirp erb 'capra, damma'; see above.

Germanic. From this suffix are no doubt derived the Gothic adverbs in -ba, as ubilaba 'badly, wickedly' battraba 'bitterly', agluba 'hardly, scarcely', ana-laugmba 'secretly'.

Balto-Slavonic. Inth. anksztý-ba-s 'of an early kind, appearing early', beside ankszti adv. 'early', and, modelled on this word, velúha-s 'of a late kind' beside velaī adv. 'late'. Further, numerous abstract substantives in -y-b-c, derived from adjectives, as auksztűbé 'height, highness' from áukszta-s 'high', jaunybe 'youth' from jáuna-s 'young', bailybe 'timorousness' from bailù-s 'timorous', kantrybe 'patience' from kantru-s 'patient'; Lettish has preserved the older unextended -ība, as áugstiba, jáuniba. Again we have primary nomina actions in -yba -ybe, as dalýbos pl. 'division of an inheritance' beside dalýti, 'to divide', tikyba tikýbė 'faith' beside tikėti 'to believe'; cp. Lett. tizziba 'faith', máziba 'teaching, instruction' (mázit 'to teach'). Lastly there are a few substantives in which we have the suffix added immediately to the root: dár-ba-s 'work', hence darbù-s 'diligent' and dîrbu 'I work', beside darýti 'to do'; gar-ba (Szyrwid) and garbe 'honour', hence garbù-s 'honourable' and gerbiù 'I honour', beside giriù 'I praise'; similarly Lett. schkir-ba 'a split, rift', beside schkir-t (Lith. skir-ti) 'to split, part, divide'.

In Slavonic the suffix appears in substantives in -ba. O.C.Sl. atro-ba 'intestines, belly' beside je-tro 'liver', see § 75 p. 189. 197 f. zŭlo-ba 'wickedness' from zŭlŭ 'wicked'. Serv. rugo-ba 'disgraceful character' beside rug O.C.Sl. ragŭ 'disgrace', grdo-ba indecency' beside O.C.Sl. grīdŭ 'proud, arrogant'. O.C.Sl. tati-ba 'thievery, theft' from tati 'thief', gosti-ba 'entertainment, cheer' from gosti 'guest'. Starting from forms like these -tha became an independent ending, e. g. družība 'companionship, friendship', from drugă 'companion, friend', săliba 'embassy' from sălă 'ambassador'. Cp. tati-stvo, giving rise to sŭl-istvo § 61 p. 117. The use of -iba was extended by the fact that the form became associated with verbs in -i-ti (like gosti-ti druži-ti); after this connexion had been established, abstract substantives in -tha were made directly from these verbs (cp. Miklosisch, Vergl. Gr. II 213 ff.). A few nouns in -tba were formed from the participle in -tu (-to-), as ženit-ibu 'wooing, marriage, wedding' (also ženit-istvo), gostit-iba 'hospitality', orat-iba 'tillage', set-iba 'sowing'; this group of forms arose during the time when the part. pass. was still formed with -to- in these verbs.

§ 79. The Suffix -to- -ta-.

This suffix was both primary and secondary in the proethnic and later periods. We may classify its usage under four headings.

1. -to--ta- as a primary suffix in participial adjectives and substantives connected with them ¹).

The suffix was used to form a participial noun immediately from the root, e. g. *klā-tó- 'heard' from kley- 'hear'. This formation must have been very common in the Indo-Germanic period.

The root (in the strict sense, cp. § 8 Rem. 1 p. 20) might, generally speaking, be replaced by any element or combination of elements which acted as a verbal stem; hence forms like *μεπο-το 'vomited' Skr. vami-ta- Gr. ἐμε-τό-ς (ἔμε-το-ς) Lat.

¹⁾ Bordellé, De linguae Latinae adjectivis auffixo to a nominibus derivatis, Düsseldorf 1878 Birt, De participis Latinis quae dicuntur perfecti passivi, Index lect. Marburg. 1883—84 (cp. with this treatise Osthoff, Zur Gesch. d Perf. 550 ff.).

vomi-tu-s, or like *dorki-to- 'brought to sight', Skr. darši-tá-Goth. ga-tarhi- \bar{p} -s, partic. of *dorkejō, causal of \sqrt{derk} - 'see', and those developed in the separate languages like $a\gamma an\eta$ -ró- ϵ ($a\gamma an a$) Lat. piscā-tu-s (piscārī) Goth. fiskō- \bar{p} -s (fiskō-n).

The addition of -to- to thematic present stems was no doubt a later process, even though it may have begun in the proethnic period; cp. e. g. Skr. darś-a-tá-s 'visible, worth seeing' Gr. ἐρπ-ε-τό-ν 'creeping thing', Gall. nem-e-to-n O.Ir. nemed n. 'sanctuary' (properly 'what is revered'). Cp. -e-ti§ 100. -o-to- also may be a proethnic form: Gr. βίο-το-ς βιο-τή 'life, livelihood', O.Ir. biad n. 'livelihood', Lith. gyva-tà 'life, livelihood' O.C.Sl. živo-tũ 'life, living thing'.

The meaning of these participial forms was generally passive, and with the exception of the last group (darša-tá-s etc.), that of a perfect participle passive. But the passive sense can hardly have been originally attached to the suffix itself. Numerous forms occur with an active-intransitive sense which dates from the earliest period, such as *bhū-tó- become, grown', *sto-tó- 'having a position, standing', *sru-tó- 'having a flow, flowing'. The idea of completion or being complete, and hence of being in a particular condition seems to have been the essential element in the meaning of the forms derived from the verbal stem. Hence we have also active to-participles from active verbs, such as O.H.G. wis 'skilful, wise' Gr. α-ιστο-ς 'unskilful', Gr. τλητό-ς 'enduring' υπ-οπτο-ς 'entertaining suspicion', Lat. con-sideratu-s 'considerate, thoughtful' cenātu-s 'who has dined' (cp. Mod.II.G. ein gelernter schlosser 'a trained locksmith' lit. 'who has learnt', ein erfahrener mann 'an experienced man', ein ehrvergessener mensch 'a dishonourable fellow', lit. 'one who has forgotten honour' etc. 1)

¹⁾ It need hardly be assumed that this sense was first introduced into the participles when they were compounded with other words and the meaning of the compound was epithetised (mutatum, § 50); e. g. Gr. ~-ioro-; 'being without anything known, without knowledge', Lat. in-consideratu-s 'being without anything considered, without consideration'; and that it was only on the model of this group of words that the signification was extended to some of the participles when uncompounded.

At the same time, I do not suppose that the use of the to-participles is original in Latin deponents, where they share all the constructions of the present nt- participle and the finite verb, e.g. omnia confessus like omnia confitens and omnia confitent. This usage arose only after compound tenses like confessus sum had become part of the system of the finite verb.

The idea of completion and of being brought to an end is often replaced by one of capacity or possibility, as in Gr. 2v--76-5 'capable of being freed'. This change of meaning is no doubt proethnic in Idg. *morto-s 'mortal' (Skr márta- Gr. βροτό-ς). But we find that in the separate languages this usage is seldom or never found except in participles compounded with the privative particle, or in some other form of negative expression Compare, for examples of the first kind, Skr á-marta-s a-mýta-s Gr. \ddot{a} - $\mu\beta\varrho\sigma\tau\sigma$ - ς 'immortal', Skr a- $t\hat{u}\tau ta$ -s 'unsurpassable', \dot{a} - $j\bar{t}ta$ -s'unfading', ú-dabdhu-s 'inviolable, infallible', á-parīta-s 'unconquerable', Gr. α-λυτο-ς 'indissoluble', α-μεμπτο-ς 'blameless', av-inalnero-s 'not to be confounded, or terrified', Lat. in-victu-s 'invincible' in-fectu-s 'not to be done, impossible', in-numeratu-s 'innumerable', Goth un-suht-s 'incontestable', un-atgaht-s 'unapproachable', cp. also O.Ir. dī-bruhe 'importabilis'; and of the second, σίκ ἀνεκτό-ς 'not to be borne', σίκ ὀνομαστό-ς 'not to be named' in Homer. Hence we may infer that this meaning first arose in negative expressions. It spread most widely in Greek, further examples are vonvo-c 'comprehensible', θανμαστό-ς 'wonderful', βατύ-ς 'passable, practicable (of roads)'.

In every language we meet with a number of forms in -to-which stand in no actual connexion with any verbal system, and are therefore simply adjectives, as Skr. śī-tá-'cold', Lat. al-tu-s'high', Goth. raiht-s 'right'. Some of these may date from a period of the proethnic language in which the adjectives formed with -to- had not yet been associated with the verb, and thus may never have been participles at all.

Even in the Indo-Germanic period these to-formations were often used as substantives, partly to denote living beings (masc.,

fem.) and concrete material things (neut.), partly as abstract substantives (§ 158). In the latter usage this suffix, like -o, is often found in the masculine. The feminine $-t\bar{a}$ -, forming abstract substantives, had even then become secondary. This point will be further discussed in the next section.

The to-stems formed immediately from the root usually have the weak grade of ablaut in the root-syllable, e. g. *klu-tó-*klū-tó- Beside this, however, we often find the forms of the strong grade, especially in substantival uses. With this is generally united a difference of accent. Cp. e. g. *klėu-to-m 'hearing' beside *klū-tó-s 'heard', mór-to-s 'mortal' beside *mṛ-tó-s 'dead'¹). Here too it is not clear how the different grades were originally distributed. Compare the relations of the different grades in $t\iota$ -stems, § 99.

Remark 1. Analogy often gave rise to mixed forms For example, Germ. * $m\dot{\omega}$ -pa-n n. 'murder' beside Skr. mg- $t\dot{\phi}$ -m has the accent of *mer-to- or * $m\dot{\phi}$ -to- (Skr. $m\dot{\alpha}r$ -ta-), Germ. * $3\dot{\omega}$ -pa-n n. 'gold' that of * $\hat{g}h\dot{e}l$ -to- (Lett. $f\dot{e}$ 'l-t-) or * $\hat{g}h\dot{\phi}l$ -to- (O.C.Sl. zlato), and vice versa, Gr $\mu o e$ - $t\dot{\phi}$ - $t\dot{\phi}$ - (Hesych, — if the word is rightly accented) beside Skr. $m\dot{\alpha}r$ -ta-ta- $t\dot{\phi}$ - has the accent of mg- $t\dot{\phi}$ - (Skr. mg- $t\dot{\alpha}$ -s), Gr pa- $t\dot{\phi}$ - $t\dot{$

Where participles of this kind have strong-grade vocalism, we can hardly help suspecting in many cases that it is due to the analogy of other forms of the verbal system; e. g. Gr. $\delta_{eix-ro-\varsigma}$ beside $i\delta_{ei}\xi\alpha$ etc. contrasted with Skr. $di\check{\varsigma}$ -tá-s (from \sqrt{dei} -).

Indo-Germanic. *klā-tó- 'heard, famous', √kleu-: Skr. śrutá-s (Avest. srūta-), Gr. κλυτό-ς, Lat. in-clutu-s, O.Ir. cloth (O.Bret. clot 'glory'; perhaps f.), O.H.G. Hlot-hari Lothair (*Κλυτόστρατος would have the same meaning) hlūt ('loud');

¹⁾ The use of strong-grade forms as substantives no doubt indicates that originally the Noun had but one set of forms for both its adjectival and its substantival meaning. Isolation from the adjective in use brought with it isolation in form, Cp. § 158.

*kléu-to-m 'hearing': Avest. srao-te-m, Goth. hliu-p, and no doubt Mod.Slov. slu-t 'suspicion' Serv. slu-ta 'who surmises'. *sru-tó 'flowing', V sreŭ-: Skr. sru-tá-s, Gr. ov-ró-c; Skr. srutá-m 'a flowing, flood' Lith, sru-tà f. 'filthy liquid'; Lith. srau-ta-s 'stream, torrent', compare Skr. srótas- n. 'stream', extended by -es-. *ăs-tó- 'burnt', √ eus-: Skr. uṣ-tá-s, Lat. ūs-tu-s. *i-tó-'gone', Vei-: Skr. atīta- from ati+ita- 'disappeared, fled away', Gr. aμαξ-ιτό-ς f. (scil. oδό-ς) 'road passable for waggons', Lat. i-tu-m (est), ad-stu-s, Skr. e-ta-s 'hastening', Gr. ol-to-g 'fate'. *qi-tó-, \(\square\) qez- 'pile, range, count, pay': Skr. citá-s 'arranged, piled' Gr. 71-76-5 'requited' (in Homer also with I, a-7170-5); Skr. ci-tā 'layer' O.C.Sl. ci-tā 'number' po-citā 'enumeration'. *vit*tó-, V yeid- 'sec, observe, know': Skr. vittá-s 'found, perceived, known' (Avest. vīsta- 'found'), Gr. a-1010-g 'unknown, unskilful', O.Ir. ro fess 'scitum est', Goth. un-vis (stem un-vissa-) 'uncertain'; Lat. vīsu-s, Goth. un-veis 'unwise, unskilful' O.H.G. wīs 'wise' for Idg. *uīt*to- or *ueit*to- (O.C.Sl. vēstŭ 'known, clear' is for *woit*to-); and also O.H.G. wisa f. 'way, kind'. *mr-to- *mor-to-, √ mer- 'die': Skr. mr-tá- 'having died, dead' a-mfta- 'immortal' már-ta- 'mortal, man', Armen. mar-d 'man' (= *mr-tó-, see I § 291 p. 232 f.), Gr. μορ-τό-ς βρο-τό-ς 'mortal, man' α-μβροτο-ς 'immortal', Lat. Mor-ta goddess of death, one of the Parcae; Skr. mrtá-m 'death' O.H.G. mord n. 'murder': cp. Rem. 1 p. 221. *str-to- *str-to- 'spread out, stretched out': Skr. str-ta- Avest. stare-ta-, Gr. στρω-τό-ς, Lat. strā-tu-s, O.C.Sl. -strĭ-tŭ; Gr. στρα--τό-ς 'camp, host'. *wrt'tό- 'versus', γ wert-: Skr. vrttá-s, Lat. vorsu-s versu-s, Skr. vrttá-m n. O.C.Sl. vrista f. 'condition, state, position, stage', Lith. varsta-s 'a furrow-length'. *mlk-to- 'milked', V melĝ-: Lat. mulc-tu-s, Lith. milsz-ta-s: Mid.Ir. mlicht blicht m. 'milk'. *gm-tó-, \(\sigma \) gem- 'go': Skr. qa-tá- 'gone, gone out, come' á-gata-s 'untrodden', Gr. βα-τό-ς 'trodden, passable', α-βατο-ς 'untrodden, impassable' δύσ-βατο-ς 'hard to pass over', Lat. circum--ventu-s, and no doubt Lith. pri-gimta-s 'inborn' (cp. I § 249 p. 204). *mn-tó- 'thought, meant', \(\sqrt{men-: Skr. ma-tá-, Lat.} \) com-mentu-s, Goth. mun-d-s, Lith. miñ-ta-s O.C.Sl. me-tu; Skr. ma-tá-m 'meaning, opinion, purpose' Gr. αὐτό-ματο-ς 'of one's

own design, willingly', Lat. com-mentu-m 'idea, invention, plan', O.Ir. der-met n. 'forgetting'. *gn-tó- *gn-tó- 'begotten, born', √ gen-: Skr. ja-tá- 'born, son', Lat. gnā-tu-s nā-tu-s 'born, son', Gall. Cintu-gnatu-s ('first-born'), Goth. gma-kund-s 'born of woman' O.Sax. god-cund 'born of God, divine' O.Icel. kun-d-r 'son'; Skr. ja-tá-m 'birth, origin, race', O.H.G. kin-d n. 'child', ground-form *qén-to-m. *kns-tó-, \(\shi \) kens- 'to mention, praise (Gr. xónuo-c indicates that this belongs to the e-series of ablaut; see Solmsen, Kuhn's Ztschr. XXIX 123. 329): Skr. šas-tá- 'spoken, praised', Osc. an-censto nom. sing. fem. 'incensa' censtom-en 'in censum' (Lat. cēnsu-s instead of *censtu-s, Rem. 2 p. 231) *set*tó- 'seated', \sqrt{sed-: Skr sattá-, Lat. ob-sessu-s; Avest pasu--šasta- m. 'cow-pen' AS. O Icel. sess m. 'seat', Lat. sub-sessa 'ambuscade'. *peq-tó-s 'cooked', γ peq-. Skr. pak-tá- Gr. πεπ-τό-s Lat. coctu-s for *cuec-to-s (I § 172, 3 p. 152, § 431 a p 319 f.). *dho-tó- *dhē-to- 'set, placed, laid', \(\sqrt{dhē} - \cdot \text{Skr. -dhitá- hi-tá-,} \) Gr. 9e-vo-c, Lat. crēditu-s for *crēdato-s (cp. Skr. šrád-dhita-m neut. 'trusted, believed'), Lith. de-ta-s 'laid' *do-to-, *-t"to-(i. e. *-d+to-) and *dō-to- 'given', \(\sqrt{d\bar{o}}\) d\bar{o}-\(\sqrt{Skr} \) vy-\bar{a}\-dita-s 'separated, opened', dēvá-tta- 'god-given' Gr. do-ró-s, Lat. da-tu-s, Skr. två-data- 'given by thee' Avest. da-ta- 'given', Lith. du'-ta-s Skr. á-kūta-m 'intention', Lat. cau-tu-s, beside Skr. a-kuvatē 'he intends' kav-i-š 'seer, sage', Lat cav-eō. Skr. ap-táreached, attained, adapted, fit', Lat. ap-tu-s ad-eptu-s, beside Skr. ap-nó-ti 'he reaches' Lat. apīscor. *siū-tó- 'sewn', beside Skr. sίν-yā-mi 'I sew': Skr. syū-tά- Gr. νεο-καττῦτο-ς ('newly soled'), Lat. sū-tu-s, Lith. sıú-ta-s O.C.Sl. šı-tŭ; Skr. syū-ta-s 'sack' Mid.H.G. siu-t sū-t m. 'seam'. *yē-to- *yē-tā- 'blowing, wind': Skr. vā-ta-s, Gr. ἀή-τη f. ἀή-τη-ς m., Lith. denomin. vě-tau 'I winnow, fan'. *plē-tó- 'filled', plē- 'fill': Skr. prā-tá-Lat. im-plētu-s. *ĝnō-tó- 'known, recognised', ĝnō- 'know: Skr. jna-tá-, Gr. γνω-τό-ς, Lat. nō-tu-s, O.Ir. qna-th (known, accustomed'), Skr. á-jñāta- Gr. à-yvwvo-5 Lat. Ignotu-s.

*uema-tó- 'vomited', beside Skr. vámi-mi Gr. ἐμέ-ω 'vomit': Skr. vami-ta- Gr. ἐμε-τό-ς Lat. vomi-tu-s; Gr. ἔμε-τ-ος 'vomiting' (subst.). *ĝena-to- 'begotten', \sqrt{gen} : Lat. geni-tu-s; Gr.

γενε-τή 'birth, origin', made masculine γενέ-τη-ς 'begetter, off-spring' (cp. under Greek p. 229). With respect to the vowel-gradation of the stem these forms stand on a level with such others as Gr φ ερ-τό-ς, while such forms as Gr. \varkappa μη-τό-ς (beside \varkappa άμα-το-ς) no doubt correspond to the Skr. bhr-tά-.

Causative and Denominative formations: *dorki-tó- from *dorké½ō 'I bring to sight, show', \$\sqrt{derk}\$- 'see': Skr. darši-tá- 'shown' (daršáyāmī), Goth. ga-tarhi-ħ-s 'blameworthy, notorious' (ga-tarhja 'I point out, blame'). *uosi-tó-, from *uosé½ō 'to make put on, clothe', \$\sqrt{ues}\$ 'put on something': Skr. vāsi-tá- 'clothed' (vāsáyāmī), Goth. vasi-ħ-s 'clothed' (vasja). *moni-tó-, from *moné½ō, \$\sqrt{men}\$- 'think, intend': Skr. mānītá- 'honoured' (māná-yāmī), Lat moni-tu-s 'made aware, reminded, taught' (moneō); Skr. mānīta-m 'a showing honour to'. The character of the formations in the several languages is so different, that it is somewhat doubtful whether to-participles were formed from true denominatives in Indo-Germanic; ep. c. g. Skr mantri-ta- 'advised, discussed' (mantráyāmī, mántra-s), Gr. δωρη-τό-ς 'presented with, given' (δωρέω, δῶρο-ν).

In the separate languages these participles served as the model for a number of adjectives in -to- derived immediately from substantives or adjectives, and meaning 'furnished with, made into' and the like; e. g. Skr ankuritá- 'with young shoots' from ankura- 'young shoot', arunita- 'reddened' from aruni- 'red', Gr. θυσανωτό-ς 'tasselled' from θύσανο-ς 'tassel', Lat. cordatu-s from cor (cord-), atratu-s from ater, Goth. un-qēnip-s 'unmarried', from qēn-s 'woman', Lith. kalnūta-s 'mountainous' from hálna-s 'mountain', bradatū 'bearded' from brada 'beard'.

In Aryan, Greek and Italic -to- is used also as a secondary suffix, and added immediately to the noun-stem, just as if this were a verb-stem. In Aryan this only occurs in compounds, so that here -to- has the same function as -to- in adjectival compounds (see § 63 p. 126); e. g. Skr. án-ap-ta- 'not watery' from ap- 'water' Avest. hu-patar'-ta- 'well-winged' from a form *patara- 'wing' (§ 74 p. 182); cp. Lat. auro-clavatu-s,

Eng. hare-hearted, lily-livered, and the like (see under Germ. p. 234). Similarly Gr. ἀ-γέρασ-το-ς 'unhonoured by gifts, unrewarded' from γέρας 'gift of honour', ἀ-χείμαν-το-ς 'without storms, without cold' from χεῖ-μα χει-μων' 'storm, winter's cold'; but along with these we have γελασ-τό-ς from γελάω, a denom. verb from *γελας- 'laugh' (Solmsen, Kuhn's Ztschr. XXIX 109), ἀκεσ-τό-ς from ἀκέομαι, denom. from ἄκος n. 'remedy', and the like. Lat. līber-tu-s (Falisc. lofer-ta 'liberta'), from Lat. līber, sceles-tu-s from scelus -er-is. We may conjecture that the participial -to-was added immediately to noun-stems in the class of Indo-Germanic substantives in -my-to- and -μy-to-, which will be discussed separately in § 82 p. 249. This group of words undoubtedly belongs to the proethnic period.

Examples of -e-to- -o-to- are given above, p. 219, and under the separate languages below.

Arvan. Skr. cyu-tá- Avest. šū-ta- 'driven, shaken': Gr. ¿πί-σσυτο-ς 'pressing forward', ground-form *qiu-tó-. Skr. hu-táhū-tá- Avest. zū-ta- 'called upon, invoked': Goth. gu-p n. 'God' pr. Germ. *zu-đá-n n. 'a being that is called upon'. Skr. stu-tá-Avest. stu-ta- 'praised, lauded'; Skr. stutá- n. 'praise' Avest. stutu- m. 'praise, prayer'. Skr. ūdhá- 'carried', for pr. Ar. *uždhái e. *ugh+to-, Lat. vec-tu-s, Lith. vèszta-s 'carried' vegh-. Skr. drugdhá-m 'insult' Avest druxta- O.Pers. dūrūxta- 'betrayed, deceived' (cp. I § 482 Rem. 1 p. 356), \(\sqrt{dhreugh}\). Skr. -i-ta- Avest. O Pers. i-ta- 'gone': Gr. άμαξ-ιτό-ς etc., see p. 222. Skr. si-tá- 'bound' Avest. hi-ta- 'bound, seamed'. Skr. prī-tá-'beloved, dear, glad' Avest. fri-ta- beloved, kindly': A.S. fri-d O.Icel. frî-đ-r 'lovely, beautiful'. Skr. piš-tá- 'adorned, equipped' O.Pers. ni-piš-ta- 'written'. Lat. pīc-tu-s, \sqrt{peik} -. (pr. Ar.) kr-tú- Avest. kere-ta- O.Pers. kar-ta- 'made', \sqrt{qer} -. Skr. drbdhá- 'fastened, wound' Avest. der'wđa- 'a twist, braid', √ derbh-. Skr. śūr-tá- 'destroyed', Avest. a-sar'-ta- 'unhurt', ground-form *kr-tó-. Skr. ha-tá- Avest. O.Pers. ja-ta- 'smitten, slain' (cp. I § 454 Rem. p. 335): Gr. φα-τό-ς 'killed', common ground-form *ghy-tó-, A.S. zūd f. 'battle' pr. Germ. *zún-þō, √ ghen-. Skr. bhaddá- Avest. O.Pers. basta-'bound' (cp. I § 482

In Sanskrit the use of -to- was restricted by that of the parallel suffix -no-, which had a similar meaning; see § 66, 1 p. 139 ff.

Skr. -i-ta- = -9-to- occurs not only in vami-ta- (p 223) but also e. g. in vani-ta- 'loved' (aor. vani-šīṣ-ṭa), dhamı-tá- 'kindled' (fut. dhamı-ṣya-tı), carı-tá-m 'course' (inf. cári-tum).

-1-ta- in Causatives and Denominatives. Skr. vēdītá- 'informed', beside vēdāyati 'gives to understand, informs'. Avest. randīta- 'great', from rud- 'grow'. Formed directly from the noun: Skr. ankušīta- 'stung' from ankušā- 'sting, hook', karnakītā- 'having side-branches' from kārnaka-s 'side-branch', karbūrīta- 'speckled' from karbūrā- 'speckled', Avest masīta- 'great' from mas-ah- mas-an- n. 'size' (the connexion of āsīta- 'quick' with ās-u- 'quick' is uncertam), perhaps also Skr. hārītā-Avest. zaīrītā- 'yellowish' Skr. palītā- 'gray' rōhītā- lōhītā- 'red' and so forth. Like Skr. ān-ap-ta- (see above p. 224) we have also ā-manyu-ta- 'harbouring no enmity', from manyū-š 'enmīty'.

Idg. -e-to-. Skr. darś-a-tá- Avest. dar°s-a-ta- 'worth seeing', \sqrt{derk} - 'see'. Skr. yaj-a-tá- Avest. yaz-a-ta- 'worthy of honour', $\sqrt{i}ag$ - 'honour'. Skr. pac-a-tá- 'cooked', \sqrt{peq} - 'cook'. har-ya-tá- 'wished for, desired', beside hár-ya-ti 'he desires, takes pleasure in a thing'. ('p. Skr. drś-a-ti-g and the like, § 100.

Many -to- participles have quite the character of adjectives. A few examples may be given. Skr. drdhá- 'firm' (Lat. forcti-s forti-s, transferred to the i-decl., $\sqrt{dher gh}$ -), syē-tá- 'white', sī-tá- 'cold', súr-ta- clear', tṛš-tá- 'rough', tig-itá- 'sharp', redupl. vā-vá-ta- 'dear'. Avest. sar*-ta- 'cold, cool': Lith. szál-ta-s 'cold'.

Further examples of the substantival value in these forms are: Skr. $d\bar{u}$ -tá- Avest. $d\bar{u}$ -ta- m. 'messenger' (one gone into the distance'), Skr su-tá-s 'soma-juice' ('that which has been pressed out'): Skr ghāta-s 'blow, killing'; Skr. gár-ta-s 'high chair'; Avest. ka-ta- m. 'grave'. Skr. khā-tá-m 'grave'. Skr. bhak-tá-m 'food, nourishment' ('that which has been allotted'); Skr. ghī-tá-m 'fat'; Skr. r-tá-m 'right'; Skr. ás-ta-m 'home'; Skr. jīvi-tá-m 'life'; Skr. vr-a-tá-m 'will'; Avest. taš-te-m 'the implements of sacrifice'; Avest. fra-āāte-m 'help, prosperity'. Skr. sī-tā 'furrow'. O.II G. sī-ta O.Icel. sī-āa f. 'side' ('bounding line, boundary'); Skr. ak-tá 'night' (añj- 'anoint, adorn'); Avest cistā 'wisdom'. Skr cittá-m 'thought, spirit'; Avest. dī-tā- 'look'. Skr. dhī-tá-m 'thought'.

Armenian. mar-d 'man' ground-form *mq-t6-: Skr. mq-t6-etc., see above p. 222. has-t 'firm': O.Sax. fas-t 'firm', rootform Idg. pas- or pss. A doubtful form is dr-and 'door-post, threshold'. Skr. á-tā 'setting, framework of a door' Lat an-ta four-cornered door-pillar, plaster' (cp. I § 253 p. 206 f.).

In extended formations: ard-ar 'upright'. Skr. r- $t\acute{a}$ - 'right, properly made'. erd-nu-m 'I swear': Osset. ar-d ar-t 'oath', O.C.Sl. ro-ta f. 'oath'.

Greek. Here the to-participles were less closely connected with the other forms of the verbal system than in Aryan, Italic and elsewhere. They were restricted to the attributive use.

λυ-τό-ς 'that can be loosed' βου-λυτό-ς 'time when the oxen are unyoked': Lat. so-lū-tu-s, O.Icel lū-ā-r 'crushed to powder, exhausted'. ἄ-πυστο-ς 'unknown, ignorant': Skr. buddhá-'awakened, enlightened, made acquainted, known', \sqrt{bheudh} -. ζευκ-τό-ς 'yoked, put to': Skr. yuk-tá- 'yoked', Lat. jūnc-tu-s

(with n from jungo), O.H.G. gi-joht 'yoked'. TUN-TO-G 'prepared' νεό-τευχτο-ς 'newly prepared'. φυχ-τό-ς φευχ-τό-ς 'that can be escaped'. φθι-τό-5 'disappeared, dead': Skr. kši-tá- 'exhausted, decayed'. nioro-c 'trustworthy, true, trustful, trusting' ev-neioro-c 'easy to persuade': Lat. fīsu-s, V bheidh-. δρα-τό-ς δαρ-τό-ς 'skinned, flaved': Avest. der'-ta- 'cut, mown', Lith. nu-dirta-s 'skinned'. φερ-τό-ς 'bearable, φόρ-το-ς 'burden'. Skr. bhr-tá-s 'carried, sustained, hired', O.Ir. ed-bart ed-part f. 'oblatio'. γλασ-τό-ς 'shattered' (κλαδ-, aor. Hom. κλάσσαι). Lat. per-culsu-s, common ground-form *klt*tó-, i. e *kld+to-. τα-τό-ς 'ductile': Skr. ta-tá-s 'stretched, extended', Lat. ten-tu-s, common ground-form *tn-tó-s, V ten-. ἀν-εκτό-ς 'tolerable': Skr. sādhá- 'overcome' for pr. Ar *sāždhá- (I § 404, 2 p. 299), √ seĝh-. ζεσ-τό-ς 'boiled': Skr. prá-yasta-s 'boiling over', γ jes-. σεπ-τό-ς 'before which one recedes, honoured with reverence, holy': Skr. tyak-tá- 'forsaken'. är-ετο-ς 'loosened, let go': Lat. sa-tu-s, O C.Sl. na-sětŭ 'sown', √ sē- 'throw, east, sow'. α-ατο-ς 'insatiable': Goth sα-ħ-s 'sated', Lith. so-ta-s 'repletion', \sqrt{sa} -. $\xi\mu$ - $\pi\lambda\eta r\tau o$ -g 'struck, amazed' πλήκ-τη-ς 'striker': Lat. planc-tu-s with the masal of the present (plango) inserted, Lath plak-ta-s 'struck with the rod', plagplag-. *πακ-το- in πακτύω 'I make fast' πηκ-τό-ς 'fast joined πηκ-τή 'net fixed in its place'. Lat. pac-tu-s, (com-pectu-s) and pac-tu-s (? Osthoff, Zur Gesch. d. Perf. 178 f.), \sqrt{pak} pāĝ-. ἐπ-ακτό-ς 'brought in'. Lat. āc-tu-s, Gall. amb-actu-s orig. 'he who is sent about, messenger' (cp. O.Ir imm-agim 'I drive about'), $\sqrt{a\hat{g}}$. εν-ννητο-ς 'well spun, woven': Lat. nē-tu-s, common ground-form *snē-to-ε. βλη-τό-ς 'thrown, struck', cp. Skr. part. glā-na- 'exhausted, ill', Idg. glē-. πλω-τό-ς 'swimming, navigating, navigable', cp. Goth. flo-du-s 'flood' (suffix -tu-).

 $\dot{\alpha}$ -δάμα-το- ς 'unsubdued' beside $\delta\mu\eta$ -τό- ς 'subdued': Skr. dam-i-tά- 'tamed'. καμα-το- ς 'toil' beside πολύ-κμητο- ς 'wrought with toil'. Θάνα-το- ς 'death' $\dot{\alpha}$ -Θάνατο- ς 'immortal' beside Θνη-τό- ς mortal'. $\dot{\alpha}$ -δάμα-το- ς : δμη-τό- ς = φ ε ϱ -τό- ς : Skr. bhγ-tά-s, see p. 224 above.

άγαπη-τό-ς Dor. άγαπα-τό-ς 'beloved' from άγαπάω. κοσμη--τό-ς 'set in order' κοσμή-τη-ς 'orderer' from κοσμέω. χολω-τό-ς 'enraged' from χολόω. μηνί-τη-ς 'wrathful man' from μηνίω. ἀρτυ-τό-ς 'prepared, seasoned' (of meats) from ἀρτύω. πορευ-τό-ς 'wandering' from πορεύω. ἀκεσ-τό-ς 'curable' from ἀκέσμαι for 'ἀκεσ-μο-μαι. ἰμερ-τό-ς 'longed after, lovely' from ἱμείρω. ὑφαν-τό-ς 'woven' ὑφάν-τη-ς 'weaver' from ὑφαίνω. ληιστό-ς 'captured' from ληίζομαι. ὀνομαστό-ς 'that can be named' from ὀνομάζω. Examples of words formed directly from nouns are: κοντωτό-ς 'furnished with punting poles' (κοντό-ς) καρνωτό-ς 'shaped like a nut (κάρυο-ν)', words like these gave the type from which σαλπιγγ-ωτό-ς 'shaped like a trumpet' (σάλπιγγ-) and others of the same kind were formed; further, ἀ-γέραστο-ς 'without gifts of honour' (γέρας), ἀτρίβαστο-ς 'not worn, unharmed' (beside ἀτριβής), and other words.

Idg. -e-to- (cp. -e-ti- § 100). ἐλε-τό-ς 'that can be grasped'. εὐρε-τό-ς 'to be found', εἰρε-τή-ς 'inventor'. Denominative forms: ναιε-τάω 'dwell', ἀρι-δείκετο-ς 'worth seeing, remarkable'. δακε-τό-ν 'biting creature'. Cp. also ἀν-ήνυτο-ς 'that cannot be completed'. beside ἀ-νύ-ω (Skr. sa-nō-mi), πι-νυ-τό-ς 'wise' for *πυ-νυ-το- I § 48 p. 41 (cp. Skr. pu-nā-mi 'I purify, clear up'); these words therefore contain the -ney--nu- which is used in forming the present stem With -o-to-. βίο-το-ς βιο-τή 'life, livelihood': O.Ir. biad etc., see above, p. 219.

Further examples of substantives formed with this suffix are: νόσ-το-ς 'return home' · Skr. άs-ta-m Avest. as-te-m 'home' for *qs-to-m (Bartholomae, Kuhn's Ztschr. XXIX 483), O.H.G. nes-t n. 'provision for the way, support'. βλασ-τό-ς βλάσ-τη 'bud, shoot', κοῖ-το-ς κοί-τη 'couch', ἄμη-το-ς 'mowing, harvest', ἄω-το-ς 'wool, flock (of wool)', ἀλαλη-τό-ς 'battle-cry', κωκῦ-τό-ς 'wail', ἔμε-το-ς 'vomiting', ἔε-τό-ς 'rain'. φν-τό-ν 'growth', σπάφ-το-ν σπάφ-τη 'rope', πο-τό-ν 'drink'. κίσ-τη 'chest, box', είφκτή 'εφκτή 'cage, prison', βρον-τή 'thunder', ἐν-ετή 'brooch', ἀκ-τή 'rugged coast', ἀή-τη 'blast, wind', ἀῦ-τή 'shout', τελεν-τή 'ending', ἀρε-τή 'virtue', γαμε-τή 'wife', πινν-τή 'understanding'. Abstract tū- stems were employed to denote persons of the masculine gender (§ 149. 157); hence came the large class of masculines in -τᾶ-ς, like γενέ-τη-ς act. 'begetter', pass. 'he that is begotten' beside γενε-τή 'origin, birth',

and $\kappa \rho_i - \tau \dot{\eta} - \varsigma$ 'judge', $\delta \dot{\epsilon} \kappa - \tau \eta - \varsigma$ 'receiver', $\pi \rho o - \varphi \eta \tau \dot{\eta} - \varsigma$ 'interpreter of oracles, soothsayer', $\pi o i \eta - \tau \dot{\eta} - \varsigma$ 'maker, poet', $\dot{\epsilon} \dot{\epsilon} \dot{\delta} \nu \omega - \tau \dot{\eta} - \varsigma$ 'bride's father', $\dot{\epsilon} \kappa \dot{\epsilon} \dot{\tau} \dot{\eta} - \varsigma$ 'suppliant'; cp. § 80 p. 239 f.

Italic. In this group of languages the to-participles filled a larger and more important place than in any other.

Lat. i-tu-m i-tare. Umbr. etato 'itate': Skr. -i-ta- etc., see p. 222 above. Lat scrīp-tu-s, Umbr. screihtor pl. 'scripti' Osc. scriftas pl. 'scriptae'. Lat. fīsu-s, cp. Umbr Fisiu Fissiu (a derivative in -10-) abl. 'Fisio'. Gr. nioro-5, V bheidh-. Lat. mulsu-s part, molta multa 'punishment', Umb. motar gen. 'multae', Osc. moltam 'multam' pr. Ital. *molk-ta-: Skr. mrš-tá- part. of mṛṣamı 'I take hold of, touch'. Lat. or-tu-s, Umbr. ortom 'ortum' ground-form *r-to- Gr. vé(f)-opto-g 'newly arisen' xovi-opto-g 'raising of dust, cloud of dust', ground-form *\bar{r}-t\u00f6-, cp. Skr. \bar{\textit{tr-na-.}} Lat, cēnsu-s, Osc, an-censto fem. 'incensa'. Skr. šas-tá-, see p. 223 above. Lat. ēm-p-tus, Umbr. emps 'emptus' da-etom 'demptum', for the p sec I § 207 p. 174. Lith. isz-inta-s 'taken out'. Lat. usu-s, Pelign oisa abl. 'usa, consumpta', beside the pres. Lat. oetor ūtor. Lat. sanc-tu-s, Umbr. sahta sahatam 'sanctam', Osc. saahtum 'sanctum'. Lat. sta-tu-s prae-statu-s, Umbr. Prestotar (o = a, see I § 105 p. 98) gen. 'Praestatae' Osc. statúm 'statum, statutum' Staatiis 'Statius' · Skr. sthi-tá- Avest. stā-taetc., see p. 226 above Lat. piā-tu-s, Umbr. pihaz pihos 'piatus'. Lat. lēgā-tu-s, Osc. lígatúis 'legatis'. Lat. finī-tu-s; Umbr. stati-ta pl. 'statuta'; Osc, καπιδιτωμ 1, c. kapıd-ī-to-m 'ollarium' (beside Lat. capis -idis). Lat. geni-tu-s, Osc. Genetaí 'Genetrici': (ir. γενε-τή 'origin, birth'. Lat. taci-tu-s, Umbr. ta s e z 'tacitus' tasetur pl. 'taciti'.

Lat. ex-ūtu-s: Lith. isz-aũta-s 'stripped' aũ-ta-s 'rags for the feet'. ci-tu-s Skr. śi-tá-s 'excited, put in motion'. in-certu-s: Gr. ἄ-κριτο-ς 'undistinguished' (cp. I § 33 p. 33 f.). re-līctu-s: Skr. rik-tá-s rik-ta-s 'cleared, empty', Gr. ἀ-διά-λειπτο-ς 'uninterrupted', Lith. prì-likta-s 'allowed by fate, allotted'. tortu-s for *torc-tu-s: Gr. τρεπ-τό-ς 'that can be turned, moved round'. pulsu-s from pellō. tīnctu-s: Gr. τεγκ-τό-ς 'wetted, softened'. lēc-tu-s: Gr. λεκ-τό-ς 'collected, that can be spoken'. ēsu-s: O.H.G.

ās n. 'food for animals', Lith. su-ēsta-s 'eaten up' O.C.Sl. jas-to 'food', \sqrt{ed} -. ca-tu-s: Skr. $\dot{s}i$ -tá-s 'whetted, sharpened'. \ddot{u} nctu-s: Skr. ak-ta-s 'anointed'. scissu-s Gr. σ_{x} 1 σ_{x} 5 σ_{x} 6 σ_{x} 6 'split'. σ_{x} 6 'eaten up' O.C.Sl. jas-to 'food', σ_{x} 6 'eaten up' O.C.Sl. jas-to 'food', σ_{x} 6 'split'. σ_{x} 7 'split'. σ_{x} 8 'split'. σ_{x} 9 'food', σ_{x} 9

Remark 2. The ending -so-s, which had a regular phonetic origin in scissu-s vīsu-s vīsu-s vīsu-s per-culsu-s and similar forms, spread beyond its proper sphere, e.g. lapsu-s, fīxu-s, sparsu-s, mulsu-s (beside mulctu-s), cēnsu-s, hausu-s (beside haustu-s). This was furthered by the analogy of the s-perfect. The parallelism of con-cussu-s: con-cussī, laesu-s: laesī, sēnsu-s: sēnsī gave rise to fīxu-s beside fīxī, sparsu-s beside sparsī, etc On the analogy of pendō: pēnsu-s, we find in-tēnsu-s formed beside ten-tu-s (pres. tendō), ep. p. 161 footnote 2. Conversely we have com-ēstu-s instead of com-ēsu-s on the analogy of haus-tu-s ges-tu-s.

In Latin the terminations -2-to- -i-to- -e-to- became indistinguishable. moli-tu-s (molere), ali-tu-s beside al-tu-s (alere), pī(n)si-tu-s beside pī(n)su-s (pīnsere), O Lat. ad-gretu-s for *-gred(i)-to-s (I § 501 Rem. 2 p. 368) beside ad-gressu-s (ad-gredī); moni-tu-s (monēre); habi-tu-s (habēre); domi-tu-s (domāre), veti-tu-s beside vetā-tu-s (vetāre), im-plicitu-s beside im-plicātu-s (im-plicāte). Cp. the abstract nouns in -itiō § 100.

prīvā-tu-sa mā-tu-s etc. olētu-m 'ordure', monē-ta. vestī-tu-s, fīnī-tu-s etc. statū-tu-s, tribū-tu-s etc. Participles were formed directly from nouns more frequently in Italic than in the other groups of languages: ānsā-tu-s from ānsa, barbā-tu-s from barba, ātrā-tu-s from āter, aurī-tu-s from auri-s, cīnctū-tu-s from cinctu-s (gen. cinctūs) and, by a further transference of ending, e. g. gradātu-s from gradu-s (gen. gradūs), arcuātu-s from arcu-s (gen. arcūs), dentātu-s from dēns (gen. dent-is), galērītu-s from galēru-s, patrītu-s from pater, nāsūtu-s from nāsu-s. An isolated example has -ōtu-s: aegrōtu-s from aeger (stem aegro-). -to- is also added immediately to the stem as a secondary suffix; e. g. liber-tu-s Falisc. loferta 'liberta', jus-tu-s, sceles-tu-s, Umbr. mersto 'iustum' = *mers-(e)s-to- *med-(e)s-tofrom mer-s mers 'ius', Lat. onus-tu-s, vetus-tu-s, über-tu-s, senec-tu-s; often to denote places which contain anything, as arbus-tu-m, carec-tu-m, virgul-tu-m. Hence come also the

adjectives in $-\bar{o}nsu-s$ $-\bar{o}su-s$, as $form\bar{o}(n)su-s$ $v\bar{v}r\bar{o}su-s$, for -ouensso-i. e. -o-upt+to- (see I § 238 p. 199 f., § 501 p. 368, II § 127): cp. Avest. $a\bar{s}avasta-$ 'pure, upright' (n. 'purity, uprightness' from $a\bar{s}a-vant-$ 'possessed of purity, pure, upright'.

Adjectives. Lat. sanctu-s Umbr. sahta Osc. saahtúm, see p. 230 above. Lat. citu-s, catu-s, curtus, stlātu-s latu-s 'outspread, wide' (for *stl-to-, cp. O.C.Sl. stelja 'sterno'), ex-celsu-s, pēnsu-s, at-tentu-s, altu-s, beātu-s argūtu-s, and other examples.

Substantives. Lat. lēgātu-s Osc. lígātúís 'legātis'; Lat. hortu-s Osc. húrtúm. Gr. χόρ-το-ς 'grass, place for grazing, courtyard', O.Ir. gor-t 'seges' lub-gort 'vegetable garden' (cp. I § 389 p. 291); Lat. lectu-s lectu-m 'lying-place', lutu-s lutu-m, cubitu-s, palātu-s palātu-m. Lat. dictu-m, jussu-m, strātu-m, tēctu-m, in-cestu-m, olētu-m. Lat. multa Umb. motar Osc. moltam, see p. 230 above, Lat. Vesta, of-fēnsa, im-pēnsa, re-pulsa, sub-sessa, secta, fossa; Umbr. totam 'civitatem'. Osc. tovto τω το 'civitas' pr. Ital. *toutā-: O.Ir. tuath f. 'people', Goth. piuda 'people', ground-form *teutā-, ν teu- 'tumere'

Old Irish. The participal -to- still survives as a verbal suffix, in the preterite passive, a periphrastic formation which is only found in the 3. sing. and 3 pl. (the verb substantive has been dropped). ro alt 'educatus est' (alim 'educo'): Lat. al-tu-s. ro chēt 'cantus est' (canim 'cano'): Lat. can-tu-s. do-breth Mid.Ir. 'datum est' (do-biur 'I bring, give'): Skr. bhīg-tá- etc. ro fess 'scitum est': Skr. vittá- etc. ro both 'one was': Gr. qv-ró-v 'growth' Lith. bù-ta-s 'dwelling, house' Skr. bhū-tá- 'become'. ro chloss 'auditum est', \sqrt{kley-s-. ro erbad 'commissum, creditum est' beside pres. 3. sing. erbaid 'credit'. This group of forms no doubt sprang from the impersonal use of the neuter.

In some words the old participial form has a purely adjectival value. necht 'pure': Skr. nik-tá- 'washed', Gr. ά-νιπτο-ς 'unwashed'. cloth 'famed': Skr. śru-tá- etc., see p. 221 nocht 'naked': Goth. nuqap-s. gnāth 'known, accustomed': Skr. jnā--tá- etc., see p. 221. Generally the participles which were used as adjectives were not also used as the pret. pass., cp. cloth beside ro chloss.

The participial meaning still survives in -the, an extension of the suffix by -io- (cp. Gr. αμβρόσιο-ς: αμβροτο-ς, Skr. mártiya-: márta-, O.H.G. wīsi 'wise' Mid.H.G. sīhte 'shallow'). brithe brethe 'brought': Skr. bhr-tá-. cete 'cantus'. er-ite 'susceptus' beside 3. sing. pres. conj. -air-ema 'suscipiat': Lat. ēm-p-tu-s, tuicse 'electus' beside to-gu 'choice', from -gus-t-izo-: Skr. juš-tá- júš-ta- 'beloved, desired', Gr. yevo-vo-5 'tasted, to be tasted', A.S. ze-cost 'valuable' √ geus-. Sometimes the idea of capacity, possibility is implied, as in rithe 'vendible' (also 'sold, given up') beside re-nim 'I give up, sell', di-brithe 'importabilis'. There is certainly a connexion between the use of -the-forms as participles, and the conversion of the predicative -to-participle into a preterite passive. Preference was given to the existing -tio-forms in order to make a distinction in form answering to the distinction in sense; and then new -t10-forms were made at will and used as participles. The same thing happened in Cymric, only the suffix employed there for the participles was not -t-10-, but -(e)tic which came from -t-īco- (Zeuss-Ebel, Gr. C. p. 532).

On the other hand, we have the simple -to- -ta- in partec. used as substantives. yor-t m. seges': Gr. χόρ-το-ς, see p. 232 above. mlicht blicht m. (Mid.Ir.) 'milk': Lat. mulcto- etc., see above p. 222. der-met n. 'a forgetting': Skr. ma-tá-m, see p. 222 above. nemed (Gall. neme-to-n) n. 'sacred thing' ('something honoured'), \sqrt{nem} . dliged n. 'law'. biad n. 'means of livelihood': Gr βίο-το-ς βιο-τή 'life, livelihood' etc., see p. 219 above. both f. 'dwelling-place, hut'; cp. above ro both. loth f. 'filth'. Lat. lu-tu-s lu-tu-m. breth f. 'judgement, sentence'. im-thecht f. 'going round, change'. ed-bart ed-part f. 'oblatio'.

Cp. Gall. amb-actu-s 'bondman, servant' orig. 'one sent about, messenger' (see p. 228), Celtu-s Crestu-s Ate-gnatu-s Ate-gnata, Γαισατοι pl. ('pilati'), Sematu-s Cirata, and many similar forms.

Germanic. -to- was a living participial suffix in derivative verbs (Causative and Denominative), e. g. Goth. nasip-s O.H.G. gi-nerit 'saved' from nasjan nerien 'to save'; Goth. ga-tarhip-s 'blame-worthy, notorious' from ga-tarhjan 'to mark out, blame': Skr. daršitá- 'shown'; paúrsip-s 'thirsty' from paúrseip mik 'I am

thirsty', lit. 'it thirsts me': Skr. tršitá- 'thirsty'; Goth. salbob-s O.H.G. qi-salbot 'anointed' from salbon 'to anoint'; Goth. habáip-s O.H.G. gi-habēt 'had' from haban habēn 'to have'. Further in Gothic, we have such partee, attached to the preterite-presents, e. g. mund-s 'meant, thought' beside man 'I think, mean': Skr. matá- etc., skuld-s 'owed' beside skal 'I ought, maht-s 'able, possible', beside mag 'I can'. Lastly they occur in certain strong verbs which have preterites in -ta, e g Goth, vaurht-s O.H.G. m-world -woraht beside Goth. vairkjan O.H.G. wurchen 'work': Avest, varšta- 'worked, done' Gr. a-ggento-g 'undone' V yer-g-, Goth. *būht-s () II.G. qu-dāht (pr. Germ *buny-ta-, I § 214 p 181) beside pugkyan dunken 'to seem', Goth. *braht-s O.H.G. braht (pr. Germ. *brawy-ta-) beside briggan bringan 'to bring'. In all other cases -eno- -ono- was the participial suffix in use (§ 67 p 149 ff), and in O.H.G it appears also in preteritepresents (gi-wizzan from weiz 'I know', gi-torran from gi-tar 'I dare', and occasionally in the strong verbs with t-preterites (brungan, side by side with braht).

The suffix also formed participles directly from nouns. Goth. un-qēnip-s 'not having a wife', from qēn-s 'woman'. O.H.G. gestirnōt 'having a brow or front' from gistirni gestirne n. 'brow', Mid H G. ge-jāret 'aged' lit. 'be-yeared'. O.Icel. hærā-r 'covered with hair' In the developement of Anglo-Saxon and Norse there appears a special group of adjectival compounds derived in this way, e. g. Engl. hare-hearted, hare-lipped, bare-footed, bare-headed, O.Icel. bjart-litaā-r 'bright-coloured', sex-hofāaā-r 'six-headed', gull-bitlaā-r 'with golden bridle': cp. Skr. án-apta-'not watery' Lat. auro-clāvātu-s p. 224.

Idg. -e-to- is no doubt to be traced in O.H.G. hulid n. 'velamentum', egida f. 'harrow' (: Mod.Cymr. oged O.Corn. ocet 'harrow') and other words. -o-to- in Goth. naqap-s beside O.Icel. nekkveð-r nekkvið-r O.Ir. nocht 'naked' (cp. Skr. nag-na- with the participial suffix -no-), Goth. liuhap n., side by side with O.H G. lioht n. 'light'.

It is common in adjectives. Further examples are: Goth. vun-d-s O.H.G. wunt 'wounded': Gr. Fazo- in Fazálau. o'laí

(Hesych.). Goth. bi-ūht-s 'accustomed': Lith. j-ùnkta-s 'accustomed' (cp. Osthoff, Paul-Br. Beitr. VIII 269). O.H.G. zorah-t O.Sax. torht toroht 'clear, bright': Skr. dṛṣṭá-s 'seen', common ground-form *dṛk-tó- Goth. faúrh-t-s O.Sax. forht 'timid'. O.H.G. zar-t 'dear, fine, beautiful' beside Skr. ā-dṛta-s 'considerate, treated with consideration, honoured'? Goth. kal-d-s O.H.G. kalt 'cold': cp. Lat. gelu, O.C.Sl. gol-oft 'ice' 1). Goth. raih-t-s O.H.G. reht 'right': O.Pers. rāsta 'upright, just' (for *rāšta- 'on the analogy of forms with raz-), Gr. òvertó-s 'extended, outstretched', Lat. rēctu-s, ground-form *rēk-to-, \(\sigma reg-\). Goth. bairh-t-s O.H.G. beraht 'bright'. O.H.G. lioh-t 'beaming'. Goth. dáu-p-s O.H.G. beraht 'bright'. O.H.G. lioh-t 'beaming'. Goth. haf-t-s O.H.G. haft 'captured, fettered': Lat. cap-tu-s.

Substantives. Goth. mō-b-s (stem mō-da-) 'anger' O.H.G. muot m. 'spirit, mind, courage', beside O.C Sl. sŭ-më-ti 'to dare'. A.S droh-t m. 'work' O.Icel. prott-r 'strength', cp. O.H.G. drucchen 'to press'. O.H.G. haf-t m. n. A.S haeft m. O.Icel. hapt n. 'bond, fetter', cp. Goth. haft-s 'captus'. O II.G. O.Sax. fros-t A.S. forst m O.Icel. frost n. 'frost', beside O.H.G. friosan 'to freeze'. O.H.G. gi-waht m. 'mention, fame', beside gi-wuog 'he made mention of: Skr. uk-tú- 'spoken', \(\sqrt{yeq-.} \) O.H.G. mor-d n O.Icel. mord n. 'murder, killing': Skr. my-tá-m- 'death. Goth. gul-b O.H.G gold n. 'gold': Lett. fe'l-t-s O.C.Sl zla-to 'gold', √ ghel- 'to shine with a yellow gleam'. O.H.G. pro-d n. O.Icel. brod n. 'broth': Lat. de-fru-tum -frutu-m. Goth. piu-p O.Icel. pjod n. 'good' (subst.). Goth. hliu-p 'listening to, attention, silence' O.Icel. hlyvd n. 'hearing, sound': Avest. srao-te-m, see p. 221 f. O.H.G. ferid n. 'navigium' zimbrid n. 'building'. Goth. skanda O.H.G. scanta f. 'shame' beside the adj. O.H.G. scan-t 'ashamed' (cp. O.H.G. scama 'shame'). O.H.G. wun-ta 'wound', beside wunt 'wounded', scar-ta 'notch, wound', beside scart 'injured, mutilated', forah-ta 'fear', beside Goth. faurht-s

¹⁾ Do the last two words, zart and kalt, come from Idg. *df-to*gf-to- or *dor-to- *gol-to-? There is the same doubt as to O.H.G. scar-t
'injured, mutilated'.

'fearful, timid'. Goth. ras-ta 'a length of road' O.H.G. rasta 'rest, repose, a length of road'. O.H.G. slah-ta 'killing, slaughter'. A.S. zūd f. battle' pr. Germ. *zún-pō: Skr. ha-tá- 'slain'. Goth. us-fartō f. (n-decl.) 'a going out' (usfarpōn gatáujan us skipa i. c. 'to suffer shipwreck'). Goth pu-da O.H.G. diota 'people': Osc. tooto etc., see p 232 above.

Balto-Slavonic

In Lithuanian the to-participle is still in regular use with a passive sense in verbs of all classes. gir-ta-s 'famed': Skr. gūr-ta-s 'approved, welcome, pleasant', ground-form *gr-to-and *gr-to-. pil-ta-s 'poured, shed': Skr. pūr-tá-'filled', ground-form *pl-to- and *pl-to- kirsta-s 'hewn' (pres. kert-ù): Skr krtta-s 'cut off, split', ground-form *grt^s-tó-, \sqrt{qert-. sùk-ta-s} 'turned' (pres. suk-ù). at-sèkta-s 'traced out, found out': Lat sec-ta sectūrī. dĕ-ta-s 'laid' (pres. dedù) Skr. -dhi-ta- etc, see p. 223 above. jēszkó-ta-s 'sought' (pres jēszkau). pa-veizdéta-s 'examined, revised' (pres. pa-véizdmi). táiky-ta-s ('properly united' (pres. táikau). áuksin-ta-s 'gilded' (pres áuksinu). balnú'-ta-s 'saddled' (pres. balnú'ju). Also act.-intrans, but only rarely, as bú-ta neutr. 'been', e g. czión yrà bútu 'people have been here' '1) Skr bhū-tá- 'become' važiú'-ta-s 'riding (in a carriage)' (pres. važiú' u' I ride').

Partec. in -è-tu-s and -ù-ta-s are often formed directly from nouns. dùlkėta-s 'dusty' from dùlkes pl. 'dust'. skylėta-s 'perforated' from skylė 'hole'. kalnū'ta-s 'mauntainous, full of mountains' from kálna-s 'mountain', gaurū'ta-s 'with delicate hair' from gauraī pl. 'delicate hair'. asū'ta-s 'with a handle' from asà 'handle', lúpūta-s 'lipped' from lúpa 'lip'.

In Old Church Slavonic -to- was but little used as a participial suffix. It occurs regularly in forms from roots ending in a nasal, e. g. žę-tŭ 'hewn, mown': Lith. giñ-ta-s 'hunted, driven' (used of cattle), Skr. há-ta-s etc., see p. 225 above; pę-tŭ 'stretched, hung': Lith. pin-ta-s 'twisted'; ję-tŭ 'taken':

¹⁾ Jis rādo svētimo būta 'he found that there was a stranger' properly 'the existing of a stranger', with the same nominal construction as the passive participles have.

Lith. im-ta-s 'taken'. Besides these, it occurs in certain roots with ri, i, e before the suffix, e. g. pro-stritu 'outstretched': Skr. sty-ta-s etc., see p. 222 above; vi-tu 'wounded': Lith. vý-ta-s 'twisted' (of cords), pe-tu 'sung'. Elsewhere -eno- (-no-) was the usual form, see § 67 p 151 and p. 154 f.

Partec. in -a-tŭ, from nouns, are common. bradatŭ 'bearded' from brada 'beard': Lat. barbātu-s, cp. also Lith. barzdűta-s. rogatŭ 'horned' from rogŭ 'horn': cp. Lith ragŭta-s. ženatŭ 'having a wife' from žena 'woman'. mažata 'maritata' from mažī 'man'.

-e-to- -o-to- in Balto-Slavonic The former is sometimes found in Slavonic, as O.C.Sl. trep-etũ 'tremor' Little-Russ. trep-eta 'aspen'; O.C.Sl. kreċ-etũ 'cicala'. -o-to-: Lith. gyvatà 'life, livelihood'. O.C.Sl. životũ 'life, living being': Gr. β/ο-το-ς etc., see p. 219 above; Lett. luppata-s 'patch, shred' (lup-t Lith. lùp-ti 'to pare, flay'); Lith. sùkata 'giddy sickness (of sheep)' sùk-ti 'to turn'), adatà Lett addata 'needle' (Lith. ad-ýti 'to stitch'); O.C.Sl. klokotũ 'bubbling' (subst.), klopotũ 'noise' Pol. klopot 'unrest', Czech blekot 'yelping' (subst.) (O C.Sl. blekotati 'to bleat' Russ. blekotat 'to stammer'), dusot 'roar', sikot 'hiss', lakota 'eager desire'.

In Adjectives it is common. Lith spista-s 'pressed, thick' (beside spintù spisti 'to fly out in swarms', of bees). Lat. spissu-s. Lith. skýs-ta-s 'with a thin stream', dialectically also 'pure, clear' of liquids, skáis-ta-s 'clear, shining', O.C.Sl. čis-tŭ 'pure, holy', beside Lith. skédžiu 'I part, separate, rarefy'. Lith. gel-ta-s O.C.Sl. žlŭ-tŭ (pr. slav. *gŭl-tŭ) 'yellowish'. Lith. szál-ta-s 'cold': Avest. sar'-ta- 'cold'. tvìr-ta-s 'firm'. drui-ta-s 'firm, lasting', cp. no doubt O.H.G. trū-t 'beloved, dear' and trūžn 'to trust, believe'. pik-ta-s 'angry'. bál-ta-s 'white'. rūksz-ta-s 'sour'. kársz-ta-s 'hot'. áuksz-ta-s 'high'. O.C Sl. tlŭs-tŭ 'fat'. žestŭ žestokŭ 'hard', no doubt orig. 'burnt', for *gek-s-to- beside žegą 'I burn' (cp. I § 545 p. 400). is-tŭ 'certain, true'. lju-tŭ 'violent, grim, terrible'. čçŝ-tŭ 'thick': Lith. part. kimsz-ta-s 'stuffed', (kemszù 'I stuff'). otŭ-vrīstŭ 'opened, open' (otŭ-vrīza 'I let loose, open'). u-veṣ-tŭ 'wreathed, crowned' (u-veza 'I wreathe, crown').

In substantives. Lith. pirsz-ta-s O.C.Sl. pris-tu 'finger' ground-form *prk-to-s, cp. no doubt Skr sprš-tá-s 'touched'. Pruss. gei-t-s acc. gei-ta-n 'bread' O.C.Sl. ži-to 'fruit, corn', common ground-form *gez-to-: A.S. cī-đ m. O.Sax. kī-th m. or n. Mid.H.G. kī-t n. 'offspring' pr. Germ. kī-pa-, \(\sqrt{gei-} 'live, \) come to life'. Lith, sé-ta-s O.C.Sl, si-to 'sieve'. Lith, var-tai pl., O.C.Sl. vra-ta (pr. Slav. *vor-ta) n. pl. 'door', beside Lith. vér-ti O.C.Sl. vrčti 'to shut'. Lith. güsz-ta-s güsz-tù 'nest of fowls and geese': Skr. gudhá-s 'hidden', common ground-form * $ah\bar{u}\hat{a}h + to$, or the Skr. word may come from * $ahu\hat{a}h + to$. til-ta-s 'bridge'. mil-tai pl. 'meal' tvár-ta-s 'enclosure'. smars--tu-s 'stench' (smard-). spar-ta-s 'bond'. žlaūk-tai pl. 'husks'. lëp-ta-s 'footway', laîp-ta-s 'scaffolding, gangway'. maîsz-ta-s maisz-ta 'uproar': Gr. μῖκ-τό-ς 'mixed'. sósta-s 'seat' beside sédmi. gel-tà 'yellowness', beside gel-ta-s 'yellow'. bank-tos pl. fem. 'violence, tempest', beside bank-ta-s 'violent' (bangà 'wave'). sru-tà filthy liquid': Skr. sru-tú-s 'flowing'. nasz-tà 'burden'. vasz-tà 'cart'. bras-tù. 'wadıng through, ford' (bredù). O.C.Sl. podŭ-jetŭ grasp, support' beside parte. 1etu. lis-tu leaf'. otu-vetu 'answer', cp. Pruss. way-te 'parley, conference'. mos-tu 'bridge'. mlatu 'hammer' (pr. Slav. *mol-tŭ). sŭ-vito 'linen' beside parte. vi-tŭ. ias-to 'food': Lat. ēsu-s etc., see p. 230 f. le-to 'summer, year' orig. 'rainy season', cp. Lith. lè-tu-s ly-tù-s 'rain' 'fetter', beside the parte. pe-tu. vrista 'position, stage, age': Skr. vrttá-m, see p. 222 above. krasta (pr. Slav. *kors-ta-) 'itch, scab': Lith. karsz-ta-s 'combed, curried'. pe-ta 'heel'.

§ 80. 2. -ta- as a secondary suffix, forming abstract substantives 1).

The suffix -ta- which, as we have seen, formed primary abstract substantives in the proethnic and later periods, as Avest. cis-ta- 'wisdom', Gr. ἀρε-τή 'virtue', Lat. multa 'punishment', O.Ir. ed-bart f. 'oblatio', Goth. skan-da 'shame', Lith. gel-ta 'yellowness', O.C.Sl. vris-ta 'position, stage', (see § 79), had also begun to

G. Bühler, Das Griechische Secundärsuffix της, Göttingen 1858.
 H. Ebel, Die Masculina auf. -της, Kuhn's Ztschr. IV 155 ff. Brandstaeter, Die paronymis Craecis in -ιτης, Danzig 1852.

be used in the proethnic period as a secondary suffix, and formed abstract substantives from substantives and adjectives alike. It seems to have been even then extended to -tat--tati- (§ 102), and in some languages it was partly or wholly superseded by this suffix or by -tat-(i)- (see loc. cit.).

-tā- was fertile in Aryan, Greek, Germanic, and Slavonic. Indo-Germanic. Lat. juven-ta, Goth. junda 'youth' pr. Germ. *juyun-dō, ground-form *zuyy-tā, beside Skr. yúvan-'young, young man' Lat. juven-; cp. *zuyy-ta-s, § 101. Before -tā-, o-stems had either -o- or -e-; the difference was doubtless connected with a difference in accent (cp. especially Germ. -é-pō- and -e-đō-). Skr. pūrna-tā- 'a being full, fullness', O.H.G. fulli-da O.Sax. fulli-tha O.C.Sl. plūno-ta 'fulness', beside Skr. pūrná-s Goth. full-s O.C.Sl. plūnō 'full'; Skr. ghōra-tā- 'awfulness', Goth. gáuri-tha 'trouble, beside ghōrá-s 'awful' gáur-s 'troubled'; Skr. kṛṣṇa-tā- O.C.Sl. ċrīno-ta 'blackness', beside kṛṣṇá-s, ċrīnū 'black', Skr. dīrgha-tā- O.C.Sl. dlūgo-ta 'length', beside dīrghā-s, dlūgū 'long'.

Aryan. Skr. $d\bar{e}v\acute{a}-t\bar{a}$ - 'divinty' from $d\bar{e}v\acute{a}-s$ 'god'. $nagn\acute{a}-t\bar{a}$ - 'nakedness' from $nagn\acute{a}-s$ 'naked', cp. O.C.Sl. nago-ta 'nakedness'. $av\acute{t}\cdot a-t\bar{a}$ - 'want of sons, or children' from $a-v\acute{t}ra-s$ 'without sons, or children'. Avest. $yesnya-t\bar{a}$ - 'adorableness' from yesnya- 'adorable'. Skr. $bandh\acute{u}-t\bar{a}$ - 'relationship' from $b\acute{a}ndhu-\check{s}$ 'relative, relationship'. $ay\acute{v}-t\bar{a}$ 'want of cattle' from $\acute{a}-g\bar{o}$ - 'without cattle', cp. Gr. $no\lambda v\acute{p}o\acute{v}\tau \gamma-s$ 'one rich in cattle'. $apraj\acute{a}s-t\bar{a}$ - 'want of offspring' from $\acute{a}-pra-jas$ - 'without offspring'.

Greek. Here these abstract substantives were used of persons (ep. Skr. $d\acute{e}v\acute{a}$ -ta- 'divinity' then 'deity, god', O.C.Sl. juno-ta 'young man', orig. 'youthfulness'); and they were altered to look like masculines by a change of form in the nom. and gen. sing., just as $\gamma \epsilon \nu \epsilon \tau \dot{\eta}$ became $\gamma \epsilon \nu \epsilon \tau \dot{\eta}$ - ϵ (see § 79 p. 229 f.). It is now impossible to distinguish the forms in which this change first took place and which then served as models for the rest. The feminines in -ta in their abstract meaning fell out of use in prehistoric times, replaced no doubt by forms in -tat-; compare e. g. $\beta u \rho \dot{v}$ - $\tau \eta \tau$ - $\alpha \epsilon$ 'weight' with Skr. guru-tat-

'weight', Goth. kaúriþa 'burden', βραδύ-της -τητ-ος (also -τής τῆτος) 'slowness' with Skr. mṛdu-tā- 'softness'. The following are examples of this change to the masculine gender:—

ἀγρό-τη-ς 'dweller in the country' from ἀγρό-ς, δημό-τη-ς 'fellow demesman' from δημο-ς, iππό-τα 'charioteer' (-τα is the vocative form, which was also used as nominative, see the Author Morph. Unt. II 199 f Fleckeisen's Jahrbb. 1880 p. 660, G. Meyer Gr. Gr.² 318) from iππο-ς. οἰκί-τη-ς 'member of one's household' from οἶτο-ς, which served as the type for εννέ-τη-ς 'sharer of one's bed, husband', beside εννή and the like. πολν-βονίτη-ς 'one rich in cattle' from βονί-ς. ναν'-τη-ς 'sailor' from ναν-ς.

The primary and secondary formations had two points of contact. First, e. g. $oini-r\eta$ - ς and $\gamma \varepsilon \nu \dot{\epsilon} - \tau \eta$ - ς had the same ending $-\dot{\epsilon} \iota \eta$ - ς ; and secondly certain of them could be regarded equally well as denominative or as participal formations, e. g. $\kappa o \varrho \nu \sigma - \tau \dot{\eta}$ - ς 'helmed, armed man, warrior' $\kappa \varepsilon \varrho \dot{\alpha} \sigma - \tau \eta$ - ς 'horned creature, ram' $\alpha \dot{\epsilon} \chi \mu \eta - r \dot{\eta}$ - ς 'javelin-thrower'.

Italic Examples are rare juven-ta (see above, p. 239) and its opposite senec-ta, Majes-ta Vulcan's consort. It is clear that -tat(i)- and -tūt(i)- have spread at the expense of -ta-.

Latin perhaps, as well as Greek, may have had masculines in -ta-: eques equits like $i\pi\pi\delta$ - $\tau\alpha$ and the like. See on this point § 123 Rem. 1.

Germanic. All the forms excepting Goth. jun-da (see above, p. 239) had -ipō- or -idō-. (the latter is rare, e. g. Goth. áupida 'wilderness' from áup-s 'waste, desolate'). -i- represents the Idg. -e- of the o-stems; but here and there Idg. -i- may have been the original sound, as in O.H.G. gi-meini-da 'community' beside Goth. ga-maini- 'common, communis'. Even in proethnic Germanic -ipō- (-idō-) was transferred to other classes of stems, e. g. to those in -u-; the word jun-da escaped this change merely because the stem from which it was derived (= Skr. yúvan-) had fallen out of independent use.

These abstract substantives were far more frequently derived from adjectives than from substantives.

Goth. vargipa 'damnation' from varga- m. O.H.G. warg m. 'outlawed criminal, banished evildoer'. Goth. veitvodipa 'evidence' from veitvop-s 'witness'. A.S. äyft O.Icel. pyft 'theft' from deof pjof-r 'thief'. Goth. háuhipa O.H.G. höhida 'height' from háuh-s hoh 'high'. O.H.G. heilida O.Icel. heilt 'health' from O.H.G. heil O.Icel. heilt 'healthy'. Goth. niujipa 'newness' from niuji-s 'new'. fairnipa 'age' from fairnei-s 'old'. tulgipa 'safety, fortification', from tulgu-s 'firm'.

In West-Germanic and Norse -ipō- was associated with the verbs in -jan, since verbs of this kind were often connected with the nouns from which the -ipō- forms were derived and -i- was a characteristic mark of their conjugation, cp. e. g. O.H.G. hōhida beside hōhen (Goth. hauhjan) 'to exalt'. Hence arose analogical primary formations, which were most common in High German, as O.H.G. gi-hōrida 'hearing' formed from gi-hōren (Goth. ga-hāusjan) 'to hear', ir-lōsida 'release' (subst.) from ir-lōsen (Goth. us-lāusjan) 'to release'. Later on these were formed from other verbs than those in -jan; as O.H.G. far-manida 'contempt' from far-manōn, gi-habida 'bearing, behaviour' from gi-habēn, ant-findida 'feeling' from ant-findan.

Balto-Slavonic.

In Lithuanian -tā- is quite rare in this use, e. g. sveika-tà 'health' from sveika-s 'healthy'. Possibly -tà was not pure Lithuanian, but borrowed from Slavonic; cp. nogatà (någatà) 'nakedness' from Pol. nagota, siratà 'orphan' from Pol. sierota Little-Russ. syrota.

Old Church Slavonic. rabota 'servitude' from rabü 'servant', gnusota 'dirtiness' from gnusü 'dirt', sramota 'shame' from sramü 'shame'. dobrota 'goodness' from dobrü 'good', pistrota 'motley colouring' from pistrü 'motley', bėlota 'whiteness' from bėlü 'white', šestota 'hardness' from šestü 'hard'. Some have become 'concrete: sirota f. 'orphan', orig. 'bereavement', from sirü 'bereaved, orbus' and junota m. 'young man', orig. 'youth' from junü 'young'. Cp. above, p. 239, Gr. åγφό-τη-ς etc., and § 157.

§ 81. 3. -to- as a Suffix of Comparison. This class includes the -to- of the ordinal numerals, and the superlative -is-to- which is an extension of the primary comparative-suffix -ies- (§ 135).

An extension of -to- by -mo- forms the superlative-suffix -typmo-, which was discussed in § 73 p. 177 ff.

Indo-Germanic. The numerals in this period had sometimes -mo- (§ 72, 2 p. 166 ff.), sometimes -to-, sometimes perhaps both forms, e. g. *dekmmo- and *dekmto- 'tenth'. The latter form was the original of Gr. δέκα-ro-ς, Goth. taihun-da, Lith. deszim-ta-s O.C.Sl. desę-tŭ. Skr. cathur-thá-s, Gr. τέταφ-το-ς τέτφα-ro-ς, Lat. quar-tu-s for *ctvar-to-s, O.H.G. fior-do (n-stem), Lith. ketviř-ta-s O.C.Sl četvrĭ-tŭ 'fourth'. Skr. šaš-thá-s, Gr. έκ-το-ς, Lat. sex-tu-s, Goth. saihs-ta (n-stem), Lith. szēsz-ta-s O.C.Sl. šes-tŭ 'sixth', cp. I § 589 Rem. 2 p. 446. Gr. εἰκοσ-τό-ς Boeot. fixaσ-τό-ς 'twentieth' contrasted with Avest. vīsaṣ-tema- Lat. vīcēnsimu-s, see above, p. 177.

Remark 1. *de·hm 'ten' has the parallel form *dehmt (Skr. daśdi-f. 'decade', Goth. taihun, Lith. dāszīmt, pl dāszīmt-s, O.C.Sl. pl. deset-e, see I § 244 p 202, § 664, 2 p. 522, II § 123); this naturally suggests the comparison, *dehmto-s:*dehmt = *dehmmo-s:dehm. Cp. p. 167 Rem. And it can hardly be denied that this -to- and the -to- of the cardinal numeral *hmtó-m 'hundred' (Skr *atá-m etc.) are identical. I should have more confidence in suggesting this view of *dehmto-, but that the -to- of the ordinal numerals may also be the participal suffix; the tenth might be, so to speak, the be-ten-ed (cp. Skr. án-ap-ta- etc. p. 224), i. e. 'he to whom the number ten has been assigned in an enumeration'.

With the numerals proper is connected Skr. kati-thá-s 'which (in a series)?' beside káti Avest. caiti 'how many?', Lat. cottī-diē for *cust(i)-tei- (loc.) 'on a day of whatsoever number, on which day soever, every day beside quo-t for *quo-ti (I § 655, 1 p. 501). Cp. I § 501 Rem. 2 p. 368 § 633 p. 474. It is formed in the same way as Skr. višati-tamá-s 'twentieth'.

-is-to-, in the proethnic language, was the usual superlative ending where the comparative was formed in-ies-. *hoghisto-s: Skr. lághistha-s 'nimblest, smallest', Gr. ελάχ-ιστο-ς 'smallest'. Skr. sodd-ištha-s Gr. ηδ-ιστο-ς Goth. sut-ist-s 'suavissimus'. *plēisto-s 'plurimus' i. e. *plē+isto-: Gr. πλεϊστο-ς; as regards Avest. fraešta-

O.Icel. flestr see p. 244. 247 f. The root-syllable had originally the weak form of Ablaut, and -to- was accented; this is shewn on the one hand by Gr. **xpair-1070-5*, beside **xpairon** **xpairon**, dl/y-1070-5*, beside dleifun and the like, on the other hand by Skr. **jyësthá-s kanisthá-s and O.Fries. lērest, with r for pr. Germ. z, beside lēssa and the like (see Kluge, Paul-Braune's Beitr. VIII 519 ff., Wheeler, Der griech. Nominalacc. 40 f.); cp. also the accentuation of -to- in numerals like Skr. catur-thá-s Gr. **elxoa-ró-5*, O.H.G. **sibun-to* (pr. Germ. **-dő). In the separate branches of language, both the vocalism and the accentuation of these superlatives were influenced more or less strongly by the comparative forms, themselves at the same time reacting upon the latter.

The new suffix -isto- was primary to start with, like the comparative -ies-. But in all the different branches in which it was fertile, i. e. in Aryan, Greek and Germanic, it was very soon used along with -ies- as a denominative (cp. § 58 p. 106 f.).

Aryan. In Sanskrit we find -tha- and -ta-, and (always with the aspirate) -ištha-. In Avest. -tha- is represented by pux-da- 'fifth' (cp. Skr. panca-tha-) and hapta-pa- 'seventh' (Skr. sapta-tha-). -tha- therefore certainly dates from proethnic Aryan. Cp. I § 475 p. 350 f.

Remark 2. I cannot follow those who would infer from this another proethnic suffix -tho-, so long as no undoubted example of the aspirate has been found in the European branch. Whence comes the aspirate in Gr. loisfo-; 'last'? — The question of the Indo-Germanic Tenues Aspiratae is not decided even by Moulton's essay, ingenious as it is, in the American Journal of Philology VIII 207 ff., since he is only concerned with the evidence in Greek. What, for instance, do we gain by deriving Gr. réagro-s from *rerag-So-s and thus reconciling it with Skr. catur-thd-s, if all the while Lat. quar-tu-s is left out of consideration? (Moulton p. 208.) Why is not the Latin word *quarbus, with b for pr. Ital. p?

-ta- occurs e. g. in Skr. tr-t-tya- Avest. pri-t-ya- O.Pers. ŝi-t-iya- 'third'; beside which we have also Skr. tri-tá-s (on which tr-t-tya- is based), the name of a divinity to which another, dvitá-s, was created as a contrast (op. the Italic forms), Skr. šaṣ-tá- 'sixtieth', sapta-tá- 'seventieth' and the like; op. also Skr. paācát- f. 'a group of five' dašát- f. 'a group of ten'.

With Skr. kati-thá- (see above, p. 242) are connected tāpathita- 'such and such a one (in a series)' bahutithá- 'manifold'.

-1sto-. Skr. máh-ištha- Avest. maz-išta- 'greatest': Gr. µśy--1070-c. Skr. ds-18tha- Avest. as-18ta- 'quickest': Gr. ax-1070-c. O.Pers. mab-išta- 'greatest', beside Avest. mas-yah- 'greater': Gr. μήχ-ιστο-ς 'longest, greatest'. Skr. vás-ištha- Avest. vah-išta-'best'. Skr. yav-iştha- youngest', compar. yav-īyas-, pos. yuvan-. gar-ištha- heaviest', compar. gár-īyas-, pos. gurú-. sthéštha- most constant', beside sthi-rá- (O.H.G. stara-blint 'stone-blind'), for pr. Ar. *sthajšhta- Idg. *sto-is-to- (just as the optative stem Skr. sthē- is for *stə-1-, see I § 116 p. 108); similarly sphéštha 'richest, fattest' beside sphi-rá- (O.C.Sl. sporu 'rich'), for *spa--isto; the ē spread to the comparative, and sthéyas- and sphéyastook the place of *sthā-yas- and *sphā-yas- (we can hardly assume a form *sthā-īyas- or *sthā-iyas-). On the other hand the analogy of sré-yus- and pré-yas- gave rise to the superlative forms śreśtha- 'fairest' prestha- 'dearest' (which Avest. sraestashows to be as old as proethnic Aryan): in the Veda occur the regular śray-iştha- or śriy-iştha- (pos. śri-rá- Avest. sri-ra-) and pray-ištha- or priy-ištha- (pos. priy-á-).1) It is also possible that Skr. jyőštha- 'mightiest' (comp. jyá-yas-) and Avest. fraesta-'plurimus' (comp. frā-yah- Skr. prā-yas-) was formed on the analogy of sthestha-; for the Gr. πλείσ-το-ς points to an Idg. *plē-isto-, and the character of these stems, as we know it, in other words, justifies us in restoring this form.2) It cannot be shewn that pr. Ar. ag (*/jagštha-*prajštha-) became aj by any regular phonetic change. The words dhestha- 'most generous' and yeştha-'swiftest', to be read in Veda as trisyllables, I should perhaps regard as written for dháyıştha yáyiştha- (or perhaps dhéyistha- yéyistha-, the original ā being replaced by ē), cp. bhúyiştha.

¹⁾ One of the two forms must be inferred for metrical reasons. In the passages of the Rigveda which concern us the forms of the later language, *ré#ha- and pré#ha-, are the traditional reading.

²⁾ Osthoff now takes a different view (Paul-Braune's Beitr. XIII 443); however, he supposes an Idg. *plo-1016-s. On O.Icel. flestr see below, p. 247 f.

A few noun stems form superlatives in the same way, with -iṣtha- in place of -tama-. Skr. brāhm-iṣtha- 'a Brahman in the highest degree' from brāh-man- (similarly compar. brāhm-īyas-). drādh-iṣtha- 'firmest' (instead of dārhiṣtha-) from dṛāhā-ground-form *dhṛāh+to- (similarly compar. drādh-īyas-); this formation was modelled on such forms as kraṣiṣtha-. kṛṣá- 'lean', bhraṣiṣtha-: bhṛṣáa- 'strong, violent'.

Greek. ἐνα-το-ς 'ninth' for *ἐν-Γα-το-ς: Goth. niun-da, Lith. deviñ-ta-s O.C.Sl. deve-tŭ- (ep. I § 152 p. 138). The analogy of εἰκοσ-τό-ς 'twentieth', τριᾶκοσ-τό-ς 'thirtieth' gave rise to such forms as ἐνατοστό-ς 'hundredth', διᾶνοσιοστό-ς 'two-hundredth', χτλιοστό-ς 'thousandth'; and also, πόστο-ς 'which (in a series)?', πολλοστό-ς 'one of many, multesimus' ὁλιγοστό-ς 'one of few'.

The -ato-s of Evato-s Sévato-s spread considerably by analogy: *πρωf-ατο-ς (Att. etc. πρῶτο-ς Dor. πρᾶτο-ς) 'first' instead of *πρω-fo-ς (I § 306 p. 242 II § 64 p. 134), τρίτ-ατο-ς 'third', ξβδόμ-ατο-ς 'seventh', ογδό-ατο-ς 'eighth'; νπ-ατο-ς 'uppermost', ĕσχ-ατο-ς 'outermost', μέσσ-ατο-ς 'midmost', νέ-ατο-ς 'novissimus'; βίλτ-ατο-ς 'best' (for its etymology see Wackernagel Kuhn's Ztschr. XXX 301 f.), φέρτ-ατο-ς 'most eminent'. The -τατο- of τρίτατο-ς βέλτατο-ς etc. was regarded as a simple suffix and taken into general use as the common superlative suffix for stems whose comparative was formed in -repo- (cp. § 75 p. 193); e. g. ωμό-τατο-ς, σοφώ-τατο-ς, παλαί-τατο-ς, εὶ δαιμον--έστατο-ς, χύν-τατο-ς. A further accumulation of superlative elements is seen e. g. in ἐσχ-ατώ-τατο-ς, κυντότατο-ς, which looks like an attempt at *xvv-τατώ-τατο-ς (cp. xvv-τεοιώ-τερο-ς) γαλλ--ιστό-τατο-ς, έγγ-ιστό-τατα, and conversely πρώτ-ιστο-ς. Cp. Ascoli Curtins' Stud. IX 339 ff.

Remark 3. Bezzenberger (Beitr. V 94 ff.) attempts a different explanation of -τατο-; but I am convinced that it is untenable (see Morph. Unt. III 68 f.).

-isto-. ὤκ-ιστο-ς 'quickest': Skr. ἀἐ-iṣṭha-s. βάφδ-ιστο-ς βράδ--ιστο-ς 'slowest': Skr. mrad-iṣṭha-s (a later formation for *mṛd--iṣṭha-s). τάχ-ιστο-ς 'quickest'. μάλ-ιστα 'most' (adv.) πλεῖστο-ς ground-form *plē-isto-s; see pp. 242, 244 above. Later on, analogical formations were made from noun stems: κάλλ-ιστο-ς 'fairest' from το κάλλος, άλπν-ιστο-ς 'loveliest, most agreeable' beside ἔπ-αλπνο-ς, τέρπν-ιστο-ς 'most delightful' from τερπ-νό-ς, πρέσβ-ιστο-ς 'oldest, most honourable' from πρέσβν-ς. Here -ιστο-took the place of -τατο-, as was also the case in ἔγγ-ιστα beside ἐγγν-τατα 'nearest', πόρσ-ιστα beside πορρω-τάτω πορσώ-τατα 'furthest forward'.

Italic. Lat. sex-tu-s, Umbr. sestentasiaru sextentariarum' Osc. Ziégreç 'sextius': Skr. šaś-thá-s etc., see p. 242 above. Lat. quintu-s Quinctiu-s, Osc. Πομπτιες 'Quinctius': Avest. pux-đa-(the u is remarkable), Gr. πέμπ-το-ς Goth. fimfta- (in our records found only in composition), Lith. penk-ta-s O.C.Sl. pe-tu. Lat. ter-t-iu-s, Umbr. tert1am-a 'ad tertiam', by the side of which stands Lat. trit-avo-s (if this and not strit-avo-s was the true form of the word), for the first part of which either *trito-s or *tritio-s may be assumed as the earliest form (see § 34 p. 59): Skr. tri-tá-s trt-tya-s (p. 243), Gr. τρί-το-ς Lesb. τέρ-το-ς. Goth. pri-dja Lith. trēczia-s O.C.Sl. tretījī. In any case the forms *ter-to- *tr-to-, which are connected by ablaut are older than *tr-i-to-, which was derived directly from the cardinal (tr-itr-ei-), though there would be nothing in the least irregular in its formation, if the -to- of the ordinals is really the participial suffix, as was suggested in Rem. 1 (p. 242). have it extended by -10- in ter-t-iu-s etc. as in Skr. dvi--t-tya- 'second' and tur-ya- tur-tya- 'fourth' (§ 63 p. 133). Side by side with cottī-diē (see above, p. 242), we have quo-tu-s to-tu-s quo-tumu-s (§ 73 p. 178). In Latin the superlative suffix -isto- gave place to the new formation -issimo-; contrast e. g. ōc-issimu-s (comp. ōc-ior) with Skr. áś-iştha- (áś-īyas-) Gr. wx--1570-5 (mx-imx). It is not clear in what way this substitution took place, see § 73 Rem. p. 179.

Remark 4. It must be left an open question wheter -isto- is still preserved in proper names, whether e. g. Nostiu-s stands for *Novist-iu-s and is to be compared with Skr. náv-ištha-s, as Pauli (Altital. Stud. II 140 f.)

Old Irish, coiced O.Cymr. pimphet 'fifth': cp. Skr. panca--thá-s. Similarly sessed Mod.Cymr. chweched 'sixth'; as to the cause of this new formation see Zimmer, Kuhn's Ztschr. XXX 214. We frequently find the termination -mad, which arose from an extension of older forms in -mmo-; as sechtmad Mod.-Cymr. seithuet 'seventh' (cp. Lat. septimu-s), dechmad Mod.Cymr. decuet 'tenth' (cp. Lat. decimu-s), cētmad Bret. kandved 'hundrodth', see § 72, 2 p. 168. In proethnic Celtic -eto-s was the termination of all these words, and the difference of vocalism between O.Ir. coiced (with e) and *sechtmad (with a) depends upon the kind of sound in the preceding syllable: sechtmad is due to the older form *sechtamet(os). tress- 'third' in compp. no doubt stands for *tris-to-, i. e. *tris (= Skr. tri-š Gr. τρί-ς) +-to- (beside it in Mod.Cymr. we find the form trydydd from *tri-tiio-s) ep. Lat. trīnī for *tris-no- § 66 p. 146 and O.H.G. dris-ki 'ternus' zwis-ki 'twofold'.

-isto- in Keltic gave place to -mo- (-is-ηmo), see § 72, 2 p. 169, cp. c. g. O.Ir. lugem 'smallest' (compar. laigiu) as contrasted with Skr. lágh-ištha-s Gr. ἐλάχ-ιστο-ς.

Germanic. The numerals passed into the n-declension. Goth. saihsta O.H.G. sehsto O.Icel. sētte sētti 'sixth': Skr. šaš-thdcic., see p. 242 above. Goth. niunda O.H.G. niunto O.Icel. nīunde nīundi 'ninth', pr. Germ. *niun-dá-n- (I § 179 p. 156): cp. Gr. ěvaro-g In Goth. ahtu-da O.H.G. ahtodo 'eighth', we have a formation peculiar to Germanic, cp. Gr. òyðo(f)ή-xovta Vulgar Lat. octua-ginta.

-isto-. In the oldest West-Germanic the inflexion of the superlative was almost exclusively weak (n-declension); in Gothic and Norse it was both strong and weak. Goth. sut-ist-s O.H.G. suaz-isto 'sweetest': Skr. svád-ištha-. Goth. háuh-ist-s O.H.G. hōh-isto 'highest'. Goth. máist-s O.H.G. meisto 'most' (compar., máiza mēro), cp. Umbr. mestru fem. 'maior', common groundform *ma-isto- beside the pos. O.Ir. ma-r Goth. -mēr-s 'great'. The O.Icel. flest-r 'plurimus', together with the compar. fleire, which cannot be referred to *plēis- (Osthoff, Paul-Braune's Beitr. XIII 444), I suppose to have been altered on the analogy of

mest-r meire; cp. pp. 242 f. 244 and § 135. We often find new formations from noun-stems: Goth. *jūh-ist-s (inferred from jūhiza) O.H.G. jung-isto O.Icel. ērst-r (for *ēst-r, r being inserted from the compar. ēre) and yngst-r 'youngest', from Goth. jugg-s etc. = pr. Germ. *inum-gá-s Skr. yuva-šá-s; this new form took the place of another which answered to the Skr. yáv-ištha-s; this must have been before Verner's law came into operation, as the word has -h- instead of -g-, which shews that in the noun from which it was formed (*yūnzá-) the breathed spirant had not yet become voiced (I § 530 p. 386 f.). Goth. *alp-ist-s (inferred from alpiza) O.H.G. altisto 'oldest' beside Goth. al-pei-s O.H.G. al-t 'old'. Accumulated endings of comparison are seen in e. g. Goth. af-tum-ist-s A.S. aef-tem-est 'hindmost, last' beside Goth. af-tuma, O.H.G. af-tr-isto 'last' beside af-tro- af-tero.

Since -ista- and -iz-en- became denominative so early in proethnic Germanic, it is not surprising that before that period ended they were added to ō-, the adverbial termination of the o-stems, just as was the Gr. -raro- -revo- in σοφώ-revo-ς ἀνω-τέρω etc. (§ 75). Thus arose forms like Goth. sniumundōs 'more-hastily', from sniumundō 'hastily', frōdōza 'more shrewd' frōdōst-s 'most shrewd', from frōp-s 'prudent', O.H.G. blintōro blintōst from blint 'blind' (aftr-ōsto beside aftr-isto (see above) and the like), O.Icel. spakare spakast-r from spak-r 'intelligent'. In Gothic this formation was always strictly confined to o-stems; in Old High German was occasionally extended to other adjectival stems. Pr. Germ. -ō-izō- -ō-ista-z became -ōzō. -ōsta-z, ep. I § 142 p. 127. Slavonic has a similar group of comparatives, the forms in -ĕ-j*; see § 135.

Remark 5. This explanation of the comparative suffix in Germanic has not been universally accepted. (Johansson, De derivatis contractis, p. 182). But it is certainly not disproved by the forms máiza áiv-s (for *māiza āivo-). It is quite possible that āi had here become āi (see I § 614 p. 464) before this new method of forming comparatives had been adopted in proethnic Germanic. Each period has its own phonetic laws.

Balto-Slavonic. Lath. deszim-ta-s O.C.Sl. desę-tŭ 'tenth': Gr. Jéna-ro-ç etc., see above, p. 242.

-isto- in Lithuanian gave place to -idus-ja- which (in spite of

J. Schmidt's objections, Kuhn's Ztschr. XXVI 378) is no doubt connected with Slav. -uchū -iuchū (Miklosich Vergl. Gramm. II 289 ff.); whilst in Slavonic the comparative displaced the superlative formation.

§ 82. 4. The Suffixes -my-to-, -un-to-1).

In proethnic Indo-Germanic there were a certain number of formations in -to- which were extensions of stems in -menand -yen-. *kley-my-to-: Skr. śrō-mata-m 'renown' O.H.G. hliumunt m. 'report, reputation' beside Avest. srao-man- n. Goth. hliu-ma m. 'hearing', \scrib kley- 'to hear'. Gr. δνό-ματα pl. 'names' Lat. cōgnō-mentu-m, beside Skr. nd-man- n. 'name' Lat. nō-men n. etc. Gr. rαο-σύ-ματα pl. 'something stitched together, soles; contrivances, plots' (prep. κάτ), Lat. as-sū-mentu-m 'patch put on', Skr. beside syū-man- n. 'band, strip, row', Gr. ύ-μήν -ύν-ος 'skin, sinew'. *per-uy-to-: Skr. pár-vata-s 'mountain, rock' Gr. πείρατα Lesb. πέρρατα pl. 'extremes, boundaries', for *περ-Fατα (I § 166 p. 146 f.), beside Skr. pár-van- n. 'knot, joint, break, section' Gr ἀ-πείρων 'boundless' for *å-περ-Fων.

Probably this use of -to- is to be connected with that discussed p. 224, where we saw that the participial -to- could be added directly to noun-stems. From *kleu-men- was first formed *kleu-my-to- (hliumunt indicates that -to- was accented) 'called, famed' (cp. Gr. θανμα-ro-ς beside θανμα, orig. stem *θαν-μεν-); the neuter, used substantivally, had the meaning 'a being called, renown', and then in High German the gender of the word was altered to match that of ruof, ruom. Gr. *δνο-ματο-ν orig. 'the being named, having a name'; Lat. cōgnōmentu-m 'the having a surname', beside cōgnōminātu-s, like sceles-tu-s beside scelerātu-s, ther-tu-s beside tīberātu-s. Skr. pár-vata-s is easily explained as an epithet of giri-š 'mountain'.

Remark. The following formations are akin to those just discussed: Skr. ei-mán-ta-s 'crown of the head, boundary' beside si-mán-m. 'parting of the hair, crown of the head' f. 'boundary', Gr. i-µávr- (f) 'strap' beside t-µov-iá 'rope of a draw-well' O.Sax. ei-mo 'band, rope' (i-µávr- instead of *i-µávro- see p. 250 f.); Skr. hē-man-tá-s 'winter' beside hē-man loc. 'in

¹⁾ The Author, Morph. Unters. II 220 ff.

winter'; as-man-in-m 'fire place' beside as-man-m. 'stone'. In the first word the Idg. ending was perhaps -mi-io-, see I § 280 p. 196; the accent was shifted from -to- to -mi-doubtless through the influence of *sī-mén-, the stem from which the word was formed, just as in Sanskrit the accent of *sī-man-n. changed *s̄rōmatá-m to s̄rōmatam. On the other hand, hēmaniā-s and asmania-m may be later analogical forms dating from the period after the separation of the languages and based on the strong form of the parent stem, as in vṛṣ̄s̄an-tama- and the like. Or has hīmantā-s any im mediate connexion with the Gr. a-zelaarvo-z mentioned on p. 225?

In most languages these combined suffixes, even when they did not die out, survived only in a few old forms and were no longer in living use; in Germanic besides hliumunt the only other example is Goth. sniu-mundō 'hastily' (from *sneu-men- 'haste') which presupposes an adj. *sniu-munda- cp. Gr. \$av\uau-\tilde{\chi}\c-\chi\$. But in Italic -m\uau-to-, and in Greek -m\uau-to- and -u\uau-to- became exceedingly fertile.

Greek. Forms like ονόματα are: εί-ματα 'clothes' (cp. εὐ--είμων 'well clothed' Skr. vás-man- n. 'covering'), δίο-ματα 'hides, skins', ὑπο-δήματα 'sandals', μνή-ματα 'memorials', καλύμ-ματα 'veils', νοή-ματα 'thoughts', δομή-ματα 'longings'. Like *περ-Γατα we have eidara 'food' in Hom., i. e. éd-fara or (with assimilation) éddara (cp. I § 166 p. 147), φρήατα φρέατα 'wells' (for *φρή-Γατα), στέστα 'lumps of fat' (for *στα-Γατα, √ stā- 'to stand'). Stems in -men- and -yen- were regularly extended in this way; and -to- also attached itself to neuter stems in -en-: e. g. ηπ-ατα 'livers' (Skr. yakun- Lat. jecin-), oug-ara 'udders' (Skr. ūdh-an-), κρᾶτα κάρητα 'heads' for *κρᾶσ-ατα *καρᾶσ-ατα (Skr. šīrš-an-); to which κρήνη Lesb. κράνια and κάρηνο-ν (for *κρασ·ν-α *ragato-v-o-) are related in the same way as viorour-o-s to ονόματα. The nom. and acc. sing., e. g. ονο-μα, and the loc. pl., e. g. oró-uao, must be forms of the original n-declension without -to-. But along with these there were in use such case-forms as ονομα-τα, ονομά-των, and ονόμα-τος (= Skr. adverbial ablative nama-tas); and as though these werereally to be divided δνόματ-α δνομάτ-ων δνόματ-ος, a new form was made for the locative, ονόματι. Thus the ro-stem passed over to the r-declension. In the same way i-marr- (see

p. 250 Rem.) was no doubt developed from *ί-μάν-τος, cp. Skr. stma-tás.

Italic. Lat. testa-mentu-m, Osc. tristaamentud abl. 'testamento'. In Latin we sometimes find only the original form in -men, as agmen, crīmen, certāmen; sometimes -mento- as well, e. g. augmen and augmentu-m, suf-fīmentu-m, regimen and regimentu-m, fundāmen and fundāmentu-m; sometimes only -mento-, as armentu-m, caementu-m, dēlectāmentu-m, argūmentu-m, vestīmentu-m. Further, unguen-tu-m was formed from unguen as -mentu-m from -men-, just as in Greek ηπ-ατα arose on the model of ὀνό-ματα, *περ-Fατα- etc.

§ 83. The Suffix -ko--ka-. This is shewn to be proethnic by the word *iuun-kó-s or *juun-kó-s 'youthful, young', beside Skr. yúv-an- Lat. juv-en- (for the initial sound see I § 117 p. 109 f. § 598 p. 452 f.): Skr. yuva-śú-s, Lat. juven-cu-s, O.Ir. δας δς, Goth. jugg-s'). Compare also lōpā-śά-s 'fox, jackal', Armen. αλυδε 'fox', Gr. ἀλώπη-ξ -εκ-ος and (in the Iambic writer Ananios) -ηκ-ος 'fox', with -κ- for -κο-, with the same change of inflexion as in μεῖρα-ξ: Skr. marya-ká-s etc. (§ 84. 129), beside Skr. lōpā-ka-s 'fox' (-ka- had originally a diminutive force), Gr. ἀλωπό-χρους 'fox-coloured' ἀλωπό-ς 'sly', Lith. lāpe 'fox'; in some of the languages, no doubt, the word may have been borrowed and naturalised, nor can we be certain that the suffix of Gr. ἀλώπηξ is not -qo-, and so identical with the -ka- of Skr. lōpā-ka-.

Beyond these words a few examples from Aryan are all that can be ascribed with certainty to the suffix -ko-.

Aryan. In Skr. arva-śá-s árva-śa-s 'hasty, travelling quickly' from árvan- (same meaning); éta-śa-s 'hasty', from éta-s (the same); babhru-śá-s babhlu-śá-s 'brownish' from babhrú-š

¹⁾ Here perhaps $\tilde{v}dx = iv\theta o - \epsilon$ also should be classed (for the diminutival force of $-iv\theta o -$ see A. Döhring, Programm des Friedrichs-Collegiums, Königsberg 1885 p. 15). The youth Hyacinthus and his early death represent the life of the physical world, where maturity is at once followed by decay. If this etymology is correct, it proves the existence of an Indo-Germanic stem *2uyen- with an initial 2 (not i), see I § 598 p. 452.

'brown'; rōma-śá-s lōma-śá-s 'hairy', from róman-lóman-n. 'hair of the head'; anku-śá-s 'hook' beside anku-rá-s (p. 199).

Armenian. aluës 'fox', see above.

Greek. ἀλώπηξ 'fox', see above.

Italic. Lat. juven-cu-s, Umbr. ivengar pl. 'iuvencae', see above.

Old Irish. ōac ōc 'young', Mod.Cymr. neuanc O.Corn. nouenc Bret. iaouank, see above.

Germanic. Goth. jugg-s O.H.G. O.Sax. jung O.Icel. ung-r 'young', pr. Germ. *2uuun-gú-s (I § 179 p. 156), see above. For Goth. jūhiza O.Icel. ēre 'younger' see I § 530 p. 387, II § 81 p. 248.

Balto-Slavonic. We can scarcely place in this group Lith. pálsza-s 'tawny' O.C.Sl pelesű 'dark grey' beside Lith. pál-va-s O.C.Sl. pla-vű 'tawny'. These forms no doubt arose (as we may infer from the Russ. pelesyj 'variegated' polosa 'stripe, streak') through a confusion of \sqrt{pel} - with \sqrt{perk} - (Gr. $\pi \epsilon \rho x \sigma - \varsigma$ $\pi \epsilon \rho x r \sigma - \varsigma$).

§ 84. The Suffixes -qo $-q\bar{a}$, -iqo $-iq\bar{a}$, -iqo $-tq\bar{a}$, $-\bar{u}qo$ $-\bar{u}q\bar{a}$, and $-\bar{u}qo$ $-\bar{u}q\bar{a}$.

The velar character of the k-sound in the suffixes which we are now to discuss appears regularly and unmistakeably in Aryan, Armenian and Balto-Slavonic (see I § 417 ff. p. 305 ff.). In Greek, Italic, Keltic and Germanic it can be identified with certainty only in the comparatively rare cases where we find the k-sound labialised (ku), as in Lat. anti-quo-s, Mod.Cymr. hys-p 'dry'. The remaining examples in this group of languages have only k without any following u; yet it is clear that these forms, except of course such as we have already seen reason

¹⁾ J. Budenz, Das Suffix *\(\alpha\): (\(\alpha\)'s, \(\alpha\)'s, \(\alpha\)'s, \(\alpha\)'s, \(\alpha\)'s, \(\alpha\)'s, \(\alpha\)'s, \(\alpha\)'s C. von Paucker, Die [lat.] Deminutiva mit dem Suffix *\-c-ulus, \(\alpha\), \(\alpha

to refer to the suffix -ko- (§ 83), did. originally contain q not k, because a large number of them correspond exactly to forms in the Eastern group which vouch for -qo-; thus examples like Lat. mus-culu-s: Skr. muṣ-ká- Armen. mukn prove that the Latin diminutival suffix -culo- is derived from -qo-. It must be confessed, however, that no real difference of meaning can be found between the suffixes -ko- and -qo-, and it is therefore quite possible that amongst the examples of -ko- in the Western languages which are given in this section, there may be some few forms which are really derived from -ko-.

-qo- is used both as a primary and as a denominative suffix. No general definition can be given of its original function in its primary use. In derivatives -qo- and -iqo-were used to form adjectives (and substantives based upon adjectives) meaning 'related, or belonging to' the thing or person denoted by the original word, which was generally either an adverb or some case of a noun. Further, -qo- was added to substantives, without altering their substantival or adjectival character, but to give a slight modification of meaning; the derivative signified 'a thing tantamount to' or 'that which merely resembles' the original. Hence it was often used to form diminutives. This modification of meaning again, was often lost, so that the derivative was simply equivalent to the original word. As to the functions of -\overline{1}qo-, -\overline{1}qo-, and -\overline{1}qo-, see below.

Analogical changes of many kinds, affecting the final sound of the stem to which -qo- was added, arose even in proethnic Indo-Germanic, and still more freely after the separation of the languages, but we can seldom trace the course of their development in early times. The facts are exceedingly confused, and the classification which follows must be regarded simply as an a attempt to reduce them to some kind of order.

In Greek, Italic and Keltic -qo- was often transferred to the consonantal declension, e. g. Gr. μεῖρα-ξ: Skr. marya-ká-s. Cp. Gr. ἀλώπηξ § 83 p. 251 and § 129.

§ 85. 1. -qo- as an original primary suffix. On the whole it is not common.

Indo-Germanic. None of the forms to be mentioned here are found in more than a few languages. Skr. dhā-ká-s 'receptacle', Gr. θή-κη 'receptacle', V dhē- 'τιθέναι'. Skr. pīva-sphāká-s 'swelling with fat', Lett. spė-k-s 'strength', (beside spē-t 'to be able'), V spē- 'extend, become rich'. It is no doubt also primary in Lat. siccu-s O.Ir. ses-c 'unfruitful' Mod.Cymr. hys-p 'dry' pr. Kelt. *siskuo-s, common ground-form *sit-qo-s, cp. Lat. sit-i-s (I § 419 p. 307).

Armenian. bok 'barefoot' ground-form *bhos-qo- (I § 561 p. 417), cp. O.H.G. bar 'naked, bare' O.C.Sl. bosŭ 'barefoot'. Or is -qo- here a secondary suffix?

Greek. 37-xn 'receptacle': Skr. dhā-ká-s, see above.

Italic. Lat. siccu-s, see above. Beside it we have also tesquo-s, for *ters-quo- (I § 269 p. 217), \$\sqrt{ters-}\$ 'to become dry, arid'. cas-cu-s beside canu-s for *cas-no-s (cp. Osc. casnar 'senex'); for the function of the suffix cp. pris-cu-s § 88. A stem *fa-co- is implied in -fex (arti-fex etc.), hence fa-c-i\(\overline{o}\). facundus and fecundu-s imply *f\(\overline{a}\)-co-, *f\(\overline{e}\)-co-, see § 69 p. 161. tru-c-s beside truare is no doubt another example, see O. Ribbeck Archiv f. lat. Lexicogr. II 122 f.

Old Irish. ses-c, Mod.Cymr. hys-p, see above. bris-c Bret. bres-k 'brittle' no doubt from \sqrt{bherdh} - (Gr. $niq\vartheta_{\omega}$); the ground-form will then be *bhrdh+qo-, see I § 298 p. 236. For Celt. -sk- coming from -tk- see I § 516 p. 376.

Germanic. O.Icel. los-k-r 'soft, lazy', pr. Germ. *lat-kya-z, beside Goth. letan 'to let, permit', lat-s 'lazy, idle', \$\sqrt{led-lad-}\$. O.H.G. ras-c and ros-ch 'quick, clever, strong' O.Icel. rosk-r 'bold, brave', pr. Germ. *raskya-z and *ruskya-z, ground-form *rot-qo- and *rt-qo-, \$\sqrt{ret-}\$ (O.H.G. rado 'quickly' Goth. ra\bar{p}-s 'easy'). O.H.G. A.S horse 'quick, cutting, clever' O.Icel. horsk-r

'clever', Goth. and-hruskáiþ 'he investigates', ground-form probably *kṛt-qo-, ep. Goth. hard-u-s 'hard' Gr. *koat-v-s' 'strong'; ep. also Mid.Eng. and Dan. harsk 'rough, hard' with another grade of vocalism. O.Icel. beis-k-r 'sharp', beside Goth. báit-r-s 'biting, bitter', \checkmark bheid- For -sk- from -tk- see I § 527 p. 383. Here should also be classed O.Icel. prosk-r- 'bold' vask-r- 'bold' O.H.G. frisc 'brisk, lively, alert' and other similar words (Kluge Nom. Stammb. p. 89), though only, perhaps, as later formations with a suffix -sk(u)o- abstracted from the older forms with sk = tk (ep. p. 18 f.).

O.Icel. lau-g f. 'bath' from pr. Germ. *lau-zō-, cp. O.Icel. laud-r 'soap' Lat. lav-ere.

Balto-Slavonic. Lith. pll-ka-s 'grey' beside pelêti 'to grow mouldy' pelê 'mouse', cp. also pelêka-s 'mouse-grey'. Lith. plus-ka-k-i-s 'one that has ruined himself, spendthrift'. Lett. plus-ka slovenly vagabond, scamp' plūs-kas f. pl. 'sluice', beside Lith. plus-ti 'to begin to swim, run over'. Lett. rusch-ka 'filthy fellow' pe'lnu-ruschk-i-s 'Cinderella'. properly 'ash-stirrer' (Lith. pelen-rūsà and -rūsi-s), beside Lith. rūsinti 'to rummage, stir'. Lett. lischk-i-s 'flatterer' properly 'licker' kréima-laischk-i-s 'cream-licker', a name of the fore-finger. Lett. spé-k-s 'strength': Skr. pīva-sphāká-s; see above, p. 254. O.C.Sl. zna-kū 'token'. bra-kū 'marriage, wedding', which we may perhaps derive from berą bīrati \square\$ bher-.

§ 86. 2. -qo- as a secondary suffix forming adjectives (and substantives based upon adjectives) from adverbs and inflected nouns with the meaning 'related, or belonging to' what is denoted by the original word, where the nature of the relationship or connexion may vary very widely.

a. From Adverbs.

Indo-Germanic. Skr. anti-ká-s 'coming to an end with or at something, near' (ánti 'over against, in sight of, near'), Lat. anti-quo-s anti-cu-s 'preceding in space or time or order, more important, earlier, old' (ante for *anti). Skr. ánī-ka-m 'that which is turned towards one, the side turned to one, front, face, point' Avest. ainika- m. 'front', Gr. èvī-nή 'attack,

rebuke' (Osthoff, Morph. Unt. IV 223). Skr. nī-ca- low, going downwards', Gr. νῖ-κάω ('bring low, fight down') 'conquer' (hence νί-κη with the meaning 'victory', like Lat. pūgna from pūgnārs, H.G. handel m. from handeln, opfer n. from opfern), Lith. denom. ny-k-stù 'I disappear, pass away' (auksztỹ-naika adv. 'backwards' and others, with non-original ablaut) O.C.Sl. ni-cǐ 'pronus' for *nī-k-jǐ.

Aryan. Skr. ucca-s Avest. uska- adj. 'on high, high' Skr. útka-s 'longing for something' ground-form *ud+qo- *ud+qe-, beside Skr. úd 'up'. Skr. úbhi-ka-s ábhi-ka-s 'coming after a thing, lustful' beside abhí abhí. Skr. ánu-ka-s 'coming after a thing, desirous, dependent' ánu-ka-m 'backbone', beside ánu.

Such forms as these in -īka- -ūka- were in Sanskrit associated with compounds in -y-anc- -v-anc- (-anc- 'directed towards something', cp. § 163), and this led to a number of new formations. See Osthoff loc. cit. 249 ff.

Greek. $\pi \dot{\epsilon} \rho \iota \dot{\epsilon}$ adv. 'around', $\pi \dot{\epsilon} \rho \iota \sigma \sigma \dot{\sigma} - \varepsilon$ neparto - ε 'superfluous, extraordinary, superabundant' for * $\pi \dot{\epsilon} \rho \iota - \kappa - \iota \rho - \varepsilon$, beside $\pi \dot{\epsilon} \rho \iota$. As in the case of the adverbs $\mu o v v \dot{\alpha} \dot{\xi}$ and $\dot{\delta} \dot{\delta} \dot{\alpha} \dot{\xi}$ from * $\mu o v v \dot{\alpha} - \kappa \sigma - \varepsilon$, * $\dot{\delta} \dot{\alpha} \dot{\tau} - \kappa \sigma - \varepsilon$ (§ 88), a nom. in - $\kappa - \varepsilon$ instead of - $\kappa \sigma - \varepsilon$ was first formed, $\pi \dot{\epsilon} \rho \iota \dot{\xi}$ instead of * $\pi \dot{\epsilon} \rho \iota - \kappa \sigma - \varepsilon$ (cp. $\mu \dot{\epsilon} \dot{\ell} \rho \dot{\alpha} - \dot{\xi}$ § 84 p. 253, § 88 pp. 263. 265), and then on the analogy of adverbs like $\pi \dot{\alpha} \rho - \dot{\epsilon} \dot{\xi}$ $\dot{\epsilon} \dot{\nu} \tau - \dot{\epsilon} \dot{\xi}$ $\dot{\alpha} \dot{\nu}$ etc. it came to be regarded and used as an adverb.

From a stem *πρά-κο- (cp. πέρα 'beyond' πέρα-ν 'on that side') arose πράσσω, the oldest meaning of which was 'press through, go through' (Hom. ἄλα πρήσσοντες), see Leo Meyer, Kuhn's Ztschr. XXII 61 ff.

Italic. Lat. reci-procu-s orig. 'directed backwards and forwards' from *re-co- and *pro-co-, cp. O.C.Sl. pro-ku. procul is an extension of the stem *proco- by -lo- cp. simul').

Germanic. O.H.G. abu-h aba-h O.Sax. abhu-h 'turned away, perverse, wicked', (the neut. is used substantivally, 'per-

¹⁾ Detailed arguments in support of this explanation of reciprocus and proced will be found in Rhein. Mus. XLIII 402 ff., where, unfortunately, I overlooked the fact that the same derivation had already been suggested by Corssen, Krit. Nachtr. 186 f.

verseness, wickedness') O.Icel. ofu-g-r 'turned away, perverse', beside af 'from, away': ep. O.C.Sl. opako opaky opače adv. retrorsum, contrarium' pače 'contra, potius' paky 'iterum' (opače: pače = Gr. ano: O.H.G. fo-na, a regular example of proethnic ablaut); ep. also Skr. ápaka-s 'lying behind, remote', which need not necessarily be regarded as a compound of -anc- (ep. p. 256 under Aryan).

Balto-Slavonic. O.C.Sl. pro-kŭ 'remaining over', from pro. pre-kŭ 'transversus' for *per-kŭ, from pre.

b. From Nouns. The terminations -o-qo- -e-qo- which arose when the suffix was added to o-stems were in Aryan and Slavonic also used as primary suffixes.

Indo-Germanic. Skr. dvi-ka- 'consisting of two' (beside this dva-ká- 'two by two, joined in pairs'), A.S. twi-z O.H.G. zwī-g and zwī gen. zwī-es, pr. Germ. *tuǐ-zuá- 'twig' (cp. O.C.Sl. roz-ga 'twig' from rozǔ razǔ 'dis-'), O.H.G. zweho zwīfo 'doubt', pr. Germ. *tuǐ-xuo-n- (I § 444 p. 329); to which no doubt we should refer Gr. δισσό-ς διττό-ς 'twofold', for *δ-ε-κ-μο-ς. Similarly Skr. tri-ká- 'three by three, threefold' and Gr. τρισσό-ς τριτό-ς 'threefold'. The Ion. διξό-ς τριξό-ς are perhaps to be explained as standing for *δ-ε-κ-τμο-ς *τρι-κ-τμο-ς. Lat. ūni-cu-s, Goth. ἀina-h-s O.H.G. eina-g 'single', O.C.Sl. ino-kǔ 'solus'.

Aryan. Skr. sūci-ka-s adj., 'stinging', subst. 'stinging vermin', from sūci- f. 'needle', ánta-ka-s 'making an end, he that makes an end', from án-ta-s 'end'. urvāru-ká-m 'that which belongs to the gourd-plant (urvāru-\(\xi\)), or comes from it, fruit of the gourd'. sindhu-ka-s 'coming from the Indus (sindhu-\(\xi\)). rūpa-ka-s 'in (an assumed) form', from rūpá-m 'form'. Avest. kasvi-ka- 'rather small, rather poor', from kasvi-\(\xi\) 's 'smallness, dwarfish stature'. Skr. máma-ka-s 'my', asmāka-s Avest. ahmāka-'our' (is the termination of this word Idg. -o-qo- or the suffix -aqo-\(\xi\)). Hence Ar. -ka-, so frequent in Sanskrit in adjectival (epithetised) compounds as Skr. rigata-\(\xi\)fi-ka-s 'whose beauty is past' (cp. Avest. dūra\(\xi\)-srī-ka- 'beautiful at a distance') a-bhrāt\(\xi\)-ka-s 'brotherless', a-r\(\xi\)tas-ka-s 'without seed', sa-patni-ka-s 'with one's wife'; cp. also Avest. hu-may\(\xi\)-ka- 'possessing good wisdom'

(hu-maya-). These compounds however may also be classed under § 88 p. 264.

From ánta-ka-s and similar forms arose a primary suffix -aka-, as Skr. sáyaka-s 'meant for throwing' neut. 'missile', nāyaka-s 'guide', pācaka-s 'cooking, cook', pṛchaka-s 'who asks'. Cp. Slav. -okŭ, p. 260

To these no doubt should be added vartaka-s vártika 'quail': Gr. ὄρτυξ (gen. ὁρτυχ-ος and ορτυχ-ος, cp. Osthoff, Zur Gesch. d. Perf. 620) 'quail', with v on the analogy of κόκκυξ, ἴβυξ and the like.

Itulic Lat. amm-cu-s, from amm-s, cīvi-cu-s, from cīvi-s, aedīli-c-iu-s, from aedīli-s. Cp. Idg -iqo- m bell-icu-s, patr--icu-s, patr-ic-iu-s and the like, § 87.

The following forms appear to be connected with the same suffix: Umbr. Kastrušiie 'Castricii (beside kastruvuf 'fundos' Osc. castroos gen. 'fundi') and Osc. Iúvkiíúí '*Jovicio', beside Osc. Viínikiís 'Vinicius'.

Old Irish. sūde-ch 'oculeus' for *sūli-co-s, from sūil n. 'oculus', O.Kelt. are-mori-cī 'those who dwell before the sea' (O.Ir. muir n., Lat. mare for *mari). Cp. Idg. -iqo- in cuimn-ech 'mindful of' and the like, § 87.

Germanic. Goth. stáina-h-s (stem stáina-ha-) O.H.G. steina-g 'stony', from Goth. stáina- m. 'stone', Goth. vaúrda-h-s

Mahlow, Die langen Vocale 102, assumes that -ιακό-ς with Lat.
 -icu-s Goth. -eig-s represents an Idg. -iako-, an inference which I cannot accept.

'verbal' from vaúrda-n. 'word', mōda-g-s (stem mōda-ga-) 'wrathful' O.Sax. mōda-g 'excited, spirited', from Goth. mōda- m. 'courage, wrath'. The forms -a-ha- a-za- alternate according to the place of the accent, by the rule given in § 530 p. 386, cp. Skr. asmāka-āṇḍīka- on the one hand, and ēkaká- urvāruká- on the other. The termination -a-za- was transferred to other classes of stems, e. g. O.H.G. nōtag beside Germanic nauði- nauði- 'need', O.Sax. craftag beside krafti- 'strength'.

Goth. handu-g-s 'wise' (O.H.G. hantag 'sharp') from handu-s 'hand', though it is quite possible that the two words are not connected historically but merely by popular etymology (see Kluge, Nom. Stammb. 86, Kauffmann, Paul-Braune's Beitr. XII 202) 1).

Chēruscī is explained by Bremer (Paul-Braune's Beitr. XI 3) as coming from *zērus-ka- 'hairy', cp. O.H.G. hār pl. hārir 'hair'. For -us- cp. O.H.G. angus-t § 101.

In proethnic and later Germanic we find adjectives in -\(\tau\)zaregularly corresponding to -\(\tau\)-stems, as Goth. mahteg-s O.H.G. mahteg' mighty' from mahti-, O.H.G. creft\(\tau\)g' strong' from krafti-. But the same termination appears also in adjectives derived from other classes of stems and equally dating from the oldest period of Germanic, as Goth. váurstveig-s 'active' from váurstva- n. 'work, activity', O.H.G. jār\(\tau\)g' yearly' from j\(\tau\)ra- n. 'year'; and it must therefore be referred to the Idg. suffix -\(\tau\)qo- (\(\frac{8}{99}\)); there is no need to suppose an original -\(\elli\)2-qo- (*maxti-*maxtei-), nor can any argument for such a form be based on the obscure Gothic word \(\tau\)hiug 'seasonable'. We conclude then that in proethnic Germanic -\(\tau\)-za- from i-stems was replaced by -\(\tau\)za-, just as in Gothic we have also the older form gabig-s altered to gabeig-s (\(\frac{8}{9}\)87). The influence of other derivatives with \(\tau\) in actual use (e. g. Goth. váurstvei f.) was a factor in the change.

Balto-Slavonic. In the Baltic languages the suffix hardly occurs at all in this use; Lith. peléka-s Lett. pelék-s 'mouse-grey' (Lith. pelé Lett. pele 'mouse') was no doubt formed on the analogy

Osthoff's last suggestion as to handugs (Paul-Braune's Beitr. XIII 419) does not commend itself to me.

of adjectives like jüdőka-s (from jü'da-s 'black', § 89 c). In Slavonic we have -okü as a primary suffix, e. g. O.C.Sl. süvédokü 'privy to something, witness', Russ. chodók 'goer, foot-messenger', ědők 'eater'; it probably began in derivatives from noun-stems in o (op. Russ. chod 'way, path' beside chodok), cp. Skr. -aka- p. 258-

§ 87. 3. -iqo-, a by-form of the Suffix -qo- (§ 86). This suffix forms adjectives from nouns in Aryan, Greek, Italic and Keltic, and it is so common that it can hardly have arisen independently in the separate languages from the ending of such forms as Gr. $qv\sigma_l-x\acute{o}-c$ ($qv\acute{\sigma}_l-c$). Further in Germanic and Balto-Slavonic, as well as in Sanskrit and Latin, -iqo- is a primary suffix, and this usage must have been derived from its denominative use; so that clearly it had become a single independent suffix in proethnic Indo-Germanic. But of course there is nothing to prevent our supposing that it did originally spring from noun-stems in -i-.

Aryan. Skr. paryāy-iká-s 'strophic' from paryāyá-s 'rotation, strophe'. It occurs most frequently after the vriddhistrengthening, which serves also to form adjectives without the addition of any suffix (see § 60 p. 112 f.; cp. māma-ká-s, 'my' beside māma-ka-s, § 86 b p. 257), as vāsant-ika- 'belonging to spring' (vasantá-s), vārṣ-ika-s 'belonging to the rainy season' (varṣā-m), āhn-ika-s 'daily' from āhan-n. 'day'. But -ika- was not adopted in general use as an adjectival suffix, cp. rūpa-ka-urvāru-kā- etc., § 86 b p. 257.

It is primary in Skr. vfsc-ika-s 'scorpion, tarantula', from vfscami 'I split, cut asunder'.

Greek. $inn-inó-\varsigma$ 'belonging to horses' from $inno-\varsigma$, $nap dev-inó-\varsigma$ 'maidenly' from $nap devo-\varsigma$, $vv\mu q-inó-\varsigma$ 'bridal' from $v\acute{u}\mu q\eta$, $a\acute{d}\sigma - in\acute{d}\sigma - i\acute{d}\sigma$ 'of the city' from $a\acute{d}\sigma v$, $edv-in\acute{d}\sigma$ 'national' from edv of edv, edv deviné-edv belonging to contests' from edv of edv, edv deviné-edv 'manly' from edv gen. edv of edv. From participial stems in edv there arose a new suffix edv - edv of edv of

By the side of $-i\pi \dot{\phi}$ - ς we find, though only rarely, $-\pi \dot{\phi}$ - ς , as $A_1\beta v - \pi \dot{\phi}$ - ς ; see § 86 b.

Italic. Lat. mod-icu-s from modu-s, bell-icu-s from bellu-m, fabr-ica from faber (stem fabro-), gent-icu-s from gēns (stem gent-), histriōn-icu-s from histriō (stem histriōn-), patr-icu-s from pater (stem patr-); participial stems in -to- gave rise to -tico-as an independent suffix, e. g. cēnāticu-s, herbāticu-s, volāticu-s, rūsticu-s, domesticu-s, ep. Gr. -rīso- above. Similarly -ic-īu-s in caement-iciu-s, sūtōr-iciu-s, patr-iciu-s etc.

The Umbro-Samnite dialects shew that -ico- was proethnic in Italic, so that (say) modicu-s was not developed in Latin out of *modo-co-s: Osc. túvtíks 'publicus' tovtico nom. fem. 'publica', Volse. toticu abl. 'publico', Umbr. totcor pl. 'urbiei' from *tōtico-, a derivative of touta- 'civitas, urbs'; Umbr. fratreks fratrexs 'fratricus, fratrum magister' fratreca 'fratrica' (e from 1, see I § 33 p. 34). Cp. also Osc. Viínikiís 'Vinicius' and múíníkad abl. fem. 'communi', múltasíkad abl. fem. 'multaticia'. But we also find Ümbr. Kastrůsiie and Osc. Iúvkiíúí (§ 86b p. 258), which are hard to explain with certainty.

-iqo- is a primary suffix in Lat. mord-icu-s mord-ex, med-icu-s, vert-ex; and no doubt also in $p\bar{o}dex$ for *pozd-ex \sqrt{pezd} -'pedere' (I § 594 p. 450). Compare the root-vowel of this word with Goth. gabig-s ($p\bar{o}dex:p\bar{e}dere = gabigs:giban$).

Old Irish. As in Latin, -ico- is a general derivative suffix, i. e. it forms derivatives from all manner of stems. cuimn-ech 'mindful of' from cuman 'thought, remembrance', cretm-ech 'fidelis' from cretem 'fides'; feminines in -iche = Lat. -ic-ia, as tairismiche 'immobility' from tairism-ech 'immovable' (tairissem 'a standing fast'). It is possible however that some of the words in -ech -iche (Zeuss 2 810 sq.) contain -iaco- or -aco-.

Germanic. The fertility of -iza- was limited on the one hand by the use of -a-xa- -a-za- (§ 86), on the other by that of -īza- (§ 89 a). In Gothic it does not occur as a secondary suffix, but it does in Old High German; e. g. wuot-ig beside wuota-g 'furious'. It is primary e. g. in Goth. gab-ig-s 'rich' beside giban gaf 'to give', cp. Lat. pōd-ex), O.H.G. heb-ig 'at which one must strain or heave, heavy' (beside Goth. hafjan).

But here too other suffixes encroached upon its use, cp. Goth. gabeig-s beside gabig-s, O.Icel. gqfug-r hqfug-r.

On the other hand, -iza- is sometimes found where -za-must no doubt have been original (§ 88); O.H.G. entrig 'strange' (pr. Germ. *andr-izá-) from ander 'other'; possibly however -iza-may here represent Idg. -e-qo- (§ 88 p. 268).

Balto-Slavonic. Here it is not uncommon as a primary suffix. In Lithuanian the root has the vowel of the preterite (cp. Lat. pōdex, (foth. gabigs). Lith. szer-ika-s 'one who gives fodder' from szeriù 'I give fodder' pret. szerian, kirt-ika-s 'hewer' from kertù 'I hew' pret. kirtaŭ, skund-ika-s 'who loves to lament', tup-ika-s 'squatter'. Lett. jum-ik-i-s 'tile-setter' from ju'mt 'to cover', glûn-ik-i-s 'spy' from glûnêt 'to lurk', u'rb-ik-i-s 'borer' from u'rbt 'to bore'. O C.Sl. žež-ikŭ 'burning' from žega 'I burn' (trans.), tęž-ikŭ 'burdensome, heavy' from tęziti 'to burden', skać-ikŭ 'grasshopper' ('springer'), meč-ikŭ 'bear' ('growler'), smyċ-ikŭ 'fiddler'; more frequently we have -icĭ, as yad-īcĭ 'eater' pis-ĭcĭ 'writer' šīv-ĭcĭ 'cobbler', žīv-ĭcĭ 'offerer, priest'.

There is a class of substantives derived from adjectives which may contain this Idg. -iqo-, though I do not feel certain that it is so, such as Lith. jaunik-i-s 'betrothed husband' (jáuna-s 'young'), Lett. melnik-i-s 'black horse' (meln-s 'black'), O.C.Sl. rožanici 'bow' (rožanii 'of horn') bradatici 'bearded man' (bradatii 'bearded') junici 'young bull' (junii 'young').

§ 88. 4. -qo- is added to substantives and adjectives without altering their substantival or adjectival character; the meaning of the new word bears to the old much the same relation as Mod.H.G. schwärzlich to schwarz, [Eng. blackish to black], i. e. it denotes something tantamount to' or something which is merely 'like' the original. From this a diminutival sense was often developed, and hence -qo- was used in forming familiar and pet names. Yet this modification of meaning frequently died out, so that the new word meant simply the same as the old.

The boundary between this class of words and those given under 2 b and 3 (§ 86 and 87) fluctuates considerably. It is

often doubtful whether any particular word belongs to one or the other category.

The diminutival -qo- is often combined with other diminutival elements, e. g. Lat. -culo- = -qo- + -lo-.

Indo-Germanic. Skr. muš-ká-s 'testicle' mūšaka-s mūšikā 'mouse, rat' (mūš- mūša-s mūšā 'mouse'), Armen. mu-k-n, gen. mkan, 'mouse, muscle', Lat. mus-culu-s (mūs), O.C.Sl. myšīca 'arm'. *sŭ-qo- from *sŭ- 'sow': Skr. sū-kará-s 'pig, boar' (popularly derived from kar- 'to make' as 'that which makes the noise sa'), Lat. su-culu-s su-cula, O.Cymr. hu-cc 'sus' Corn. ho-ch 'porcus', A.S. su-zu f. 'sow' (unless we accept Bugge's derivation of this A.S word from Idg. *suy-, Paul-Braune's Beitr. XIII 509 f.). Lat. bū-cula, Mid.Cymr. bu-ch 'cow'. Armen. nu-k-n, gen, jkan, 'fish', Pruss, suckans i. e. zu-ka-ns acc. 'fishes', Lith. žù-k-mistra-s 'fish-master', beside Gr. ix9v-ç Lith. žuv-l-s 'fish' (for the initial sound cp. 1 § 554 Rem. 1 p. 407 and Bartholomae Ar. Forsch. II 56). Skr. ajakā ajikā 'little goat' (ajá-s 'he--goat' ajá 'she-goat'), Lith. oszkà (ožỹ-s 'he-goat'). Skr. avi-ká-s avi-kā 'sheep' (ávi-š 'sheep'), Lat. ovi-cula, Lith. avi-kỹnê 'sheeppen' (avi-s 'sheep') O.C Sl. ovi-ca 'sheep'. Skr. marya-ká-s 'mannıkin' (márya-s 'man, young man'), Gr. μεῖραξ 'girl', later also 'boy' μειράκ-ιο-ν 'boy'. Skr. pūsu-ka- m. pl. 'dust' (pāsú-š 'dust'), O.C.Sl. pėsŭ-kŭ 'sand'.

In names of persons: Skr. dēvaka-s dēvika-s beside dēva-s dēva-datta-s, Gall. Dēvicō Dēvicia beside Dēvō Dēvo-gnāta; Skr. sunaka-s beside sunas-karna-s, Gr. κύναξ beside Κύν-αγο-ς; Skr. sana-ka-s beside sana-śruta-s, Gall. Seniccō Seneca beside Bret. Hen-car, O.H.G. Sinigus (Latinised) beside Sino Sin-hart.

*sene-qo- (*seno-qo-) meaning probably 'oldish', from *seno'old' (Skr. sána-s &c.): Skr. sana-ká-s 'former, old', Lat. senex
senica, (Gall. Seniccō, Seneca; O.Ir. senchas 'antiquity', see § 108),
pr. Norse singōstēr nom. pl. masc. 'oldest' from *sing- (cp.
F. Burg, Die ältteren nord. Runeneinschr. 1885, p. 130 f.).
Frankish Sinigu-s (Goth. sineig-s 'old' see § 89 a), Lett. senz-i-s
(z for k) 'old inhabitant, a man of olden time'. Armen. ancu-k
anju-k O.C.Sl. qzū-kū 'narrow', beside Skr. qhū-š 'narrow'.

Aryan. Skr. aśva-ká-s 'little horse' from ášva-s 'horse', śiśu-ká-s 'little child' from štśu-š 'child', rāja-ká-s 'petty king' from rājan- 'king'. Avest. drafša-ka- m. 'little banner' from drafša- m. 'banner', aper'nāyū-ka- m. 'little child' from a-per'-nāyu- m. 'child' (orig. 'not of full age'), kaini-kā- 'little girl' beside kainin- f. 'maid, maiden'.

Familiar and pet names, e. g. Skr. vasu-ka-s O.Pers. vahu-ka beside Skr. vasu-š vasu-datta-s Avest. vohu-data-, Skr. datta-ka-s dattika-s beside dattu-s datta-šatru-š agni-datta-s.

No difference of meaning can be detected in the following examples. Skr. vádha-ka-s and vadhá-s 'murderer', ásta-ka-m and ásta-m 'home', ιξι-hά- and ίξι-ξ f. 'arrow', uda-ká-m and udán- n. 'water', Avest. mašyāka- and mašya- m. 'mortal, man', pasu-ka- and pasu-š m. 'cow' (cp. Skr. paśu-kā- a small animal), O.Pers. σπακα (Herodotus) and Avest. span- 'dog'.

Similarly there is no serious difference in meaning between Skr. arbha-ká-s and árbha-s 'small', nágna-ka-s and nagná-s 'naked', ējāt-ká-s and éjant- 'trembling, quivering', anīyas-ká-s and ánīyas- 'thinner, finer' (cp. Lat. melius-culu-s). Thus adjectival compounds like vigata-śrī-ka-, which we noticed in § 86 p. 257, may also be classed here. In Sanskrit, forms like śikṣu-ka-s 'imparting, generous' (śikṣu-š the same), pranāyu-ka-s 'falling into ruin, perishing' (pranā-yu-ṣ, the same) and the like gave rise to an independent primary suffix -uka-, e. g. dáṣuka-s 'biting', vi-kásuka-s vi-kasuka-s 'bursting'.

For feminine substantives the usual suffix is -ikā- (corresponding to masc. -akā-), as nāsikā- du. beside nāsā- du. 'nose', iyattikā- fem. of iyattakā- 'so small'. Whilst the forms in -akā-express the fem. by simple differentiation (Motion) of the masc. neut. stem -aka-, -i-kā- was originally derived from fem. i-stems (cp. also Avest. nāirikā- beside nāiri- nāirī- 'wife', carāitikā- 'girl, wife' beside carāiti- carāitī- 'wife').

Armenian. A further suffix -en- was added to the stems of the substantives formed with -qo-. We have already noticed mukn 'mouse, muscle' from *mus-qo- or *mūs-qo- (I § 561 p. 417) and ju-k-n 'fish'. To these should be added armukn, gen.

armkan 'elhow, hend' (beside Lat. armu-s Goth. arm-s); perhaps its resemblance to mukn is more than accidental.

ancu-k anju-k 'narrow' sce p. 263 above.

Greek. With a diminutival or contemptuons sense, more or less obscured: μεῖραξ 'girl' (p. 263), δέλφαξ 'pig, sucking pig', βῶμαξ 'small altar', λίθαξ 'stone', λεῖμαξ 'meadow'. Attached to these are unmistakable diminutives like μειράκ-ιο-ν 'little boy' σπινθηράκ-ιο-ν 'little spark' (cp. ἀσπίδ-ιο-ν 'little shield' § 63 p. 128). Add also pet names like "Ιππακο-ς beside "Ιππο-ς "Ιππ-αρχο-ς" Αρχ-ιππο-ς, Πύρρακο-ς beside Πύρρο-ς, Λάβραξ beside Λάβρο-ς, Φαῖναξ beside Φαῖνο-ς, Μόλυκο-ς Μόλυξ beside Μόλο-ς Μόλ-ορχο-ς 'Αγχί-μολο-ς.

dóáξ 'with the teeth, mordicus' was derived from a stem
 *dóaτ-κο- *dóaκκ(o)- 'tooth': Skr. a-datka- 'toothless', A.S. tusc
 or tusc O.Fris. tusk O.Icel. tosk-r 'tooth' pr. Germ. *tuns-ka-,
 common ground-form *dnt-qo-, beside δδούς Goth. tunp-u-s 'tooth'
 (cp. I § 527 p. 383). But δάκνω obviously influenced its meaning and perhaps its form also. In the same way we have γνν-ξ
 with bended knees' from γνν- 'knee'. As to their use as adverbs see § 86 p. 256.

πηλί-ro-ς how great? how old? τηλί-κο-ς so great, so old from *πάλι- *τάλι- = Lat. quāli-s tāli-s: similarly O.H.G. Alemann. we-lēr how produced? so-lēr thus produced pr. Germ. *-li-χα-, cp. also O.C.Sl. kolikū tolikū § 89 α. Beside Att. ήλίκο-ς ήλιξ stands βάλικιώτης (more correctly -τας) συνέφηβος. Κρῆτες in Hesychius, which points to a form *syāli-.

Italic. Lat. homun-c-iō 'mannikin' from homō. *albi-co-'whitish' *nigrico- 'blackish' in albicare nigricare. prīs-cu-s beside prius. paucu-s for *pavi-co-s (cp. pauper for *pavi-per). sene-x seni-ca: Skr. sana-ká-s see above, p. 263.

The usual suffix is -culo-, i. e. -qo- + -lo-, the second of which is itself diminutival (§ 76 p. 205 f.). This extension of the suffix dates from proethnic Italic, and in many words was no doubt intended to revive the diminutival force which at the time was disappearing or had quite disappeared. Lat. ovicula: *ovica (Skr. avi-kā) = lupula: lupa; similarly pauculu-s: paucu-s = frīgidulu-s: frīgidu-s.

bū-cula: Mid.Cymr. bu-ch 'cow'. su-culu-s: O.Cymr. hu-cc 'sow', Lat. diē-cula, Osc. zi-colom 'diem' (the diminutival sense of -colo- has disappeared). Lat. fūni-culu-s, classi-cula, spē-cula, nūbē-cula, frāter-culu-s, amātor-culu-s, homun-culu-s, aedificātiun-cula, mus-culu-s, corpus-culu-m, arbus-cula, corculu-m (i. e. *cord + culum).

Remark 1. The $\bar{\iota}$ in crātīcula, febrīcula, apīcula and similar words may be variously explained. The first analysis must certainly be crātīc-ula not crātīc-ula. Cp. § 89 a p. 271.

seniculu-s: senex, nigriculu-s: nigricāre, leviculu-s, dulcīculu-s, pauperculu-s, melius-culu-s, tardius-culu-s, (cp. prīs-cu-s and Skr. anīyas-kú-s).

Keltic. O.Cymr. hu-cc 'sus' Corn. ho-ch 'porcus': Skr. sū-kurá-s see p. 263 above, we must no doubt add O.Ir. socc 'ploughshare', properly 'pig's snout', see Thurneysen, Keltorom. 112 f. 1). Mid.Cymr. bu-ch 'cow': Lat. bū-cula uire (gen. airech) 'princeps' for *ariak-s, Skr. arya-ka-s 'honourable man', from aryá- 'devoted, pious'. Proper names: Gall. Dīvicō Dīvicia, see above, p. 263.

Remark 2 Here may also be mentioned O.Ir. menics Mod.Cymr. mynych 'frequens', though their relation to Goth. manag-s 'much', and O.C.Sl. munogū 'much' is not clear. Does the Slav. word contain Idg. -go- (§ 91)? Or should we regard it as a word borrowed from Germanic? Cp. Schleicher in his and Kuhn's Beitr. V 112 f.

Germanic. A.S. tusc or tasc 'tooth' ground-form *dut-qo-, see above, p. 265.

¹⁾ Cp. Gr. \tilde{v}_{r-s} $\tilde{v}_{r\eta}$ 'ploughshare', which is usually connected with \tilde{v}_{-s} (cp. Solmsen, Kuhn's Ztschr. XXIX 81).

-qo- was added to -en-, which formed substantives denoting a thing or person standing in some characteristic relation to the idea of the original word; hence arose in proethnic Germanic the suffix -un-za- (and beside it -un-za-, with no difference in meaning). The suffix -qo- in this use in historical times is merely an amplification of the suffix to which it is added, and has no special meaning of its own; at most we may credit it with some part of the idea of pity or contempt implied in words like O.H.G. arming 'homo pauper, miser' abansting 'homo invidus', which are common enough. We may compare the relation of O.H.G. Berhtung Berhtung: Berhto (gen. Berhtin), arming: armo (gen. armin) 'poor' with that of Gr. Πύρρακο-ς: Hippior. This compound suffix was soon added to stems with l-suffixes, e. g. O.H.G. sidil-ing 'settler' from sedal 'seat', edil-ing 'man of noble blood' from edili 'noble'. Thus there arose an independent suffix -(1)lunza- -(1)lunza-, which was fertile in North and West Germanic.

Remark 3 It is difficult to determine the relation between -11032-and -11032-. The latter form appears to be older, e. g. in tribe names like Greuthungī (Amm Marc.), The most natural assumption is that at the time when the connexion between -11032- and the en-stems was still recognised, e (later 1) was introduced through the influence of the cases which had the strong form -en- (later -110-). Yet it is quite conceivable that -11032- and -132- were contaminated (§ 87 p. 261), or that -11032-started from stems in -110-, which existed in the pre-Germanic period (see § 115), -11032- -11032- 110

Examples. O.H.G. hūsingā pl. 'penates' ('those who belong to the house') O.Fris. hūsing 'member of the household', O.H.G. chamarling 'chamberlain' hofiling 'courtier', būring būling būweling 'peasant' from. būr, bū 'habitatio', sidiling 'settler' from sedal 'seat', A.S. bedlinz 'he who lies lazily in bed, effeminatus', O.H.G. sarling 'who is hidden in armour (saro), soldier', fūstiling Mid.H.G. viustinc 'mitten', Mid.H.G. hendelinc 'glove', O.Icel.

fingrung-r 'finger-ring', Mid.H.G. bertinc 'lay brother' from bart 'beard', O.H.G. wihseling 'changeling', zwineling 'twin', O.Icel. vetrung-r 'a beast one winter old'. hofding-r 'chieftain, captain'; names of families and tribes like A.S. Skyldunzas O.Icel. Skjqldungar; A.S. Hrēdlinz 'son of Hrēdel'; O.Icel. attung-r 'kinsman' from att 'race', O.H.G. chunnling 'kinsman' from chunni 'race', O.Icel. systrung-r 'mother's sister's son' O.Fris. susterling 'sister's child', O.H.G. sunufatarungo pl. 'the people of the son and the father' These is but one example in Gothic, gadiligg-s 'cousin': O.H.G. gatiling gatuling O.S. gaduling.

The use of these forms in the feminine as abstract substantives in Norse and West-Germanic was no doubt etablished by the same process as in e.g. ().H.G. forahta 'fear' contrasted with foraht Goth. faurht-s 'full of fear' (§ 79 p. 235 f.); similarly Lat. fabrica 'formation manufacture', (from faber); ep. also § 158. O.Icel. hadung 'an insulting' from had 'insult, scoff', launung 'secret' from laun (the same), with which primary formations like kvisting 'murdering' (from kvista 'to murder') became associated. O.H.G. werdunga 'dignitas' from werd; primary in e.g. hantalunga 'handling', from hantalon 'to handle'. In O.Icel. we have also side by side birting-r 'bright one' and birting 'brightness', ginnung-r 'deceiver, impostor' and ginning 'deceit', and the like.

Remark 4. If -inza- -inzā-, were derived from the suffix -īn- which is itself used to form abstract substantives (see Rem. 3), we should further have to consider whether the fem. -in-zō-, as in O.Icel. birting, was not formed immediately from the īn-stem by the addition of -qo- merely as an amplification.

Adjectival stems were extended by -qo-, e. g. O.H.G. gōra-g 'pitiful' beside Goth. gáur-s 'sorrowful', O.Icel. qrāug-r 'steep' beside Gr. òq9ó-; Lat. arduo-s (I § 306 p. 241). Here must be classed also O.H.G. entrig 'strange' (from ander 'other'), if the termination is Idg. *-tre-qó-, not *-tr-iqó- (§ 87 p. 262). -130- was generally substituted for the original ending as in Goth. sineig-s 'old' (contrast Skr. sana-ká-s p. 263), see § 89 a p. 271.

O.H.G. Alemann. weler 'how made?' see above, p. 265.

Remark 5. The origin of this word is therefore distinct from that of O.H.G. wie-lik Goth. hvi-leik-s 'what sort of', a compound of Germ.-lika-'body, form'. But the termination $-li-\chi a$ - was associated with this by popular etymology, just as in Skr. -i-ka- $-\bar{u}-ka$ - $-\bar{u}-ka$ - were associated with $-a\hat{n}c$ - (see p. 256).

Balto-Slavonic. -uqo is common to Baltic and Slavonic as a diminutive suffix. There can be no doubt that it first appeared in u-stems, cp. O.C.Sl. synükü 'little son': synü, gen. synu 'son'. So Lith. parszùka-s 'little sucking pig' beside parsza-s, medùka-s 'little tree' beside mēdi-s, O.C.Sl. cvětükü 'floweret' beside cvětü gen. cvěta. In Slavonic the same suffix was also used for the extension of adjective stems, yet with the loss of what was originally its special sense: qzükü 'narrow': Armen. ancuk anjuk 'narrow' (Skr. qhú-š), sladükü 'sweet' (Lith. saldù-s); others are not derived from u-stems e. g. bridükü 'bitter', lēpükü 'ornament'. Cp. further Pruss. names hke Banduke (banda-'useful') Wyrucke (vira- 'man').

Similarly the diminutival -i-qo-, which first appeared in i-stems, was extended beyond its original sphere in both Baltic and Slavonic. Yet -i-qo- itself is not used with this function, but only -i-q-io- -i-q-id-, which contains the additional suffix -io-. Proethnic examples are: O.C.Sl. ovi-ca 'sheep', cp. Lith. avi-k-ynė 'sheep-pen': Skr. avi-kd etc., see p. 263 above; O.C.Sl. myšica 'arm' orig. 'little mouse, muscle': Skr. mūšika 'mouse, rat', cp. loc. cit. In both these words the original diminutival sense was lost. Other examples are: Lith. rankikė 'little hand', kumelikė 'little (bad) mare', mamikė 'little mother' (in Lith. only feminines), O.C.Sl. kamenici 'little stone', korabitci 'little ship', dėtica collective 'little children' (dėti 'children'), dvirica 'little door' (dviri 'door'). Compare also Prussian names like Teviko (tewa- tāwa- 'father').

Here should also be classed Lith. -in-inka- Lett. -(i)n-ika--en-ika- (i comes from en), combinations of suffixes which denote any kind of relation to the original word, e. g. Lith. darb-ininka-s (Lett. da'rbinik-s) 'worker' from darba-s 'work', dari-ininka-s (Lett. da'r/nik-s) 'gardener' from darba-s 'garden', pùs-ininka-s 'owner of half a measure of land, small proprietor', tauk-iniūka-s' dweller in the fields, countryman', Lētùv-ininka-s' a Lithuanian' from Lētuvà 'Lithuania', Lett. gudrinik-s' wiseacre' from gudr-s' wise', sweschinīk-s' stranger' from swesch 'strange', Rīd/inīk-s' man of Riga' from Rīga' Riga', uppenīk-s' dweller by a river' from uppe 'river'. By the side of this suffix, with a similar meaning, stands Lith. -in-yka- Pruss. -n-ik-i- O.C.Sl. -n-iko-, which I refer to Idg. -īqo-, see § 89 a. The second part of Lith. -in-inka-should no doubt be identified with Germ. -un-za- (cp. I § 249 p. 204 f.), and it must be assumed that in Baltic there once existed forms like *dvarinka-s *dvarenka-s 'courtier' (should we add here the forms mēscei month' zajecī 'hare', which are quite isolated in Slavonic?) and that their suffix was confused with -(i)n-īka- (dvārinyka-s O C.Sl. dvorīnikū) producing Lith. -in-inka- (dvārininka-s) Lett. (*-n-enka-) -n-ika-.

Remark 6. I prefer this view to that proposed in I § 219, 4 p. 186, which I have now abandoned, that Slav. -iki is the phonetic equivalent of Lith. -inka-s. I have to thank Leskien for suggesting the above explanation.

§ 89. 5. $-\bar{\imath}qo - -\bar{\imath}q\bar{\alpha} -$, $-\bar{\imath}qo - -\bar{\imath}q\bar{\alpha} -$ and $-\bar{\alpha}qo - -\bar{\alpha}q\bar{\alpha} -$. The long vowels preceding the q may, like the i of -iqo- (§ 87), represent the final of a noun-stem; but it is not clear in what particular words these forms of the suffix first appeared. No general definition of their functions can be given.

a. - $\bar{i}qo$ -. Cp. Skr án \bar{i} -ka- \S 86 a p 256, suc \bar{i} -ka- sa--patn \bar{i} -ka- \S 86 b p. 257.

Aryan. It is rarely denominative: Skr. and-ika-s 'bearing eggs', from andá-m 'egg'. More frequently it is primary: Skr. dfš-īka-s 'conspicuous' dfš-īka-m 'aspect' dfš-īkā 'appearance', vydh-īkā-s 'augmenter', myd-īkā-m 'pity, grace'.

In Greek it is rare. $\pi \dot{\epsilon} \rho \partial \bar{\iota} \xi$ 'partridge' (properly 'peditor', though its resemblance to $\pi \dot{\epsilon} \rho \partial \omega$ may perhaps be due merely to a freak of popular etymology), $\beta \dot{\epsilon} \mu \beta \bar{\iota} \xi$ 'top'.

Italic. Denominative forms: umbil-īcu-s (cp. Gr. ¿µφαλό-ς), rubr-īcu-s rubr-īca, lect-īca and others. Primary forms: am-īcu-s, mend-īcu-s, pud-īcu-s, and others; add also pēdīcāre from

a stem *pēd-īco- with the same meaning as pōdex (§ 87 p. 261).
-īc-io- and -t-īc-io- (cp. -t-ico- § 87 p. 261) are derived suffixes e. g. novīciu-s, ad-ventīciu-s. Some nouns in -īqo- have passed into the consonantal declension: fēlīx, pernīx.

Perhaps we should also class here craticula and the like, see § 88 Rem. 1 p. 266.

In Germanic. -\(\bar{i}\)za- appears with various functions. It forms adjectives from nouns, c. g. Goth. mahteig-s 'mighty' from mahti- 'might', O.H.G. spenstig 'alluring' from spanst f. 'allurement, enticement; here -\bar{i}\)za- has taken the place of an older -\(\bar{z}a\)- (-i-\(\bar{z}a\)- a-\(\bar{z}a\)- etc.), see § 86 p. 259. It extends adjectival stems without altering their adjectival character, e. g. Goth. andan\(\bar{e}\)meig-s: anda-n\(\bar{e}\)m-s' pleasant', O.H.G wird\(\bar{i}g\). werd 'worthy', riht\(\bar{i}g\): reht 'right'; -\(\bar{z}a\)- has the same function, e. g. in O.H.G. g\(\bar{g}a\)ra-g: Goth. g\(\dal{a}u\)r-s 'troubled', see § 88 p. 268; there can be no doubt that in this use also -\(\bar{i}\)za- has spread beyond its original sphere, cp. Goth. sineig-s instead of orig. *sene-qo- or *seno-qo- (p. 263). Finally it occurs as a primary suffix, e. g. in Goth. gabeig-s beside the older gabig-s, see § 87 p. 261.

Balto-Slavonic. Both branches have -igo- as a secondary suffix, in substantives which are generally derived from adjectives, and express any kind of relation to the original word. In Baltic (Lith, and Pruss.) these forms are nearly always derived from nouns with an n-suffix, Lith. -in-yka-s Pruss. -n-ik-i-s, in Slavonic from others also. In Lithuanian -ininka-s is exactly equivalent to -inyka-s, but the two suffixes are distributed amongst the various dialects: in some the first, and in others the second was alone in use; in many of the districts bordering on Slavonian territory the Slav. -iniku- may have helped to establish the form -inyka-s (there are a large number of such words borrowed from Slavonic, e. g. metelnyka-s 'impostor' = Pol. mietelnik). Lith, darbinuka-s beside darbininka-s, etc., see § 88 p. 269 f. Pruss. laukinik-i-s 'vassal, feudal dependant' (Lith. laukinyka-s laukiniñka-s), slidenik-i-s 'leading hound', stubonik-i-s (booth-owner' hence) 'cupper, surgeon'. O.C.Sl. zlatikŭ a gold coin (zlată 'golden'), sîrebrînikă sîrebrînika 'silver coin' (sîrebrînă

'silvern'), krūvīnikū 'murderer' (krūvīnū 'bloody'), grēšīnikū 'sinner' (grēšīnū 'sinful'), vlasēnikū 'who has a hairy (vlasēnū) garment'; from participles, e. g. učenikū 'scholar, disciple', (učenū 'becoming learned') izbranikū 'one elected, chosen' (iz-branū 'elected'); from subst. e. g. Russ. babik 'fop, ladies' man' (baba 'woman'), sēverik 'north wind' (sēver 'north'). In Lithuanian we have only isolated examples of derivatives without the n-suffix, as dalỹka-s 'piece, part' from dall-s 'part'.

O.C.Sl. sikŭ 'talis' (also sicī, cp. ljubimicī beside ljubimikŭ and the like) from sĭ 'hic', tolikŭ 'tantus' kolikŭ 'quantus', compare also velikŭ 'great' beside velijĭ 'great': cp. Gr. πηλίχο-ς O.H.G. weler § 88 p. 265.

Further -ikŭ forms diminutives and pet names in Slavonic, as Russ. domik 'little house' mjačik 'little ball', Lower Sorb. gašik 'little pond', gjarnyk 'little pot'; Czech Volik beside Vol, Vladik beside Vlad, Mod.Slov. Namka 'Annie'.

Primary: O.C.Sl. -ica, as ljubica 'amator', žirica 'sacerdos'. b. -ūqo-. Cp. Skr. ánū-ka- § 86 a p. 256.

Aryan. In Sanskrit, it is found primary adjectives containing reduplicated verbal forms, as dan-daś-ūka-s 'biting' (ep. dáśuka-s 'biting' § 88 p. 264), ja-jar-ūka-s 'watchful', va-vad-ūka-s 'talkative'.

Greek. It is found in isolated words as a primary suffix: *π'ρῦξ (Dor. etc. *άρῦξ) 'herald', cp. Skr. ca-kar-tı 'he extols' karŭ-š 'praiser'.

Italic. In Latin it occurs a few times in primary use e. g. cad-ūcu-s, fīdūc-ia, and not more often as secondary, e. g. aerūca (beside aerūgō) from aes, lactūca from lac (lact-is).

In Slavonic it is a primary suffix in a few words, e. g. O.C.Sl. jęz-ykŭ 'tongue, speech' (: Pruss. ins-uw-i-s 'tongue'), vlad-yka 'ruler, lord', Russ. kl-yk 'hewer', pol. bzd-yk 'peditor'.

c. -ago-.

Aryan. Here -aka- is ambiguous, so that no forms can be said with certainty to be derived from -aqo-. Besides Skr. asmāka-s etc. (§ 86b p. 267) the following may be examples: pacāká-s Ved. 'clear, pure' (to be read, as the metre indicates.

for the pavaká-s of the Mss.), jálpaka-s beside jalpaka-s 'tal-kative', bhíkṣāka-s 'beggar'.

Greek. $v\acute{e}a\xi$ 'youth': O.C.Sl. novakŭ 'novice'. $\vartheta\acute{\omega}\varrho a\xi$ Ion. $\vartheta\acute{\omega}\varrho\eta\xi$ 'breastplate'. $\mathring{\varrho}\varrho\eta\xi$ Lesb. $\mathring{\varrho}\varrho\eta a\xi$ 'little sprout or shoot'. $\eta\dot{\eta}\lambda\eta\xi$ 'helmet'. $\sigma\varrho\dot{\eta}\xi$ 'wasp', which no doubt is for $\sigma\varrho\dot{-}ax$ - i. e. 'a creature that lives in swarm', compare Skr. $sabh-\acute{a}$ 'assemblage' Goth. sib-ja 'kinsman' (Baunack, Stud. auf dem Geb. des Griech. I 25).

Italic. In denominative formations merācu-s from meru-s, lingulāca from lingulu-s, verbēnāca from verbēna; opācu-s is no doubt to be compared with op- ob. -āx is common both in primary and secondary use bibāx, loquāx, persequāx, mordāx, audāx, pūgnāx, vērāx.

Old Irish. -āko- is common to all Celtic languages, forming adjectives from substantives, as in marcach Mid.Cymr marchawc 'equester' from marc 'horse', cumachtach Mid.Cymr. kyfoethawc Corn. chefuidoc 'mighty' from cumachta 'might'. It is also found in proper names, as Gall. Dumnācu-s Mid.Cymr. Dyfnawc, Gall. Tento-bōdiācī (pl.) Mid.Ir. Buadhach, Gall. Benācū-s; its originally adjectival character appears clearly in placenames in -ācum like Gall. Avutācum i. e. 'praedium Aviti' (Zeuss² 806)

Germanic. Goth. áinōhō Luke 8, 42, fem. of áinaha 'unicus', which is usually adduced here, is most probably nothing but a scribe's mistake (perhaps caused by áinōhun?).

Balto-Slavonic. Lith. tõk-s gen. tók-io O.C.Sl. takŭ 'talis'; similarly kõk-s kakŭ 'qualis', jõk-s 'any one' jakŭ 'qualis', anõk-s 'of that kind' onako adv. 'so', dvejóka-s dvojakŭ 'twofold' trejóka-s trojakŭ 'threefold'. There are only one or two examples to add from Slavonic e. g. O.C.Sl jedinakŭ 'aequalis' drugako adv. 'otherwise' (cp. Lith. vēnóka-s vēnõk-s 'of one kind' kitõk-s 'of another kind'), but in Baltic this suffix was very fertile in forming new adjectives from those already in use to express an approach to the meaning of the original: Lith. jūdó-ka-s 'blackish' (jū'da-s 'black'), sūpnóka-s 'weakish, rather weak'

(sìlpna-s 'weak'), saldóka-s' sweetish, rather sweet' (saldù-s 'sweet'), didóka-s 'rather large' (didi-s 'large'); in Lettish it became the ordinary comparative suffix, as in sa'ldák-s 'sweeter' (sa'ld-s), labbák-s 'better' (lab-s).

-āqo- was further employed in Balto-Slavonic to form substantives from adjectives to denote something characterised by the quality which the adjective expressed. So Lith. naujōka-s O.C.Sl. novakŭ 'novice' (Serv. novak 'new moon') from naŭje-s novŭ 'new'. Gr. νεάξ, Lith. trecziōka-s 'threepenny-bit' (strictly a coin worth three copper groschen) szesztōka-s (twice as much), O.C.Sl. tretijakŭ 'a three-year-old'; O.C.Sl. junakŭ 'a youth'; O C Sl. bujakŭ 'fool, blockhead'; finally personal names in -akŭ, as Russ. Gojah, Czech Lstak, Modlak.

The difference in accentuation between trejóka-s and treczióka-s should be noticed. The Gliding 1) (geschliffen) accent in töks replaced the Incisive (gestossen) in consequence of the loss of the final syllable, cp. tókio.

§ 90. The Suffix -sko - -ska and (in Germanic and Balto-Slavonic) -isko - -iska. We have to consider chiefly the primary noun-suffix -sko -, which is identical with the verbal suffix -sko - forming present stems. Occasionally we meet with forms which point to an original -sqo -. I must leave it an open question whether to regard these as two entirely distinct forms, or to suppose that the velar was substituted for the palatal in the original suffix by some secondary process, cp. I § 467 p. 342 f. I confess however that the latter view seems to me more probable.

In do-Germanic. *prk-ska-'question, investigation, enquiry' (cp. Skr. prcham Lat. poscō, \(\sigma\) prek-): Skr. prcha-, Armen. hare (gen. harei, transferred to the i-declension), O.H.G. forsca. *is-ska-*ais-ska- (cp. Skr. icham 'I long for, desire', \(\sigma\) ais-): Skr icha-

¹⁾ I am very sorry to depart from Dr. Wright's translation of these terms in Vol. I (p. 558 f.) but the rendering 'slurred' for geschliffen and 'broken' for gestossen seem to me a little misleading.

R. S. C.

'longing, wish', Armen. aic 'enquiry' (only found in the accusative and then only in certain phrases), O.H.G. eisca 'an asking, demanding'. Skr. vancha 'wish' O.H.G. wunsc m. 'wish, desire', beside Skr. vanchami 'I wish', \(\sqrt{yen-} \) 'find pleasure in something'; in Sanskrit, the nasal is due to the analogy of kindred forms (Bartholomae Ar. Forsch. II 91), *va-ch is for *y\varphi-sk-, and wunsc for *y\varphi-sko-.

Aryan. There are but few examples to be added from Sanskrit. mūrchā- 'weakness' beside mūrchāmi 'I freeze, grow torpid' (compare mūrkhā- 'stupid, dull, unintelligent' which may be classed with sargā- and the like, I § 467, 1 p. 342 f.), beside mūr-tā-s 'curdled', if Goth. un-tıla-malsk-s 'thoughtless' and O.Sax. malsc 'haughty' come from the same word, its form in pr. Idg. would be *ml-sko-. mlēchā-s 'foreigner, barbarian', beside mlēchāmi 'I jabber'; the Pāh form mılakkha- is still obscure, in spite of E. Kuhn's attempt to explain it in his Ztschr. XXV 327.

Armenian. See above. Perhaps also p'uk 'breath, flatus' beside pčem 'I breathe, blow', cp. Gr. φ v' σ va 'blister, weal' φ v' σ v' intestine, sausage' beside φ \tilde{v} σ a 'blowing, blast', \sqrt{phu} - or sphu-(the weak form).

Greek. δίσχο-ς 'quoit' for *διχ-σχο-ς, beside δικεῖν 'to throw'. βο-σχή 'fodder, pasture', beside βόσχω 'I feed'.

Here apparently we must class the diminutives 1) in -ισκο(which do not occur in Homer), as παίδισκο-ς 'little boy' παιδίσκη 'little grrl', οἰκίσκος οἰκίσκη 'little house', χοιρίσκο-ς 'little pig', ἐδρίσκη 'httle pitcher'. These may be connected with presents in -ισκω (like εὐρίσκω), and the (primary) forms on which the rest were modelled (cp. ἄρεσκο-ς 'pleasing' beside ἀρέσκω) may have arisen when such presents still had the sense of becoming, of gradual realisation, compare νεᾶνίσκο-ς with Lat. adulēscēns.

Italic. Lat. ēsca for *ēd+scā and its opposite pōsca. Also vescu-s properly 'eaten away'), beside vescor, if this group of

¹⁾ Janson, De Graeci sermonis deminutivis in loro-s, Thorn 1856.

words contains -sko- (cp. Osthoff, Zur Gesch. d. Perf. 606; Baunack, Kuhn's Ztschr. XXVII 561 ff.).

Germanic. O.H.G. forsca eisca wunse Goth. -malsk-s see above p. 275. O.H.G. frosk O.Icel. frosk-r 'frog' for pr. Germ. *frux-ska-, cp. A.S. frozza 'frog'. —

Here must be classed the secondary adjectival suffix, Germ. -iska-, Lith. -iszka-, Slav. -ĭsko-. It denotes origin and connexion, or fitness and quality.

Germ. Goth. judawisk-s 'Jewish', piudisk-s 'èdvisó,' O.H.G. diutisc 'German'; O.H.G. frencisc 'Frankish', Goth. mannisk-s 'human', gudisk-s 'divine', funisk-s 'fiery', O.H.G. urdisc 'earthly', antarisc 'strange', dorfisc 'belonging to a village, rustic, clownish', mordisc 'murderous', altisc 'old'.

Lith. průsiszka-s 'Prussian', létùviszka-s 'Lithuanian', dřviszka-s 'divine', téviszka-s 'fatherly', dañgiszka-s 'heavenly; substantives are formed from it by -10-, c. g namiszki-s m. namiszke f., 'member of a household', mūsiszki-s 'one who is ours', Klaipediszki-s 'inhabitant of Memel', téviske 'patrimony or father's house, fatherland, home'. O.C Sl. rumisků 'Roman', židorisků 'Jewish', kŭnęžísků 'princely', dětisků 'childish', nebesisků 'heavenly'

The history of this suffix involves considerable difficulty.

Remark. It may be suspected that the Balto-Slavonic suffix was borrowed from Germanic (see I § 587 Rem. 2 p. 442): in Romance indeed -isco- (Ital. grechisco, donnesco) was borrowed from Germanic and Slav.-arī Lith.-orin-s came from Germ -aria-. It is quite possible that it is a compound suffix -is+kn- (compare § 86) (op Skr. arētūs-kn- mastiška-); and if so it would be a question whether OHG. altisc and other forms derived from adjectives did not contain the comparative stem (op. Skr. aniyas-kū- p. 264) Finally it is conceivable that it is an analogical modification of Idg. -iqo- (§ 87).

§ 91. The Suffix -go--ga-. The following forms may be quoted towards proving the existence of a suffix -go- in procthnic Indo-Germanic.

Skr. árbha-ga-s 'youthful' beside árbha-s arbha-ká-s 'small, young'. śfroga-m 'horn' may be regarded as derived from a form *śrna- == Goth. hańrn, just as O.H.G. scincha f. 'hollow

of the thigh, shank': scina 'leg-splint', Dan. manke: O.H.G. mana 'mane' (Kluge, Festgruss an Bohtlingk, 1888, p. 60).

Armen. krun-k 'crane': O.H.G. chranu-h A.S. cornu-c 'crane' beside A.S. cran Gr. yépavo-5 'crane'. Also arn-kun-k (gen. sruni-c) pl. 'shinbones, calves'? Armen. -k however also represents Idg. q.

In Germanic -ka- is a common suffix. With chranuh we may compare certain other names of birds, such as Goth. ahak-s 'dove' O.H.G. habuh A.S. hafoc 'hawk', which resemble Greek bird-names in -γ-, like κόκκυγ- (see Bugge, Paul-Braune's Beitr. XII 424 f.). In other words it has generally more or less of a diminutival force, as O.H.G. armhha 'paupercula', fulihha 'she-foal', snurihha 'little daughter-in-law', and adjectives like O.H.G altih 'old' O.Sax. luttic O.Fries. litik 'small' (cp. Skr. árbha-ga-s). By the side of the O.H.G. scincha mentioned on p. 276 should no doubt be placed O.H.G. zinko 'tooth, prong', which is connected with Mid.II.G. zint O.Icel. tind-r, ground-form *dend-go-, from the stem *dent- 'tooth'.

In Balto-Slavonic also -go- is fairly frequent; but this may equally well represent Idg. -gho-. Lith. isz-ei-gà or isz-ei-ga 'exit' beside isz-eĭti 'to go out', O.C.Sl. slu-ga 'servant' from \$\sim kleu-\$' hear' (slu-tije, slovo etc.), stru-ga 'current, ship' from \$\sim sreu-\$' flow' (stru-ja, o-strovū etc.). Lith. melāg-i-s m. melāg-e f. 'liar', compare -in-ga-s in such words as varginga-s 'pitiful, miserable' from varya-s 'misery' (and -in-ka-s § 68 p. 271). O.C.Sl. roz-ya 'twig' beside rozū razū 'dis-'. O.C.Sl. ma-ĕī 'man' for -g-ie, cp. Skr. mánu- Goth. mann- 'human being, man'. Lith. ketvèr-g-i-s adj. 'of four years', trei-g-ȳ-s 'of three years' and the like, O.C.Sl. četvri-gū Russ. četver-g 'Thursday'.

Remark. We must remember that the suffix -go- may have been developed from -go- in the proethnic period. See I § 469, 7 p. 346. By the side of -go- we may perhaps recognise a similar suffix -gu- Gr. $\pi e^{2i\sigma-\gamma u-\varsigma}$ $\pi e^{2i\sigma-\beta u-\varsigma}$ 'old' and in Lith. $\check{z}mo-g\dot{u}-s$ 'human being'; $\pi e^{2i\sigma-\gamma u-\varsigma}$ whould stand beside Lat. pris-co- (cp. § 135) as Skr. drbha-gabeside arbha-kā- and as O.H.G. zinko beside A.S. tuec or tūsk § 88 p. 266. A different explanation of $-\gamma u- -\beta u-$ is given by Eezzenberger in his Beitr. IV 345.

II. Suffixes in -i.

§ 92. In the *i*-suffixes we have a triple Ablaut: *i*, *e<u>i</u>, <i>o<u>i</u>* (*e*-series, I § 311—314). *i* e. g. in nom. and acc. sing. masc. fem. -*i*-s -*i*-m; *e<u>i</u>* e. g. in nom. pl. masc. fem. -*e<u>i</u>*-es; *o<u>i</u>* in gen. sing. -*o<u>i</u>-s. We have not enough evidence to determine exactly the connexion between these grades of Ablaut and the varying conditions of Accent in the original declension.*

In the proethnic period the *i*-stems were masculine, feminine and neuter. The first two had originally the same declension. Differences only arose after the separation of the languages, e. g. Skr. acc. pl. ávīn m. ávīš f. 'oves'.

i-stems often pass into the inflexion of the -ī-: -iē-stems (§ 109), and into that of the monosyllabic -ī-: -ii-stems (§ 109 Remark 2).

§ 93. The Suffix -:-. This was always a primary suffix. It is secondary only in nouns originally belonging to other declensions which have been transferred to the inflexion of the i-stems. The change of declension is due sometimes to a mere association of similar forms which leaves the meaning unaltered, as in Lat. nāv-i-s nāv-i-um nāv-i-bus¹) (contrast Skr. nāú-š nāv-ām nāu-bhyás); sometimes it denotes a change of meaning, the new signification being taken from that of other i-suffixes (as -ti--ni-), as in O.C.Sl. žestoč-ĭ 'hardness' from žestokŭ 'hard'.

-i- as a primary suffix is found in substantives and adjectives. The substantives are most commonly masculine and feminine, and they may be either abstract or concrete.

Indo-Germanic. Substantives.

Masculine and Feminine *ou-i-s 'sheep': Skr. ávi-š m. f. (instead of *āvi-š on the analogy of the cases which began with avy-? see I § 78 p. 69 f.), Gr. ŏi-ç oi-ç m. f., Lat. ovi-s m. f., O.H.G. ou f., Lith. avi-s f. (O.C.Sl. ovi-ca § 88 p. 269). Skr. ák-i-š m. Avest. ažiš m 'snake, dragon', Armen. iž (gen. iž-i) 'viper', Lat.

For the transference of -i-stems into the r-declension, see § 109
 Rem. 1.

angu-i-s m. f. (O.Ir. esc-ung 'eel', a compound with esc 'swamp'), Lith. ang-i-s f. 'adder'; cp. also Gr. ἔχι-ς m. f. 'adder, viper' ὄφι-ς m. 'snake, dragon'. Avest. er'z-i-š Gr. ὄφχι-ς m. 'testicle'. *ηs-i-s m. 'sword': Skr. asi-š Lat. ēnsi-s. Skr. -jān-i-š ján-i-š Avest. jaini-š f. 'woman', Goth. qēns (stem qēn-i-) f. 'woman', beside Skr. gn-ā- etc., see § 60 p. 111.

Neut. *oqi- 'eye': Armen. αὐ-k (gen. αὐας) pl., Gr. ŏσος for *ok*-i-e du. n. (Att. τρι-οττί-ς must have arisen through a fusion of ὀττ- = *oqi- and ὀτι- = *oqi-), in Gothic in and-dugi-ba adv. 'coming into sight, openly' (for the ἀu cp. I § 444 Rem. 3 p. 331), Lith. aki-s f., O.C.Sl. oči du.; add Skr. ákši n. There were a few other proethnic neuters, as O.C.Sl. uš-i 'ears' But only a part of the cases were originally taken from these stems, the rest were formed from stems in -en- (cp. e. g. Skr. akṣn-ā (instr.) beside ákṣ-i etc., § 114). In several languages, however, the i-declension was carried through all the cases and the gender was changed. In others however the i-inflexion remained defective. Cp. § 114 and Joh. Schmidt, Kuhn's Ztschr. XXVI 16 ff.

There appears to be no one adjectival stem which is found simultaneously in more than one language. Here however we must notice *tr-i- 'three' (cp. Skr. tr-tiya- 'tertius' etc.): Skr. tráy-as loc. tri-şú, Armen. ere-k instr. eri-v-k (I § 263 p. 214), Gr. τρεῖς τρι-σί, Lat. trēs tri-bus O.Ir. trī dat. tri-b, Goth. preis dat. pri-m, Lith. trŷs loc. tri-sè O.C.Sl. trij-e trij-e loc. trì-chù.

Aryan. Substantives.

Masculine and Feminine. The suffix is especially used to form nomina agentis (m.) and abstract verbal substantives (far more commonly f. than m.). Skr. v-i-\$ Avest. v-i-\$ m. 'bird': Lat. av-i-\$ (the loss of the root-syllable in Sanskrit is a trace of the Ablaut of the original declension). Skr. kav-i-\$ 'sage' Avest. kav-i-\$ m. 'king'. Skr. gir-i-\$ Avest. gai-ri-\$ m. 'mountain' (should we connect it with gurú- 'heavy'?) Skr. va-vr-i-\$ m. 'husk, covering' Avest. vaoiri- (cp. I § 160 p. 144) in us-vaoiri-\$ 'shelled, without shell'. Skr. f\$-i-\$ m. 'singer, sage', ktr-i-\$ m. 'singer of praises, arc-i-\$ m. 'beam', dhvan-i-\$ m. 'tone, sound', nidh-i-\$ m. 'establish-

ment, store, treasure' (ni-dhā-); rúc-i-ṣˇ f. 'gleam, light', kṛṣ-i-ṣˇ f. 'ploughing', rốp-i-ṣˇ f. 'violent pain', grấh-i-ṣˇ f. 'seizure', nābh-i-ṣˇ f. 'middle'. Avest. vaṇiā-i-ṣˇ m. 'announcer', vair-i-sˇ m. 'canal, pond'; baoiā-i-sˇ f. 'smell, perfume' vaiā-i-sˇ flowing, stream'.

The dative of the nomina actionis is used as an infinitive in Vedic and Avestic, e. g. Ved. dršáyē 'for seeing', yudháyë 'for fighting', Avest. savayōī 'to use' (cp. Bartholomae, Kuhn's Ztschr. XXVIII 20).

Neuters. Skr. ákši- Avest. aši- 'eye', see above p. 279. Skr. ásthi- 'bone', dádhi- 'curds'. Avest. uši- 'understanding, thought'.

Adjectives. Skr. hár-i-š Avest. zairi-š 'golden yellow'. Skr. šúc-i-š 'shining, pure', gfbh-i-š 'containing in oneself', kēp-i-š 'trembling', máh-i-š 'great'; often in reduplicated forms, as cá-kr-i-š 'making', dá-dh-i-š 'bestowing', tá-tur-i-š 'overcoming', ba-bhr-i-š 'carrying', da-d-i-š 'giving', sa-sah-i-š 'conquering, victorious'. Avest. darš-i-š 'violent, mighty' cp. Skr. dá-dhṛš-i-š 'courageous, bold', Avest. da-dqs-i-š 'biting'.

We find a class of words transferred to the i-declension in order to denote relation of any kind to the original word. In Sanskrit they generally imply origin. The initial syllable has the vriddhi strengthening regularly in Sanskrit, and often in Iranian. Skr. sárath-i-š 'charioteer' from sa-rátha-s 'riding in the same chariot', paúrukutsi-š 'descendant, son of purukútsa-s'. Avest. māzdayasni-š 'belonging to the worshippers of Mazda', from mazda-yasna- 'one who worships Mazda' vār prayni-š 'victorious' from ver pra-jan- 'victor', dāstayāni-š 'son of dāštayāna-'; O.Pers. pātišuvari-š 'a man from Patishuvar'. It is difficult to say on what model this class of forms was made, cp. Lat. decemjugi-s 'and the like (p. 281). Compare the vriddhi-formations in -a- § 60 p. 112 f.

Armenian. 1ž (gen. 1ž-i) 'viper': Skr. áh-i-š etc., see p. 278 above. aic (gen. aic-i) 'goat': Gr. alyi- in alyi-ßoro-z 'pasturing goats'. From old neuter forms are derived ac-k pl. 'eyes' (see p. 279 above) and sirt (gen. srt-i) 'heart': Lith. szird-l-s 'heart' beside Goth. hairtō.

Greek. Here it is not common. Substantives. Masculine and Feminine. δ - ι - ς m. f., $\delta \chi$ - ι - ς m. f. $\delta \varphi$ - ι - ς m., see above p. 278 f. $\tau \varrho \delta \chi$ - ι - ς m. 'runner', $\sigma \tau \varrho \delta \varphi$ - ι - ς 'adroit, sly fellow', $\kappa \delta \varrho$ - ι - ς m. 'cimex', $\delta \varrho$ - ι - ς f. 'strife: Skr. δr -i- δ 'enemy'; $\pi \delta \varrho$ - ι - ς 'heifer, maiden', $\varrho \delta \chi$ - ι - ς f. 'backbone, back', $\tau \varrho \delta \pi$ - ι - ς f. 'ship's keel', $\mu \tilde{\eta} \nu$ - ι - ς f. 'wrath'. There remains one original neuter, $\delta \sigma \sigma s$, see p. 279 above, whilst all the other proethnic neuters of this class were driven out of use by new formations.

The Adjective $\tau \varrho \delta \varphi - \iota \cdot \varsigma$ 'thick, fat, strong' was no doubt originally a substantive, 'thick, strong appearance'.

Italic. Substantives. Masculine and Feminine. Lat. ov-i-s m. f., Umbr. ovi acc. 'oves': Skr. áv-i-š etc., see p. 279 above. Lat. av-i-s f., Umbr. avif acc. 'aves': Skr. v-i-š 'bird'. Lat. ax-i-s m.: Lith. asz-i-s O.C.Sl. os-š 'axle'; torris m. (\sqrt{ters-}), orb-i-s m., corb-i-s m. f., crat-i-s f.; ap-i-s f., trud-i-s f., scob-i-s f., sit-i-s f., rav-i-s f. Osc. slagím 'regionem'.

Neuters. Lat. mar-e: O.Ir. muir n. O.H.G. meri n. (perhaps however the Idg. form is *mo-ri, cp. Gr. iδ-φι); sal-e (stem sal-ι-, also m.): Armen. αλ (gen. αλ-ι) 'salt', Gr. άλι- in άλι-πόφφυφο-ς 'sea-purple', O.C.Sl. sol-ĭ f. 'salt'; conclāv-e, prae-saep-e (also praesaep-i-s f.). aur-ι-s too was originally neut.: Mid.Ir. au ō, dat. pl. auib, O.C.Sl. uš-i du., Lith. aus-ì-s.

Adjectives. rud-i-s, jug-i-s, dulc-i-s, grand-i-s, turp-i-s. In Latin the i-declension was invaded by a large number of words which did not belong to it originally, as ped-i-bus, nav-i-bu-s nav-i-um nav-i-s, juven-i-s. This is especially note-worthy in adjectives, and particularly in compound words. In these the -i- often seems to be merely a sign of their adjectival character. simili-s 'like': Gr. όμαλό-ς 'even', humi-li-s: Gr. χθαμαλό-ς low', see § 76 p. 202 f. in-ermi-s (also in-ermu-s) from arma pl., ex-somni-s from somnu-s, im-belli-s from bellu-m, im-berbi-s (also im-berbu-s) from barba, multi-formi-s from forma, bi-corni-s from cornu. We have examples of a similar transference in other languages; with the change in inermi-s etc. compare especially the parallel change in Irisn.

The proethnic variation between -tat- and -tati- (cīvitat-um

and croitati-um), noct- and nocti- and the like must have been an important factor in enlarging the i-declension.

Old Irish. aird m. or f. 'point at the corner or end': Gr. a'go-1-5 f. 'arrow-point, sting'. aig f. 'ice'. muir n. 'sea' (Gall. Mori-tasgu-s): Lat. mare n. O.H.G. meri n. (though the Idg. form was perhaps *mo-ri); gein n. 'birth', guin n. 'wound', buaid n. 'victory'.

air-dirc 'famed' ē-cndirc 'absent': cp. Skr. dṛṣ-i-ṣ 'a seeing'; maith 'good' (Gall. Mati-donnu-s), tais 'soft, gentle' (Gall. Taximagulu-s), tin 'tender' (Gall. Teni-genonia.)

Adjectives, especially compound adjectives, frequently passed over to the *i*-declension; as *ē*-nirt 'strengthless, weak' from nert 'strength', so-choise 'docibilis' from cose 'an instructing', ess-amin 'fearless' from omun 'fear' (cp. Gall. Ex-obnu-s Ex-omnu-s). Also substantives, as samail 'likeness, picture' and therefore also its derivative co-smil 'like'. The same may be seen in Latin (p. 281).

Germanic. Substantives. Masculine and Feminine. The verbal abstract nouns are much more commonly m, than f. Goth. baur A.S. byre m. 'son'. Goth. nau-s (acc. pl. nav--i-ns) m. 'dead man': O.C.Sl. nav-i 'mortuus'. O.H.G. win-i m. 'friend': Skr. vasu-váni-š 'desiring riches' vaní-š 'desire, longing'. O.Icel. kon-r m. 'one who belongs to a family, relative', elg-r m. 'elk'. Goth. balg-s m. 'leather bottle, skin'. Goth. hug-s O.Sax. hug-i m. 'thought, spirit' pr. Germ. *xuz-i-s, Goth. gum-s O.Sax. kum-i O.H.G. chum-i m. 'a coming', Goth. mun-s O.Icel. mun-r m. 'view', Goth. slah-s O.Sax. sleg-1 m. 'blow' (the difference between the -h- and the -g- corresponds to the original variation of accent in the different cases of the same declension), O.H.G. big O.Sax. bit-1 m. 'bite', O.H.G. fang A.S. fenz O.Icel. feng-r m. 'capture'. Goth. gen-s f. 'woman': Skr. -jani-s. Goth. ven-s f. 'hope' O.H.G. wan m. 'faith, hope', unless it is to be analysed as *ye-(e)ni- and so belongs to § 96 (p. 288). O.H.G. chur-i f. 'choice'. O.H.G. chur-i f. 'choice'. O.H.G. wurt f. O.Icel. Urd-r f. 'fate' pr. Germ. *uurd-i-s. For the treatment of the nominative ending -i-s in these forms see I § 660, 1 p. 514, § 661, 2 p. 517. Neut. O.H.G. meri 'sea' (cp. Goth. mari-saiv-s): Lat. mare n. O.Ir. muir n. (though perhaps the Idg. form was *me-ri).

Adjectival i-stems were confused with io- stems in proethnic and later Germanic,

Balto-Slavonic. Substantives. Masculines are rare. Lith. vag-i-s'thief'; O.C.Sl. nav-i'dead': Goth. náu-s'dead man' (see above); O.C.Sl. medv-ěd-i'bear' (honey-eater'), cp. jad-i f. 'food'; glad-i'hunger'. The feminine is more frequent. Lith. asz-i-s O.C.Sl. os-i'axle': Lat. ax-i-s. Lith. pil-i-s' stronghold, castle': cp. Skr. pur-i-š'town', though these two words may be independent extensions of an orig. stem *pll-. Lith. āt-ils-i-s' repose, ease', rūd-i-s' rust'. O.C.Sl. lūš-ī'lie': O.H.G. lug A.S. lyze (pr. Germ. *luzi-) m. 'lie'. O.C.Sl. věd-ī'knowledge: Avest. vaeid-is' herald'. O.C.Sl. sīč-ī' urme', o-stež-ī'clothing', chot-ī'desire, craving', bled-ī'error, deceit', rěč-ī'speech', vodo-tečī vodo-točī water-course, channel'. The following imply old neuter forms: O.C.Sl. du. očī 'eyes' (cp. Skr. akṣī) and uṣī 'ears', Lith. akì-s f. and ausì-s f., see p. 281.

Adjectives in -i- are not found in the historical period of Lithuanian, so that Lith. didi-s 'large' loc. didi-mè cannot be classed here. The word was no doubt a substantive originally, like Gr. $\tau o \circ \phi_{I}$ (see above p. 281). In Slavonic too the adjectives in -i- have died out. Possibly however they are represented by indeclinable forms in -i, such as O.C.Sl. is-plüni beside plüni 'full' sugubi beside sugubă 'doubled', svobodi 'free', which Mahlow, (Die langen Vokale, p. 121) compares with Lat. in-ermi-s O.Ir. \(\tilde{e}\)-nirt (p. 281 f.); see however Leskien, Handbuch² p. 72 f. 94 f.

In Balto-Slavonic, as in Latin, the forms of the i-declension invaded other classes of stems. E. g. dat. pl. Lith. akmen-i-ms O.C.Sl. kamen-i-mi (nom. sing. Lith. ak-mi O.C.Sl. kamy 'stone') like Lat. homin-i-bus, Lith. moter-i-ms O.C.Sl. mater-i-mi (nom. sing. Lith. moté 'woman' O.C.Sl. mati 'mother') like Lat. matr-i-bus, Lith. debes-i-ms O.C.Sl. nebes-i-mi (nom. sing. Lith. debes-i-s m. f. 'cloud' O.C.Sl. nebo n. 'heaven') like Lat. gener-i-bus. Many words were thus transferred entirely, or almost entirely, to this declension, as Lith. dant-i-s f. 'tooth' (gen. pl. dant-i), eqs-i-s

f. 'goose' (gen. pl. žąs-ũ), debes-ì-s; O.C.Sl. krŭv-ĩ f. 'blood' (gen. sing. krŭv-e), kamen-ĩ beside kamy, vĩs-ĩ 'village' (Skr. víś-).

In Slavonic -i- is a secondary suffix in feminine abstract nouns like žestoči 'hardness', from žestokū 'hard', zelenī 'viriditas', from zelenū 'viridis', zūlī 'wickedness', from zūlū 'wicked', toplī 'warmth', from toplū 'warm' (cp. § 98). The type for these new formations was set by such pairs of forms as da-nī 'gift' and da-nū 'given', bra-nī 'fight' and bra-nū 'fought', pę-tī 'fivefold character, five' and pę-tū 'fifth'.

§ 94. The Suffixes -n:- (-nn:-) and -eni- (-on:-).')

The two forms are related in the same way as -no- and -eno-. Hence we analyse e. g *doni-s (Lith. dûn:-s O.C Sl. dani 'gift') as *do+en:-. See § 65 p. 138.

These suffixes appear to have been always primary.

Amongst the substantives formed with -ni--eni-, the verbal abstract nouns are a prominent class, widely represented in Aryan, Germanic and Balto-Slavonic These stand in the same relation to the participial suffixes -no--eno- (-ono-) as the noun suffix -ti-, which also forms verbal abstract nouns (§ 100), to the participial suffix -to- (§ 79 p. 218): e. g. Skr. lū-ni-š 'a tearing away': lū-na-s 'torn away' = hū-ti-š 'call': hū-ta-s 'called'. And it is certainly not an accident that these nouns in -ni- are most common in the languages in which the no-stems occupy a prominent place among the forms of the infinitive.

In Germanic and Balto-Slavonic we often find -sni- instead of -ni-. The origin of the -s- is not quite clear. Possibly it should be sought in forms like *leuqs-m-s 'gleam' (Avest. raoxšni-š), cp. -s-no- § 66 p. 140 f. With Lith. deksni-s 'burnt patch of ground' cp. O.C.Sl. žestu for *gek-s-to- p. 79 p. 237.

Remark. Sometimes it is not easy to decide whether in any particular word we have this suffix or an en-stem extended by -1- (1. e. transferred to the s-declension) The latter is certainly the case e. g. in Skr. šun-1-5 Avest. sūn-i-5 Lith. szun-i-5 Pruss. sun-1-5 'dog' beside Skr. švū gen. šūn-as,

H. Ebel, Die Abstractsuffixe -ni and -ani (in Gothie), Kuhn's Ztschr. V 302 ff. Losch, Die mit dem Suffix Ni gebildeten Verbalabstracta im Gotischen, Germania XXXII 223 ff.

Lat. carn-i-s beside carō carn-is, O.C.Sl. dīn-ī 'day' jelen-ī 'stag' beside gen. sing. dīn-s jelen-e, srīšen-ī beside Lith szirszū, gen. szirszeūs, 'hornet, gadfly'. Perhaps also in Skr. vṛšni-ṣ 'rṣni-ṣ 'male, strong, mighty' vṛṣni-ṣ 'm. 'ram' Avest. varēni-ē 'ram' beside Skr. vṛṣan- 'male', Skr. prēni-ē 'full of love' beside instr. prēn-ā 'through love, through affection', Gr. aerins 'eagle' fowl' O.H.G. arn (pl. erni) 'eagle' beside Goth. ara, gen. arins 'eagle'. Cp. § 65 Rem. p. 139.

§ 95. 1. -ni- (-nni-).

Indo-Germanic. Skr. ag-ní-š m. Lat. īg-ni-s m. Lith. ug-ni-s f. O.C.Sl. og-ni m. 'fire', the relation of the different root-vowels is obscure. Skr. śró-ni-š m. f. 'hinder parts, hip', Lat. clū-ni-s m. f, O.Icel. hlau-n f. 'hip-bone, hinder-part', Lith. szlau--ni-s f. 'hip, upper part of the thigh, shaft-bar (of a carriage)'; how is this related to Gr. κλόνι-ς 'os sacrum'? (cp. the Author, Zum heut. Stand der Sprachwiss. 1885, p. 70 f., Holthausen. Paul-Br. Beitr XIII 590). *lū-ni-s f. 'a loosing, tearing loose': Skr. lū-ni-š 'a tearing loose, cutting off', Goth. lū-n-s 'means of loosing, ransom' (von Bahder, Verbalabstr. 81, Osthoff, Morph. Unt. IV 121). Avest. rašm-s 'truth' pr. Ar. *raž-niš (I § 403 p. 298), Goth. ga-reh-sn-s f. 'intent, plan', Vreg- (Avest. razayeiti 'he arranges'). Skr śrēni- 'light, pure' (in śrēni-dant-'with bright teeth'), Goth hrái-n-s 'pure', cp. also O.C.Sl. srě-nŭ 'white' (Kluge gives a different explanation, Paul-Br. Beitr. VIII 525).

Aryan. Skr. śró-ni-š m. f. Avest. srao-ni-š f. hinder parts' Lat. clū-ni-s etc.; see above. Skr. váh-ni-š m. 'beast of draught', yō-ni-š m. 'lap, womb', ghf-ni-š m. 'heat, sun-shine'. Skr. jūr-ni-š 'glow', sṛ-ni-š sṛ-ni-š 'sickle', mē-ni-š f. 'offensive weapon, missile', śré-ni-š f. 'row, line', gīr-ni-š f. 'a swallowing'. Avest. raorš-ni-š f. 'gleam, brightness', fšao-ni-š f. probably 'riches, food, nourishment'.

Adjectives. Skr. śrēm- bright, pure', see above, túr-ni-š 'hastening', bhúr-ni-š 'hasty, fiery', pṛś-m-š 'spotted, variegated', Avest. raoxś-ni-š 'gleaming, clear'.

The Aryan suffix -ani- may in some words be referred to -yni-; perhaps in kšip-ani-š f. 'blow' and other words in -ani-.

Compare Skr. -ána- from -nnó- § 66 p. 142, and -anú- for -nnú- § 106.

Armenian. srun-k (gen. sruni-c) pl. 'shinbones, calves', compared with Lat. crits.

Greek. Here the suffix is extremely rare. For xlovi-g see p. 285. sv-n-5 'bereft, mulcted' is a certain example, cp. Skr. u-ná-s 'deficient in something' Goth. v-an-s 'absent, lacking'. But vn-5 vnu-5 'ploughshare' (cp. Solmsen, Kuhn's Zeitschr. XXIX 81), onávi-5 'rarity, want' and one or two others are very doubtful.

Italic. Lat. Fōnēs 'dei silvestres' (Gloss.) beside Faunus, Umbr. fons (pl. foner) 'propitius, favens', cp. fav-eō; the word seems to have been originally a substantive, meaning 'favour'. Lat. τ̄g-ni-s m.: Skr. ag-ni-š etc. see p. 285. pēni-s m. f. for *pes-ni-s beside Skr. pás-as Gr. πέος n. 'penis' (I § 570 p. 427). amni-s m. f. for *ab-ni-s, compared with O.Ir. abann 'stream' (I § 511 p. 375). fūni-s m. f, fīni-s m. f., crīni-s m. f.

It is not clear how far the Adjectives in -ni- were brought into this class of stems merely through a secondary change of declension, cp. § 93 p. 281. com-moini-s com-mūni-s (Osc. múinikad abl. 'communi' see § 87 p. 261) corresponds to Goth. ga-máin-s 'common' pr. Germ. *za-maini-z. omni-s for *op-ni-s, beside op-s (cp. Goth. all-s § 66 p. 147), sēg-ni-s, lēni-s, mūni-s, im-māni-s, in-clīni-s and others. It must not be forgotten that the uncompounded words may have been originally substantives.

Old Irish. tain 'a harrying, raid' for *tu-ag-ni- or *tu-ag-ni-, similarly imm-ain 'a driving, riding' (passing into the analogy of the i-stems, see Stokes, Kuhn's Ztschr. XXVIII 290), from \(\sigma ag-\) 'agere', cp. I \(\sigma \) 523 p. 380. buain 'harvesting' for *bong-ni-, beside bongaim 'I gather, make harvest'. cluain 'meadow, mead'. -nni- may be contained in O.Ir. colinn (gen. colno) f. 'corpus, caro' Mid.Cymr. celein Mod.Cymr. celain celan, which point to *colani- (or *colanni-, cp. \(\sigma 117 \) Rem. 3).

Germanic. The Substantives in -ni- and- sni- are femi-

nine and mostly abstract. O.Icel. hlau-n 'hip-bone': Skr. śrć-ni-š etc.; see above, p. 285. Goth. siun-s 'looking, power of sight, visage, appearance' pr. Germ. *si(z)u-ni-s, beside Goth. saihvan 'to see', \$\sigma seq_:\$ see I \ 441 p. 327 f., \ 444 c p. 330. Goth. anda-viz-n-s 'sustenance, support' váila-viz-n-s 'welfare, good condition' from visan. \$\sigma k-n-s' \text{disputed question'}, táik-n-s' notice, token' \$\sigma \text{dei\beta}-\text{dei\beta}-\text{, d\delau-n-s' vapour, smell'. Goth. ama-busn-s' bidding, charge, command' for *-butsni-, beside ana-biudan, us-beisn-s' expectation, patience' for *-b\vec{v}-b\vec{v}tsni-, beside us-beidan (I \ 552 p. 404), ga-r\vec{c}h-sn-s' intent, plan' (cp. Avest. ra\vec{s}-ni- p. 285), r\vec{c}h-sn-s' court, courtyard'.

The adjectival -ni- corresponds to the adjectival -i- (§ 93 p. 283), and, like -i-, was confused with the 20-declension. Goth. hráin-s O.Sax. hrēm 'pure': Skr. śrēni- 'bright, pure'; see p. 285 above. Goth. ga-máin-s 'common': Lat. com-moini-s commūni-s, see p. 286. Goth. ana-siun-s 'visible', skáun-s 'beautiful' (noticeable, worth looking at' beside O.H.G. scouvōn), ar-ni-ba adv. 'safely, heedfully'.

In Balto-Slavonic we find only substantives, which in both branches are almost exclusively feminine, often with s or (in Slav.) z prefixed (-sni-, -zni-).

Lith. ug-nì-s f. O C.Sl. og-nǐ m. (the only masc.) 'fire': Skr. ag-nì-š etc., see above p. 285. Lith. bar-nì-s f. 'quarrel' O.C.Sl. bra-nǐ f. 'battle'. Lith. kul-nì-s f. 'heel', vil-nì-s f. 'wave', szak-nì-s f. 'root', pus-nì-s f. 'snow-drift', krós-nı-s 'stove, oven', dek-snì-s f. 'burnt patch of ground' lup-snì-s (and lupsznì-s f. 'shell peeled off', žink-snì-s f. 'step'; the forms are frequently transferred to the io-declension (masc.), as žiñksni-s gen. žiñksnio = žinksnì-s. O.C.Sl. strì-nǐ 'stem' stǐg-nǐ 'way, road', po-jas-nǐ 'girth', pri-kaz-nǐ 'tale, history, example', sĕ-nǐ 'shade' (no doubt to be compared with Skr. chāy-ā 'shade', I § 393 p. 293 f., § 414 Rem. p. 303 f.), pĕ-snǐ 'song', kŭ-znī 'deceit', ži-znī 'life'.

§ 96. 2. -en:- (-oni-).

Indo-Germanic. *bhāni-s: Armen. ban (gen. bani) λόγος', A.S. bēn O.Icel. bōn bōn f. 'prayer' pr. Germ. *bōni-z, O.C.Sl. basnī f. 'fable, spell' (the s is a later insertion). We

may place here, but with more hesitation, Goth. as-an-s f. 'harvest, summer' (cp. asnei-s O.H.G. esni 'day-labourer'), Pruss. ass-ani-s 'autumn' O.C.Sl. jes-eni f. 'autumn'.

Aryan. Skr. -áni- beside -ani- (is the latter for -yni-? see § 95 p. 285 f.). iṣ-áni-ṣ f. 'impulse, motive' śar-áni-ṣ 'injury, transgression', aṣ-áni-ṣ f. 'missile'. car-áni-ṣ 'mobile', cakṣ-áṇi-ṣ 'brightener, illuminator', rurukṣ-áni-ṣ 'able or willing to destroy'. Skr. sarva-jyāni-ṣ f. 'complete ruin' Avest. zyāni-ṣ f. 'harm', Skr. hāni-ṣ f. 'abandonment, decrease, loss', glāni-ṣ glāni-ṣ f. 'relaxation, discouragement'.

Armenian. ban 'λόγος: A.S. bēn etc., see above.

Italic. Lat pām-s m, also pāne n., beside pā-bulu-m.

Germanic. Goth. as-an-s f. 'harvest, summer'?, see above. A.S. ben O.Icel. bon bon f 'prayer'. Armen. ban etc., see above. The comparison of Goth von-s hope with O H.G. war (Bremer, Paul-Braune's Beitr. XI 274) is still uncertain; see § 93 p. 282 The suffix was fertile in forming feminine abstracts connected with weak verbs and derived from the present stem; these words end in -Ini- -oni- -aini-, as Goth. láisein-s 'instruction' from láisjan 'to instruct', lapon-s 'invitation' from lapon 'to invite', pulin-s 'patience, endurance' from pulan 'to endure'. The form of the suffix was -eni- (as opposed to -ono- in the infinitive, which appears in laisian and hulan): laisain-s = ground-form *logseg-eni-s, pr. Germ. -ij-ini-, cp. 3. sing. Goth. láiseib, buláin-s = ground-form *tllēy-eni-s pr. Germ. -ēi-ini, cp. 3. sing. buldib. lahon-s like 3. sing. lahoh; see I § 142 p. 127. These abstract forms were very numerous even in proethnic Germanic; but the separate Germanic languages differ in the extent to which they made use of the established types. In Gothic the three methods of formation were in full use together: the form in -ein-s was the most, that in -on-s the least common; further examples are af-lagein-s 'remission', ga-hráinein-s 'purification', frijon-s 'caress, kiss', paháin-s 'silence'. But in High German the only forms which appear are those in -ini-, and these are very numerous; but they were phonetically modified by confusion with secondary abstract nouns in -in- (§ 115), as O.H.G. touf in and touf i

'baptism' = Goth. dáupein-s, mendīn mendī 'joy', restīn restī 'rest, repose'.

Balto-Slavonic. Pruss. ass-ani-s O.C.Sl. jes-enī f. 'autumn'?, see p. 288 above. Words in which the suffix was contracted with the vowel ending of the stem to which it was added, often show an inserted s (z). Lith. dūni-s dūsni-s f. O.C.Sl. danī f. 'gift'. O.C.Sl. basnī f. 'fable, spell': Armen. ban etc., see p. 287 above, prē-stanī f. 'omission' from prē-statī 'to omit, cease'; nadēznī 'hope' from dēti 'ponere'. These nouns are also formed from derivative verbs, and are based upon the stem of the infinitive; as bojaznī f. 'fear' (bojatī se), lajaznī f. 'repentance' (kajatī se), prījaznī prujaznī f. 'love, friendship' (prījatī prijatī), bolēznī f. 'pain, sickness' (bolētī). Compare Pruss. biasna-n acc. 'fear' beside biā-twei 'to fear', eb-signāsna-n acc. 'blessing' beside be-signāt-s part. 'blessed'.

§ 97. The Suffix -mi. There are a few original substantives in which -mi is primary, but the suffix never became fertile. Nearly all apparent examples from later periods are obviously nothing but -mo forms which have passed into the ι -declension.

No general definition can be given of the function of this suffix. Indo-Germanic. *qr-mi-s worm' (compare Lat. cur-vo-s?): Skr. kf-mi-š m., O.Ir. cruim f. Mod.Cymr. pryf pr. Kelt *kuri-mi-, Lith. kirmi-s, gen. kirmio, transferred to the jo-declension (and now obsolete) from which was formed kir-m-elē (§ 76 p. 212). With the same suffix, and formed in imitation of the word *qr-mi-s, but from other roots, we have Lat. ver-mi-s m. O.H.G. wur-m (pl. wurmi) m. worm' and Gr. ελ-μι-ς f. 'intestinal worm'. *yl-mi-s Skr. ūr-mi-š m. 'wave', A.S. wielm wylm m. 'welling up, wave' pr. Germ. *yal-mi-z (I § 306 p. 243). Avest. da-mi-š 'creation, creature' (dāmi-dāta- 'gracious to created beings'?), Gr. 9-έ-μι-ς f. (with secondary formations which have invaded its declension) 'ordinance, right', \$\square\$ dhē 'set, establish'.

Aryan. Skr. ký-mi-š, ūr-mi-š, Avest. dā-mi-š, see above. Skr. bhū-mi-š f. (also bhūmī-, see § 109 Rem.) Avest. bū-mi-š f. O.Pers. bumi- f. 'earth'. Skr. raś-mi-š m. 'rein, strap', kūr-mi-Brugmann, Elements. II.

'action, performance' in tuvi-kūrmi-š 'mighty in action', sūr-mi-š f. 'light, shining flame'. Avest. dā-mi-š (dą-mi-š, see I § 200 p. 169) f. 'wisdom, insight', from dā- 'know, understand'.

Greek. $\{\lambda-\mu-\varsigma, \vartheta \xi-\mu-\varsigma, \text{ see above. } q\tilde{\eta}-\mu-\varsigma \text{ 'speech, talk, report' beside } q\tilde{\eta}-\mu\eta.$

Italic. Lat. ver-mi-s, see above A change from the oto the i-declension produced in-ermi-s, sub-limi-s and the like; see § 93 p. 281 and § 95 p. 286

Old Irish. cruim, see above. cnāim m. 'bone' pr. Kelt. *cnā-mi-, beside Gr. κνή-μη 'shinbone', compare Aeol. κνα-μι-ν aec. (pl. Hom. ννημίδες) 'greaves'.

Germanic. O.H.G. wur-m, A.S. wiel-m, see above. By a change from the o- to the i-declension, Goth. hái-m-s f. village' beside pl. hái-mō-s, ar-mi-ns m. acc. pl. 'arms' beside the old o-stem O.H.G. aram O.Icel. ar-m-r (§ 72, 3 p. 171).

O.C.Sl. sedmi f. 'the number seven', osmi f. 'the number eight' were formed from the ordinals sedmu, osmu on the analogy of peti: petu and so forth

§ 98. The Suffixes -ri- (-rri-) and -li- (-lli-)¹). There are a few original nouns in which these suffixes are primary. -li- is very fertile in Italic. A large number of the examples of -ri- -li- which date from later periods, just as those of -mi-, arise simply from the transference of other stems into the i-declension.

No general definition can be given of their function.

Idg. -ri-. Skr. áś-ri-ṣ̄ f. 'the sharp side of a thing, corner, border, cut edge', Gr. ăx-qi-ç f. 'point', esp. 'hill-top' ŏr-qi-ç f. 'point, corner, border', Lat. oc-ri-s m. 'hill-top'; compare Gr. ăx-qv-ç etc.; see § 74 p. 184. Gr. "ð-qi-ç 'knowing', O.Icel. vit-r 'wise' (pr. Germ. *yit-ri-z), \(\sqrt{uexd}\)-. Skr. vádh-ri-š 'gelded, castrated' Gr. è\(\frac{a}{2}\)-\(\rho_i\)-\(\frac{a}{2}\)-\(\rho_i\)-\(\frac{a}{2}\)-\(\rho_i\)-\(\rho

¹⁾ C. von Pucker, Die [lat.! nomina derivata auf -alis (-aris) und -arius, Kuhn's Zischr. XXVII 113 ff

-li-. Lat. tali-s quali-s, O.C.Sl. toli adv. 'so much, tantum' koli adv. 'how much, quantum', and (derived from -li-stems) Gr. τηλί-κο-ς πηλί-κο-ς, O.H.G. Alemann. welēr solēr, O.C.Sl. tolikū kolikū; see § 88 p. 265, § 89 p. 272.

Aryan. Only the evidence of the kindred languages can determine whether in any particular word we have Idg. -ri-or -li-.

-ri-. Skr. dś-rι-š see above jī-ri-š 'flowing water', beside jī-rd-s 'lively, rough': Lat. vι-reō O.C.Sl. žι-rũ, see § 74 p. 182 f. šubh-ri-š with the same meaning as šubh-rά-s 'gleaming, beautiful': Armen. surb 'pure', see § 74 p. 183. ús-ri-š with the same meaning as us-rά-s 'of the morning' (adj.): Gr. αύ-ρ-ιο-r, see § 74 p. 181.

-li-. Skr. $t\vec{u}$ -li- \dot{s} f. 'brush', beside $t\bar{u}$ - $l\bar{v}$ f. 'cotton, wick, brush' $t\bar{u}$ -la-m 'panicle, tuft': Gr. $\tau\dot{v}$ - $\lambda\eta$ $\tau\dot{v}$ - $\lambda\eta$, see § 76 p. 198. Skr. dha-li- \dot{s} f. 'dust': cp. Lat. $f\bar{u}l\bar{v}g\bar{v}$ 'soot', Lith. $dulk\dot{e}$ f. 'mote'. Avest. tiy-ri- \dot{s} m. 'arrow, missile' beside tiy-ra- 'sharp, pointed': Goth. stik-l-s, § 76 pp. 200, 207.

In the following examples it is not clear whether the suffix originally had r or l. Skr. $bh\acute{u}$ - r_l - \mathring{s} 'abundant, great, many', neut. $bh\acute{u}$ - r_l Avest. $b\~{u}$ i r_l . Skr. ámgh- r_l - \mathring{s} m. 'foot', $v\acute{a}mk$ - r_l - \mathring{s} m. f. 'rib'. áb-hri- \mathring{s} f 'hoe, spatula'. Avest. $maoir_l$ - \mathring{s} m. 'ant' for pr. Ar. *mau- r_l - \mathring{s} (I § 160 p. 144), cp. Skr. vam- $r\acute{u}$ -s m. vam- $r\acute{t}$ f. 'ant'. — Skr. $amg\acute{u}$ - r_l - \mathring{s} amg \acute{u} -l- \mathring{s} f. 'finger' beside $amgu\~{s}$ tha- Avest. $amgu\~{s}$ ta- m. 'toe'. There are also a few adjectives in -uri- \mathring{s} , where we can hardly assume either -rrl- or -vll

Greek. Here it is very rare. ἄκ-ρι-ς ὄκ-ρι-ς, ἴδ-ρι-ς, see above. No doubt we should add ΰβρι-ς.

Italic. Lat. oc-ri-s m., Umbr. ukri-per ocri-per 'pro ocre': Gr. ŏx-qı-ç, see above. Lat. ut-ri-s m., to be compared perhaps with uteru-s. securi-s, cp. figura and similar forms. Lat. sac-ri- (e. g. sacrem porcum) beside sac-ro-, Umbr. sakre n. 'sacrum, hostia' beside sakra 'sacras'. Lat. acer acri-s, beside Gr. äx-qo-ç; Osc. akrid 'acri' or 'raptim' might also be referred to a stem akro- (cp. amprufid 'improbe'). Lat. put-

-ri-s. Umbr. pacrer pl. 'pacati, propitii', cp. Goth. fag-r-s 'suitable' pr. Germ. *faz-rá-s § 74 p. 187. Cp. -bri- beside -bro- in anclābri-s etc., § 77 p. 215.

In Italic tāli-s quāli-s (p. 291) served as the types for a large group of adjectives; as Lat. æquāli-s, līberāli-s, nātāli-s, vēnāli-s, vītāli-s, dōtāli-s; Umbr. verfale 'verbale, templum', sorsālem 'porciharem', Tefrali abl. 'Tefri proprio'; the change of l to r by dissimilation seems to have taken place in proethnic Italic when there was already an l in the word (ep. I § 269 p. 217). Lat. ālāri-s, palmāri-s, militāri-s, lūnāri-s, lūnāri-s, lūminari-s, Umbr. staflarem 'stabularem'. The analogy of vīta: vītāli-s gave rise in Latin to the forms fidēli-s (fidē-s), famēlicu-s (famē-s): ovīli-s (ovi-s), hostīli-s (hosti-s), and then further, to virīli-s (vir), puerīli-s (puer), hastīli-s (hasta); tribūli-s (tribu-s), īdūli-s (īdūs) pl.), whence pedūli-s (pes). Cp. Gr. τοῖο-ς ποῦο-ς: παντοῖο-ς ἀλλοῖο-c § 63 Rem. 2 p. 128 and O.C.Sl. takŭ kakŭ: jedinakŭ drugako § 89 c, p. 273.

-li- in Latin adjectives frequently arises from the transference of o-stems into the i-declension, and the group of original forms in āli-s (-ēli-s -īli-s) may have helped to effect the change. simili-s: ep. Gr. ὁμαλό-ς (in Celtic also an i-stem, O.Ir. samail, see below), humili-s. ep. Gr χθαμαλό-ς, pestili-s etc., see § 76 p. 202 f. 205. Further agili-s· Skr. ajirá-s, bibili-s, coctili-s etc., p. 204. Cp also stabili-s nōbili-s etc., § 77 p. 215.

There is one substantive in -l-, Lat. tōlēs pl. m. 'wen on the neek', for *tons-li-, from tens- 'stretch' (Goth. at-pinsan 'to draw towards one', Lith. tēs-ti 'to stretch by pulling'), tōnsillae 'tonsils' points to an older form *tons-lo- or *tons-la-.

Old-Irish. All the apparent examples of this suffix known to me may have originally been ro- lo-stems (cp. § 93 p. 282). liver 'diligent'. dill f 'creature, element' (beside dill). biail, gen. bēla, f. 'axe'. samuil 'likeness, picture' with the adjectives derived from it, as co-smil 'similar': cp. Lat. sunili-s.

In Germanic the suffix is extremely rare, and forms only adjectives, in which as in other *i*-stems, there is a confusion with the *io*-declension. O.Icel. vit-r 'wise': Gr. $i\delta$ - $q\iota$ - ς , see

above p. 290. Goth. riu-r-s 'fleeting, perishable' O.Icel. ryr-r 'thin'.

Balto-Slavonic. O.C.Sl. dib-ri f. 'ravine'. Lith. ang-li-s f. O.C.Sl. ag-li m. 'coal'. O.C.Sl. by-li f. 'plant, vegetable' beside part. by-li, reb-li f. 'bud, shoot', sop-li (beside sopeli) f. 'flute', süch-li f. 'dry wood, brushwood' beside u-süch-li 'dry' (cp. I § 588 Rem. 2 p. 444), tek-li f. 'resin', properly 'outflow', beside part. tek-li. In -ē-li- (cp. -ē-lo- § 76 p. 212 f.): gybčli f. 'destruction', kapēlī f. 'bath', pečalī f. 'care, grief', sopēlī f. 'flute', svirēlī f. 'flute', obitēlī f. 'dwelling', obutēlī f. 'shoe', dētēlī f. 'deed'. In -s-li- (cp. -s-lo- § 76 p. 211): jaslı pl. f. 'crib' for *ēt-s-li-beside jastī 'he eats', gaşli pl. f. 'zither' beside gada 'I play on the zither', myslī f. 'thought' beside Goth. ga-máud-jan 'to remind', otŭ-raslī f. 'sprig' beside rasta 'I grow'. Some of these forms with -li- must no doubt be explained in the same way as šestocī (§ 93 p. 278. 284); toplī (beside toplū) has already been mentioned in that section.

§ 99. The Suffix -ti-. In Indo-Germanic this was a common primary suffix, and formed feminine nomina actionis. In Aryan, Balto-Slavonic, (and Keltic, cp. § 156) regular infinitives were developed from these abstract verbal nouns; e. g. Skr. pītáy-ē O.C.Sl. pi-ti 'to drink'.

Here and there we find nomina agentis also formed with -ti-, and some of these occur in more than one language; as Lat. hos-ti-s Goth. gas-t-s O.C.Sl. gos-ti, O.Ir. tāid O.C.Sl. ta-tī. All these forms may originally have been nomina actionis, the word which denoted a state or capacity being applied to the person in whom it was realised; thus Skr. citti-š f. 'understanding, state of being intelligent' also means in the Rig-Veda 'he who is intelligent'. And even adjectival stems, like Skr. pa-ti-š, 'stinking', were developed from these abstract nouns. Cp. § 80 p. 238 f., § 108. 149. 155.

In denominative abstract nouns, -ti- is rare; examples are numerals like *peroq-ti-s 'fivefold character'. The -ti in Skr. ká-ti seems to be connected with this use of the suffix.

§ 100. 1. -ti- in primary abstract nouns (nomina actionis).

The root-syllable nearly always has the vowel in its weak grade. The accent is sometimes on the suffix, sometimes on the root, and in Sanskrit and Germanic the same word often shows both, as Skr. mati-\(\vec{s}\) and mati-\(\vec{s}\), O.H.G. gi-burt (pr. Germ. *burdi-) and Goth. ga-baurb-s (pr. Germ. *burpi-). It is therefore probable that originally the accentuation varied in the different cases and corresponded to the different grades of the root; say nom. sing. *mén-ti-s nom. pl. *mytéi-es. In the process of levelling, the weak form of the root-syllable generally prevailed, and as the same readjustment happened also in the to-participles (\(\vec{s}\) 79 p. 221), the two are no doubt connected. In the Slavonic infinitive, *mén-ti- was the type usually followed; which is due to the influence of the supine in -t\(\vec{u}\) (\(\vec{s}\) 108).

These ti-stems were extended by the suffix -en-, and hence were formed a large class of abstract nouns in Italic and Keltic such as Lat. men-tiō beside mēns 1), O.Ir. er-mitiu 'honour'; these were not unknown even in Germanic and Greek, cp. Goth. $ra-pj\bar{o} = \text{Lat. } ra-ti\bar{o}$, and Gr. $\delta\omega\tau\ell\nu-\eta$. Cp. § 115. In Italic and Keltic a large proportion of the ti-abstracts were replaced by this newer formation.

These nouns could be derived from any form which served as a verbal stem, not merely from the root (in the strict sense of the word); hence words like Skr. údi-ti-§ f. 'speech' (beside part. udi-tá-s), Lat. moni-tiō (beside moni-tu-s) and Gr. őoā-o-ç f. 'seeing', Lat. satiās occupātiō. O.Ir. saigid 'a searching', Lith. sēdēti O.C.Sl. sēdēti 'to sit'.

The addition of -ti- to the stem of the thematic present or aorist as in Skr. romá-ti- ξ Gr. $\lambda \acute{a} \chi \epsilon - \sigma i - \varsigma$ was no doubt a secondary development, although perhaps it may have begun even in the proethnic period; cp. -e-to- ξ 79 p. 218 f.

Indo-Germanic. *sru-ti-s f. 'a flowing, streaming' from

¹⁾ Leo Meyer, Die latemusche Abstractbildung durch das Suffix tiön, Benfey's Orient und Occident II 586 ff.

V srey-: Skr. sru-ti-š Gr. ov-or-c. Skr. juš-ti-š f. mark of affection, favour', Gr. yevoi-5 f. 'tasting, taste' (a later formation from γεύω for *γεύσω), Goth. ga-kust-s-f. 'trial, testing', γ ĝeus-. Skr. udhi-š f. 'a leading, carrying', Lat. vecti-s m. 'lifter, lever' vectio, inf. Lith. vesti O.C.Sl. vesti 'to carry, vehere'. *qi-ti-s f., from \sqrt{qei} : Skr. άρα-citi-š 'requital, punishment', Gr. τί-σι-ς 'estimate, atonement, punishment' ἀπό-τισι-ς 'requital, punishment'. Avest. vae-ti-š f. 'willow twig', Lat. vī-ti-s f., O.Ir. fēith f. 'sinew', Lath. vý-ti-s f. 'twig of willow-tree' O.C.Sl. vi-ti f. 'res torta in modum funis' pa-vitt f. no doubt = 'vitis', inf. Lith. vý-ti O.C.Sl. vi-ti 'to wind, turn'. Skr. vitti-š 'consciousness, the finding, becoming possessed of a thing'. Avest. e-visti-š f. 'ignorance'. Lat. vīsiō f., O.C.Sl. za-vistī f. 'envy, hatred' vēstī f. 'news', V yeid- 'videre'. *bhr-ti-s f. from V bher- 'ferre': Skr. bhrti-s 'carrying, sustenance, support', Lat. fors, O.Ir. brith inf. 'to carry, carrying', Goth. ga-baúrp-s O.H.G. gi-burt 'birth'. *dhrs-ti-s 'boldness' from \sqrt{dhers} - 'be bold': Skr. dhfšti-š O.H.G. ga-turst. Gr. αμελξι-ς f. I § 235 p. 198 f.) 'gait, step', Lat. in-ventio, Goth. ga-qumb-s 'a meeting' O.H.G. cumft cunft 'a coming' and O.Icel. sam-kund 'meeting' (the difference is due to the variation of accent in proethnic Germanic), Lith. pri-ginti-s 'innate peculiarity' (cp. I § 249 p. 204). Skr. ma-tí-š má-ti-š f. 'thought, mind', Gr. μάν-τι-ς m. 'one inspired, seer', Lat. mēns men-tio, O.Ir. er-mitíu 'honour', Goth. ga-mund-s f. 'remembrance' ana-mind-s f. 'guess', Lith. at-mintl-s f. 'memory' O.C.Sl. pa-meti f. 'remembrance', V men- 'reflect'. *ĝņ-ti-s *ĝū-ti-s *ĝen-ti-s from √ ĝen- 'gignere': Skr. jati-š f. 'birth' Avest. fra-zainti-š f. 'progeny, children', Lat. gens natio (cp. gnatu-s natu-s: Skr. jatá-s). *kns-ti- from √ kens-: Skr. šastí-š 'praise, glory', Lat. cēnsiō (instead of *cens-tiō, cp. cēnsu-s § 79 p. 223. 230). *peq-ti-s f. from √ peq-'cook': Skr. pakti-š 'cooked dish', Gr. néwi-c 'cooking', Lat. coctio for *cyec-tio, O.C.Sl. peštī 'fireplace' pešti inf. 'to cook'. *-d+ti *də-ti *dō-ti f. from √ dō- 'give': Skr. bhága-tti-š 'gift

of fortune' diti-ș 'riches, possessions' dâti-vara-s 'loving to give, generous', Gr. δόσι-ς δῶτι-ς 'gift', Lat. datio dos (gen. dotis), Lith. duti-s O.C.Sl. doti 'gift'; inf. Lith. du'ti O.C.Sl. dati 'to give'. *dho-ti- *dhē-ti- f. from v dhē 'poncre': Skr. dēvá-hiti-ķ 'divine law, ordinance', Avest. ni-đāiti-š f. 'laying aside, drawing off (of clothes), Gr. Θέσι-ς 'setting, arranging, position', Lat. con-ditio, (toth. gu-dep-s (st. -dedi-) O.H.G. tat 'deed', O.C.Sl. blago-dčti 'benefit, favour'; inf. Lith, dčti O.C.Sl. dčti 'ponere'. Skr. áp-ti-š 'reaching, attaining', Lat. ad-eptio for *-ap-tio. Skr. syū-ti-š f. a sewing, bag', inf. Lith. šiú-ti O.C.Sl. ši-ti 'to sew'. *plē-ti-s f. 'filling' from plē- 'fill': Skr. prā-ti-š, Gr. πλησι-ς (late), Lat ex-plētio. Skr. prá-jūā-ti-š f. 'recognising' jūā-tí-š m. 'kinsman', Gr yrio-oi-s f. 'knowledge', Lat. no-tio, O.H.G. ur-chnat f. 'agnitio' (ground-form *@nē-ti-), O.C.Sl. po-znatī f. 'cognitio'; cp. Av. a-zaints-s f. 'knowledge, understanding', Goth. ga-kunp-s f. 'acquaintance' (abstr.) ga-kund-s f. 'a making acquainted, persuasion' O.H.G. kunst f. 'wisdom, mental capacity', O.C.Sl. ze-ti m. 'son-in-law' (ep. Lith. žénta-s 'son-in-law', Gr. yvoróg 'near relative').

Examples of -e-ti- are given under the separate languages. In Aryan -ti- 18 a living suffix. Skr. śrú-ti-š f. 'hearing, sound, news, tale' Avest. fra-srūiti-š 'recitation, declamation': O.C.Sl. inf. slu-ti 'to be called, nominari' \(\shi kley-. \) Skr. soma--suti-s f. 'pressing of the soma' sú-ti-s Avest. hūiti-s 'pressing, preparation (of the soma)'. Skr. buddhi-5 f. insight, observation, understanding' Avest. paiti-busti-š f. 'observing': Gr. πύστι-ς f. 'inquiry, news', \square bheudh-. Skr. i-ti-\(\xi\) f. 'going' Avest. paititi-\(\xi\) f., i. e. pastīti-š, 'a running against, regret': Lat. i-tio, Lith. pri-eiti-s f. 'suburb', Vej- 'ire'. Skr. k\(\displie{\chi}\)-ti-\(\displie{\chi}\) Avest. \(\displie{\chi}\)-ti-\(\displie{\chi}\) f. 'dwelling, settlement' Gr. xti-or-g f. 'founding of a colony'. Skr. diš-ti-š f. 'direction, dictate' Avest. a-diš-ti-š f. 'direction, instruction': Gr. deiti-c f. 'showing', Lat. dic-tio, O.H.G. in-ziht f. 'accusation'. Skr. bhr-ti-s f. 'carrying, sustenance, provision' Avest. ber'ti-s f. 'offering, fostering care': Lat, fors etc., see above p. 295. Skr. dfš-ti-š drš-ti-š Avest. darš-ti-š f. 'seeing': Gr. déρξι-ς f. 'seeing', V derk-. Skr. apa-sypti-s f. 'going out, de-

parture': Gr. δρψι-ς f. 'creeping'. Skr. gå-ti-š f. 'a going' Avest. aiwi-gaiti-š f. 'arrival': Gr. βά-σι-ς etc., \sqrt{gem} -, see above p. 295. Skr. rá-ti-š rán-ti-š f. a pleasant tarrying, pleasure, delight: Gr. ἐρασί-μολπο-ς 'taking pleasure in song', Lith. inf. rim-ti 'to be calm in spirit', vrem-. Skr. ha-ti-š f. 'blow, killing' á-hati-š á-hanti-š f. 'inviolability' Avest. jaiti-š jainti-š f. 'striking, killmg': Lith. ap-ginti-s f. 'vindication' inf. giñ-ti 'to drive (cattle)' O.C.Sl. inf. že-ti 'to hew, mow', v ghen-. Skr. šas-ti-š f. 'praise, glory' Avest sas-ti-š f. 'instruction': Lat. cēnsiō, see above p 295. Skr. ni-šatti-š rest, inactivity': Lat. sessiō Lith. sés-ti O.C.Sl. sěsti 'to sit', √sed- 'sit'. Avest, ava-spašti-š f. 'espying': Gr. σχέψι-ς 'inspection, examination' (instead of *σπεξι-ς), Lat. īn-spectiō. Skr. sthi-ti-š f. Avest stāiti-š f. standing'. Gr. orá-or-, position, place, uprising', Lat. sta-tiō, O.H.(†. sta-t (pl steti) f. 'place, stead', O.C.Sl. po-stati f 'pars, modus' inf. Lith stó-ti 'to tread' O.C.Sl. sta-ti 'to place oneself'; a form *-st-ti-, to be compared with Skr. -tti- 'gift' (p. 295 f.), may be concealed in Germ. *fir-sti-'roof-ridge' (cp. § 4 p. 9), which would then be parallel to Skr savyē-šthar- i. e. -st+tar- (§ 122). Skr. m-ti-š f. 'measure, worth, right judgement'. A.S. mæ-đ f. 'measure, relation', \(me-\) me-. Skr. bhak-ti-š Avest. bax-ti-š f. 'distribution', \sqrt{bhaq}-. Skr iš-ti-š Avest. iš-ti-š tš-ti-š f. 'wish', \sqrt{azs} -. Skr. iš-ti-š f. 'offering', \(\sqrt{2a\hat{g}}\). Skr. ahrā-ti-š f. 'odour, smell' beside parte. ahrā-Avest. syenti-š (gen. šātoiš) f. well-being, place of delight, home' O.Pers. śiyā-ti-š f. 'place of delight, dwelling-place pr. Ar. *cyā-ti-: Lat. quiës, gen. quiëtis, Idg. qzē- 'be at ease'. Avest. jyāiti-š f. 'life': cp. Gr. $\zeta \tilde{\eta}$ 'he lives'. Avest. upa-snāiti-š f. 'a washing', beside Skr. snā-ta-s 'washed'. We may add a few more examples of the variation of the accent in Sanskrit (there are more words with the accent on the root-syllable in classical Sanskrit than in Veda): trp-ti- tfp-ti-, kīr-ti- kir-ti-, bhū-tibhú-ti-, hē-ti- hé-ti-. Masculine and Adjectival forms are rare; besides those given under Indo-Germanic cp. Skr. dhú-ti-š m. 'shaker' (f. 'shaking', Gr. 95-01-5 f. 'raging, roaring'), váš-ti-š 'desirous', Avest. rai-ti-s m. 'distributor' (f. 'distribution, alms', Skr. ra-ti-š 'alms, gift)'.

With reduplication we have e. g. Skr. car-kr-ti-š f. 'laudatory mention, praise', dt-dhi-ti-š f. 'devotion', Avest. za-zāiti-š f. 'throwing away'. Cp. the Greek forms p. 299.

Sometimes we have -e-ti-, e. g. Skr. vas-a-ti-š f. 'nest', drš-a-ti-š 'aspect', ram-á-ti-š f. 'place of pleasant sojourn' rám-a-ti-š 'gladly tarrying', ar-a-ti-š m. 'servant', vrk-á-ti-š m. 'destroyer, robber', Avest. pav-aiti-š f. 'rottenness, filth'. Cp. Skr. dars-a-tá-s and the like § 79 p. 226.

In Aryan the dative of the -ti- abstracts served as an instinitive, e. g. Ved. $p\bar{\imath}$ -táyē 'to drink' Av. ker^{\imath} -tēệ 'to fulfil' (cp. Bartholomae, Kuhn's Ztschr. XXVIII 20 f.).

Armenian. z-yest, gen. z-yesti, 'garment': Lat. ves-ti-s. sas-t, gen. sasti, 'abuse, reproach, threat, anger, sternness': Skr. saš-ti-š šiš-ti-š f. 'punishment'.

In Greek it is a living suffix, especially fertile in forming nomina actionis from derived verbs. zv-ai-s outpouring, gush, libation': Skr. d-hutis f. 'the offering of oblations' liv-oi-5 f. 'a loosing' beside \u03b2-ro-5. \u03b2-5 f. 'flight': Lith. inf. bukti 'to be cast into fear', 491-01-5 f. 'a waning, wasting': Skr. kší-ti-š f. 'destruction'. πίστι-ς f. 'trust' beside πιστό-ς πείθ-ω. δάρ-σι-ς f. flaying': Skr. df-ts-š f. 'leather skin or bag', Goth. ya-taurp-s (stem gatairpi-) f. 'destruction', Lith. inf. dir-ti 'to skin' ground-form *dr-ti, V der- 'tear'. βρώσι-ς f. 'food': Lith. gir-ti-s f. 'drink, feast', ground-form *gr-ti- *gr-ti- γ ger-. μάρπ-τι-ς m. 'seizer, robber'. τέρψι-ς f. 'contenting, delight': Skr. trp-ti-š tfp-ti-š f. 'satiating, contenting', Goth. paurf-t-s O.H.G. durft f. 'requisite, want'. βά-σι-ς f. 'gait, step': Skr. gά-tι-š etc., see above p. 295. τά-σι-ς 'stretching, straining': Skr. ta-ti-š tán-ti-ś f. 'row', Lat. in-tentio. μάν-τι-ς m. 'one inspired, seer': Skr. ma-tl-š etc., see p. 295 above. Εξι-ς f. 'condition, state', beside αν-εκτό-ς έχ-ω. ar-ισι-ς f. 'a slackening, loosing' σύν-εσι-ς f. 'understanding' Hσί--odo-5, av-noi-dimpo-5 'sending forth gifts, letting grow' (of the earth), Lat. sa-tiō, Goth. mana-sēp-s (st. -sēdi-) f. 'seed of men, multitude, world' O.H.G. sa-t f. 'seed', Lith. inf. se-ti 'to sow', V sē- 'throw forth, sow'. dé-ou-5 f. 'binding, knot': Skr. á-diti-\$ boundlessness, state of being unconfined', V de- bind'. qui-re-c

f. 'story, news' $\varphi \vec{a} - \sigma_{l-\varsigma}$ f. 'assertion': Skr. bha-ti-š f. 'gleam', \checkmark bha-'shine, cause to appear, show'. $\varkappa \alpha \vec{v} - \sigma_{l-\varsigma}$ f. 'burning', from $\varkappa \alpha t \omega$ $\varkappa \alpha \vec{v} - \sigma \omega$. $\pi \vec{\gamma} \vec{\xi}_{l-\varsigma}$ f. 'fixing, setting in': Lat. $p \alpha c - t \vec{i} \vec{\sigma}$, $\checkmark p \alpha \vec{k} - p \alpha \vec{g} - \vec{\sigma} \psi_{l-\varsigma}$ f. 'sight, countenance'. $\vec{\alpha} \mu - \pi \omega \tau_{l-\varsigma}$ f. 'ebb': Lat. $p \vec{\sigma} - t \vec{i} \vec{\sigma}$, op. also Skr. $p \vec{t} - t \vec{l} - \vec{s}$ f. 'drinking' O.C.Sl. $p \vec{t} - t \vec{i}$ 'to drink', $\checkmark p \vec{\sigma}(\vec{i}) - \vec{\alpha} \eta - \sigma \iota_{l-\varsigma}$ f. 'blowing'. $\nu \vec{\eta} - \sigma \iota_{l-\varsigma}$ f. 'spinning': O.H.G. $n \vec{a} - t$ f. 'seam'. $\dot{\varphi} \vec{\eta} - \sigma \iota_{l-\varsigma}$ f. 'speaking, word' for $*f_{\ell} \eta - \sigma \iota_{l-\varsigma}$: Avest. $u v \sigma \vec{a} t \vec{i} - \vec{s}$ f. 'law' (cp. I § 157 p. 141). From derivative verbs: $\ddot{\sigma} \varrho \vec{\omega} \sigma_{l-\varsigma}$ 'seeing' $(\dot{\sigma} \varrho \vec{\omega} \omega)$, $\alpha \vec{i} \tau \eta \sigma \iota_{l-\varsigma}$ 'prayer, demand', $(\alpha l \tau i \omega)$, $\alpha \vec{j} \vec{i} \omega \sigma \iota_{l-\varsigma}$ 'thinking worthy' $(\dot{\alpha} \vec{\xi}_{l} i \omega \omega)$, $\varkappa \alpha \vec{j} \sigma \sigma \sigma \iota_{l-\varsigma}$ 'purifying' $(\varkappa \alpha \vec{j} \sigma \alpha \omega)$, $\varkappa \alpha \sigma \sigma \sigma \iota_{l-\varsigma}$ 'proclamation, announcing' $(\varkappa \eta \rho \dot{\nu} \sigma \sigma \omega)$.

With reduplication: e. g. ποίφυξι-ς 'a snorting' from ποι--φύσσω. Cp. the Aryan forms p. 298.

With -e-ti- we have e. g. $\sigma_{\chi^+\ell^-\sigma^{\prime}-\varsigma}$ 'holding, condition', $\lambda\acute{\alpha}_{\chi^-\ell^-\sigma^{\prime}-\varsigma}$ 'lot, fate', $\varepsilon \ddot{v}_{\ell^-\varepsilon^-\sigma^{\prime}-\varsigma}$ 'finding'. Cp. also $\ddot{\alpha}_{-\nu\nu-\sigma^{\prime}-\varsigma}$ 'completing'. In correspondence with these nouns we find the partee. $\ddot{\alpha}_{-\sigma\chi\varepsilon\tau\sigma^-\varsigma}$, $\varepsilon\dot{v}_{\ell\varepsilon^-\tau\dot{\sigma}^-\varsigma}$, $\dot{\alpha}_{\nu-\dot{\gamma}\nu\nu-\tau\sigma^-\varsigma}$ § 79 p. 229.

-ti- was so widely used in Greek and formed so many new words that it is often impossible to tell whether a given word arose in Greek or is really Indo-Germanic. It is not probable that forms like φεῦξι-ς ἐεῦσι-ς ζεῦξι-ς Ατcad. ἔσ-τεισι-ς (beside φυ'ξι-ς ἐνσι-ς τίσι-ς), in which the root-syllable is in the strong grade, are to be referred simply and immediately to the ablaut variation of the stem in Indo-Germanic (see p. 294).

As to the association of the -ti-stems in compounds like $\tau \in \rho \cap \mu \cap \rho \cap \sigma$ with the σ -aorist, see § 30 p. 52.

In Italic, -ti- was no longer a living suffix. But its extension -tion- (-tin-) was very fertile.

a. -ti-. Lat. cu-ti-s f.: O.H.G. hū-t O.Icel. hū-đ f. 'skin' pr. Germ. *xū-đi-. tussi-s f., no doubt to be connected with tundō. fus-ti-s m. vī-ti-s f.: Avest. vue-ti-š etc., see p. 295 above. fors f., Osc. fortis adv. 'forte' Pelign. forte gen. 'fortunae': Skr. bhr-ti-š etc., see p. 295 above. mors f.: Skr. mr-ti-š f. 'death', O.Lith. mir-ti-s f. O.C.Sl. sū-mrītī f. 'death', common ground-form *mr-ti-s. sors, also sor-ti-s f., beside serō. ars f.: Skr. r-ti-š f. 'method, kind, way'. pars f., beside por-tiō, see

Umbr. ahtim-em 'in actionem' beside ahtu 'actui', Lat. ago. Lat. hos-ti-s m. 'foreigner, enemy': Goth. gas-t-s m. 'stranger, guest', O.C.Sl. gos-ti m. 'guest, companion, friend' (the root meaning is perhaps 'injury, harm', compare Skr. ghas- 'to consume'; see the Author, in Curtius' Stud. V. 228 ff.). nox f.: Skr. nák-ti-š f. Goth nah-t-s f. Lith. nak-tì-s f. O.C.Sl. noš-tǐ f. 'night'; yet this word *noq-ti- may not belong to the oldest stratum of ti- nouns, but be only an extension of *nog-t- (§ 123). cōs, gen. cōtis, f., cp. Skr. śā-ta-s 'whetted, sharpened', Gr. zā--vo-c 'cone'. quies, gen. quietis, f.: Avest. syeiti-s, see above, p. 297. From satiare: satias, gen. satiatis, f. 'sufficiency, repletion'. forti-s O.Lat. forcti-s originally followed the o-declension:

Skr. drdhá-s 'established, firm', \(\sqrt{dher gh-} \)

b. -tion-. Lat. junc-tio: Skr. yuk-ti-š f. 'a yoking, setting going', Gr. Leviti-g f. 'a yoking, putting to', Lith. inf. junk-ti 'to voke'; the nasal of the Lat. and the Lith. form came from the present stem (Lat. jungo Lith. jungiu). circum-litio: Lith. inf. le-ti 'to pour'. fissio: Skr. bhitti-s f. 'a breaking'. por-tio beside pars, see p. 299 above. cul-tio, from colo for *cuelo (I § 427 a p. 313, § 431 a p. 320). ēm-p-tiō (the regular form would have been, *en-tiō, see I § 207 p. 174): O.Ir. inf. air--itiu 'accipere', O.C.Sl. rako-jeti f. 'manipulus, sheaf' inf. Lith. im-ti O.C.Sl. je-ti 'to take'. men-tio beside mens, see above, p. 295. nā-tiō cōg-nā-tiō Umbr. natīne 'natione, gente', beside gēns, see above p. 295. of-fensio, from of-fendo, coctio: Skr. pak-ti-š etc., see p. 295 above. gestro, beside gero. messio (cp. messi-s) see above. lec-tiō: Gr. λέξι-ς f. 'speaking, expression'. sta-tio; the stem from which this is derived, *sta-ti-, may be contained in Umbr. statita 'statuta': Skr. sthi-ti-s etc.. see p. 297 above. ra-tio: Goth. ra-pjo f. 'reckoning, account', beside Lat. re-rī ra-tu-s. ac-tiō beside Umb. ahtim-em 'in actionem'. cap-tiō: Goth. anda-haft-s f. 'rejoinder, answer' Mid.H.G. haf-t f. 'a holding, hold'. cautio Skr. á-kū-ti-š f.

'intention'. auctiō: Lith. inf. áuk-ti 'to grow', √aug-. scānsiō, beside scandō. nō-tiō: Skr. prá-jñāti-š etc., see above p. 296. con-crē-tiō. From derivative verbs: Lat. occupātiō dominātiō captātiō Osc. medicatinom 'judicationem' fruktatiuf 'usus, fructus', Lat. largītiō sortītiō, tribūtiō. It should be observed however that the great fertility of -tiōn- often makes it doubtful whether any given word really represents an original ti-stem, e. g. fissiō auctiō.

Lat. monitio, vomitio, sorbitio, ex-spuitio. Osc. úíttiu f'usio, usus' for *oit(i)tiuf, see I \\$ 501 Rem. 2 p. 368, \\$ 633 p. 474. Cp. monitu-s and so forth, \\$ 79 p. 231.

Old Irish. fēnth f. 'sinew': Avest. vae-ti-š etc., see above p. 295. taid m. 'thief': O.C.Sl. ta-tī m. 'thief'.

-ti- was a living suffix, and formed abstract verbal nouns which were feminine (for the infinitives see § 156). buith 'being': Skr. bhū-ti-š bhū-ti-š f. 'good condition, well-being', Gr. qν'-σι-ς f. 'nature', O.C.Sl. za-bytī f. 'forgetting, forgetfulness', inf. Lith. bū-ti Slav. by-ti 'to be'. brith 'carrying': Skr. bhṛ-ti-š etc., see above p. 295. blith 'grinding, molere', beside melim 'I grind' (I § 212 p. 179). cleith (Mid.Ir.) 'concealment, hiding', beside celim 'I conceal'. saigid 'seeking out', beside saigim 'I seek out', compared with Lat. sāqiō. iar-figid 'questioning', cp. Lat. pocātiō.

Adjectives in -ti-, like blāith soft, gentle' (ground-form *m\bar{t}-ti-s, I\\$ 306 p. 243), \bar{c}-cm-ailt 'insolens', may have originally belonged to the o-declension. Cp. \\$ 93 p. 282.

Some of the feminine abstract substantives in -tiu are also used to form infinitives (§ 156). er-mitiu 'honour' toim-tiu 'meaning, intent': Lat. mentiō, see above p. 295. air-itiu 'accipere': Lat. ēmptiō, see above p. 300. clōsi(u) 'hearing': Skr. śruṣ-ti-ṣ f. 'a gratifying, courtesy', O.Sax. O.Icel. hlus-t f. 'hearing', Lith. inf. kláus-ti 'to ask' (I § 467, 2 p. 343). epelt(i)u 'death', sinking', beside at-bail 'he dies, perishes'. aicsiu 'seeing' from *-cas-tiō, beside ad-chess 'visum est'. aigthiu 'fearing', for *-agithiu. Sometimes we find this extended form side by side

with the shorter form in -ti-; e. g. dat. do saichtin and do saigthin (both Mid.Ir.) = do saigid 'to seek out'.

Germanic. In proethnic Germanic -ti- was fertile; but later on it passed almost, ifn ot entirely out of use. This was due to two causes; to the variation caused by phonetic change (cp. e. g. Goth. anda-hafti-, ga-mundi-, ga-dēdi- (pronounced -dēdi-), ga-qumpi-, ga-vissi-), and to the almost complete loss of the to- participles, which broke down its formal connexion with the verb.

Goth, us-tauht-s 1) 'completion, fulfilment' O.H.G. zuh-t 'drawing, training': Lat. duc-tiō, \(\sqrt{deyk-.} \) Goth. fra-lust-s 'loss, destruction' (compare O.H.G. lus-t 'pleasure', perhaps in the sense of 'being free, unrestrained'), beside Goth. -liusan: cp. Gr. λύ-σι-ς. Goth. saúh-t-s O.H G. suh-t 'illness', beside Goth. siukan 'be ill'. Goth. lis-t-s O.H.G. lis-t 'craft, trick' beside Goth. leisan 'to experience, learn': O.C.Sl. lis-ti f. 'deceit, trick'. Mid.H.G. trif-t 'driving, pasturage, meadow' O.Icel. drip-t 'snow drift', beside Goth. dreuban 'to drive'. O.H.G. scur-t 'shearing': Gr. κάρ-σι-ς f. 'shearing', \sqrt{s} ker-. Goth. ga-faurd-s 'a meeting, high council' O.H.G. far-t 'travelling' ground-form *pr-tfand *pr-ti-, \(\sqrt{per-.} \) O.H.G. ga-turst A.S. ze-dyrst 'boldness': Skr. dhṛṣ-tu-s 'boldness', \(\sqrt{dhers-.} \) Goth. fra-vaurht-s O.Sax. far-wurht 'misdeed, sin': Avest. anvaršti-š i. e. anuvaršti-š f. 'suitable conduct'. O.H.G. gi-dult 'patience': Lat. ob-latio (-tlatifor *t[-ti-), \(\sigma tel-\). Goth. ga-qumb-s 'meeting' O.H.G. cumft cunft 'coming' O.Icel. sam-kund 'meeting': Skr. qá-ti-š etc., see above, p. 295. Goth. anda-numt-s 'taking up, reception' O.H.G. numft nunft 'taking', beside Goth. nıman. Goth. ga-kumb-s 'a being acquainted' ga-kund-s'a making acquainted, persuasion', O.H.G. kunst 'wisdom': Avest. ā-zainti-š f. 'knowledge, understanding', see p. 296 above. As to ft and st in the last-named forms see I § 214 p. 180 f. and § 529 p. 386. O.H.G. anadaht 'devotion' for *pany-ti-, beside Goth. Pagkjan (pret. Pahta) 'to think'. O.H.G. sih-t 'sight, power of sight', beside Goth.

¹⁾ The forms which follow are feminine unless it is otherwise stated.

sathran 'to see': cp. Lith. sèk-ti 'to follow'? (cp. I § 419 p. 307). Goth. fra-gift-s 'bestowing' O.H.G. gif-t 'gift', beside Goth. giban to give'. Goth. ga-qiss 'agreement', beside ga-qiban (pret. ga-qab). O.H.G. sta-t O.Sax. ste-di 'place, stead': Skr. sthi-ti-š etc., see above p. 297. Goth. ga-dēp-s (st. -dēdi-) O.H.G. tā-t 'deed': Avest. ni-daiti-s etc., see above, p. 296. Goth. anda-haft-s 'rejoinder, answer' Mid.H.G. haf-t 'hold': Lat. cap-tiō. ga-skaft-s O.H.G. gi-scaft 'creation, creature', beside Goth. ga--skapjan 'to make'. Goth. mah-t-s O.H.G. mah-t 'might': O.C.Sl. mošti f. 'might' inf. mošti 'to be able or capable'. Goth. gas-t-s m. O.H.G. gas-t m. 'guest': Lat. hos-ti-s, see above p. 300. Goth. slaúh-t-s 'slaughter' O.H.G. slah-t 'striking, slaving': Gr. λάκ-τι-ς 'pestle for pounding, pounding' (λανίζω, Lat. lacerō)? Goth. áih-t-s O.H.G. ēh-t 'property, possession': Av. īš-tı-š f. 'goods, riches' (Skr. īś-). O.H.G. ur-chnāt 'agnitio': Skr. prá-jñā-ti-š etc., see p. 296 above. O.H.G. nā-t 'seam': Gr. νη-σι-, f. 'spinning'. O.HG. hano-crāt 'cock-crow' (A.S. crāwan 'to crow'): Lith. inf. gró-ti 'to croak'. O.H.G. bluo-t 'blooming, bloom', beside Lat. flo-s. Mid.H.G. gruo-t 'a being green', beside Gr. γλω-ρό-ς light green, yellow'. The following no doubt come from weak verbs: (toth. fahēp-s (st. fahēdi-) 'joy' (see Bremer, Paul-Br. Beitr. XI 32), Goth. ar-báip-s (st. arbáidi-) O.H.G. arabeit 'work, need'.

Now and then we find -s-ti- instead of -ti-, as Goth. an-st-s O.H.G. an-st 'favour, grace' (compare O.Icel. of-un-d 'ill-will'), beside O.H.G. unnan 'to bestow', O.H.G. span-st 'enticement', beside spanan 'to entice', Goth. háif-st-s A.S. hæst beside O.Icel. heip-t 'strife', O.H.G. trust for *truh-st beside truh-t O.Icel. drött 'troop, following'. This s came originally from forms like O.Sax. O.Icel. klu-s-t 'hearing' = Skr. śruṣ-ti-ṣ (p. 301), Mid.H.G. bluo-s-t (cp. A.S. blöstm and Lat. flör-ēre) beside bluo-t 'bloom': in West-Germanic, forms like kunst must also have had some influence, if the conjecture given in I § 529 Rem. p. 386 is correct. Cp. -s-tuo- § 61, -s-tro- § 62, -s-lo- § 76, -s-tu- § 108, -s-men-§ 117.

In the Germanic dialects many of these words became

masculine without any change of meaning; this must be distinguished from the change of gender in such words as gasti 'guest'. Cp. von Bahder, Verbalstr. 76 f.

Goth. ra-piō 'reckoning, account': Lat. ra-ti-ō, see above p. 300.

Balto-Slavonic. Here -ti- was very fertile, forming all the infinitives of Lithuanian, Lettic, and Slavonic. And it should be noticed that in this group of languages the phonetic changes which the suffix underwent were very slight (O.C.Sl. nošti for pr. Slav. *notži, 1 § 462 p. 338).

Lith. plu-ti 'to become flooded, overflow' O.C.Sl. plu-ti Russ. ply-t 'to flow, swim'; Skr. plu-ti-s f. 'overflowing, flood', Gr. πλύ-σι-ς f. 'washing', \(\sigma \) pleu-. Lith. is 2-a ūti O.C.Sl. iz-uti 'to uncover the feet': Lat. ex-ūtiō (late). Lath. jáu-ti 'aquam fervidam super infundere' Lett. jáu-t 'to make dough, mix' jū-tis pl. 'joint where two bones are connected': Skr. yu-ti-\$ f. 'meeting together' yū-ti-š f 'bond' Avest. gao-jaoti-š f. 'meadow-land, cattle-pasture'. Lith, mùk-ti 'to slip away' maūk-ti 'to graze': Skr. múk-ti-š f. 'loosing, freeing, giving up', Gr. anó-uvti-c f. blowing the nose', Lat. e-munctio (the nasal comes from the present). Lith. pri-ettl-s f. 'suburb' inf. eī-ti O.C.Sl. i-ti 'to go': Skr. i-ti-š f., etc., see p. 296 above. Lith. szli-ti-s f. heap of sheaves' inf. szlē-tı 'to make one thing lean on another: Gr. xλί-σι-ς f. 'bending, inclining, lying', \$\sqrt{klei-.}\$ O.C.Sl. ži-tī f. 'life' inf. ži-ti 'to live' Lith. gý-ti 'to revive, get well': Avest. jī-ti-š f. 'life'. Lith. ný-ti-s f. 'weaver's instrument, slaie': Skr. nī-th-š f. 'leading, guiding'. Lith. lik-ti 'to leave': Gr. ĕx-λειψι-ς f. 'ceasing, failing', Lat. re-lictio. O.C.Sl. cis-ti 'honour' inf. cisti Russ. česť (i. e. *čisti) to count, reckon, honour': Skr. cit-ti-š f. 'thought, intent, intelligence'. Lith, dir-ti 'to skin' Little-Russ. derty (i. e. *dīr-ti) Slov. dreti (i. e. *der-ti) 'to tear, skin': Skr. df-ti-š etc., see p. 298 above. Lith. gir-ti-s f. feast gér-ti 'to drink' O.Croat. po-žrti Little-Russ. žerty (i. e. *žīr-tī) O.C.Sl. žrěti (i. e. *žerti) 'to swallow': Gr. βρω-σι-ς f. 'food, victuals' (ground-form *gr-ti-s). Lith. pir-ti-s f. 'bath-room' per-ti 'to bathe' (trans.), pres. periù. Lith. kirsti 'to strike sharply, strike

hard': Skr. kftti-ë f. 'hide, skin' (kart-'cut off, loosened'). O.C.Sl. versett f. 'condition, state, situation' Lith. virsti 'to upset, be upset'. persti 'to turn': Skr. vyt-ti-s f. 'rolling, proceeding, conduct', Lat. in-versio. Lith. pál-ti-s f. 'side of bacon' O.C.Sl. plu-ti f. 'meat'. Lith. pil-ti 'to pour, shed': Skr. pūr-ti-š 'filling, fulfilment', √ pel-. Lith. kıl-tì-s f. 'race, stock' kél-ti 'to lift, transport, help forward'. Lith. mllsz-ti Slov. molsti (i. e. *mils-ti) O.C.Sl. mlesti (i. e. *mels-ti) 'to milk': Gr. αμελέι-ς f. 'milking',

melg-. Lith. skilsti-s f. 'cloven foot of an ox' (skéld-u and skéldžiu I crash, break myself in two'): cp. Gr. κλάσι-ς f. 'breaking' beside κλαστί-ς κλαδ-αρό-ς (cp. I § 369 p. 280). Lith. at-minti-s f. 'memory' O.C.Sl. pa-meti f. 'remembrance' Lith. min-ti 'to remember': Skr. ma-ti-š etc., see p. 295 above. Lith. link-ti 'to bend' (intr.) lenk-ti 'to bend' (trans.) O.C.Sl. lesti 'to bend' (trans.), Vleng-. Lith. blisti 'to grow dark' blesti 'to darken' (intr.) (pres. blendžiů'-s) O.C.Sl. blesti 'to go astray' (pres. bled-q), √ bhlendh-. Lith. ugnã-dekti-s f. 'piercing cold' dèk-ti 'to burn' (trans. and intrans.), O.C.Sl. žešti 'to burn' (trans.), beside pres. deg-ù žeg-a (pr. Slav. *geg-a for *deg-a), \(\sqrt{dhegh-}. \) Lith. ësti 'to devour' O.C.Sl. jasti 'to eat': Gr. vijori-c 'fasting', Lat. com--ēstiō (instead of the regular *-ēsiō, cp. I § 501, Rem. 2 p. 368), √ed-. Lith. du-ti-s f. O.C.Sl. da-ti f. 'gift', Lith. du'-ti O.C.Sl. da-ti 'to give': Skr. dati- etc., see p. 295. Lith. spé-ti 'to have leisure, be quick enough O.C.Sl. spě-ti 'to go forward, have success': Skr. sphā-ti-š f. 'a making fat, prospering' sphī-ti-š f. 'prosperous condition', O.H.G. spuo-t f. 'progress, success', √ spē(1)-. Lith. nak-tì-s f. O.C.Sl. noštĭ f. 'night': Skr. nák-ti-š etc., see p. 300 above. Lith. prë-žasti-s f. 'cause', beside žad-ù 'I promise'. O.C.Sl. na-pasti f. 'danger', beside pada 'I fall'. O.C.Sl. sě-tí f. 'cord', Lett. si-t 'to bind', \sqrt{sai} . Lith. jó-ti 'to ride': Avest. vasë-yasti-š f. 'free course, progress after one's desire'. Lith. šio-ti-s f. 'cleft, ravine' -šió-ti 'to open the mouth wide': Lat. hiā-tiō. O.C.Sl. po-znatī f. 'cognitio' zna-ti 'to know': Skr. prá-jaati-š f. etc., see p. 296 above. O.C.Si. grē-ti 'to warm', beside pres. gre-ja. Infinitives in Baltic and Slavonic were closely connected with the finite verb; hence the action of ana-Brugmann, Elements. II.

logy caused many changes in the grade of the root-vowel. For the phaenomena in Slavonic cp. Leskien, Archiv f. Slav. Phil. V 497 ff.

In Lithuanian we sometimes find -s-ti-, as ugnā-deksti-s beside ugnā-dekti-s (p. 305), cp. dek-s-nt-s § 95 p. 287. -ti-stems frequently passed into the analogy of -ja- and -ė- stems, e. g. krý-ti-s gen. -tes f. and krý-ti-s gen. -czio m. 'purse-net, hoop-net', szli-tt-s and szli-tė f. 'heap of sheaves'.

Infinitives of derivative verbs; Lith. jëszkó-ti O.C.Sl. iska-ti 'to seek', Lith. sédé-ti O.C.Sl. sědé-ti 'to sit'; Lith. ganý-ti O.C.Sl. goni-ti 'to protect, tend'.

§ 101. 2. -ti- is used to form secondary abstract substantives. This use is exactly parallel to that of the participial suffix -to- and the abstract nominal suffix -to- -ta-(which were originally identical); both of these, as we have seen, could beadded directly to noun stems in the proethnic and later periods (§ 79 p. 224 f. § 80 p. 238 ff. § 82 p. 249 ff.).

The forms which can be most confidently referred to the proethnic language are a group of abstract nouns connected with the ordinals in -to- (§ 81 p. 242 ff.) *penq-ti-s f. 'fivefold character, the number five, a group of five': Skr. pankti-š, O.Icel. fimt, O.C.Sl. peti; with these should no doubt be compared O.H.G. fast f. 'fist' pr. Germ. *funysti-z and O.C.Sl. peti f. 'fist' (-st-for -kst- as in teste, see I § 545 p. 399 f.), common ground-form *pnq-sti-s¹). Skr. šaš-ti-š f. 'sixty' (a six-fold quantity', i. e. of tens), O.C.Sl. šes-ti f. 'a group of six'. Skr. nava-ti-š 'ninety' (a nine-fold quantity' i. e. of tens) Avest. navaiti-š f. 'a group of nine' and 'ninety', O.Icel. nīun-d f. O.C.Sl. deve-ti f. 'a group of nine'. Skr. daša-ti-š 'a group of ten' and 'a hundred', O.Icel. tīun-d f. 'a group of ten'. Lith. dēszim-ti-s f. O.C.Sl. dese-tī f. 'a group of ten'. These numeral forms naturally suggest

¹⁾ Cp. *ppq- in O.H.G. funfiu and elsewhere (Kuhn's Ztschr. XXVII 193 f., Paul-Braune's Beitr. XII 512) and for meaning, Goth. flggr-s 'finger', which is doubtless connected with this numeral. — Vol. I § 249 p. 205 should be corrected accordingly.

the conjecture, that we have the same suffix in Skr. tá-ti (nom. acc.) 'so many' ká-ti (nom. acc.) 'how many?', Lat. tot toti-dem, quot: these words may have been originally neuter.

Remark. In Greek we find numerals in $-rv-\varsigma$ in place of such forms as *peng-ti-s (see § 108). In proethnic Indo-Germanic there were forms in -t- parallel to these in -ti- (see § 123).

Beside Idg. *juun-tā 'youth' (§ 80 p. 239) there seems to have been a second form *zuun-ti-s f. with the same meaning: Skr. yuvati-š 'maiden, young woman' (the abstract is used for the concrete, § 155), O.H.G. jugund A.S. zeozoā 'youth' (Engl. youth both as the period and the person), prehist. Germ. *juzunpi-for *juuunpi- (Bugge, Paul-Braune's Beitr. XIII 504). Lat. sēmen-ti-s f. 'seed, seed-corn, seed time', originally 'the being sown'.

Further it is possible that stems in -es-ti- -os-ti- (cp. Lat. sceles-tu-s onus-tu-s and the like) date from the proethnic period. In the words in which they occur, the termination -esti- -ostiis used as a simple and indivisible suffix. Skr. gábhasti-§ f. m. 'a thing separated into different parts, hand, fork, shaft (of a carriage)', pulasti-s 'hair of the head, wearing smooth hair', palasti-š 'gray with old age' (dubious). Lat. agresti-s, orig. 'a belonging to the country, rusticity'? O.H.G. angust f. 'anxiety O.C.Sl. qzostī 'strait, narrowing', cp. also Lat. angustu-s angustiae. In Lithuanian we have -esti-s, which passed over to the -io- declension: kalbesti-s f. 'speech', beside kalbesni-s m. 'talk' and kalbesi-s m. 'dialect' kalbesé f. 'speech'; mõkesti-s m. (gen. -esczio), beside mõkesni-s m. 'payment'; lükesti-s f. 'awaiting, hope'; rupesti-s f. m. 'care'. In Slavonic there are a large number of feminine abstract nouns in -osti (but -j-esti, see I § 84 p. 80) formed from adjectives, and, more rarely, from substantives: besides O.C.Sl. qzosti (cp. qzuku 'narrow'), which has been mentioned, other examples are dlugost 'length' from dlugu long', dobljesti 'bravery' from dobli 'brave', zverosti 'wildness' from zvěrt 'wild animal', boljesti 'illness' from bolt 'one who is ill'.

Other forms are more isolated, e. g. Skr. addhā-ti-š (concrete) 'one who has learnt the truth, sage' beside addhā 'in

truth', Goth. gamáin-p-s f. 'community' beside ga-máin-s 'common, joint' (cp. gamáin-dap-s § 102 below, and p. 311).

For -ti- in -tāti- and -tūti-, see the following section.

§ 102. The Suffixes -tāti (-tāt-) and -tāti-(-tāt-)¹). The former occurs in Aryan, Greek, and Italic; the latter in Italic, Celtic and Germanic. They formed feminine abstract nouns from adjectives and substantives. -tāti-appears to have arisen through the addition of -ti-(§ 101) to -tā-(§ 80 p. 238 ff.), cp. Skr. dēvā-tā- and dēvā-tāti-, Skr. guru-tā- and Gr. βαρύ-τηι-, Lat. juven-tā- and juven-tāti-. The accumulation of suffixes would be like that in Skr. -tvā-tā-, cp. § 56 p. 103 f.; Lat. juven-tāti-: juven-tā-: Skr. yuva-tī- = puruṣā-tvātā-: puruṣā-tva-: puruṣā-tā-. -tūti- may have come from -tu-stems (§ 108) rather later. The parallel forms -tāt- and -tūt- beside -tāti- and -tūti- resemble doublets like Idg. *noq-t-: *noq-tī- 'night', *dekm-t-: *dekm-ti- 'ten-fold character', Skr. sam-i-t- f. beside sām-i-ti- f. (§ 123), and the shorter forms no doubt contain the suffix -t-.

Most of the words which occur in more than one language have -tāt(i)-: Skr. sarvá-tāt-'ş sarvá-tāt- 'perfection'. Avest. haurva-tāt- 'safety', Gr. όλό-της 'totality, entirety', beside Skr. sárva-s Gr. ὅλο-ς 'whole'; Gr. νεό-της 'youth', Lat. novi-tās, beside Gr. νεό-ς Lat. novo-s. With -tūt(i)-: Lat. juven-tūs, O.Ir. ōitiu 'youth' (dat. ōitid) for *(i)ouētū(s) (-iu for -u is due to the palatal character of the preceding syllable). A form with-tūt(i)-in one group of languages sometimes corresponds to a form with-tāt(i)- in another, as O.Cymr. duiu-tit 'deitas': Skr. dēvá-tāt-; O.Ir. beo-thu 'life': Gr. βιό-της; O.Ir. oen-tu 'unitas': Lat. ūni-tās; Goth. gamáin-dūp-s: Lat. communi-tā-s. In many words -tūt(i) may have ousted -tūt(i)-, which on the whole is certainly older.

For the loss of a syllable in forms like Avest. amer'tatbeside amer'ta-tat- 'immortality', Gr. novn- 'drink' for *novo-

¹⁾ Th. Aufrecht, Das Affix $\tau\eta\tau$ tāt, Kuhn's Ztschr. I 159 ff. C. Angermann, Das Suffix $\tau\eta\tau$ in Primärbildungen, Curt. Stud. III 122 ff. K. Walter, Das latein. Suffix -tāt and -tāt, Kuhn's Zeitschr. X, 159. C. von Pancker, Die [lat.] substantive abstracta auf -tas, ibid. XXIII 138 ff.

-rār-, Lat. acc. lūculentātem beside lūculenti-tātem, see I § 643 p. 481 f.

Arvan. In Sanskrit, -tati- and -tat- (the latter is rarer) are only found in Veda, and even there not frequently. In Avestic we have only -tat, where it is comparatively commoner than either form in Sanskrit. Skr. upará-tāt- 'neighbourhood, environs'. Avest. upara-tat- 'superiority', beside Skr. úpara-'nearer'. Avest. upara- 'upper'. Skr. grbhītá-tāti-š 'state of being caught' from grbhītá-s 'caught', jyēšthá-tāti-š 'sovereignty' from jyēštha-s 'mightiest', satyá-tātı-š and satyá-tāt- 'truthfulness' from satyá-s 'truthful', ásta-tāti-š 'homestead', home' from ásta-m 'home', sá-tāti-š 'health, bliss' from sám- n. 'health, bliss'. Avest. drva-tat- 'durability, soundness' from drva- 'durable. sound', fratema-tat- 'sovereignty' from fratema- 'first', hunar'tat-'virtue' for *hunar ta-tat-, compared with Skr. sūnfta-s 'beautiful, glorious', ušta-tāt- 'prosperity, welfare' from uštā- 'well-being'. yavae-tat- 'eternal duration' from yave adv. 'always', dat. of yun. 'eternity' (cp. yurae-n- 'ever living).

Remark. From the last word we once find the phrase yavae-ca $t\bar{a}u\bar{t}$ for ever' (usually the word is $yavaet\bar{a}u\bar{t}$). Thus $-t\bar{a}u$ - was regarded as a compounded word (this appears also in other ways); and it seems to have been popularly connected with tan- 'stretch out'. Cp. Mod.H.G. $br\bar{o}s\bar{a}me$ (O.H.G. brosma), which has no etymological connexion with $s\bar{a}me(n)$, but has been associated with it; furthermore we find even in Greek $\pi arr - o' - \tau \eta_{\bar{s}}$ like $\pi arr - o' - \mu o \varrho \phi o - \bar{s}$ and Goth. $mikil - d\bar{u}\bar{p} - s = *mikila - d\bar{u}\bar{p} - s$ hke $gud - h\bar{u}s = *guda - h\bar{u}s$ p. 311.

Greek. Here we find only $-\tau \alpha \tau$ -, which was substituted for the -ta- used in forming abstracts (§ 80 p. 239 f.), and appears only in the combinations $-o -\tau \alpha \tau$ - and $-v -\tau \alpha \tau$ -. $\delta \varrho \vartheta \delta -\tau \eta \varsigma$ 'straightforwardness, rightness' from $\delta \varrho \vartheta \delta -\varsigma$: Lat. ardui-tas. $\sigma \kappa \alpha \iota \delta -\tau \eta \varsigma$ 'awkwardness' from $\sigma \kappa \alpha \iota \delta -\varsigma$ 'awkward': Lat. scaevi-tas. $\kappa \alpha \kappa \delta -\tau \eta \varsigma$ 'wickedness' from $\kappa \alpha \kappa \delta -\varsigma$. $\dot{\alpha} \gamma \nu \delta -\tau \eta \varsigma$ 'purity, chastity' from $\dot{\alpha} \gamma \nu \delta -\varsigma$. $\dot{\beta} \iota \delta -\tau \eta \varsigma$ 'life' from $\dot{\beta} lo -\varsigma$. $\dot{\beta} \epsilon \delta -\tau \eta \varsigma$ 'godhead' from $\vartheta \epsilon \delta -\varsigma$. $\dot{\epsilon} \nu -\delta -\tau \eta \varsigma$ 'unity' from ϵls 'one'. $\pi \alpha \nu -\tau \delta -\tau \eta \varsigma$ 'totality' from $\pi \alpha \varsigma$. Hom. $\dot{\alpha} \nu \delta -o -\tau \dot{\eta} \tau -\alpha$ acc. 'manhood' (more correctly no doubt $\delta \varrho \sigma \tau \dot{\eta} \tau \alpha$; see I § 204 p. 170) from $\dot{\alpha} \nu \dot{\eta} \varrho$ $\dot{\alpha} \nu \dot{\eta} \varrho -\dot{\sigma} \varsigma$. In the last three examples -o- appears as it does in compounds, e. g. $\pi \alpha \nu \tau -\dot{\sigma} -\dot{\sigma} \gamma \dot{\sigma} \dot{\sigma} = 0$

μορφο-ς; cp. also Lat. libīdin-i-tās. βαρύ-της 'gravitas' from βαρύ-ς: cp. Skr. guru-tā- (§ 80 p. 239 f.). γλυκύ-της 'sweetness' from γλυκύ-ς. βραδύ-της (βραδυτής) 'slowness' from βραδύ-ς. ταχυ-τή-ς 'swiftness' from ταχύ-ς.

Italic. In Latin we cannot distinguish -tāti- from -tāt-, -tāti- from -tāt, since in very many points the consonantal declension was assimilated to that of the i-stems. It may have been these very suffixes, with their double forms taken along with such doublets as noct-nocti- etc., that helped to establish the confusion. The variation in the gen. pl. (cīvitātium and cīvitātum) is of special importance (§ 93 p. 281).

boni-tās from bonu-s. dūri-tās from dūru-s. anxie-tās from anxiu-s. quāli-tās from quali-s. civit-tas from cīvi-s. libertās from līber. ūber-tās from ūber (in imitation of which was formed viduertās from viduo-s; notice the parallelism in meaning). facul-tās from facili-s, with the later by-form facili-tās. volup-tās from volupe volup. mājes-tās from mājor (cp. § 135 Rem. 1). hones-tās from honēs. tempes-tās from tempus. vetus-tās from vetus, or for *vetusti-tās from vetus-tu-s. voluntās for *volunti-tās from volēns. libidin-i-tās from libīdē, cp. Gr. ἐν-ό-της (see above). Pelign. Herentas 'Venus' Osc. Herentate's 'Veneris, Volupiae', from herest 'volet', formed from the part. pres., like Lat. voluntās.

-tūti- -tūt- is very much rarer. Lat, juven-tūs (: O.Ir. ōitiu), senec-tūs beside juven-tūs juven-ta, senec-ta, from juven-i-s, senex. virtūs from vir. servi-tūs from servo-s. There can be no doubt that -tūdō (gen. -tū-din-s), e. g. in servi-tūdō alti-tūdō, is closely related to this suffix.

In Old Irish we have -tat-, which we may ascribe to proethnic Celtic. ōitiu 'youth': Lat. juven-tas; see above, p. 308. oen-tu 'unitas' for *oen-thu (th (b) after n was replaced by the tenuis by a comparatively late change). beo-thu (gen. be--thath) 'life'. The suffixes -atu -etu, in derivatives from adjectives in -e (io-stems), are especially frequent; as torbatu 'utilitas' from tor-be 'utilis', dommetu 'paupertas' from domme 'inops', oendatu 'unity' from oen-de 'single', ildatu 'pluralitas from il-de 'pluralis', fliuchaidatu 'humiditas' from fliuchaide 'humidus'; the origin of this -atu -etu is doubtful').

Germanic. It occurs only in Gothic, in certain substantives in -dūpi-, derived from adjectives; as mikil-dūp-s 'greatness from mikil-s (mikila-) 'great', gamáin-dūp-s 'community' from ga-máin-s (ga-máini-) 'common'. The loss of the vowel before the suffix is like that in ga-máin-p-s (§ 101 p. 307 f.) and in compounds, e.g. gud-hūs brūp-fap-s (§ 40 pp. 69, 71 f.).

III. Suffixes in -u.

§ 103. The u-suffixes have a triple ablaut: u, eu, ou (e-series, I § 311—314). u e. g. in nom. and acc. sing. masc. fem. u-s u-m. eu e. g. in nom. pl. masc. fem. -eu-es. ou in gen. sing. -ou-s. The connexion of this ablaut with the original conditions of accent in the different cases cannot be exactly determined from the evidence now at our disposal. No clear explanation has been given of Gr. \tau\colonus(f)-\delta-\circ\colons compared with \tau\cdolon\cdolon'-\circ\colons compared with Skr. a-gr-u-, Skr. prthiv-\tau\colons compared with prth-\delta-\circ\colons, which seem to imply -ou- as one of the proethnic forms of the suffix. The best analysis of the words is \tau\alpha-f\delta-\circ\colons, gra-vi-s, prthi-v\tau\cdolons, i. e. to suppose that the root-syllable was extended by \delta, as in \(\frac{\circ}{\circ}\chi^2 - \tau\chi^2 \) and the like (I § 110 p. 103 ff.).

From the proethnic period downwards we find u-stems in all three genders. The masculine and feminine stems had originally the same inflexion; differences only arose during the development of the separate languages, as in Skr. acc. pl. sūnūn m. 'sons', hānūš f. 'jawbones'.

^{1) &}quot;It is hard to decide whether -atu came from -antu, or from the union of two dental suffixes (perhaps -ato-tūt-). Zimmer (Kuhn's Zischr. XXVII 461) regards the acc. corpitadid as a true phonetic spelling (cp. I § 212 Rem. p. 179); yet, as he himself remarks, it may be merely a mistake of the scribe's. Mid.Ir. sochmattu 'possibility' perhaps supports t rather than d. Unfortunately the modern Celtic languages have lost the suffix. Personally I incline towards the second assumption; compare e.g. no-erladaigtis 'they obeyed' beside aurlatu 'obedience'."

Thurneysen.

§ 104. The suffix -u-1). This is always primary, and most common in adjectives. The evidence of Sanskrit, Greek, Germanic and Lithuanian proves that in Indo-Germanic these adjectives were nearly always oxytone and had the root-syllable in the weak grade. But the strong grade must have been at one time regular in a certain number of the cases. It is true that such forms as Skr. prathú-š Lith. platù-s beside Skr. prthú-š, Skr. svadú-š Gr. nov-c O.H.G suozi beside Goth. sut-s, cannot be taken to prove this, since a certain amount of assimilation between the forms of the three degrees of comparison (positive, comparative, and superlative) may be assumed in all these cases. and must be assumed in some; but it is fairly shewn by the variation between e. g. Goth. filu and Skr. purú-š. Notice also the variation of form within the weak grade itself, e. g. *grr-u- and *-gr-u 'heavy' (I § 313 p. 250 f.). The feminine of these adjectives was differentiated by -12- -2- in the proethnic and later periods, e. g. Skr. tanv-t beside the masc. tan-ú-š (see § 110).

The substantives were masculine, feminine, or neuter. The variations of ablaut differed in different words. Note *gon-u-*gen-u-*gn-u-'knee' and the like, and *pek-u- and *-pk-u-'cow' (vol. I loc. cit.).

In do-Germanic. Adjectives. *ggr-u-s *-gr-u-s (cp. the compar. Skr. gár-īyas): Skr. gurú-ṣ 'heavy, violent, hard' Avest. gouru-ṣ 'adverse' Skr. a-gru- Avest. a-γru- 'unmarried' ('non gravida'), Gr. βαον΄-ς 'heavy' (Lat. gravi-s see § 103 p. 311), Goth. kaúru-s 'heavy' (I § 290 p. 232). *tγs-ú-s, from √ ters-'be dry, arid': Skr. tṛṣu-ṣ 'parched with thirst', O.Icel. purr O.H.G. durr-i Goth. paursu-s (instead of *paurz-u-s) 'dry, arid' (cp. I § 582 Rem. 1 p. 435 f.). Skr. pur-u-ṣ Gr. πολ-υ-ς (cp.

¹⁾ O. Weise, De linguarum Indogerm. suffixis primariis, I De adjectivis suffixo -u- formatis, Gotting. 1878. A. Bezzenberger, Eine idg. Accentregel, in his Beitr. II 123 ff. R. Thurneysen, Weibliche u-Stämme im Irischen, Kuhn's Ztschr. XXVIII 147 ff.; Wh. Stokes, Irish feminine stems in u, ibid. 291 f. I. Schmidt, Über das litau. Nominalsuffix -u, Kuhn and Schleicher's Beitr. IV 257 ff.

I p. 308 p. 244). O.Ir. il Goth. fil-u (n.) 'much'), \(\sqrt{pel-.} \) Skr. prth-u-s prath-u-s Gr. nlat-v-s 'broad', Gall. Litu-gena Litu--mara. Lith. plat-ù-s 'broad', beside the compar. Skr. práth-īyas-. *tyn-u-s 'stretched, thin' from \sqrt{ten} - 'stretch out, lengthen': Skr. tanú-š (pari-tatn-ú-š 'encompassing' redupl.), Gr. τανύ-γλωσσο-ς 'with tongue outstretched, long-tongued', Lat. tenu-i-s, O.Ir. tan-a, O.H.G. dunn-i, O.C.Sl. tı̃nŭ-kū (from which come on the one hand tini-ku, Czech tenký, on the other tunu-ku, Russ. tonkij). *lwah-ú-s 'quick, small', Vlewgh- in Skr. raháya-ti (I § 454 p. 335): Skr. raghú-š Gr. elayú-5. *angh-ú-s 'narrow', V angh- 'make narrow, bind together': Skr. ahú-š, Armen. anyu-k ancu-k, Goth. aggvu-s (instead of *aggu-s, see p. 316), O.C.Sl. azŭ-kŭ. Skr. svād-ú-š 'sweet, pleasant', Gr. 75-v-c 'sweet, pleasant', Lat. suavi-s for *syad-y-i-s, Goth. sut-s O.H.G. suoz-i A.S. swēt-e 'sweet'. Skr. as-u-s 'swift', Gr. ax-v-c 'swift', Lat. acu-pediu-s beside ōc-ior.

Substantives. *pek-ú-s *-pk-u-s m. and *pék-u n. 'cattle': Skr. pašú-š Avest. pasu-š 'cattle' Avest. haurva-fšu- 'all the cattle' (I § 398 p. 296), Lat. pecu-s, with its oblique cases reformed by analogy, on the one hand gen. pecudi-s etc. (§ 128), on the other (when pecus was regarded as neuter) gen. pecor-is etc.; Skr. páśu, Lat. pecu, Goth. faíhu ('money'). Skr. hán-u-š f. 'jawbone', Gr. yév-v-g f. 'jaw, jawbone', Lat. genu-Inu-s 'belonging to the check', O.Ir. giun m. 'mouth', Goth. kınnu-s f. 'cheek, jowl' instead of *kinu-s through the influence of kinn-, which stands for *kiny-, cp. I § 469, 8 p. 346 f. Skr. kět-ú-š m. phenomenon caused by light, picture, form, Goth. háid-u-s m. 'kind, way'. *bhāgh-u-s m.: Skr. bā-hú-š 'arm', Gr. πάχυ-ς πῆχυ-ς fore-arm, something bent' O.Icel. bog-r 'something bent'. *medh-u n.: Skr. mád-hu 'sweetness, honey' (the Skr. adj. mádhu- was derived from this subst.), Gr. µ69v 'intoxicating drink, wine', O.Ir. mid (gen. meda) O.H.G. meto m. 'mead', Lith. medù-s m. O.C.Sl. medu m. 'honey'. *gon-u- *gen-u- *gn-u- n. 'knee': Skr. jan-u 'knee' jnu-badh- 'bending the knees' Avest, zanv-a pl. 'knees' fra-šnu 'knee bent forward' (I § 403 p. 298), Gr. yévv. yeuvar youaran Hesych. (Cp. I § 639 p. 479), yru-netely to sink on one's knees, become helpless', Lat. genu, Goth. kniu (st. kn-iv-a-) 'knee' knu-ssjan 'to kneel'.

Arvan. Skr. pur-ú-š Avest, pouru- par-ao O.Pers. par-u-'much' (I § 290 p. 231 f.): Gr. nol-v-5 etc.; see p. 312 above. Skr. ur-ú-š Avest, vouru-š 'broad' common ground-form *urr-ú-(I § 157 p. 141): Gr. elev-s 'broad' no doubt for *e-fev- with prothetic &; the relation of the Arvan to the Greek form is therefore the same as that of Skr. gurú-: -gru-. Skr. ri-ú-š Avest. erez-u-š straight, right'. Skr. prth-ú-š Avest. perep-u-š 'broad': Gr. πλατ-ν-ç etc., see above p. 313. Skr. vás-u-š Avest. vamh-u-š O.Pers. vahu- (in the proper name vahu-ka-) 'good', the neut, in Skr. and Avest. = 'goods'; the substantival use is perhaps older than the adjectival (cp. Skr. mádhu- p. 313): O.Ir. fiu 'suitable' or 'suitability' (cp. under Old Irish). Skr. aś-ú-š Avest. as-u-š 'swift': Gr. ωκ-ύ-ς etc., see above p. 313. Skr. rbh-ú-š 'clever, artistic', šay-ú-š 'lying', dar-ú-š 'breaking', jay-ú-š 'victorious', šu-šth-ú-š 'standing well, in good condition' (stha-), táp-u-š 'hot', tár-u-š 'passing through'; ci-kit-ú-š 'skilful', ji-gy-ú-š 'victorious'; there are many adjectives from desiderative stems, as di-drkš-ú-š 'wishing to see' ci-kits-ú-š 'clever, crafty', di-ts-ú-š 'ready to give'. Avest. driy-u-š 'poor', ja--yāuru-š 'awake, watchful'.

Skr. iš-u-š m. f. Avest. iš-u-š m. 'arrow'. Skr. ás-u-š m. 'spirit of life' Avest. anh-u-š m. 'the world, the sum of living beings', O.Pers. au-ra-, § 76 Rem. 1 p. 201. Skr. bah-ú-š m. Avest. bāz-u-š m. 'arm': Gr. nηχ-v-ς etc., see above p. 313. Skr. sindh-u-š m. f. 'stream, Indus, region of the Indus', Avest. hind-u-š m. O.Pers. hi(n)d-ū-š 'India'. Skr. mádh-u n. Avest. maā-u n. 'sweetness, honey': Gr. μέθ-v, etc.; see above, p. 313. Skr. dār-u n. 'wood, piece of wood, beam, plug' Avest. dāuru n. 'wood, spear' Skr. dar-v-i-š dar-v-i 'spoon' dr-u-n. m. 'wood, wooden implements' m. 'tree, branch'. Avest. dr-u-n. 'wood, spear': Gr. δόρ-v n. 'wood, beam, spear-shaft, spear' δρν-τόμο-ς 'cutting wood' δρύ-α n. δρύ-ες f. 'oaks', O.Ir. daur, gen. daro dara, Mod. Cymr. derw-en 'oak', O.Ir. derucc 'acorn', Goth. triu (st. tr-iv-a-) n. 'tree', Lith. der-v-à f. 'pine-wood' O.C.Sl. drēvo n. 'tree' (pr.

Slav. *der-v-o) dr-ŭv-o (usually in pl. dr-ŭv-a) 'wood', Idg. *dor-u- *der-u- *dr-u-. We have a corresponding variation of ablaut in another neuter word, Skr. sán-u- sn-u- n. m. 'peak'. Skr. bándh-u-š m. 'relationship, relation', qŝ-u-š m. 'stem', ci-kit-u-š f. 'insight, understanding', párŝ-u-š f. 'rib': Avest. per's-u-š m. 'rib', tál-u n. 'palate', trap-u n. 'chin'. Avest. sēnh-u- sēngh-u-f. 'instruction'.

Armenian. barj-r, gen. barju 'high', ground-form *bhygh-u-. anju-k ancu-k 'narrow', (extended by -qo-, see above p. 313). bazu-k 'arm' has the same addition, compare Skr. bahu-\$ (see above, p. 313), but the word may have been borrowed from Persian. Other derivatives from u-stems: cn-aut 'jawbone, cheek', beside Skr. hán-u-\$ etc. (see above, p. 313), cun-r (pl. cunk-k) 'knee', beside Skr. ján-u etc. (see above, p. 313), and other words.

Greek. $\sigma \rho \alpha \sigma - v' - \varphi$ 'bold': Mid.H.G. turr - e 'bold' Lith. dras - u - s 'bold' (this word like dras - u 'boldness' which is closely akin, was modified through the influence of $dris - \varepsilon$; see I § 285 Rem. p. 228), $\sqrt{dhers} - \beta \rho \alpha \delta - v' - \varepsilon$ 'slow': Skr. $mrd - u - \varepsilon$ 'tender'. $max - v' - \varepsilon$ 'thick': Skr. $bah - u - \varepsilon$ 'thick, much', common ground-form * $bhugh - u - \varepsilon$; can we compare Lith. $bing - u - \varepsilon$ 'stately, stiff, proud' in spite of the palatal gh (cp. Avest. bazah - n. 'size, strength')? see I § 467, 2 p. 343. $\lambda \iota \gamma - v' - \varepsilon$ 'clear-sounding', $\gamma \lambda \nu x - v' - \varepsilon$ 'sweet', $\tau u \rho \varphi - v' - \varepsilon$ 'thick' $\beta \alpha \vartheta - v' - \varepsilon$ 'deep', $\delta \alpha \sigma - v' - \varepsilon$ 'thickly overgrown', $\eta v' - \varepsilon$ ' $\varepsilon - \varepsilon$ 'stout, good', $\tau \rho \overline{\alpha} \chi - v' - \varepsilon$ 'rough, uneven, rugged', $\beta \rho \overline{\imath} \vartheta - v' - \varepsilon$ 'heavy', $\delta \overline{\varsigma} - v' - \varepsilon$ 'sharp, piercing'.

πῆχ-ν-ς m. 'forc-arm, something bent': Skr. bāh-ú-š m. etc., see above p. 313. πέλεκ-ν-ς m. 'axe': Skr. paraš-ú-š parš-u-š m. 'axe'. στάχ-ν-ς ἄσταχ-ν-ς m. 'ear of corn'. γῆρ-ν-ς m. 'voice'. γέν-ν-ς f. 'chin, jawbone': Skr. hán-u-š etc., see above p. 313. ἄρκ-ν-ς f. 'hunter's net'. μέθ-ν, γόν-ν, δόρ-ν n., see above pp. 313, 314. πῶν n. 'herd' for *πωχ-ν: cp. Skr. pāy-ú-š 'guardian', beside Gr. ποι-μήν Lith. pē-mũ 'herdsman' (cp. § 105 Rem. p. 318). γλάφ-ν n. 'grotto, cave'.

Italic. We seem to have a trace of the old adjectival u-stems in Lat. īdūs pl. fem. sc. noctēs, 'the bright (nights)',

from \sqrt{aidh} burn, be clear. Compare also acu-pediu-s beside Skr. $as-\dot{u}-\dot{s}$ Gr. $\dot{\omega}\varkappa-\dot{v}-c$ 'swift'. The other Latin forms of this class have gone over to the *i*-declension: grav-1-s, ten-u-i-s, suavi-s for *syad-y-i-s, see above pp. 312, 313; and no doubt levi-s, pingui-s. The form of the feminine (cp. Skr. tanv- \dot{i}) must have had something to do with this change of declension.

Masc. lac-u-s: O.Ir. loch 'lake' n.; compare Gr. λάκκο-ς 'hole, pit', which according to the rule given in vol. I § 166 p. 147 implies a stem *λακν-. im-petu-s, alg-u-s, grad-u-s. Fem. trib-u-s Umbr. trifo 'tribum', which can scarcely come from tri- 'three' + √ bhu-; dom-u-s: O.C.Sl. dom-ŭ 'house'; ac-u-s, col-u-s (also m.). Neut. pec-u- Umbr. pequo 'pecua' beside Lat. pec-u-s, see p. 313 above; gen-u see p. 313 f.; veru Umbr. berva 'verua' berus 'verubus': O.Ir. bir 'sting, spear', common ground-form *ger-u-; spec-u (beside spec-u-s m f.); gel-u.

Old frish. tiug (gen. tig) 'thick'. O.H.G. dicchi 'thick, dense' (Goth. *pik-u-s or *piq-u-s). il 'much': Skr. pur-ú-š etc.; see p. 312 above. fiu 'suitable, worthy' or 'suitability' Mod.Cymr. gwiw 'proper, fitting, worthy' Gall. Visu-rīx pr. kelt. *ues-u-: Skr. vás-u-š vás-u (p. 314), see Thurneysen in Kuhn's Ztschr. XXVIII 148 f. dub 'black'. fliuch 'wet'. From an Indo-Germanic u-stem come also tana Corn. tanow Bret. tanav 'thin', cp. Gr. vav-v- vavu-(f)o- etc., p. 312 f., and § 103 p. 311.

Masculine. giun O.Cymr. genou Corn. genau 'mouth': Skr. hán-u-š f. etc., see above p. 313. mug 'slave, servant' for *mog-u-s: Goth. mag-u-s 'boy, servant'; fid 'tree': O.H.G. witu 'wood'. Feminine. mucc 'sow', deug 'drink'. Neuter. mid 'mead': Skr. mádhu etc., see above p. 313; loch 'lake': Lat. lac-u-s m.

Germanic. The adjectival u-stems were partly absorbed into the 20-declension, the point of connexion being the original feminine formation with -iē- -i-. Goth. kaūr-u-s 'heavy': Skr. gur-ū-š etc., see above p. 312. Goth. paūrs-u-s O.H.G. durr-i 'dry, arīd': Skr. tṛṣ-ū-ṣ etc., see above, p. 312. Goth. aggvu-s 'narrow' instead of *aggu-s through the influence of the weak form aggv- = Skr. ahv-, O.H.G. eng-i O.Icel. ong-r: Skr. ah-ū-ṣ etc., see above p. 313. Goth. O.H.G. fil-u (A.S. fealo

= pr. Germ. *fal-u, Fris. ful = *ful-u) 'much': Skr. pur-ú-š etc., see above p. 312. Goth. hard-u-s O.H.G. hart hert-i 'hard': Lith. kart-ù-s 'bitter'. A.S. myrz-e 'lasting a short time' O.H.G. murg-fari 'caducus, fragilis, transitorius': Gr. βραχ-ύ-ς 'short', common ground-form *mrgh-ú-. Goth. tuly-u-s 'firm', qairr-u-s 'soft'. A.S. spit-u O.H.G. spiz m. 'spear', properly something 'pointed', compared with O.H.G. spizzı 'pointed'.

Goth. mag-u-s O.S. mag-u m. 'boy': O.Ir. mug 'slave, servant'. Goth. hair-u-s m. 'sword': Skr. śar-u-ş m. f. 'missile' Goth. haid-u-s m. 'kind, way' O.H.G. heit m. f. 'persona, sexus, rank, position' A.S. hād m. 'family, position, nature': Skr. kēt-ú-ş m. 'phenomenon due to light, picture, form'. A.S. aelf Mid.H.G. alp (alb-) m. 'goblin, elf' was originally, no doubt, an -u-stem: Skr. rbh-ú-ş 'artistic, a sculptor'. Goth. kinnu-s f. 'cheek' instead of *kinu-s, A.S. cin f. 'chin': Skr. hán-u-s etc., see above p. 313. Goth. hand-u-s f. O.H.G. hant (dat. pl. hantum) f. 'hand'. Goth. fathu n. 'money' O.H.G. fih-u n. 'cattle': Skr. páṣ-u etc.; see p. 313 above.

In Germanic the *u*-inflexion of consonantal stems largely increased the number of the substantives in -*u*-; the point of contact is seen in forms like (Goth.) acc. sing. *fot-u* acc. pl. *fot-uns*. Cp. § 56 p. 103, § 160, 1, § 161.

Balto-Slavonic. Adjectives in u-have survived only in Lithuanian, but there they are very common; and their number was considerably increased by the fact that a parallel form in -u-s could be made to any adjective in -a-s; e. g. asztrù-s § 74 p. 187 f., gailù-s § 76 p. 210, gëdrù-s beside gëdra-s, drungnù-s beside druñgna-s. Most of the cases passed into the -io- inflection; cp. the Germanic section, p. 316. platù-s 'broad': Skr. pṛth-ú-ṣ etc.; see above, p. 313. dras-ù-s 'bold': Gr. Joao-v-c; see above, p. 315. sald-ù-s 'sweet': O.C.Sl. sladù-kū 'sweet'. dub-ù-s 'hollow', dyg-ù-s 'prickly', baug-ù-s 'timorous', staig-ù-s 'hot-tempered', smag-ù-s 'malleable'. It is only rarely that the root has the accent, as in tánk-u-s 'thick'. The existence of pairs like drasù-s 'bold' and drasù 'boldness' led to the use of -u- as a denominative suffix; e. g. tamsù-s 'dark' from

tam-s-à 'darkness', czësù-s 'timely' from cszësa-s 'time' (a borrowed word). In Slavonic adjectival u-stems are found in derivatives with -qo-; besides sladŭ-kŭ we have e. g. tinŭ-kŭ azŭ-kŭ (p. 313).

In Balto-Slavonic the substantives in -u- are all masculine. Lith. med-ù-s O.C.Sl. med-ŭ 'honey': Skr. mádh-u n. etc.; see above, p. 313. Lith. virsz-ù-s 'the upper, outer part' O.C.Sl. vrīch-u adv. 'above'. Lith. dang-ù-s 'heaven' beside dengiù 'I cover', vid-ù-s 'the inner part', al-ù-s a drink like beer. O.C.Sl. dom-ŭ 'house': Lat. dom-u-s (\sqrt{dem} - 'build'), vol-ŭ 'ox', pol-ŭ 'side'. In Slavonic all u-stems were inflected as o-stems.

§ 105. The Suffix -iu. This must be regarded as proethnic, even though we cannot point with certainty to any one example which dates from the Indo-Germanic period. It should be noticed how frequently we find -2u and -io side by side, as Skr. va-yu- \bar{s} Lith. $v\dot{e}$ -ya-s 'wind', Gr. v-iv-c and v-io-c 'son'. Skr. $y\dot{a}y$ -yu- \bar{s} 'revered as divine' and 'revering, pious' and yaj-ya-s 'venerandus'.

Remark. The explanation of Skr. $p\bar{a}y^-\hat{u}^-\hat{s}$ pr. Gr. $*\pi\omega_{F^{-\nu}}$ (§ 104 p. 315) as containing the suffix $-u^-$, not $-iu^-$ (similarly Skr. $st\bar{a}y^-\hat{u}^-\hat{s}$ $t\bar{a}y^-\hat{u}^-\hat{s}$ Avest. $t\bar{a}y^-\hat{u}^-\hat{s}$ 'thief' cp. Skr. $st\bar{c}^-n\hat{a}^-s$, Skr. $dh\bar{a}y^-\hat{u}^-\hat{s}$ 'thirsty' cp. $dh\hat{e}^-n\bar{a}^-$) is based on the hypothesis mentioned in vol. I § 150 p. 186, which would allow us to assume such a root as e. g. $*p\bar{o}i_-$, not $*p\bar{o}_-$. If this hypothesis be correct, it is natural to conjecture that the suffix $-iu^-$ may have sprung from these nouns, $*p\bar{o}i_-$ being analysed as $*p\bar{o}_-iu^-$ etc. On this model then were formed e. g. Skr. $v\bar{a}_-y\bar{u}^-\hat{s}$ (Idg. $u\bar{e}_-$), $dh\bar{a}_-y\bar{u}^-\hat{s}$ 'generous' (Idg. $dh\bar{e}_-$), and later on $-iu^-$ was added to consonant stems, as Skr. $dds_-yu^-\hat{s}_-$. So far as I can see there is nothing to prevent our assuming that this process took place in proethnic Indo-Germanic.

Aryan. Skr. dás-yu-š m., a title both of the gods' enemies, the demons, and of the unbelieving tribes, Avest. daňhu-š f. (cp. I § 125 p. 115, § 558 p. 415) O.Pers. dahyu-(nom. sing. dahyūu-š) f. 'land, district, neighbourhood'. Skr. man-yú-š m. 'excited thought, zeal, displeasure, anger' Avest. mainyu-š m. 'spirit, genius'. Skr. vā-yú-š m. Avest. va-yu-š m. 'wind': the Avestic form is no doubt for *w-iu-, see I § 109 p. 101. Skr. my-t-yú-š m. 'death': perhaps identical with the

Armen. u-stem mark mak (gen. marku maku) 'death', see I § 360 p. 276; it is based on a stem mr-t-, see § 123.

Skr. bhuj-yú-š 'flexible', śundh-yú-š 'neat, pure', dhá-yu-š 'generous', sáh-yu-š 'strong'. The commonest forms are adjectives which are connected with derivative verbs, and mean 'seeking after, desiring something' or 'possessing, performing, exhibiting something' and the like. Examples are aśvayú-š 'desiring horses', śravasyú-š 'ambitious', dēvayú-š 'reverencing the gods', udanyú-š 'containing water' vīrayú-š 'behaving like a hero'; cp. part. dēvayánt- 'reverencing the gods' and feminines like aśvayá 'desire for horses'. Avest. awhu-yu-š a proper name, beside awhuyēmi 'I govern' awhuyā- f. government'.

Armenian. Perhaps we should class here marh 'death'; see above, under Aryan.

Greek. Lac. Arcad. v-iv-g 'son', Cret. v-iv-g, Att. vv-g (inscr.), Hom. gen. vitog etc., beside vio-g vo-g, which can scarcely have come from the former by dissimilation: cp. Skr. su-ta-s begotten, son' (cp. W. Schulze, De reconditionibus quibusdam nominum in -1 \sum_ exeuntium forms, Commentationes philologae Gryphiswaldenses, Berol. 1887, p. 17 ff.).

According to Wackernagel (Kuhn's Ztschr. XXIV 295 ff., XXVII 84 ff.) substantives in $-\varepsilon \dot{v} - \zeta$ like $vo\mu \varepsilon \dot{v} - \zeta$ 'herdsman' (nom. pl. Cypr. $-\tilde{\eta} F - \varepsilon_{\delta}$) also belong here, and should be compared immediately with the Sanskrit nouns in $-ayu - \check{\xi}$. Yet some difficulties still remain; should we, for instance, assume Idg. -eju - s or $-\bar{e}ju - s$ for the nom. sing.? The latest discussion of these stems is by Johansson (De derivatis verbis contracts linguae Graecae, 1886, p. 73 ff.).

Germanic. Goth. drun-ju-s m. 'noise', stub-ju-s m. 'dust', (cp. O.H.G. stuppi 'dust'); perhaps also -vaddju-s f. 'partition, wall, rampart' (O.Icel. vegg-r, O.Sax. acc. pl. wegos i. e. weijos), where ddj came from i (I § 142 p. 127).

Baltic. In Lithuanian -iu- is common, both in primary and secondary use. It forms only masculines. gyr-iu-s 'praise, glory', vyr-iu-s 'eddy', skyr-iu-s 'separation', vy-lu-s 'enticement, trick' spēceiu-s 'swarm' op. spēceiù inf. spēsti 'to swarm' (of bees).

There a large number of nomina agentis, as pirdžiu-s, 'peditor' sùkcziu-s 'trickster', audēju-s 'weaver', rācziu-s 'wheelwright', bezdālu-s 'who sends forth many blasts', and other appellations of living beings to denote a particular characteristic, as skarmālu-s 'scamp' (skarma-la-s 'rags torn off') bēdžiu-s 'poor creature' (bēdà 'necd'), kytrūlu-s 'wiseacre, coxcomb' (kytrù-s 'clever'), ragūcziu-s 'horned thing' (ragūta-s 'horned'). In Lithuanian -iu-was far more fertile than in the other European languages. Brückner assumes that the whole group of nouns in -ju- is a purely Lithuanian formation (Archiv f. slav. Phil. III 254 f.), but this is improbable.

§ 106. The suffix -nu-(-nnu-). This is rare in most of the languages It usually forms substantives.

Indo-Germanic *sŭ-nu-s m. 'son': Skr. sūnú-š O.H.G. sunu Lith. sūnù-s O.C.Sl. synŭ.

Aryan. Skr. sū-nú-š Avest. hunu-š m. 'son': Lith. sū-nù-s etc., see above. Skr. bhā-nú-š 'gleam, sun' Av. bū-nu-š m. 'gleam, light'. Skr. dhē-nú-š f. 'milch cow' Avest. dae-nu-s f. 'female' (of animals). Skr. dā-nu Avest. dā-nu n. 'trickling moisture, dew', also Skr. dā-nu-š. Skr. vag-nú-š m. 'sound, cry', sthānú-š m. 'stick, stump'; dhṛṣ-nú-ṣ 'bold', gṛdh-nú-ṣ 'eager, greedy'. Avest. taf-nu-š m. 'heat, heat of fever', bar'ṣ-nu-ṣ f. 'peak, height', zae-nu-ṣ 'equipped'.

In Sanskrit we find also -anú-, as krand-anú-š m. 'bellowing' nad-anú-š m. 'din', vi-bhañjanú-š 'breaking to pieces'. This -anú- is parallel to -aní-, as is shewn by kšip-anú-š 'missile' kšip-aníš 'a cut with a whip'. Hence no doubt it should be derived from -nu-. See § 95 p. 285.

Forms like ky-t-nú-š 'active' (lōka-kyt-nú-š and lōka-ky-t-'making a clear space', see § 123) gave rise to the fairly common adjectival suffix -tnu- (cp. -t-van-§ 116 and the like): dar-tnú-š 'breaking to pieces', dravi-tnú-š 'running', mādayi-tnú-š 'intoxicating'.

The adjectival suffix -snu- was no doubt derived from more than one typical form. kravišnú-š 'greedy of raw flesh' (kraviš- 'raw flesh'), rōcišnú-š 'shining' (rōciš- 'light'); carišnú-š

'wandering', gamišņú-š 'going', cyāvayišnú-š 'setting in motion', jišņú-š 'victorious', ni-šatsnú-š 'sitting down'. vadhasnú-š 'carrying a murderous weapon' beside vadhasná-m 'murderous weapon' (see § 66 p. 142), as Avest. zaenu-š 'equipped, beside zaene-m 'equipment, weapon'.

Greek. Here -νν- is very rare. Hom. 30η-νν-ς 'footstool' beside Att. 30α-νο-ς 'seat, bench'. λιγ-νύ-ς 'smoke, vapour'.

Italic. The suffix is rare. Lat. ma-nu-s f., Umb. manuve in manu', no doubt standing for *ma-nu-, from $\sqrt{m\bar{e}}$ -'measure'. Lat. cor-nu n. and cor-nu-s beside the rare cor-no- n.: Gall. κάρ-νν-ξ (schol. Iliad, Σ 219, Eustath. 1139, 57) beside κάρ-νο-ν acc. 'trumpet' (Hesych.), Goth. haûr-n n. 'horn' (§ 66 p. 147); cp. Danielsson, Pauli's Altital. Stud. III 188. pī-nu-s f., also pī-no- f., cp. Gr. π/-τν-ς. The dative vēnu beside vēnō vēnu-m from *ves-no- or *vēs-no- (§ 66 p. 142 under Armenian) is certainly a late change of declension.

Old Irish. *lī-n* 'number' ground-form *plē-nu-. Cp. also orgun orcun f. 'killing, to kill' for *orgonu *orgunu according to Stokes, Kuhn's Ztschr. XXVIII 291; but *orgunā- might equally be assumed as its original form.

Germanic. Goth. su-nu-s O.H.G. sunu O.Icel. sun-r m. 'son': Skr. sū-nū-š etc., see p. 319 above. Goth. paūr-nu-s m. 'thorn' beside the -o-stems O.H.G. dorn O.Icel. porn; there is, however, no reason why we should not assume that *pur-nu-was the pr. Germ. form; O.C.Sl. trǐ-nū may also be an original u-stem, but note Skr. tf-na-m 'stem of grass'. Goth. asilu-qairnu-s f. 'µvlò's o'nuo'c, millstone' (its suffix may he compared with that of O.C.Sl. žrǐ-ny f. 'mill') beside O.H.G. chwir-na 'millstone, mill' O.Icel. kver-n 'mill', Lith. gir-nos pl. 'millstones, mill'.

Balto Slavonic. Lith. sū-nù-s O.C.Sl. sy-nũ m. 'son': Skr. sū-nú-s, see above p. 319. O.C.Sl. či-nũ m. 'rank, order', beside Skr. ci-tá- 'ranged, trooped'. In Lithuanian there are a few adjectives, which however may be simply modifications of forms in -na- (see p. 317): e. g. drung-nù-s 'lukewarm' (beside druñg-na-s), gad-nù-s 'useful', szvel-nù-s 'tender, soft to touch'; with -s-, dù-snù-s do-snù-s 'generous'.

§ 107. The Suffixes -ru- and -lu-. These are original in a few nouns. They are more or less fertile in Baltic as adjectival suffixes.

Indo-Germanic. -ru-. *dak-ru n. 'tear': Gr. δάνρυ, Lat. dacru-ma lacru-ma lacri-ma (I § 369 p. 279 f.), Corn. dagr pl. dagrou; hence no doubt Germ. *táχra- (O.H.G. zahhar O.Icel. tār) and *taʒrá- (Goth. tagr A.S. teazor) originally had -ru-; another word which no doubt was formed in imitation of this, though from a different root, is Skr. áś-ru n. 'tear', cp. Skr. kṛ-mi-ṣ: cp. Lat. ver-mi-s: cp. Gr. ελ-μι-ς § 97 p. 289. Skr. śmáṣru n. 'beard, moustache' for *smaṣ-ru (I § 557, 4 p. 413), Armen. moruk (mōru-k muru-k) 'beard' (though this comparison is not quite certain); compare Lith. smak-rà 'chin' (I § 467 p. 343).

-lu-. Skr. dhā-rú-š 'sucking' Gr. $\Im \tilde{\eta}$ - $\lambda \nu$ - ς 'giving suck, female', beside Gr. $\Im \eta$ - $\lambda \dot{\eta}$ 'mother's breast' Lat. $f\bar{e}$ -lāre etc., see I § 256 p. 210. Skr. $bh\bar{\imath}$ -rú-š $bh\bar{\imath}$ -lu-š Lith. bai- $l\dot{\imath}$ -s 'timorous'.

Aryan. Only the evidence of the cognate languages can decide whether the suffix is Idg. -ru- or Idg. -lu-. Idg. -ru-may be assumed in: Skr. áś-ru Av. as-ru n. 'tear' beside Skr. aś-rá-m 'tear' (see above), and Skr. śmaś-ru n. 'beard' (parallel to this we find hári-śmaśāru-s 'with light coloured beard'); see above.

In the following instances it is doubtful whether we have Idg. r or l. Skr. pē-ru-š no doubt meaning 'making to bubble, swell'. Avest. duž-vandru-š 'desiring evil'. Skr. patā-ru-š 'flying', like pata-rā-s § 74 p. 182. Skr. vandā-ru-š 'praising, glori-fying', piyā-ru-š 'despising, scorning', patayā-lū-š 'flying'. Is šāt-ru-š 'foe' = šāt-ru- or šāt-tru-?

Greek. δάκ-ου n., see above. κάγχου-ς f. κάχου (κάγχου) n. 'roasted barley' and βότου-ς m. 'bunch of grapes' may be classed here provisionally.

Italic. Extended by -ma-: Lat. dacru-ma (see above). Perhaps we should class here tonitru-s m. tonitru n., whose formation seems to resemble that of Skr. stanayi-tnú-š (compare § 106 p. 320) and tanyatú-š 'thunder' (§ 108).

Germanic. Goth. ái-ru-s O.Icel. o-r-r a-r-r m. 'messenger',

V'ei- 'go'; also A.S. ar 'messenger', which is no longer recognisable as an u-stem. Goth. hūh-ru-s m. and O.H.G. hungar m. (of which the same may be said) 'hunger', pr. Germ. *xinox-ru-z and *xunox-ru-s. Pr. Germ. *flō-ru- Mid.H.G. vluor m. f. 'cornfield, ground' A.S. flōr m. f. 'house-floor, barn-floor': O.Ir. lā-r 'flooring, floor'.

Balto-Slavonic. In Lithuanian there are a considerable number of adjectives in -rù-s and -lù-s: bud-rù-s 'watchful', suk-rù-s 'active', kant-rù-s 'patient', ėd-rù-s 'ravenous' (ėd-rù 'fodder') isz-matrù-s 'sharp-sighted' (cp. O.C.Sl. mot-r-iti 'to look'), buk-lù-s 'crafty, sly' isz-teklù-s isz-tenklù-s 'sufficing'. Parallel to these we sometimes have forms in -ra-s -la-s, as gëd-rù-s and gëd-ra-s 'bright, clear', and gai-lù-s gai-la-s 'ill-tempered, snappish' (of dogs). The a-form appears in most cases to be older than the other, and it must sometimes be pre-supposed, even where it does not occur, e. g. in asztrù-s 'sharp' beside O.C.Sl. ostrù Skr. catur-aśra-s Gr. ăxoo-ç (§ 76 p. 184 and p. 187).

§ 108. The Suffix $-tu^{-1}$). This was a common primary suffix used in forming abstract substantives (verbal nouns, nomina actionis) even in the proethnic period. These were masculine; but through the influence of the gender of other abstract nouns, they became feminine universally in Greek, and sometimes in Aryan and Germanic. In Aryan, Latin, Balto-Slavonic (and Keltic, see § 156) they are found attached to the verbal system as infinitives (gerunds, supines); and it is possible that this association with the verb, which gave rise to a large number of new formations, began at least in part before the end of the proethnic period. And in this connexion it is especially important to observe that we find the acc. -tu-m used after verbs of motion in precisely the same way in Sanskrit, Latin, and Balto-Slavonic; e. g. Skr. hötum ēti 'he goes make sacrifice',

¹⁾ Th. Benfey, Die Suffixe rv, tu sammt ätu, Kuhn's Ztschr. H \$15 ff.

Lat. cubitum it, Lith. eīksz válgytū 'come and eat', O.C.Sl. česo izidoste vidětŭ? 'quid exiistis visum?'

Only a few masculine and feminine substantives formed with this suffix are other than nomina actionis, and their uses can easily be derived from the meaning of an abstract verbal noun. The nomina agentis (as Skr. mán-tu-š m. 'counsellor' beside mántu-š m. 'counsel, advice', Goth. hliftu-s m. 'thief', O.Icel. vọrā-r m. 'watcher, waiter' beside vọrā-r m. 'watch') show the same change of meaning as Lat. hosti-s O.Ir. tāid; and the few adjectives that occur (as Skr. tapya-tú-š 'hot, glowing') are parallel to such forms as Skr. pú-ti-š 'stinking'. Cp. § 99 p. 293, §§ 149. 155.

There are a few neuter substantives as Skr. vás-tu Gr. ao-rv. Originally the accent varied in the different cases in connexion with differences in ablaut, c. g. *61-tu- *1-tu-- (from *ei- 'go'); such a distinction is preserved in Skr. *É-tu-m: i-tv-å. In Sanskrit the variation survived in these cases, which had been incorporated into the verbal system, because, through the difference in their use, their connexion in form was forgotten, but in the complete declension of any one noun the differences were levelled; in some cases the type *ej-tu- was adopted (e.g. mántu-š), in others *itu- (e. g. rtú-š). Other survivals of the old gradation are seen in (e. g.) Gr. κλει-τύ-ς and κλι-τύ-ς, Lith. lë-tu-s and ly-tù-s. In Latin and Lithuanian the supine was influenced by the to-participles and the abstract nouns in -ti-, so that the type *itu- prevailed: e. g. Lat. da-tu-m da-tū like da-tu-s (da-to-s) da-tiō, Lith. milsz-tū like milsz-ta-s milsz-ti (\sqrt{melos-}). On the other hand, the corresponding form in Slavonic generally shows the type *eitu- and itself influenced the ti-infinitive (e. g. O.C.Sl. mlěs-tŭ and mlěs-ti); this is certainly connected with the comparative disuse of the -to- participle in this group of languages (§ 79 p. 336).

These nouns could be based upon any form which served as a verbal stem, not merely on the root (in the strict sense); hence forms like Skr. vámi-tu-m inf. to vomit. Lat. vomi-tu-s m., Skr. jīvā-tu-š f. 'life' (cp. Av. jyā-tu-š f. 'life'), Gr. þoŋ-rv'-ç

f. 'cry', Lat. apparā-tu-s m. andī-tu-s m., O.Ir. scarad 'a severing' Goth. vratō-du-s m. 'journey', Lith. jēszkó-tū O.C.Sl. iska-tū 'to seek'.

-e-tu- is found like -e-to- § 79 p. 219 and -e-ti- § 100 p. 294), e. g. Skr. kr-ά-τú-š 'power, strength' vah-α-τú-š m. 'bridal procession', Gr. ετυ-μο-ς 'truthful' from *ε-τυ- instead of *h-ετ-υ- 'existence' (\$\sqrt{\sqrt{es-}}\$).

Indo-Germanic. Skr. inf. bhávi-tu-m gerund bha-tv-á from bháva-ti 'he becomes, is', Lat. fu-tu-ō, sup. Lith. bú-tū O.C.Sl. by-tŭ 'to be'; we may add, with hesitation, Gr. qi-tv-ç 'begetter' φĩ-τν 'shoot, scion' (see I § 56 p. 46). Skr. juš-ţv-ā gerund of jóša-ti 'has pleasure in something', Lat. gūs-tu-s m., Goth. kus-tu-s m. 'trial, proof'. Skr. pi-tú-š m. 'sap, drink, food' nourishment' pītu-dāru- m. 'pine tree' n. the resin of this tree, Gr. ni-vv-g 'pine', Lat. pītu-īta, ().Ir. 1-th m. 'corn', Lith. pē-tūs pl. 'midday meal, midday'. Skr. inf. véttu-m véttav-ē ger. vittv-á from vinda-ti 'finds, becomes possessed of', védi-tu-m vidi-tv-á from vētti 'perceives, knows' (the root is the same), Lat. vīsu-s m., O.Ir. fiss m. 'knowledge'. Avest. pešu-š m. 'ford' (-š- for -rt-, see I § 288 p. 229 f.), Lat. por-tu-s m., O.H.G. fur-t m. ford' (it has lost its character as a u-stem) O.Icel. fjord-r m. 'firth, gulf. Skr. gán-tu-š gā-tú-š m. 'course, way', inf. gán-tu-m gán-tav-ĕ ger. ga-tv-á, Lat. ad-ven-tus m., sup. ven-tu-m ven-tū, Lith. sup. giñ-tũ 'to be born' (cp. I § 249 p. 204), \sqrt{gem} -. Skr. mán-tu-š m. 'counsel, counsellor' inf. mán-tav-ē ger ma-tv-á. Lith. sup. min-tū 'to think of', \(\sqrt{men-.} \) Skr. inf. sasi-tu-m ger. šas-tv-á from šása-ti 'he recites', Lat. cēnsu-s m. mstead of *cens--tu-s (cp. § 100 p. 295), Vkens-. Skr. inf. pák-tum pák-tav-é ger. pak-tv-a from páca-ti 'cooks', Lat. coc-tu-m coc-ta, O.C.Sl. sup. peštř 'to bake' for *pek-tř (I § 462 p. 338). Lat. sup. rēc--tu-m rēc-tū, O.lr. rech-t n. 'right', O.lcel. rētt-r n. 'right'. Skr. dhá-tu-š m. 'constituent part, element', ınf. dhá-tu-m ger. dhi--tv-a hi-tv-a, Lat. con-ditu-s m. sup. con-ditu-m -ditu, sup. Lith. de-tu O.C.Sl. de-tu 'positum'. Skr. aktú-š m. 'salve, light, night' ground-form *pq-tú-s, Lat. unc-tu-m unc-tu. Skr. inf. ap-tu-m ger. ap-tv-a from ap-nó-ti 'attains, gains', Lat. ad-eptu-s m. Skr.

vás-tu n. 'dwelling-place, house', Gr. Γάσ-τυ ἄσ-τυ n. 'city'. Skr. yā-tu-ṣ m. 'traveller, time' (no doubt identical with yātú-ṣ 'ghost', see below), Lith. jó-tū 'to ride'. Lat. sup. nō-tu-m nō-tū (τηπō-tu-m τηπōtū), O.C.Sl. sup. zna-tǔ 'to know'.

Aryan. Skr. pi-tú-š m. 'sap, drink, food, nourishment' Avest. pi-tu-s m. 'food': Gr. ni-rv-c etc., see above p. 325. Skr. inf. car-tu-m cari-tu-m ger. cīr-tv-ā car-tv-ā cari-tv-ā from cára-ti 'goes, travels', Avest. care-tu-s m. horse's course, distance a horse can gallop'. Skr. gán-tu-š gā-tú-š m. 'course, way', Avest. qā-tu-š 'place, room, throne' O.Pers. qābu- 'place, room, throne' (b arose regularly in the cases which had qā-bw- — see I § 473 p. 348 f. — and from these it spread to the rest): Lat. ad-ven--tu-s etc., see above p. 325. Skr. jan-tú-š m. 'creature, being, child, people, family, stock', Avest. zan-tu-š m. 'alliance, stock', Skr. inf. jáni-tōš, adv. já-tu 'generally': Lat. geni-tu-s m., sup. geni-tu-m geni-ta, nā-tu-s m., $\sqrt{\hat{g}}$ en-. Skr. dā-tu n. 'part, task' Avest. vī-dātu-š m. 'breaking up of the body, dissolution, death', beside Skr. dá-ti dyá-ti 'cuts off': cp. Gr. Sai-tv'-ç 'meal' (orig. 'portion') δαιτυ-ιιών 'guest'. Skr. sē-tu-š m. 'connexion, bond, chain, bridge; binding' (adj.), Avest. haę-tu-š m. 'ford, bridge': Lett. sup. si-tu 'to bind', $\sqrt{sa_i}$. Skr. yā-tú-š Avest. yā-tu-š m. 'ghost, demon', no doubt (like yātu- above) from yā- 'go, fall upon something' (cp. ya-tár- 'pursuer'). Skr. r-tú-š m. 'fixed time', tán-tu-š m. 'cord' (was O.Ir. tet Mod.Cymr. tant 'string' an u-stem?) ő-tu-š m. woof; sú-tu-š f. pregnancy inf. sú-tav-ē ger. su-tv-a: O.Ir. su-th n. 'fetus'. Avest. mere-tu-s m. 'thought'; jyā-tu-š f. 'life'. Skr. jīvā-tu-š f. 'life' (no doubt with the same \bar{a} as Avest. $jy\bar{a}$ -tu- \dot{s} ; though we might also regard it as \bar{a} Idg. o. cp. Lith. gyva-tà O.C.Sl. živo-tŭ Gr. Bio-to-5), inf. ā-svāsayi-tu-m 'to cause to breathe again, console' from ā-švās-aya-ti 'makes to breathe again, consoles'.

With -e-tu-: Skr. kr-á-tu-š m. 'power, strength, power of mind', Avest. xr-a-tu-š m. 'understanding, insight', from kar-set at work'. Skr. vah-a-tú-š 'bridal procession', tan-ya-tú-š m. 'thunder', tap-ya-tú-š 'hot, glowing'. Avest. r-a-tu-š 'fixed time' beside Skr. r-tú-š.

In classical Sanskrit the accusative, in Veda also the dative and genitive-ablative served as infinitives; e. g. *rō-tu-m, *rō-tav-ē, *rō-tōṣ. The formation of compounds like *rōtu-kāma-'desire to hear' shows that even in later times the feeling that the form in -tum was a case had not quite died out. The instrumental (*sru-tvā, orig. 'with hearing') was used as the (so-called) gerund, logically connected with some noun in the sentence to denote an action accompanying or (generally) preceding the action of the verb, e. g. *srutvā cābruvan (ca abruvan) 'and hearing (or having heard) they spoke'. All such forms could be used in this way, except those derived from thematic stems (*kr-ā-tu- etc.).

Armenian. Amongst the tu-stems (e. g. zar-d, gen. zar-du adornment') there seem to be none which can be ascribed with certainty to proethnic Indo-Germanic. Hubschmann (Arm. Stud. I 46) with some hesitation connects ort, gen. ortu, 'calf' with Skr. pṛthu-ka-s 'the young of an animal, child, boy' (Gr. πόφ-τι-ς πόφ-ταξ 'calf').

Greek. The Substantives in -τν-ς, except the late form φῖ-τν-ς (p. 325), are all feminine, and occur for the most part in the Ionic dialect. *λ̄ι-τν-ς *λει-τν-ς 'slope, hill': Skr. *ri-tν-ά ger. of *rάy-α-ti 'leans'. πί-τν-ς 'pine': Skr. pi-tú-š etc., see p. 325 above. ἴ-τν-ς 'circumference, circle of a wheel, felloe', Lat. vi-tu-s m., sup. Lith. vý-tū O.C.Sl. vi-tũ 'to wind'. βρω-τν-ς 'food, meal': Lith. gér-tũ 'to drink'. γραπ-τν-ς 'a scratch', from γράφω. ἀρ-τν-ς 'bond': Lat. ar-tu-s ar-tu. ἀπ-εστν-ς 'absence'. δαι-τν-ς 'meal'. ἀπο-δαστν-ς 'division'. *τιστν-ς 'founding' from *τνίζω, ληιστν-ς 'javelin-throwing, fight with missiles', from ἀκοντίζω, ληιστν-ς 'making of booty' from ληίζομαι, φραστν-ς 'reflection' from φράζω, ἀπαστν-ς 'greeting' from ἀσπάζομαι, cp. Germ. -assu-s from verbs in -atjan p. 331. ἀρπωκν-ς from ἀρπάζω tut. ἀρπάξω. ἀγορητν-ς 'harangue' from ἀγοράομαι, βοητν-ς 'cry, call' from βοάω, ποθητν-ς 'desire' from ποθέω.

Neuters: only φε-τυ and ἀσ-τυ, see above pp. 325, 326.

In the other Indo-Germanic languages, we find numerals in -ti-s, as *penq-ti-s f. 'fivefold character, the number five'

(§ 101 p. 306 f.). The corresponding forms in Greek are feminines in -τύ-ς; as πεντηκοστύ-ς, ένατοστύ-ς τριτύ-ς (τριττύ-ς is due to the influence of τριττύ-ς) also τρικτύ-ς τετρακτύ-ς, cp. Baunack, Kuhn's Ztschr. XXV 249 ff.

šτυ-μο-ς 'truthful' from *ἐτν- 'existence' (instead of *h-ε-τν-, cp. Dor. ἔντες, Lesb. ἔφσα) ground-form *s-e-tu-, from √ es- 'esse'.

Italic. The Substantives in -tu-s are masculine. Lat. ac--tu-s. Umbr. ahtu 'actui'. Lat. adi-tu-s: Skr. svaitu-š (svá-ètu-š) 'having its own course' inf. é-tu-m ger. 1-tv-á, Lith eī-tū O.C.Sli-tŭ 'to go'. rūc-tu-s: Lith. rúk-tū 'to belch', √ reug-. duc-tu-s. or-tu-s. morsu-s beside mordeo. ē-ven-tu-s: Skr. gán-tu-š etc., see above p. 325. sēnsu-s beside sent-iō. con-spectu-s. tex-tu-s: 'Lett. tes-tu 'to hew with an axe'. Esu-s. Skr. áttu-m 'to eat', Lith. estū 'to devour', O.C.Sl. jastŭ 'to eat', ved-. sta-tu-s, sup. sta-tu-m sta-tū, prae-stitu-m and prae-stātu-m: Skr. inf. sthá-tu-m ger. sthi-tv-á from tíšthá-ti 'he stands', Lith. pa-stótū to become' O.C.Sl. sta-tŭ 'to place oneself' sa-tu-s: Lith. se-tū to sow'. fe-tu-s. cap-tu-s. rap-tu-s. can-tu-s. quaes-tu-s. auc--tu-s: Lith. áuk-tū 'to grow', \sqrt{aug-. haus-tu-s. flā-tu-s. flē--tu-s. gemi-tu-s. fremi-tu-s. strepi-tu-s. crepi-tu-s. domi-tu-s. habi-tu-s. exerci-tu-s. cond-tu-s. an-paratu-s. audi-tu-s. vesti--tu-s. Words like jūdicātu-s (jūdicāre jūdex) gave rise to an independent suffix -atu- for denoting an office or an official organisation, as principātu-s, ducātu-s, pontificātu-s, senātu-s (cp. German. -ōbu- -ōdu-).

The tu-stems (i. e. the so-called supines) form a very large group in Latin. -tu-m was orig. acc., -tū loc. or instr.' Most of the substantives in -tu-s were also used as supines, e. g. Esu-s 'eating' and Esu-m Esū; on the other hand, it is only a small proportion of the supines beside which we find independent declinable substantives. The freedom with which supines were formed was practically unlimited.

The gender of the neut. subst. ar-tu- beside masc. ar-tu-s was no doubt fixed by that of membru-m, and testu-n. (*ters-tu-, $\sqrt{ters-tar}$) by that of testu-m (stem testo-).

Old Irish. Masculines. bi-th, gen. betho, 'world'; Mod.Cymr.

by-d, Gall. Bitu-rīgēs (world-kings'): Lith. gý-tū 'to revive 'O.C.Sl. ži-tŭ 'to live', \sqrt{gei} . i-th 'corn': Skr. pi-tú-š etc., see above p. 325. fiss 'knowledge, knowing', ground-form *uid+tu-: Skr. vēthu-m etc., see above ibid. gu-th 'voice'. cru-th 'form' mess 'judging, judgement' beside midiur 'I judge'.

Neut. su-th 'fetus': Skr. sú-tu-š f. 'pregnancy'. sru-th 'stream', \sqrt{sreu} -. rech-t 'right': Lat. sup. $r\bar{e}c$ -tu-m etc.; see above p. 325.

Like tiss and mess, the numerous masculines in -ad (for -ā-tu-) formed from verbs of the 2. conj. are used as infinitives (cp. § 156), as nertad 'strengthening' from nertaim denom. verb from nert 'strength' (cp. Gr ἀγορητύ-ς, Lat. cōnātu-s), and similarly those in (i)ud (for -(χ)e-tu-) formed from verbs of the 3. conj., as derchoinud 'despair, despairing' from der-choinim' I despair', foillsigud 'showing' from foillsigim 'I show' (cp. Skr. vaha-tú-š anya-tú-š).

-tu- is a secondary suffix in the termination -es-tu- (-os-tu-). ais aes ois (gen. aisso aisa aesa) m. 'age' ground-form *āṇues-tu-s, cp. (fr. ai(f)ė; 'always'; yet Mod. Cymr. oes, since u is not usually lost in Cymric, perhaps indicates that the word is to be derived from a stem corresponding to the Skr. áyuš-, which afterwards, we must assume, was confused with the es-stem. senchas m. 'antiquity (O.Cymr. hencass, pl. hencasson 'old tale') may be an extension of *seno-qo- (cp. Skr. sana-ká-s etc., § 88 p. 263), the ground-form being *seno-q-os-tu-, or a compound *seno-cassu-. dorus n. 'door' (cp. Mod.Cymr. drws Corn. daras), dat. pl. doirsib for *doressaib, and therefore from a stem *duores-tu- in proethnic Keltic. follus 'clear'.

Germanic. In West Germanic most of the tu-stems (which were common in proethnic Germanic) lost their distinctive character; there was a confusion between the (masc.) tu- and the (fem.) ti-stems, e. g. O.H.G. luf-t m. and f., A.S. lyf-t m. and f. The original form of the tu-stems is best preserved in Gothic.

O.H.G. fri-du A.S. fri-thu m. 'joy' pr. Germ. *fri-pu-z, from Germ. frī- fri 'cherish, spare' (which appears in Goth. freidjan 'to spare' and other words. Goth. li-pu-s m. 'limb', cp. O.Icel. li-m-r 'limb'. Goth. kus-tu-s m. 'trial, proof', O.Icel.

kos-t-r (acc. pl. kosto kostu) m. 'condition', O.H.G. kos-t A.S. cys-t: Skr. jutṣ-ṭv-ā etc. see above p. 325. Goth. luf-tu-s m. O.H.G. luf-t m. 'breeze, air'. O.H.G. fur-t m. 'ford' O.Icel. fjor-ā-r 'firth, gulf': Avest. peṣu-s etc., see p. 325 above. O.H.G. durs-t A.S. durs-t (āyrs-t) m. 'thirst', \(\subseteq \text{ters-.} \) Goth. vul-pu-s m. 'glory'. Goth. lus-tu-s O.H.G. lus-t m. 'desire', for *\subseteq \text{s-tu-s}, if it is connected with Skr. la-las-a-s (I \ 299 p. 238, II \ 100 p. 302). Goth. pūh-tu-s m. 'thought', from pugkjan 'to think'. O.Icel. rētt-r m. right': Lat. rēc-tu-m etc., see above p. 325. O.Icel. hōtt-r hātt-r m. 'way, sort. kind', beside haga 'to arrange'. Goth. vuhs-tu-s O.Icel. voxt-r m. 'growth'. Goth. dāu-pu-s O.H.G. tō-d m. 'death'. O.H.G. blas-t O.Icel. blōst-r blast-r n. 'blast'. Goth. flō-du-s O.H.G. fluo-t m. 'flood'. With the meaning changed to that of a nomen agentis we have e. g. Goth. hlif-tu-s 'thief', O.Icel. vorā-r 'watchman'.

-s-tu- is rare (cp. -s-ti- § 100 p. 303 and -s-tuo- -s-troetc., see § 61 p. 117). Goth. math-s-tu-s O.H.G. mist m. 'ordure', beside O.Icel. mīga 'mingere'. O.Icel. lost-r m. 'mistake' for *lax-s-tu-, beside O.H.G. lastar n. 'crime, vice' (suffix -s-tro-, § 62 p. 121), cp. O.H.G. lahan 'to blame'.

The termination $-\delta - bu$ (also $-\delta - du$ through the original variation of accent), which appears in derivatives of the weak verbs in -on, became an independent suffix (cp. Lat. -atup. 328). Goth. yáundhu-s m. 'sorrow' from gáundn 'to sorrow', vratodu-s 'journey' from vraton 'to travel'; O.H.G. wegod m. 'help' from wegon 'to help', klagod m. 'lament' from klagon 'to lament'; O.Icel. ladad-r m. 'invitation' from lada 'to invite'. The following are examples of nouns beside which there is no corresponding verb in -on: Goth. gabaúrjopu-s 'desire' manniskodu-s 'humanity', O.H.G. strītod 'strife' leichod 'hymenaeus, concubitus', O.Icel. unad-r 'delight'. In O.H.G. the formations in -180d inod -ilod -alod are especially common, as richisod 'lordship' from rīchisōn 'to govern', ellinōd 'zeal, emulation' from ellinon 'to be zealous', swintilod 'giddiness' from swintilon 'to become giddy', huntalod 'laying on of hands' from hantalon lay hands on, handle'. On the other hand in Anglo-Saxon and Norse we find the termination -nopu-, which came from verbs in -non -nan (e. g. A.S. haftnod 'hold' beside hæftnian, O.Icel. batnad-r 'improvement' from batna); this became fertile and usurped the place of the older -opu-; e. g. A.S. fuzelnod instead of, and parallel to, fuzelod 'fowling', from fuzelian, O.Icel. dugnad-r 'strength, help', from duga.

The weak verbs in -atjan (Gr. -aleir) gave rise to the suffix -assu- (Gr. ἀσπαστύ-s from ἀσπάζομαι, p. 327), which was very fertile in all branches of Germanic except Norse, especially in the extended form resulting from its addition to n-stems, -n-assu- (Goth. -in-assu-). In West Germanic we have also (-n)-iss(u)- and (-n)-uss(u)-, whose i and u are variously explained (von Bahder, Verbalabstr, 119 ff.); and further various modifications of the final -u-, due to the analogy of feminine and neuter abstract substantives: fem. (-n)-iss-ō- (-n)-uss-ō-, (-n)-iss- $-j\bar{o}$ - (-n)-uss- $j\bar{o}$ -, (-n)-ass- \bar{i} - (-n)-iss- \bar{i} - (-n)-uss- \bar{i} -, neut. (-n)-ass-ja-(-n)-iss-ja- (-n)-uss-ja-. Examples are Goth. ibnassu-s 'equality, fairness' (A.S. emness), beside A.S. emnettan 'adaequare' = Goth. *ibnatjan; ufarrassu-s 'overflow, abundance' from ufar. These forms are especially frequent in connexion with verbs in -inon; as horin-assu-s 'adultery' beside horinon, which gave the type for words like blot-inassu-s 'divine service' (from blotan). O.H.G. rat-ussa f. 'riddle' offan-ussi f. 'opening'; ir-suochnissa f. 'experimentum' qi-miscnissī f. 'mixture' qi-hornissī f. 'hearing'. -nissa -missī had often the appearance of a denominative suffix, and hence it gave rise to a large number of formations like O.H.G. gotnissa f. 'godhead' rem-nissa f. 'purity' churt-nassi f. 'shortness'. In Upper Germany these suffixes were extended by -ipo-(§ 80 p. 240), hence -nissida -nussida, as in (O.H.G.) fir-loranissida 'loss'. fülnussida 'idleness'.

Balto-Slavonic. Lith. ly-tù-s lē-tu-s m. 'rain' (supine lý-tū 'to rain' lē-tū 'to pour'): Lat. sup. li-tu-m li-tū, Goth. acc. sing. lei-pu O.H.G. lī-d m. n. 'fruit-wine'. Lith. pē-tū-s pl. 'midday meal, midday': Skr. pi-tū-š etc., see p. 325 above. It is a moot point whether the adjectives in -tù-s, as sta-tù-s 'blunt, impolite', drums-tù-s 'dark, troubled' (of water), were

originally abstract substantives (p. 324), or whether they were modifications of old adjectives in -ta-s (see p. 317). O.C.Sl. kra-tũ 'a time, occasion' (dũva kraty 'twice'): Skr. acc. pl. kṛ-tv-as 'so many times'; Lith. karta-s may have also been originally a u-stem, from which we could then directly derive the form in dù kartù 'twice' szeszis kartùs 'six times' and the like.

The largest group of tu-stems are the infinitives (supines), which were formed at will from any verb. The Lithuanian supines in -tu -tū (the quantity differs in different dialects), which should properly be written -tų (their final nasal is still kept in the compound form of the optative, e. g. 1. pl. sùktum-bime), and the Slavonic forms in -tū, are acc. sing., cp. Lat. -tu-m. Lith. dũ-tū O.C.Sl. da-tũ 'to give', bũ-tū bý-tũ 'to be', ëstū 'to devour' jastũ 'to eat', jeszkó-tū iska-tũ 'to seek', sėdē-tū sċdē-tũ 'to sit', ganý-tū goni-tũ 'to tend, pasture', cp. also Pruss. da-tun dā-ton 'to give' maitā-tun 'to nourish' with other examples. In Old Church Slavonic there is a rare parallel form in -tu, (as by-tu), which may be regarded as gen. or loc., and Prussian has dative forms in -twei, as dā-tuei.

IV. The Suffix -1- (-12-)1).

§ 109. This suffix was used to form feminines in the proethnic and later periods. It served to differentiate the gender in the same way as a beside o (§ 59 ff.). In this function it was a secondary suffix, since these feminines were derived from the masculine and neuter stem. When a feminine of this kind was formed from o-stems, the stem-final -o was dropped in exactly the same way as before the suffix -10-; e. g. Skr. vyk-i 'she-wolf' the feminine of vfka-s 'wolf' (cp. § 63 p. 126, Rem. 3 p. 132). More rarely -i- has the appearance of a primary suffix,

¹⁾ E. Sievers, Über die Feminina auf urgeim. i, Paul-Braune's Beitr. V 136 ff. O. A. Danielsson, Om die indoeuropeiska femininstammarne på -i, Upsala universitets årsskrift 1881. W. Burda, Das slav. Suffix ynja, nom. sg. yni, Kubn-Schleicher's Beitr. VI 194 ff

as in Skr. sám- $\bar{\imath}$ 'work' Gr. $\varphi \dot{\imath} \zeta \alpha$ 'flight' (for * φv_{7} - $\zeta \alpha$); it cannot be shewn with certainty that such primary feminine forms existed in the proethnic language.

It is difficult to determine what was the strong form of the suffix -ī- in the Indo-Germanic paradigm. For though as a rule the classes of feminine nouns which contain the suffix are easily distinguished in the different languages, yet they show important differences in form which cannot have arisen simply and solely through the operation of phonetic laws. Indeed it is obvious that its declension has been influenced in very many ways by that of other stems. To me it seems most probable that -iē-(sometimes -iiē-) was the form of the strong-grade in Indo-Germanic. Cp. -iē- -iiē- ·-ī- in the optative, as in Lat. s-iē-s:s-ī-mus, and the masculine suffix -ie- -io-, -iie- -io-: -i-, -ī- (§ 63 p. 122 f.).

Remark 1 The following conclusions seem to me fairly probable. In proethnic Indo-Germanic the num sing, ended in *-i, Gr. -ii was formed on the analogy of -ia, Lat. -ie-s Lith. -(1)e (beside -i) come from the extension of the form -se- (-ige-) to all the cases. The acc. sing ended sometimes in *-i-m (8kr -i-m) sometimes in *-i2-m op the opt 3 pl. Lat s-r-ent for *s-u-int, I § 226 p. 193), from the latter we have Lat. -iem (mater-iem), Skr. -iyam (str-iyam), Gr. -iar (vorv-iar), the Skr and the Gr form having -m -, added on the analogy of the terminations -i-m -ā-m etc. Similarly the acc pl generally, perhaps always ended in *-iz-us Skr. -iyas (str-iyas), Lat -ies (mater-ies) in Gr. -ii-us is perhaps represented by -ia., the by-form of -iavs -ia, before consonants The so-called Weak Cases with a case-suffix beginning in a consonant had -ī-, as loc. pl. *-ī-su (Skr. -ī-šu). Elsewhere the form was -jē- or -zjē-, e. g gen ang *-(1):es This form of the suffix is regularly represented in Latin, Balto-Slavonic, and Aryan, Lat. muter-ie-, Lith zem-e- for *zem-18-. (I § 147 p. 131), O C.Sl. zem(l)-ju- (cp. stojat; for *stojeti, I § 76 p. 66). Skr. viduş-yū-. The Ablaut is thus precisely parallel to that of the optative suffix -je-, e g. Lat. rab-ie-s (gen. sing): rab-i-em: datr-i-x = s-ie-s: s-v-ent: s-v-mus. In several languages confusion with the id- stems led to the substitution of -(1)1ā- for -(1)1ē- e g. gen sing. Gr. norv-las idulas (this change was probably due in part to the influence of the heavier form of the acc., sing. and pl. -iar; -iar.) O.Ir. Brigte (cp. Skr. brhatyás), Goth. maujos beside nom. sing. norma idvia, Brigit (8kr brhati), mavi; so also Lith. marczios beside martl. Different views as to the form of the strong grade in this suffix have been maintained by Kluge, Paul-Braune's Beitr. VI 391 f., and by Osthoff, Zur Gesch. d. Pers. 338 f.

-i- was the regular form of the suffix when other suffixes were

added to it: e. g. Skr. pátnī-vant- 'accompanied by one's wife', Gr. παίτ--τη-ς beside Dor. πολιά-τα-ς Ιοπ. πολιή-τη-ς 'cutizen', Lat. victrī-α.

There was a confusion with the 1-stems (§ 92 ff.) as well as with the 12-stems. Compare e. g. Skr. nár-ī- and nár-ī- 'woman' (see Benfey, Nachr. von der gött Ges. d. Wiss. 1876 p 644 ff., Lanman, Noun-Inflection p. 370), Gr. 1907e-1-c (gen. 1907e-10c) 'female robber' beside \(\psi\dit\lambda\text{1-put}\) 'girl who plays the guitar', Lat. nept-1-s beside O H.G. nift (= Goth. *nift-i) Skr. napt-ī-, suāvi-s for *suād-u-1-s beside Skr. svādv-ī, Skr. āvi-š Lith. ánti-s beside Gr. \(\taligni\) 'goa 'duck' for *rat-1a. In these cases the -ī-declension was the older, but the converse change occurs in Sanskrit, stems in -i being inflected in the same way as those in -ī- in order to mark their feminine gender, e. g. gen. sing. gátyās beside gátēš from nom. gáti-ṣ, nom. sing. bhūmī gen. sing. bhūmyās beside nom bhūmi-š (§ 97 p 289), yuvatī beside yuvatī-š (§ 101 p 307).

Finally these stems were confused with the inflexion of monosyllabic stems, such as Skr. $bh\bar{\imath}$ - Gr. $x\bar{\imath}$ - in which $-\bar{\imath}$ - and $-\imath$ - alternated (nom. $bh\bar{\imath}$ - $\bar{\imath}$ gen. $bh\nu_{j}$ -ds, Gr. $x\bar{\imath}$ - ς x_{i} - ς s_{i} - s_{j} . Hence e. g. Skr. nom. napt- $\bar{\imath}$ - $\bar{\imath}$ gen. napt- $i\nu_{j}$ - s_{i} , Gr. $\pi\acute{o}lt$ - s_{i}

Remark 2 To this last remark I must add a corollary, lest it should be taken to imply the existence of a third i-suffix, $-\bar{\imath}--\imath_{\bar{\imath}}-$, in Indo-Germanic (-i- in all cases whose case-suffix began with a consonant, $-i_{\bar{\imath}}$ -where it began with a sonant) in addition to -i- (e_{$\bar{\imath}$}-) and $-\bar{\imath}$ - (- $\bar{\imath}$ ē-). There would be just as much and just as little reason for supposing a parallel suffix $-\bar{\imath}$ - $-\imath_{\bar{\imath}}$ - on the strength of such forms as Skr. **sva**r\u00fc-*\u00e4*sva**wa-am O.C.Sl. **svekr\u00fc-\u00e4*svekr\u00fc-\u00e4*v-\u00e4*sv-\u00e3\u00e4*sv-\u00e3\u00e4*sv-\u00e4\u00e4\u00e4*sv-\u00e3\u00e4\u

§ 110. Differentiation (Motion or Feminine-formation) of u-stems (§ 103 ff.). Originally the no doubt nom. sing. was -eu-ī gen. sing. -u-iēs (yet notice also Avest. vanhu-yå), loc. pl. -u-ī-su. Skr. svādv-ī Gr. ήδεῖα for *σ̄σῶs̄-ia Lat. suāv-i-s, beside masc. Skr. svādú-š Gr. ήδεῖα for *weet'. Skr. gurv-ī Gr. βαρεῖα 'gravis'. Skr. pṛthv-ī Avest. per pw-ī-Gr. πλατεῖα 'broad, wide'. Skr. tanv-ī Lat. tenu-i-s. In Germanic and Baltic post-consonantal u was dropped before -iē- (-iā-): Goth. kaúr-jō- 'gravis' (acc. sing. kaúrja nom. pl. kaúrjōs) for *kury-iō- (cp. O.Icel. ylg-r I § 444 p. 329); Lith. saldžiō- (gen. sing. saldžiōs) for *saldu-iō-, on the analogy of which was formed the nom. saldī instead of *saldv-i; Goth. hard-jō- 'hard' Lith. karcsiō-

bitter' (nom. karti) from masc. hard-u-s kart-ù-s. In this class of adjectives, the unextended form, without -ī-, could also be used for the feminine; e. g. Skr. tanu-š, Gr. $\eta\delta v'-\varsigma$ $3\eta\lambda v-\varsigma$ (in Homer and elsewhere), Goth. kauru-s (only -u-s is ever found in the nom. sing.). The nom. in -ī is found in Gothic in the subst. mavi 'girl' for *mazu-ī, beside the masc. magu-s; the analogy of the cases with this form of the stem, *ma(3)u-ī-gave rise to the gen. maujōs instead of *magjōs.

Differentiation of n-stems (§ 112 ff.). Skr. tak-ṣṇ-ī Gr. τέκτωνα (for *τεκτων-μα): Skr. ták-ṣṇ-ī Gr. τέκτων 'worker in wood, carpenter'. Skr. rájū-ī from rájan- 'king' O.Ir. rīgain 'queen', whose ground-form was *rēgūn-ī. Skr. yūn-ī from yūvan-'young, young man' Lat. jūn-ī-x. We may probably infer from Skr. pátnī Gr. πότνια 'lady' and Gr. δέσπωνα 'mistress' for *-ποτνμα (I § 488 p. 360), as compared with the masc. Skr. páti-š Gr. πόσι-ς, that -n-ī- could be used as an independent suffix even in the proethnic period.

Skr. śun-t from śvin- śun- 'dog'. pañca-damn-t from pañca-daman-. maghón-t from maghávan- maghón- 'giving bountifully, dispenser'. Avest ašaon-t from ašavan- ašaon- 'pure' (Skr. ytávan- 'holy, pious'). With Skr. pát-nt we should no doubt compare Skr. pálik-nt hárik-nt, beside palitá- 'gray, hoary' hárita- 'tawny' (as to k for t, see the Author, Morph. Unt. II 198), páruš-nt beside paruš-á- 'knotty'.

Gr. γείταινα from γείτων 'neighbour'. Θεράπαινα, beside Θεράπ-ν-η, both from Θεράπων 'servant', λέαινα from λέων 'lion' (these masculines were originally n-stems; see § 114, under Greek). -αινα was taken into general use as an independent suffix, denoting female creatures: λύκαινα, κάπραινα, ήμι-Θέαινα, etc. Notice further φάγαινα 'voracity, ravenousness' beside φαγών 'devourer'. ἄγκοινα (Att.) beside ἀγκών 'bend of the arm'; we should no doubt compare Hom. ἐπ-ηγκεν-ίδ-ες 'side-planks of a ship'.

Lat. jūn-ī-x, see above. corn-ī-x beside Gr. κορών-η 'crow', cp. also Umbr. curn-ac-o 'cornicem'.

O.Ir. rīgain 'queen': see above.

In Germanic we have -un-\(\bar{\text{l}}\)-\(\text{in-\(\bar{\text{l}}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{l}}\)-\(\text{en-\(\text{en-\(\text{en-l}}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\(\text{en-l}\)-\

The Slavonic feminines in -ynji no doubt belong originally to this class (j has come in from the other cases, as acc. -ynja): bogynji 'goddess' blagynji 'kindness'. They appear to have arisen through an analogical extension of the use of -n-i- (cp. the Author, Morph. Unt. II 200).

The original inflexion of these feminines was perhaps nom. sing. -en-1, gen. sing -n-1es and -n-2es loc. pl. -n-1-su.

Differentiation of r-stems (§ 119 ff.). The original endings were doubtless nom. sing. -er-ī, gen. sing. -r-jēs, loc. pl. -r-\(\text{t-su}\). Skr. d\(d\ta-tr-\tau\) Gr. \(\delta'\cdot\text{t-eiga}\) for *\(\delta\text{o-reso-ia}\) Lat. d\(a-tr-\ta-x\), beside Skr. dā-tár- Gr. δο-τήρ δώ-τωρ Lat. da-tor 'giver'. Skr. jáni-tr-τ Gr. γενέ-τειρα Lat. gene-tr-τ-x 'mother'. Skr. bhar-tr-τ Avest. bar pr-1- ber pr-1 'supporter, mother'. Skr. s-tr-1 Avest. s-tr-1- 'wife, woman'. Skr. nē-tr-t 'she who guides', dēš-tr-1 'she who shows', codayi-tr-t 'she who drives on', dho-tár-t f. 'shaking'. Gr. εὐνή-τειρα and εὐνή-τρ-ια 'wife', σώ-τειρα 'saviour lady', ψάλ--τρ-ια 'guitar girl'; we also have -ίς -ίδ-ος, as ληστρ-ίς 'female robber', $a\lambda \varepsilon - \tau \rho - i g$ 'female miller', $a\nu \lambda \eta - \tau \rho - i g$ (beside $a\nu \lambda \dot{\eta} - \tau \rho - i a$) 'flute-girl'. Lat. obstė-tr-1-x, mere-tr-1-x, impera-tr-1-x, cp. also the Osc. Fuu-tr-cí 'Creatrici, Genetrici'. It is still doubtful whether this Indo-Germanic formation in -tr-t- can be directly connected with the West-Germanic feminines like A.S. baecestre 'baker-woman', O.Sax. agastria 'magpie' O.H.G. wagastria 'lance', Goth. hvilf-tri f. 'coffin' and Lithuanian feminines like áuklé 'children's attendant' (i. e. *áuk-klé, from áugu 'I grow up')

perë-kle 'brood-hen' (see Kluge, Nom. Stammb. p. 24 and J. Schmidt, Kuhn's Ztschr. XXV 29). They can also be explained as extensions of stems with the suffix -tro--tlo- (§ 62 p. 118 ff.).

Differentiation of nt-stems (§ 125 ff.). It is certain that the feminine participles of non-thematic tenses which end in a consonant had -yt- in all their cases, e. g. *s-yt-ī f. 'being'; similarly the feminines of -yent-stems had -yyt-ī-. On the other hand, we find -nt- throughout the paradigm in forms like Gr. äsiga yvovāa (from änµu 'I blow' syvav 'I perceived') groundforms *yē-nt-ī *gnō-nt-ī (for Skr. vātī, which seems to contradict this, see below). It is not clear how far there was any variation of ablaut in the elements immediately preceding the -ī-suffix in the -o-nt- participles; but it is certain that -yt- sometimes appeared even here.

Skr. sat-t Avest, hait-t- Gr. Dor. sagga Att. ovga O.C.Sl. sašti, beside masc. Skr. s-ánt- etc. 'being', indic. 3. sing. Skr. ús-ti 'is'. Skr. brhat-f Avest. ber zaitī-, O.Ir. Brigit (O.Celt. Brigantiae dat. sing. with Latinised ending), from masc. Skr. brh-ant- 'being great, exalted'. Skr. vant-i (vat-t Avest. vaiti- is no doubt a re-formation following the analogy of sat-t: sánt-am; see V. Henry, Revue Crit., 1887, p. 100), Gr. ἄεισα, beside masc. Skr. vd-nt- Gr. asig asvr- 'blowing'. Skr. tu-da-nt-1 and tudat-t beside tudá-nt- 'tundens', Gr. ιδοῦσα beside ιδών ιδό-ντ- 'beholding'. Skr. bhára-nt-ī Avest. bare-nt-ī Gr. φέρουσα O.C.Sl. berašti, beside bhára-nt- Gr. φέρων φέρο-ντ- O.C.Sl. bery ferens. Goth. hulund-i 'cave' ('covering, hiding'), frijond-i 'female friend'; the participles which were in actual use as such had passed over to the in-declension, as bairandei gen. bairandeins. Lith. sukant-i gen. sukanczios from masc. sukas 'turning'. O.C.Sl. berasti, instead of *berati, where s has forced its way in from the other cases, as gen. berašte; in these -št- came regularly from -ti- (I § 147 p. 132 f.).

-unt-1. Skr. ápa-vatī from ápa-vant- 'rich in water', Gr. ànó-sosa from ànó-sis ànó-sir- 'rich in sap'; in Greek -fsr- appears
Bragmans, Elements II

for fur-, see § 127. Skr. sáras-vat-i 'rich in water' f. Avest. haraxwaiti- O.Pers. harauvati-.

Differentiation of s-stems (§ 131 ff.).

-es-i. Sk. ródas-i from ródas- 'world', śavas-i f. 'the strong one' from śávas- 'strength'. Gr. Att. ἀναίδεια 'shamelessness' ἀλήθεια 'truth' from ἀν-αιδής ἀληθής. Lat. temper-ie-s from tempus.

The original forms of the part. perf. act. were doubtless nom. sing. -ues-ī gen. sing. -us-iēs loc. pl. -us-i-su. Skr. vid-uṣ-ī Avest. vīd-uṣ-ī- Gr. id-vīa, beside masc. Skr. vid-vān Avest. vīd-vā Gr. id-vūς 'knowing'. Similarly Lith. vik-us-ī O.C.Sl. vlūk-uṣi 'havıng drawn'. A feminine of this kind is implied in Goth. bēr-us-jōs 'parents' ('those who have borne'): on the model of the feminine (*-usi -usjōs) was formed a masculine with -ja-. It is natural to infer a nom. sing. -ues-ī from the Gr. (Dor. Att.) by-forms in -(f)εια, as γεγον-εῖα, ἐρρηγ-εῖα: γεγονεῖα *γεγονυᾶς was levelled on the hand to γεγονεῖα -είᾶς, on the other to γεγονεῖα γεγονοίας (cp. § 136 Rem. 2).

Similarly in primary comparative forms: -1es-īēs -is-īes -is-ī-su. Skr. jyd-yas-ī from jyd-yan 'mightier'. Avest. fra-yah-ī- from fra-yd 'more', an isolated -iṣī is perhaps contained in Skr. māhiṣī mahiṣī beside mah-īyas-ī; see J. Schmidt, Kuhn's Ztsehr. XXVI 386. Goth. jūh-iz-ei 'younger' (cp. hairandei p. 337). O.C.Sl. boljīṣī beside neut. bolje 'greater': nom. boljīṣī gen. boljīṣī instead of *boljeṣī *bolīṣṣ̄ (cp. § 135 Rem. 1).

Differentiation of o-stems (§ 59 ff.). -τ- was in use as well as -α- in proethnic Indo-Germanic. Skr. vyk-t O.Icel. ylg-r O.H.G. wulpa 'she-wolf' (pr. Germ. *yul-t-t *yulz(u)its, I § 444 p. 329), beside Skr. vyka-s Goth. vulf-s 'wolf'; cp. also A.S. wylf f. beside wulf. Skr. dēv-t 'goddess' Avest. daev-t- 'witch' Gr. δτα 'divine lady' for *δι-ξ-μα Lith. deiv-ē 'ghost' dēv-ē 'goddess', beside Skr. dēv-ά-s Lith. dēv-α-s 'god'. Skr. pīvar-t Gr. πίσιρα, beside pī-varά-s (ir. πῖσιρό-ς 'fat' (cp. § 74 p. 182, § 76 Rem. 1 p. 201). Skr. dūt-t 'female messenger' from dūtá-s 'messenger', yam-t from yamá-s 'akin'. Gr. ἐταίρὰ 'female companion' instead of *ξταιρα, beside ξταρο-ς 'companion' (Wheeler.

Nominal acc. 59). Goth. piv-i, gen. piu-jōs, 'female servant', beside piu-s, gen. pivis, 'servant', O.Icel. mer-r'mare' beside mar-r'horse'.

Sporadic examples. Sanskrit. nap-tf'female descendant' O.H.G. nift (Goth, *nift-i) 'neptis, privigna', beside Skr. napat-'offspring'. Skr. -qhn-1 beside -han- 'killing'. Greek. uvia for *μυσ-μα Lith. mus-č 'fly', beside Lat. mus-ca. 9-ήσσα 'female labourer' for *θητ-μα, beside mase. θής, gen. θη-τ-ός. πέζα (for * $\pi \epsilon \delta_{-1} \alpha$) 'foot, lowest part', beside $\pi o v_{S}$ 'foot' (cp. § 160, 1). πίσσα Att. πίττα 'pitch' (for *πικ-μα), beside Lat. pix. κίσσα Att. κίττα 'jay' (for *κικ-ια), beside Skr. kiki-š 'jay'. φάσσα (for *φακ-ια), 'wild pigeon', beside φάψ (gen. φαβ-ός) the same, cp. I § 486 Rem. p. 359, § 495 Rem. 364. μία, gen. μιᾶς, 'una' for * $\sigma\mu$ - $\bar{\iota}$ -, beside $\bar{\iota}\nu$ - (nom. $\bar{\iota}\nu\varsigma$ $s\bar{\iota}\varsigma$) unus for *sem- (I § 204 p. 172, II § 160, 1). Latin. pauper-ie-s beside pauper. like barbar-ie-s beside barbaru-s. O.Ir. s-i 'ea' Goth. s-i 'ea': cp. Skr. s-ya. sētiq 'female companion, wife' for *sentic-t. Gothic. pas-t-i 'garment', hvōf-t-uli 'fame'; A.S. hunticze 'huntress' beside hunta 'hunter' and the like, see Kluge, Nom. Stammb. p. 22. Lithuanian. žėm-e O.C.Sl. zem(l)-ja 'earth', beside Skr. kšámjm- Av. 2°m- Gr. x3wv (I § 204 p. 172, II § 160, 2). Lith. szł O.C.Sl. si 'haec' beside sžì-s sǐ 'hic' (gen. sziō, sego instead of *šego). Lith. pati, gen. paczios, 'lady, ipsa', beside masc. pati-s (pàts) gen, patës. Lith. martì, gen. marczios 'bride'. O.C.Sl. ladiji (aldiji) 'ship', and with masculine gender (which is not original) baliji 'physician' sadiji 'judge' (cp. the Slavonic masculines in -a, § 59 p. 109); -iī- like -i- (Lith. mõ-ji-s) p. 122 footnote 2 and -iin- § 115 (under Aryan).

§ 111. Of the words in which -ī- appears to be a primary suffix, none show it in more than one language simultaneously. Examples are: Skr. śám-ī 'work'. śác-ī 'strength'.

Gr. φύζα 'flight' for *φυγ-μα. σχίζα 'wood split small, billet' for *σχιδ-μα.

Lat. ac-iës. scab-ië-s. spec-ië-s. prō-geniës. dī-luviē-s. Lith. sine 'knowledge'. srov-ë 'stream'. rëk-ë 'slice of bread'. dûb-ë 'hollow, pit'.

Many examples are doubtful, as Gr. ŏeou 'rumour, prophecy'

V. Suffixes in $-n^{-1}$).

§ 112. The parent language had four suffixes ending in a nasal: -en-, -ien-, -uen-, -men-2). They have a good deal in common with -o-, -2o- -i- -t-, -uo- -u-, -mo-, and it is not improbable that the forms -ien-, -uen- and -men- were formed in the proethnic period merely by the addition of -(e)n- to such older suffixes.

This process of extension can be seen at work in the separate languages as well; and we must there regard it as a continuation, or renewal, of a tendency which first appeared in proethnic times. Compare, for instance, the development of the n-declension in Germanic.

The oldest point of contact between the four n-suffixes and the corresponding o-suffixes is found in the representation of n-stems by o-stems in compound words, which began in the proethnic period; e. g. Gr. αἰμο-βαφής and ἄν-αιμο-ς beside αἴ-μα (ἀν-αίμων); further examples are given in § 12 p. 26 f. This shews that there were even then many parallel stems in -n-and -o- with no difference of meaning; for some reason or other the o-form of these words was preferred in composition, and by degrees this established a general rule for compounds

¹⁾ H. Ebel, Suffix -ion and -tion [in Old Italic]. Kuhn's Ztschr. V p. 420 f. R. Fisch, Substantiva personalia auf σ, σnis [in Latin], Archiv für lat. Lexikogr. und Gramm. V 56 ff. W. Meyer, Das lat. Suffix σ, σnis, ibid. 228 ff. H. Osthoff, Zur Geschichte des schwachen deutschen Adjectivums (Forschungen im Gebiete der idg. nominalen Stammbildung II) 1876. Idem, Zur Frage des Ursprungs der german. n-Declination, Paul-Braune's Beitr. III 1 ff. The Author, Die schwache Form der Nominalstämme auf -n in suffixalen Weiterbildungen und Zusammensetzungen, Morph. Unt. II 148 ff.

²⁾ One form with m is quite unique; *ghɨgem- *ghɨgem- (Avest. zyû Lat. hiem-s), which, having due regard to Skr. hēman Gr. χεῖ-μα, we ought apparently to divide *ghɨg-em- *ghɨg-em-. I have attempted to explain this rare word in § 160, 2.

of -n-stems. Another principle of formation, exemplified in most of the languages in forms like Skr. asm-tya-s beside ás-man-, Gr. χειμ-ίη beside χεῖ-μα χει-μιών, seems to have arisen in the proethnic period. Further in almost all the languages, in some of them very frequently, we find parallel forms in -n- and -oeach of which is completely declined, some of them indeed having a slight difference of meaning (to this point we shall return later on); e. g. Skr. vák-van- and vák-va- 'turning, rolling' (intr.), dhár-man- and dhár-ma- 'law, ordinance', Gr. στράβ-ων 'squinter' and στραβ-ό-ς 'squinting', οὐραν-ίων heavenly being' and οὐράν-ιο-ς 'heavenly', εθελή-μων and εθελη-μό-ς 'willing', Lat. in-cub-ō and in-cub-u-s, lan-io and lan-iu-s, alluvi-o and alluv-iu-m, Goth. sa ráuda 'the red one' and ráub-s 'red', in-gard-ja 'member of a household' and in-gard-ja- 'in a house' (adj.), O.Fris. ēth-ma beside O.S. athom 'breath', O.C.Sl. ra-me beside ra-mo 'shoulder'. And it often happens that the two forms do not appear in the same branches of the Indo-Germanic family; e. g. Goth. gajuk-a 'companion' beside Lat. con-jug-u-s, Skr. dy-un- 'life, time of life' Gr. al-(f)wv 'space of time, eternity' and Lat. ae-vo-m, Gr. πυθ-μήν 'ground, earth' and O.H.G. bodam 'ground'.

In Aryan, single cases of the -o--ā--i--u--ī- and -r-stems were transferred into the inflexion of the n-declension; e. g. Skr. nom. acc. neut. yugáni (from sing. yugá-m 'yoke', on the analogy of námān-i), gen. pl. Skr. dēvánām Avest. daevanam (Skr. dēvá-s 'god'). See J. Hanusz, Uber das allmähliche Umsichgreifen der n-Declination im Altindischen (Sitzungsberichte der Wiener Akad. d. Wiss. CX.), 1885. Similarly in West Germanic we have O.H.G. gen. pl. gebōno (from nom. sing. geba f. 'gift').

The words formed with these suffixes are generally masculine or neuter, as Skr. tákṣ-an- m. 'carpenter' yak-án- n. liver'.

A large group of feminines appears in Italic, Keltic, and Germanic consisting of abstract substantives formed with -ien-(-iōn-); as Lat. cap-iō men-tiō, O.Ir. er-mitiu 'honour', Goth. ga-run-jō 'flood of water' ra-pjō 'ratio'. It may be assumed that these n-stems, which represent a comparatively modern stratum of

formation, owe their feminine gender to their character of abstract nouns. And all the other feminine n-stems which appear in Germanic, are as such undoubtedly modern; they are due to a connexion which grew up between the Indo-Germanic suffixes -on--ion--in- and the Germanic feminine forms in -o--io-(= Idg. -a--ia-) and -t-, through the analogy of the relation between Germ. -an--ian- on the one hand and Germ. -a- on the other. In many words, where the languages vary between masculine and feminine, the masculine is clearly the older; this is true of Skr. si-mán- 'boundary' (cp. § 117), Gr. zíwy 'pillar', Lat. margō. In Skr. yóšan- f. 'virgin' (beside yóšā yóšanā) the gender was determined by the sex. In Skr. višana tvácam acc. 'streaming, raining cloud', Gr. ἀρηγών θεά 'adiutrix dea' τρήρων πέλεια 'timid dove', as in the case of Skr. tanú-š Gr. nov-s, we see the masculine form used unaltered in connexion with feminine words (§ 110 p. 335). And in other examples there are similar reasons for regarding the feminine gender as a modern developement so that we may fairly assume that nouns formed with n-suffixes were originally only masculine and neuter. For the feminine there was the special form with -ī-, as Skr. takš-n-t Gr. révr-ava, § 110 p. 335.

§ 113. From the earliest times the n-suffixes show a very complex variation of Ablaut. What are called the strong cases had -en- -on- -ēn- -ōn-, -ien- -von- -iēn- -iōn- (-iien- -iion- etc.) and so forth; the weak cases -n- -n-, -in- (-In-) -in- (-in-), -un- (-an-) -un- (-uun-), -mn- -mu-.

In the weak cases, the form of the suffix ending in a consonant preceded the case-endings beginning with a sonant, e. g. Skr. gen. sing. tákṣ-n-as 'of the carpenter' nā-mn-as 'of the name'; and conversely the form ending in a sonant preceded the case-endings beginning with a consonant, e. g. loc. pl. tákṣ-a-su nā-ma-su (-a--ma- for -v--mv-). Originally also the weak form of the suffix was regular in all extensions of the stem, e. g. takṣ-n-i fem. of tákṣan- (§ 110 p. 355), yuva-ṣā-s 'youthful' from yūv-an- 'young' (§ 83 p. 251), ṣrō-ma-ta-m 'hearing' beside Avest. srao-man- 'hearing' (§ 82 p. 249). This deserves especial

notice, because in several languages the weak forms of the suffix were banished from the actual declension by levelling and other kinds of re-formation, so that it is only in derivatives that we have any evidence to shew that such forms ever existed in the paradigm. Thus we have e. g. Gr. γειτ-ν-ία 'neighbourhood' beside γείτ-ων -ον-ος, πί-(f)αίνιο 'I make fat' for *-ψη-ίο- beside πί-(f)ων -(f)ον-ος, ποί-μν-η ποί-μν-ιο-ν 'herd' ποι-μαίνω 'I pasture' beside ποι-μήν -μέν-ος, Lat. jū-n-ī-x beside juv-en- (juv-en-is juv-en-um etc.), colu-mn-a beside colu-men -min-is, O.H.G. -birn 'she-bear' beside ber-o -in 'bear', hliu-mun-t 'call' beside Goth. hliu-ma -min-s 'hearing', Lith. él-n-i-s 'stag, elk' beside O.C.Sl. jelen- (gen. sing. jelen-e) 'stag'.

It is more difficult to determine how the strong forms of the suffix were originally distributed. The following points may be regarded as certain.

- 1. The nom. sing. masc. (fem.) ended sometimes in -ō(n), and sometimes in -ē(n), cp. Armen. šun Gr. κύ-τον πί-(F)ων ἄκ-μων, Lat. ed-ō men-tiō ter-mō O.Ir. ca er-mι-tiu brithe-m Gall. casa-mo, O.H.G. ezz-o skī-mo, Lith. szū for *szyū αk-mū O.C.Sl. ka-my and Gr. αὐχ-ήν ποι-μήν, Lat. lι-en, O.Icel. ox-e ux-e (Skr. ukṣ-ā) skī-me.
- 2. The nom. acc. neut. had $-\bar{v}(n)$ and $-\bar{v}(n)$ beside $-\eta$ $-\bar{\eta}$, cp. Goth. $vat-\bar{v}$ na-mo hairt- \bar{v} n-a, Lith. $vand-\bar{v}$ (originally neut.) and O.C.Sl. i-me (cp. Avest. $n\bar{a}$ -man Skr. $n\bar{a}$ -man-i).
- 3. A certain number of masculne stems had in the acc. sing. and nom. du. pl. -en-, cp. Gr. αὐχ-έν-α ποι-μέν-α, Lith. pē-men-į O.C.Sl. ka-men-ĭ (compare the exceptional forms ukš-án-am arya-mán-am in Sanskrit.
- 4. There were locatives singular in -en -en-i, cp. Gr. αὐχ--έν-ι αἰ-(f)έν ποι-μέν-ι δό-μεν, Goth. αὐhs-in (cp. Skr. ukṣ-áṇ-ind-man-i).

Further the following assumptions seem to me probable.

A certain proportion of the masculine stems had -onin acc. sing. and nom. du. pl., cp. Gr. τέκτ-ον-α πί-(f)ον-α ἄκμον-α, Gall. Ling-ŏn-es (nom. pl.), Goth. ah-an ah-man, Skr.
tákṣ-ān-am áṣ-mān-am. The variation between e and o in these

cases, like that between \bar{c} and \bar{o} in the nom. sing., depended upon the different position of the accent in the word; we have e. g. nom. pl. $-\epsilon n$ -es and '-on-es like nom. sing. $-\epsilon(n)$ and '- $\bar{o}(n)$, cp. Gr. $\varphi \rho - \epsilon \nu - \epsilon \varphi$ $\varphi \rho - \eta \nu$ as contrasted with $\tilde{a} - \varphi \rho - \rho \nu - \epsilon \varphi$ $\tilde{a} - \varphi \rho - \rho \nu - \epsilon \varphi$. Cp. I § 311 p. 248 f.

2. The loc. sing. always ended in -en or -en-i, even where the strong cases had -on-. Notice especially the Goth. loc. ah-in ah-min contrasted with acc. ah-an ah-man, as Skr. rajan-i: raj-an-am. Compare also Gr. ai(f)ér ai(f)oir.

In certain instances, the \bar{o} (and \bar{e} ?), which appear in the European languages in other cases than the nom. sing. masc. and the nom. acc. sing and pl. neut., had perhaps encroached upon the province of the other forms of ablaut before the end of the proethnic period (should we regard this as a dialectic variation in the parent language?); cp. e. g. acc sing. Gr. oùpar-lwr-a, Lat. libell-iōn-em rat-iōn-em, Goth. ga-run-jōn ra-pjōn, O.C.Sl. nom. pl. graždan-e for *gord-jān-e(s). Yet this form of the stem cannot have spread through the whole case-system, as we see from such forms as Umbr. abl. tribris-in-e na-tin-e, O.Ir. dat. er-mit-in.

We should compare with this the ablaut of the -er- and -ter-stems, which is on the whole parallel; see § 120.

Remark. For different views as to the strong forms see Collitz, Bezzenberger's Beitr. X 1 ff., and the authorities there cited. It is perhaps not superfluons to insist here that even if Collitz should be right in supposing the existence of Indo-Germanic locatives in -on(-i) (cp. Gr. $\tilde{\alpha}\xi on$), this would not be an argument against the hypothesis that in open syllables Idg. o became \tilde{a} in Aryan. For the n-stems had originally locatives without i, and i g. Skr. loc. kar-man can be derived as regularly from original i-man as from original i-man as from original i-man

§ 114. The Suffix -en-. This was used from the earliest period to form primary nomina agentis, as Skr. tákṣ-an- Gr. τέκτ-ων 'carpenter, worker in wood, architect'. The root-syllable is usually in the weak grade, but the accent varies between the suffix and the root; cp. Skr. ukṣ-án- beside vṛṣ-an-, Gr. -fo-ήν (πολύ-ροην) gen. àφ-ν-ός and φαγ-ών 'jawbone' beside ἄφσ-ην and στράβ-ων, Germ. *tuz-én- beside *túγ-en- (O.H.G.

heri-zogo and heri-zoho), *rub-én- (O.Icel. eid-rofe) beside *rfs--en- (O.H.G. betti-riso). Cp. Kauffmann, Paul-Braune's Beitr. XII 544. The -en-stems were substantives when there were adjectives in -o- parallel to them, and hence in some groups of languages, particularly in Germanic, this suffix acquired the function of forming substantives from any given adjective; it had the effect of specialising the idea conveyed by the adjective, by applying it to some one person or thing that possessed the particular quality in an exceptional degree. Hence it is often found in personal names, whether they were formed from a noun consisting of a single stem, or obtained by abbreviation from a compound consisting of two stems (cp. § 18 p. 34 and Osthoff, Forsch. auf dem Geb. der Idg. Nominalstammbildung, II 50 f.) Thus Gr. στραβ-ό-ς 'squinting': στράβ-ων 'squinter', Σιράβ-ων proper name, Lat. multi-bib-u-s. bibō, rūf--u-s: Ruf-v, Goth. raub-s 'red' · raud-u 'the red one', Lith. rud-a-s 'reddish brown': rud-u m. 'autumn'. Thus -en- came to be used as a secondary suffix, as Avest. mar'-t-an- 'mortal' (subst.) beside mar'-ta- 'mortal', Gr. τρή-ρ-ων πίλεια beside τρη-ρό-ς 'timorous, shy', Lat. Ca-t-ō beside ca-tu-s. Cp. further Lat. hom-ō Goth. gum-a O.Lith. žm-ū 'human being, man', properly 'the earthly one', beside Skr. kšám- jm- Avest. 2'm- Gr. γθών Lat. hum-u-s, Gr. γάστρ-ων 'glutton' from γαστήρ 'belly', Lat. cachinn-ō from cachinnu-s, capit-ō Capit-ō from caput, Goth. vaurstv-a 'worker' from vaurste 'work'.

Almost all the neuter forms containing -en- denoted some part of the body (cp. § 57 p. 105). In some of them, as we shall see -en- was a secondary suffix.

Indo-Germanic. Masculine. Skr. tákṣ-an-(-āṇ-am) Gr. τέκτ-ων (ον-ος), beside Skr. tákṣ-a-ti 'does carpenter's work'. Skr. ukṣ-án-(-áṇ-am) Mod.Cymr. ych (pl. ychen) Goth. aúhs-a 'ox', orig. 'the impregnator', beside Skr. ukṣ-á-ti 'emanat, emicat'. Avest. arṣ-an-(-ān-em) 'male, man', Skr. ṛṣa-bhá-s 'bull', for *ṛṣ-ŋ-bho-s, Armen. gen. arn 'of the man' (nom. air), Gr. ἄρσ-ην ἄρρ-ην Ιοn. ἔρσ-ην (-εν-ος) 'male', orig. 'making fruitful', beside Skr. árṣ-a-ti 'flows, streams'; cp. Skr. ফ̞ṣ̄-an (-aṇ-am) 'man, bull', beside várṣ̄-a-ti

makes to stream, rains'. *ku-en- *kuu-en- (*ku-n- *ku-v- *kuu-v-) 'dog' (according to Benfey 'that which produces young often and in great numbers' compared with Gr. *κύ-ος 'fetus' Skr. šί-šu-š 'young creature'): Skr. šv-án- šuv-án- (acc. sing. šv-án-am gen. sing. šú-n-as loc. pl. šv-á-su), Armen. šun gen. šan (I § 405 p. 301), Gr. *κύ-ων (voc. *κύ-ον gen. *κν-ν-ός), O.Ir. cū (gen. con), Lith. *szũ (gen. szu-ñ-s). Avest. *spas-an- 'watchman' O.H.G. *speho 'spy', \$\sqrt{spek}-. Lat. ed-ō (-ōn-is), O.H.G. ezz-o 'devourer', \$\sqrt{ed}-. Lat. as-sedō cōn-sedō (-ōn-is), O.H.G. ana-sezzo 'assessor' O.Icel. drōtt-sete 'lord high steward', \$\sqrt{sed}-.

Denominatives. hom- \bar{o} (- $\bar{o}n$ -is -in-is) Goth. gum- α O.Lith. $\bar{\epsilon}m$ - \tilde{a}^{1}) 'human being, man', see above. Gr. $\zeta o \dot{\nu} \gamma$ - ωv - $\varepsilon \rho$ (= Att. * $\zeta v \gamma$ - ωv - $\varepsilon \rho$). $\beta \dot{o} \varepsilon c \dot{\epsilon} \rho \gamma \dot{\alpha} \tau \omega$. A $\dot{\alpha} \kappa \omega v \varepsilon c$ Hesych., Goth. ga-juka 'comparison', beside $\zeta v \gamma \dot{o} - v$ juk 'yoke'.

In some Indo-Germanic words in which -en- is primary there is no trace of any original use as nomen agentis. *iuu-en*iū-n- *iuu-n- 'young, young man': Skr. yúv-an- (acc. sing. yúv-ān-am gen. sing. yū-n-as loc. pl. yúv-a-su), Lat. juv-en(-en-is), cp. also the form *iuu-n-kô-s which is more widely used, § 83 p. 251; the word is no doubt connected with Lith. jaū
O.C.Sl. ju 'already' see § 66 ad fin. p. 149 2). Skr. ás-an- 'stone, sling-stone', Gr. äx-wv (-ovr-oc, by a change of declension, see p. 350) 'javelin', cp. also Gr. àv-óv-n 'whetstone' and äx-avu 'point, thorn'. Skr. mārdh-án- m. A.S. mold-a m. 'head' (ground-form *mfdh-en- *mfdh-en-, cp. also I § 306 p. 243). Skr. plth-án- plth-an- plth-an- Lat. li-en (-ēnis) 'spleen' are among the neuter words which denote parts of the body.

Neuter. Skr. ud- $\acute{a}n$ -, Goth. vat- \ddot{o} , Lith. vand- \mathring{u} and und- \mathring{u} (which have become masc.), Gr. $\mathring{v}\delta$ - α - τo - with $\alpha = \eta$ (nom. $\mathring{v}\delta$ - ωo), water. Skr. $\mathring{u}dh$ -an- (nom. $\mathring{u}dh$ -ar) Gr. $o\mathring{v}\vartheta$ -a- τo - (nom. $o\mathring{v}\vartheta$ - $a\varrho$) udder. Skr. yak- $\acute{a}n$ - Gr. $\mathring{\eta}\pi$ -a- τo - (nom. $\mathring{\eta}\pi$ - $u\varrho$) Lat. jec-in- (in

¹⁾ $\check{z}m$ -ond 'wife' and $\check{z}m$ -ones 'human beings' are not parallel to this but contain the suffix of the Latin $h\check{u}m$ - $\check{u}nu$ -s (cp. § 160).

I see little probability in Danielsson's assumption (Gramm and etymol. Stud. I 49) that the word is merely an ablaut-variant of Gr. αi(f)ώτ Skr. άyun-.

jecin-or-is etc., the -or- having forced its way in from the nom. jec-ur, cp. also I § 431 c. p. 321) Lith. jekn-os f. pl. 'liver'. -enwas secondary in the word for head: Skr. šīrš-an- n. Gr. zápæ n. for * $\alpha \rho \bar{\alpha} \sigma - \alpha$ (- $\alpha = -p$), $\alpha \mu \phi \ell - \kappa \rho \bar{\alpha} \nu \sigma - c$ 'two-headed' for * $\kappa \rho \bar{\alpha} \sigma - c$ -ν-ο-, κάρανο-ν 'head' for *καρασ-ν-ο-ν (cp. the Author, Morph. Unt. II 173 f. 227 ff., Solmsen, Kuhn's Ztschr. XXIX 69, Danielsson, Gramm. und etymolog. Stud. I, 1888, p. 40 ff.), Lat. cernuo-s for *cers-n-uo-s, O.Icel. hjars-e m. 'head'; the words contain a neuter stem *ker-es- (*kr-es- *kr-es-), cp. Skr. śiras-Av. sar-ah- 'head' Lat. cerebru-m for *ceres-ro- (I § 570 p. 428) and below § 184. In like manner, Gr. ovaro- n. for *ous-n-to-Goth. áus-ō n. 'ear' no doubt implies a neuter -es-stem, which appears in Greek in the nom. $o\bar{b}_{\zeta}$ Dor. \bar{b}_{ζ} , if this represents *oy-os and not *oys-os (O.C.Sl. uch-o) (J. Wackernagel, Kuhn's Ztschr. XXIX 141, Solmsen ibid. 92). Skr. akš-án- Armen. ak-n Goth. áug-ō (cp. I § 444 Rem. 3, p. 331) 'eye', O.C.Sl. ok-n-o n. 'window' 1). For the use of -i-stems to supplement these neuters in -en- as Skr. áskš-i gen. akš-n-ás, see § 93 p. 279. For the nominatives in r, like Skr. údh-ar, see § 118.

If the Greek infinitives in $-si\nu$ (Dor. Lesb. $\eta\nu$), like $\psi \not\in \varphi v \nu$ 'to bear, are to be derived from *- $\varepsilon \sigma v \nu$ (which is more in accordance with known phonetic laws than to assume they came from *- $\varepsilon -F \varepsilon \nu$), we may infer an Indo-Germanic inf. in *-s- εn *- $\varepsilon -v$ *- εn *

Aryan. Masculines (and the few Feminines that occur) are rare in Aryan as compared with the classical languages, Celtic and Germanic. Skr. tákš-an- 'carpenter' Avest. taš-an-

¹⁾ The s of Skr. akşán- presents certain difficulties. It has been assumed that this is also an extension of an -es-stem (op. O.C.Sl. oko gen. oces-e); but this theory is not supported by Avest. aši- = Skr. akṣ̃i- (op. I § 401 with Rem. 1 p. 296 f., § 556, 1 p. 411; it must be admitted however that s is sometimes written for xs̄, see Bartholomae, Handbuch § 100 Rem. 2 p. 43) nor by Gr. Bosot. ŏxrallo-s 'eye' (op. I § 554 p. 408). Compare also I § 427 Rem. 2 p. 314.

'sculptor', see above p. 345. Skr. ukṣ-án- Avest. uxṣ-an- 'ox'; see above p. 345. Skr. śv-án- Avest. sp-an- 'dog' see above p. 346. Skr. yūv-an- Avest. yv-an- (read yuvan-, Bartholomae's Hdb. § 91 a p. 40) 'young, young man'; see above, p. 346. Skr. aṣ-an- 'stone'; see above, p. 346. Skr. rāj-an- 'king' beside rāj-án- 'government': cp. O.Ir. rīgain § 110 p. 335; cp. also Iat. rēgnu-m § 65 Rem. p. 139. Skr. mūrdh-án- (-ān-am) 'head': A.S. mold-a, see above p. 346. Skr. vi-bhv-ān-vi-bhv-an- 'excellent' beside vi-bhū- and vi-bhv-a-, words of similar meaning. Avest arṣ-an- 'male, man' O.Pers. xṣayārṣan- 'Xerxes' (for xṣaya- 'ruler' + arṣan-), see above, p. 345.

In Avestic there are a few examples of -en- in secondary use: mar't-an- beside mar'-ta-'mortalis'. pupr-an-'father of a family' beside pu-pra-'son'. vīs-an-'member of a clan' beside vīs-'clan'. hazanh-an-'robber' beside hazah-'deed of violence'. Forms like these originally existed in Sanskrit'), but they were driven out by the forms in -in-, see § 115.

Remark 1. In Sanskrit, the nom. sing. in $-i\bar{\iota}$ sometimes led to a transference to the $\bar{\iota}$ -declension; e. g. $pl\bar{\iota}h-\bar{\iota}$ -f. beside $pl\bar{\iota}h-an$ -. Cp. $-m\bar{a}$ § 117 Rem 2, $-t\bar{a}$ § 122 Rem. 1, and Gr. Ion $\star \acute{a}\varrho\eta$, which in the oldest period was neuter (see p. 347 above), but appears later as feminine (gen. $\star \acute{a}\varrho\eta_{\bar{\gamma}}$ etc.).

Neuters. Skr. ud-án- údh-an- and other words; see above, p. 346. Skr. mah-án- 'size': compare no doubt Gr. μέγ-a 'magnum', which must be a substantive used adjectivally (μέγας μέγαν are later forms). dadh-án- 'sour milk' (nom. dádhi): cp. Pruss. dadan 'milk' (an a-stem?). asth-án- 'bone' (ásthi), sakth-án- 'thigh' (sákthi), ās-ún- 'mouth', dōš-án- 'fore-arm', cákšan-'eye' (cp. akṣ-án-). áh-an- 'day' (nom. áhar), gámbh-an- 'depth'. Avest. ay-an- 'day' (bcside ay-ar'), nånh-an- 'nose'.

For the Sanskrit infinitives in -s-an-i, see p. 347 above.

Armenian. arn 'of the man' (Avest. arš-nō), see p. 345 above. šun, gen. šan, 'dog', see p. 346 above. akn, gen. akan,

¹⁾ The assumption of a nom. sing. krānā in Vedic (stem krān-an-), from krānā-'working, active', is based upon a wrong view of the particular passages where the word occurs.

'eye', see p. 347 above. garn, gen. garin, 'Lamb' for *ugr-en-: Skr. úr-an-a-s 'ram' (transferred to the o-declension), Gr. -Fρ-ην in πολύ-ρρην 'rich in sheep' nom. ἀρήν gen. ἀρ-ν-ός etc. 'ram' (I § 290 p. 232, § 291 p. 233). ελη, gen. ελίη, 'stag': O.C.Sl. jel-en- (gen. jelen-e) 'stag'; it is also found in the extended forms Gr. ελ-α-φο-ς 'stag' ελλό-ς 'young stag' for *ελ-ν-ο-ς (I § 204 p. 170 f., II § 78 p. 216), Mod.Cymr. elain 'hind', Lith. έl-n-i-s, gen. élnio, 'stag, elk'.

Greek. The masculine (rarely feminine) -en-stems are numerous. Through the generalisation of certain forms of the suffix five types of inflexion arose: $\dot{\alpha}_{\mathcal{O}}$ - ν - 'ram' (acc. $\ddot{\alpha}_{\mathcal{O}}$ - ν - α gen. $\dot{\alpha}_{\mathcal{O}}$ - $\dot{\nu}$ - $\dot{\alpha}_{\mathcal{O}}$); $\dot{\alpha}_{\mathcal{O}}$ - $\dot{\nu}$ - 'gland' $\ddot{\alpha}_{\mathcal{O}}$ - $\dot{\nu}$ - 'male' ($\dot{\alpha}_{\mathcal{O}}$ - $\dot{\nu}$ - $\dot{\nu}$ - $\dot{\alpha}_{\mathcal{O}}$, $\ddot{\alpha}_{\mathcal{O}}$ - $\dot{\nu}$ - $\dot{\alpha}_{\mathcal{O}}$ - $\dot{\alpha}_{\mathcal{O}}$); $\dot{\alpha}_{\mathcal{O}}$ - $\dot{\alpha}_{\mathcal{O}}$ - 'nightingale' $\dot{\tau}$ - $\dot{\nu}$ - $\dot{\nu}$ - $\dot{\nu}$ -carpenter' ($\dot{\alpha}_{\mathcal{O}}$ - $\dot{\alpha}_{$

Nomina agentis. τίντ-ων, ἄρσ-ην, νύ-ων, sec above p. 345 f. άρηγ-ών (-όν-) 'helping, helper'. ψυθ-ών (-όν-) 'liar, slanderer'. φωγ-ιών (-ών-) 'jawbone' (φωγ-εῖν 'to eat'). τοῦγ-ιών (-ών-) f. 'turtledove' (τούζειν 'to coo'). κοαγγ-ών (-όν-) f. 'jay' (κράζω 'I cry'). αίθ-ων (-ov- and -ων-) 'burning'. στοάβ-ων (-ων-) 'squinter'. γνέφ-ων (-ων-) 'niggard'. σκέπ-ων οτ σκίμπ-ων (-ων-) 'staff' (σκίμπ-τω 'I support'). $\nu \rho a v \gamma - \omega v (-\tilde{\omega} v)$ 'cryer, wood-pecker'. $\pi \epsilon v \vartheta - \eta' v (-\tilde{\eta} v)$ 'inquirer'. Often it is used as a denominative suffix, denoting one who stands in some special relation to what is denoted by the original word. τοήρων (-ων-) epithet of the dove, 'little trembler' beside $\tau \rho \eta - \rho \dot{\phi} - g$ 'timorous'. $\pi \dot{\phi} \rho \delta - \omega \nu$ (- $\omega \nu$ -) 'pēditor', beside ποιοδή 'pēditum'. κίβδ-ων (-ων-) 'workman who purifies metals from the dross', beside κίβδη 'dross'. δρόμ-ων (-ων-) 'runner', term applied to a light kind of ship and a kind of lobster, beside δρόμο-ς 'course'. γάστρ-ίων (-ων-) 'glutton', beside. γαστήρ 'paunch'. γνάθ-ων (-ων-) 'thick-cheek, puff-cheek', beside

¹⁾ The nom. $\hat{c}_{\ell \ell \ell r}$ occurs in an Att. inscr. earlier than 450 B. C., C.I.A. I 4, 22.

γνάθος 'cheek'. φνίσκ-ων (-ων-) 'fat-paunch, pot-belly', beside φνίσκη 'stomach, great-gut'. We should add a number of personal names, such as Στράβ-ων (στράβων, στραβό-ς), Χρέμ-ων (cp. O.H.G. Grimmo), 'Λγάθ-ων (ἀγαθό-ς), Φίλ-ων (φίλο-ς), Λρόμ-ων (δρόμων, δρόμο-ς), Λνίκ-ων (cp. O.H.G. Wolfo).

Other -en-stems are more isolated, and it is not clear how they are to be connected with the different uses of the suffix which we can trace in the parent language. Acc. $\pi \dot{\nu} \kappa - \nu - \alpha$ gen. $\pi \nu \kappa - \nu - \dot{\alpha} \varsigma$ (nom. $\pi \nu \dot{\nu} \dot{\varsigma}$ is a new formation) a place of public assembly in Athens (cp. the Author, Morph. Unt. II 169). $\tau \dot{\varsigma} \rho - \eta \nu$ (- $\varepsilon \nu$ -) 'tender'. $\alpha \dot{\nu} \chi - \dot{\eta} \nu$ (- $\dot{\varepsilon} \nu$ -) 'neck'. $\varepsilon \dot{\iota} \kappa - \dot{\omega} \nu$ (- $\dot{\alpha} \nu$ -) 'image'. $\sigma \tau \alpha \gamma - \dot{\omega} \nu$ (- $\dot{\alpha} \nu$ -) f. 'drop'. $\pi \nu \gamma - \dot{\omega} \nu$ ($\dot{\alpha} \nu$ -) f. 'length of an ell'. $\dot{\alpha} \gamma - \dot{\omega} \nu$ (- $\ddot{\omega} \nu$ -) 'contest'. $\kappa \dot{\lambda} \dot{\nu} \dot{\sigma} - \omega \nu$ (- $\omega \nu$ -) 'wave, billow'. $\lambda \varepsilon \iota \chi - \dot{\eta} \nu$ (- $\ddot{\eta} \nu$ -) 'scab, eruption'.

In consequence of the similar termination of the nom. -ων, stems of this kind sometimes followed the inflexion of stems in -οντ-. ἄκ-ων, see above, p. 346. Θεράπ-ων (-οντ-) 'servant beside Θεράπ-ν-η Θεράπ-αινα 'maid-servant'. λέων (-οντ-) 'lion' beside λεό-παρδο-ς 'leopard' (like αἰμο-βαφής ἀκμό-θετο-ν § 112 p. 340), λέωνα 'lioness' and Lat. leō (-ōn-). Cp. the Author, Morph. Unt. II 168 f. 197.

The neuters were associated with the neuter stems in -uen- and -men- and all alike underwent a change of inflexion due originally to their extension by the suffix -to-. See § 82 p. 250. **xápā 'head' for **xapāo-a gen. **xpō-τός, **xpή-δεμνο-ν 'head-band'; \vec{v} δ-α-τος, nom. \vec{v} δ-ωρ 'water'; \vec{ov} -α-τος, nom. \vec{ov} θ-αρ udder'; $\ddot{\eta}$ π-α-τος, nom. $\ddot{\eta}$ π-αρ 'liver'; \vec{ov} -α-τος $\vec{\omega}$ -τός, nom. \vec{ov} ς 'ear'; see p. 347 above. $\vec{\alpha}$ λειφ-α (also $\vec{\alpha}$ λειφ-αρ), gen. -α-τος, 'oil for anointing', like Lat. unqu-en.

Infinitives in $-\epsilon\iota\nu$ for $-\epsilon-\epsilon\nu$; for these forms see above, p. 347. It is possible, but it can hardly be proved, that the Doric infinitives like $\varphi\epsilon\varrho\epsilon\nu$ are the locatives of an abstract rootnoun in $-\epsilon n$ - $(\alpha\gamma -\epsilon\nu)$ for instance, beside $\alpha\gamma -\omega\nu$, as $\alpha\lambda$ - $(F)\epsilon\nu$ beside $\alpha\lambda$ - $(F)\omega\nu$, § 116).

Italic. Masculine (rarely feminine) -en- stems are numerous. Lat. car-ō car-n-is f., Umbr. kar-u 'pars' kar-n-e 'carne

earni' Osc. car-n-eis 'partis', beside Umbr. kar-tu 'dividito, distribuito': O.Ir. car-n-a 'flesh'. Lat. hom-ō -ōn-is and -in-is, Umbr. hom-on-us (ō) 'hominibus' Osc. humuns (ū) nom. 'homines': Goth. gum-a etc., see p. 346. Umbr. abr-un-u (ū) 'aprum' (like Lat. burdō beside burdu-s and the like); cp. Lat. aprun-culu-s. Osc. sverrun-éi (ū) dat. sing. the title of a magistrate.

If we except $car\bar{o}^1$), the different forms of the suffix were levelled in Latin in such a way that all the cases but the nom. sing. had either -en- -in- or -ōn-. -en- is found only in juven-, but there it is not phonetically regular, see I § 65 Rem. 3 p. 53. We cannot determine how far Lat. -in- represents Idg. -en- or Idg. -on- respectively.

In Latin it forms primary nomina agentis, all with -on-. ed-ō ed-ōn-is, as-sedō, see p. 346 above. in-cub-ō: O.H.G. hūf-o 'heap'. ger-ō. vol-ō. bib-ō. rap-o. mand-ō. err-ō. -ōn- is also found in denominatives, some of which are also nomina agentis, while some denote persons or things which stand in some other special relation to the thing denoted by the original word; such formations were suggested by groups of words like cachinn-ō beside cachınnare cachınnu-s, fabul-ö beside fabuları fabula and others. Examples are: gerr-ō from gerrae. simpul-ō from simpulu-m, mer-ō from meru-m, linte-ō from linteu-m, nebul-ō from nebula. bucc-ō from bucca. cox-ō from coxa. petr-ō from petra. strig-ō from striga. The same -on- forms many personal names, as Capit-ō from caput, Nās-ō from nāsu-s, Cat-ō from catu-s, Rūf-ō from rūfu-s. The following nouns denoting inanimate objects are nearly related to these appellatives: pīsō (-ōnin oblique cases and so in all these words) 'mortar' (pī(n)sere), runc-ō 'hoe' (runcare), sabul-ō 'coarse sand' from sabulu-m, pēr-ō 'a boot rather too loose at the top' from përa (cp. O.H.G. gëro from ger and the like p. 354); and no doubt pont-o 'pontoon' from pons. — In hom-o -on- gave way to -in-, when the consciousness of its original meaning (see p. 346) had died out.

¹⁾ Cp. also cor-n- in cor-n-ix beside Umbr. cur-n-ac-o 'cornicem' Gr. mos-wr-n 'crow'.

Other -en-stems are more isolated in point of meaning. juv-en- (nom. juven-i-s, see § 93 p. 281), cp. juven-cu-s Umbr. ivengar pl. 'iuvencae' § 83 p. 251, juven-ta § 80 p. 239, jūn-ī-x § 110 p. 335: Skr. yūv-an- etc., see p. 346. pect-en (-in-), li-en (-ēn-) (Skr. plīh-án-, p. 346), perhaps the Idg. nom. ended in *-ēn; cp. also sanguen, the older nom. of sangu-in-is etc., afterwords replaced by *sanguin-s, whence sanguīs. turb-ō (-in-). ōrd-ō (-in-). Some few were feminine, as aspergō (-in-), compagō (-in-), grandō (-in-, also m.), margo (-in-, also m.), virgō (-in-). Lastly, there are some masculines formed with -ōn-, which may or may not be connected with the class of -ōn- forms just discussed, as cūdō, carbō, truō.

Neuters. ungu-en (-in-) Umbr. um-en 'unguen' (umen is otherwise explained by Pauli, Altital. Stud. V 102 f.): O.Ir. imb imm, gen. imme (stem imb-en-) n., O.H.G. anch-o m. (no doubt originally neuter) 'butter'. ingu-en (-in-): Gr. àd-ήr gen. àd-ír-og 'gland', common ground-form *pg-en-, cp. also O.Icel. okk-r 'swelling'. pollen (-in-), originally *pol-en *pol-n-is; see I § 208 p. 175. jecur *jecin-is produced the form jecin-or-is; see above, p. 346 f.

Old Irish. The masculines (and the rarer feminines) have partly -on- (Gall. Lingon-es, Senon-es and the like), partly -on-. We do not find any thing like a large group of nomina agentis

The following have pr. Celt. -on-, nom. sing. in -ō (cp. -tiu for -tiō, § 115). cā (pl. coin) Mod.Cymr. ci (pl. cwn) 'dog': Skr. śvá etc., see p. 346 above. esc-ung 'eel' ('bog-snake'): cp. Lat. angu-en n. beside angui-s. derucc (gen. derc-on) 'acorn'. Miliuc (gen. Milc-on), Glaisuc, proper names. Cp. also triath, gen. trethan, 'sea' = Gr. Totr-wv.

The following have pr. Celt. -ōn-, nom. sing. in *-ōn-s (cp. Osc. -iuf -if, § 115 Rem. p. 360). ar-u (pl. arain) 'kidney' is no doubt to be compared with Lat. Praenest. nefrōn-ēs Lanuv. nebr-un-din-ēs, O.H.G. nior-o (pr. Germ. *ne(z)ur-en-) 'kidney', even though the form of the root-syllable in Celtic (Mod.Cymr. eirin) is difficult to explain. lecc-o 'cheek'. id-u 'pangs of travail'.

fiad-u 'witness'. lach-u 'duck'. Ān-u 'mater deorum Hibernensium'. Many of the substantives of this group were feminine; but I do not know how far the gender has been ascertained in particular instances.

It is not probable that *ing-e* 'nail' (gen. *ingan*) is a formation of the same sort as *men-me* 'mens' (gen. *menman*) for *-men-s (§ 117).

Remark 2. "It can scarcely be maintained that the word for 'nail' in O.Ir. was an n-stem. In any case Stokes' paradigm [Bezzenb Beitr. XI 92] does not agree with the facts in Old Irish. The following is much more likely; — Insular Celt. *enguinā Cymr ewin f, O Ir. nom. ingen, a gloss to 'ungula' (hitherto taken as gen. sing.), dat. ingin, dat pl. inginb for *inginaib. In Mid Ir the word was declined, though not entirely, as an n-stem. The nom. sing. was inga inge just as persa = O Ir. persan (persona). For the nom. pl. we still have ingne, which is regularly developed from *ingina, but cannot be satisfactorily explained as any case of the n-inflexion". Thurneysen

Neut. imb 'butter': Lat. ungu-en etc., see above p. 352.

Germanic. Here the -en-suffix attained its widest use in a mass of new formations. Its fertility is especially remarkable in the class of nomina agents and the nouns connected with them, in which -en- appears as a secondary suffix with what may be called an 'individualising' function, i. e. that of converting adjectives into substantives. Any adjective could be so converted by adding -en- to its stem. These derived forms were brought into close syntactical connexion with the definite article (demonstrative-stem *to-), and so arose what is known as the 'weak' declension of adjectives. Further Idg. and Germ. -on- was associated with Germ. -o- (Idg. -a-) on the analogy of the relation between Germ. -an- and -a-, and so a weak declension was developed for the adjectival a-stems parallel to that of the o-stems.

Masculine. Nomina agentis. Goth. áuhs-a O.H.G. ohs-o O.Icel. ox-e ux-e 'ox': Skr. ukṣ-án- etc., see p. 345 above. O.H.G. speh-o ezz-o -sezz-o see p. 346 above. Goth. skul-a O.H.G. scol-o 'debtor'. Goth. un-vita 'ignorant one, fool' O.H.G. wizz-o 'knower, sage'. Goth. nuta 'fisher'. O.H.G. herj-zogo O.Icel. Brugmann, Elements. II.

her-toge 'duke' pr. Germ. *tuz-én- and O.H.G. heri-zoho pr. Germ. *tuz-en-. O.H.G. bot-o O.Icel. bod-e 'messenger'. O.H.G. geb-o O.Icel. -qiaf-e 'giver'. O.H.G. war-queto 'veridicus' O.Icel. hrodr--kvede 'praedicator laudis' pr. Germ. *kued-én-. Mid.H.G. schad-e O.Icel. skad-e 'damager' pr. Germ. *skáp-en-. Goth. han-a O.H.G. han-o 'cock', beside Lat. can-ere. O.H.G. sceid-o 'sequester'. Further we find denominative forms, some of them also nomina agentis, and some denoting persons or things which stand in some other special relation to the idea of the original word (including many epithetised compounds with ga-). Goth. gum-a O.H.G. gomo O.Icel. gum-e 'human being, man': Lat. hom-o etc.; see above, p. 346. Goth. vaurstv-a 'worker' from vaurstv n. 'work'. Goth. spill-a 'announcer' from spill n. 'tale'. Goth. ga-razna 'neighbour' from razn 'house'. O.H.G. strur-o O.Icel. stjör-e 'steersman' from stiura f. 'rudder'. O.H.G. urteil-o 'judge' from urteil 'sentence'. O.H G. hiv-o 'spouse' O.lcel hiy-e 'attendant' beside Goth. herva- 'house'. O.H G. heim-o 'cricket on the hearth' from heim 'house, home' O.H.G qu-lanto 'fellow-countryman' from lant 'country' Further we have names of peoples, such as Teuton-es, O.H G Sahso, Franko, and names of persons, such as O H.G. Wolfo, Harto, Berhto. The following have a close connexion with the nomina agentis: A.S. drop-a 'drop' ('dripper'), O II.G. chleb-o 'sticker, glue' and the like.

The following are substantives formed from adjectives: Goth. liuta 'hypocrite' from liut-s 'hypocritical', veiha 'priest' from veih-s 'holy', O.H.G. wīzago 'soothsayer' from wīzag 'marking, surmising', and others.

Through the popularity of the -n-declension substantival o-stems denoting persons were sometimes made into -en-stems without any alteration of meaning, e. g. Goth. svaihra beside O.H.G. swehur Skr. śvášura-s Gr. ἐκυρό-ς 'father-in-law'.

We find another class of denominatives, akin to those already discussed, denoting objects of the same shape or form as the thing described by the original substantive (cp. Lat. sabulo, pēro p. 351). O.H.G. gēr-o O.Icel. geir-e wedge-shaped piece, instrument, or territory, from gēr spear. A.S. mūd-a

O.Icel. munn-e 'orifice', beside mud 'mouth'. Mid.H.G. kamb-e kamm-e 'comb-like instrument', from kam 'comb'. O.Icel. nagl-e 'nail', from nagl 'finger-nail'. O.Icel. odd-e m. 'triangle', from odd-r 'spear-point'. Add certain words in -ōn- (f.), as O.H.G. bart-a 'axe, broad-axe' beside bart 'beard'. Cp. Kluge, Nomin. Stammbildungslehre § 79 p. 37.

The most numerous of the remaining substantives are the abstract nouns and the names for parts of the body. Abstract nouns: Goth. ah-a 'thought, understanding', ga-taira 'cleft', O.H.G. scad-o O.Icel. skaā-e 'harm', O.H.G. smerz-o 'pain', gi-feho 'joy'; add also some words in -ōn- (f.), as Goth. lub-ō 'love', brinn-ō 'fever', O.Icel. tak-a 'taking in, assumption'. One or two of the names for parts of the body are proethnic: A.S. mold-a 'head' see p. 346, O.Icel. hjars-e 'head' see p. 347, O.H.G. nior-o (O.Icel. nyr-a n.) 'kidney'; see p. 352. With these, others were associated: Goth. lōf-a 'flat of the hand', O.H.G. nabol-o O.Icel. nafl-e 'navel', O.H.G. dūm-o (cp. § 72 p. 171). Also feminine forms in -ōn-as O.H.G. gall-à 'gall' (on the other hand A.S. zealla is m.), Goth. tugg-ō O.H.G. zung-a O.Icel. tung-a 'tongue', O.H.G. zēh-a 'toe'.

Feminine. The original stems in -on- were associated in Germanic with those in -a-, not so intimately indeed as were the -10n-stems, but closely enough to be attracted into the feminine gender, though we must observe that some of the abstract nouns in -on-, like those in -2on-, may have been feminine before they passed into Germanic. On their analogy feminines in -on-were formed at will from the masculine -en-stems which denoted living beings. O.H.G. maga-zoha 'nutrix' from -zoho -zogo. O.Icel. kveld-rida 'noctivaga, strix' from -ride. Goth. ga-razno 'neighbour (f.)' from ga-razna. O.H.G. gi-mahha 'wife' from gi-mahho, O.H.G. hiwa wife' from hiwo. O.H.G. wizaga soothsayer (f.)' from wizago. Goth. svaihro 'mother-in-law' from svaihra. Goth. gino O.Icel. kona 'woman' contrasted with Gr. γυνή, Goth. viduvō 'widow' contrasted with Lat, vidua. As an example of the weak adjectives we may take Goth. blind-o beside masc. blind-a 'caecus'.

Neuters, in the genitive and other cases always with -en-. Goth. vat-ō 'water', Goth. áus-ō O.H.G. ōr-a 'ear', Goth. áug-ō O.H.G. oug-a 'eye', see above p. 347. Goth. hairt-ō O.H.G. herz-a 'heart'. O.H.G. wang-a 'cheek, O.Icel. nyr-a 'kidney' beside O.H.G. m. nior-o (on the other hand O.Icel. hjars-e m. beside Skr. n. śirś-án-, cp. also O.H.G. anch-o m. 'butter' beside Lat. ungu-en n. O.Ir. imb n.). Along with these names for parts of the body we find a few other substantives, as Goth. pairk-ō 'hole', áuga-daúrō 'window' and kaúrnō 'corn' (a derivative of kaúrn, parallel to masculines like O.H.G. gēr-o and to feminines like O.H.G. bart-a p. 354 f.). In the weak adjectives: Goth. blind-ō beside masc. blind-a.

Balto-Slavonic. Here the -en-stems are rare, a large part of them have fallen out of the n-declension through various processes of re-formation. Generally the suffix appears in the form -en- in all cases except the nom. sing.

Lith. el-n- in éln-1-s 'stag, elk' O.C.Sl. jelen- m. (nom. jelen-t) 'stag': Armen. eln etc., see p. 349 above. Lith. szirsz-ñ m. O.C.Sl. srīš-en-t m. 'horse-fly, hornet', common ground-form *kṛṣ-en-: ep. O.H.G. hornaz 'hornet' pr. Germ. *zurz-n-ata-z (I § 303 p. 240). From an original *dez-en- (*diz-en- *dz-en-) *di-n- (*dez-n-) 'day' were developed Lith. f. dé-n-à Pruss. acc. dei-n-a-n O.C.Sl. gen. dī-n-e (nom. dī-nī m.). ep. Skr. din-a-m Lat. nūn-dinae (J. Schmidt, Kuhn's Ztschr. XXV 23).

Lith. $sz\tilde{u}$ (aus * $szy-\tilde{u}$, I § 184 p. 160), gen. $szu-\tilde{n}-s$ acc. szu-n-i, m. 'dog', also szun-i-s m.: Skr. $\dot{s}v-\dot{a}$ etc., see p. 346 above. $rud-\tilde{u}$ m. 'autumn' beside rud-a-s 'reddish-brown': cp. Lat-Ruf- \bar{u} (foth. $r\dot{u}ud-a$, see p. 345 above. We have an old neuter in $vand-\tilde{u}$ m. 'water' (Lett. ud-e'n-s). Skr. $ud-\dot{a}n-$ etc., see above p. 346.

O.C.Sl. step-en- m. 'step', kor-en- m. 'root', nom. stepen-t koren-t. vod-a f. 'water' (inflected as an ā-stem) perhaps comes from an Indo-Germanic nominative in -ō.

- § 115. The Suffix -ien-1). This Suffix, which appears in the forms -ien--ion--iën--ion-, -ien--ijon--ijōn- and -in--in-(-in--iin-) arose in derivatives from the stems in -io--i- and -ī-. We must distinguish two strata in this class of nasal stems.
- 1. Forms corresponding to denominatives like Lat. hom-ō Lith. rud-ā Av. mar't-an- (§ 114), as Skr. abhimātin- 'plotting' (abhi-māti-š 'plot'), οὐφανίων 'the heavenly one' (cp. οὐφάνο-ς), Lat. rulpiō (vulpēs), Goth. arbja 'heir' (arlı n. 'heritage').
- 2. Abstract Substantives like those mentioned on p. 341 f. e. g. $cap-i\bar{o}$, which, if we may judge from $\delta\omega\tau tr-\eta$ and other examples, once existed in Greek as well as elsewhere.

The custom of extending all kinds of stems by an -n-suffix remained in full force through most of the stages in the history of the separate languages, and hence the class of stems which we are now considering was continually enlarged. But we are justified in referring all such nouns as Goth. arbja to the suffix -ien- rather than to -en- (§ 114) — although a priori the word might he analysed either arbj-an- or arbja-n quite-as naturally as arb-jan- (cp. c. g. vaurstv-an- or vaurst va-n-) — simply because they created no new variety of suffix, that is, none which was not in existence in the proethnic period, but merely reproduced the original -ien- type in one or other of its forms.

On the other hand it must be admitted that this suffix had only just begun to be used independently before the separation of the languages. Indeed there appear to be no examples of particular words that contain it which are certainly proethnic; notice however such parallels as Skr. praśn-in- 'questioner' A.S. friczea 'herald' and abstract nouns like Lat. ration- = Goth. rapjon-, Lat. mentio = O.Ir. er-mitiu, which are mostly derived from Indo-Germanic stems in -ti-, see § 100 p. 294.

Aryan. Here we find only denominatives with the suffix

¹⁾ Cp Leo Meyer's treatise quoted p. 294 footnote.

in the form -in-1), which spread through all the cases in the proethnic period of Aryan; e. g. nom. pl. -in-as instead of *-iān-as, loc. sing. -in-i istead of *-jān-i. During the same period -i-replaced -ja- (== -jn-) in the 'middle' cases (e. g. Skr. arci-bhyas Avest. kaini-bjō) and -ī-replaced -jā in the nom. sing. (Skr. arcī Avest. kaini) on the analogy of the -en-stems (Skr. dat. abl. pl. -a-bhyas, nom. sing. -ā).

Skr. arcin- 'beaming from arci-s 'beam', cittin- 'intelligent' from citti-š 'understanding', ūrmin- 'billowy' from ūrmi-š 'billow', atithin- 'wandering' from átithi-š 'guest'. Avest. kainin- f. 'girl' from kanya- Skr. kanya 'girl'. Gr. xaivo-g 'new' (*xav-10-g); for the meaning of the suffix compare Lat. pūs-iō 'little boy'. But we find that the use of -in- as a derivative suffix has spread by analogy to other than -o-stems, almost exclusively however to those in -o- (cp. Gr. μαλακ-ίων from μαλακό-ς, Lat. libell-ōi from libellu-s, Goth. vaurstv-ja from vaurstv); it ousted -an-, which remained only in Avestic (see § 114 p. 348). Skr. parn-in-Avest. peren-in- 'winged', beside Skr. parná-m 'wing'. yav-in- 'rich in corn'. Avest. yev-in- m. 'fields', beside Skr. uáva-s 'corn'. Skr. śvan-ın- 'leading dogs', from śvan- 'dog'. O.Pers. vib-in- 'belonging to a clan' (Avestic shows the older form vis-an-), from vib- 'clan'. Skr. -uin- after vowels, e. g. svadhā-yin- 'he to whom the svadhā belongs' is like -ii- (Lith. mõ-ji-s) p. 122 footnote 2, and -ji- § 110 p. 336.

In Sanskrit forms like mad-in- intoxicating, rejoicing' (from máda-s 'intoxication, joyous excitement') were referred to kindred verbs (máda-ti), and hence -in- acquired the character of a primary suffix. See Whitney, Skr. Gram. § 1183.

-min-, and -vn- were no doubt special formations in Sanskrit; examples are rg-min- 'singing, jubilating' (beside rg-miya- 'worthyof praise'), namas-vin- 'paying reverence.' Cp. below Gr. στα-μίν-.

¹⁾ Prof W. Streitberg was the first scholar who clearly recognised that Ar. -in- was derived from the original -ten-. I have followed him also in regarding -i- as the weak form of -jo-, in § 116.

Greek. -ιον- -ιων- appear beside -ιο-, as in οὐραν-ἰων (-ιων-) 'the heavenly one, dweller in heaven' beside οὐράν-ιο-ς 'heavenly', Κρον-ίων (-ιον- and των-) 'the descendant of Kronos' beside Κρόν--ιο-ς 'belonging to Kronos'. Generally however -ιων- is an independent suffix. 'Ατρε-ίων 'son of Atreus', from 'Ατρεί-ς. μαλακ--ίων 'weakling', from μαλακό-ς 'weak'. δειλακρ-ίων 'wretch, miserable creature', from δείλακρο-ς 'very wretched'.

-īν- appears in Ἀδρηστ-ίν-η 'daughter of Adrestos' Εὐην-ίν-η daughter of Euenos' beside 'Ακρισ-ιών-η 'daughter of Akrisios'. Further, in δωτίν-η 'gift' beside δῶ-τι-ς 'gift', cp. Lat. datō beside dōs. This form justifies us in classing here the words δελφῖν- m. 'belly-fish, dolphin' (cp. Skr. garbh-in- 'pregnant'), ἀκτ-ῖν- f. 'beam, of light', πηρ-ῖν- f. 'scrotum', ωδ-ῖν- f. 'travail', γλωχ-ῖν- f. 'point, end' (cp. γλῶσσα for *γλωχ-ἰα). The weak form of the sufflx was adopted in all the cases, as -in- in Aryan. Closely parallel to these are words in -μῖν-: στα-μῦν- and στα-μῦν- m. 'wood that stands upright', ὑηγ-μῦν- f. 'surge, breaker' (beside ὑῆγ-μα 'a breaking'), ὑσμῦν- f. and ὑσμῦν-η 'flight' (for the -σ- cp. § 72 p. 173.). The nom. sing. ends in -īs for *-īν-ς-, for which -īν was substituted in later Greck.

Italic. -iōn- in the masculine is seen in Lat. vulpiō from vulpēs, pelliō from pelli-s, restiō from resti-s, cūriō 'head of a curia', from cūria, centuriō from centuria, laniō from laniu-s; and it is common as an independent suffix, e. g. libell-iō from libellu-s, cūr-iō 'one wasted by sorrow' from cūra, tenebr-iō from tenebrae, mīr-iō from mīru-s, and the substantives formed from the numerals, ūn-iō bīn-iō tern-iō and so forth. Some of these masculines had a diminutival sense, as homunc-iō senec-iō pūs-iō pūmil-iō, cp. Avest. kainin- p. 358. The Umbr. Vuf-iun-e Vof-ion-e should be mentioned here.

Secondly we have the feminine abstract nouns in -ion-, and -in- (-in-?) in Umbro-Samnite; this establishes a variation in the form of the suffix in different cases for the proethnic Italic period. Lat. com-mūniō beside com-mūni-s; Goth. ga-máinei 'community' beside ga-máini- 'communis'; al-luv-iō beside al-luv-iu-m, al-luv-iō-s, con-tag-iō beside con-tag-iu-m ob-

-sid-iō beside ob-sid-iu-m, cp. Goth. ga-riud-jō beside ga-riud-i. The following examples show -iōn- in independent use, so that it appears as a primary suffix: Lat. leg-iō re-ligio Osc. leg-in-ei 'legioni, cohorti' leg-in-um 'legionem, cohortem', Lat. cōn-spic-iō, reg-iō, cap-iō ūsū-capiō, opīn-iō; Umbr. fer-in-e perhaps 'feretro', tribrisu 'ternio' abl. tribris-in-e, Osc. tang-in-om 'sententiam' gen. tang-in-eis, tribarakk-iuf 'aedificatio'.

The form -tiōn- -tin- (-tīn-?) is especially frequent and largely superseded Idg. -ti-: Lat. men-tiō (O.Ir. er-mitiu 'honour'), ra-tiō (Goth. ra-p̄jō 'ratio'), da-tiō (cp. Gr. δω-τίν-η 'gift'), jūnc-tiō, occupā-tiō, tribū-tiō; Umbr. na-tin-e 'natione, gente', Osc. medica-tin-om 'indicationem', úít-tiuf 'usio, usus', frukta-tiuf 'usus, fructus', statíf 'statio, statua'. Cp. § 100 p. 300. With Lat. exerci-tiō compare exerci-tiu-m, with dic-tiō the Osc. med-dirud 'uris dictione', which no doubt comes from *med-dihtio-as Bansae from *Bantia- (1 § 502 p. 368 f.); see § 163 under Italic.

Remark The Umbrian nominative termination -iu stands for pr. Ital and pr Idg -20 On the other hand. Osc. -iuf and -if stand for *ions *-ins (*-ins?) The latter were later dialectic formations (cp. Lat. sanguis Gr. Soloji, and other similar forms, and see § 114 p 352, § 117 under Old Irish) The late origin of the ending -ns explains the special treatment of this group of sounds in these words see I § 209 p 177, § 655 p. 506.

In the Sabine dialect we find also the form -iēn- ner-iēn-em 'fortitudinem', nom. ner-io, gen. also Νηρίν-ης (Lydus de mens. IV 42), parallel to ner-ō 'brave' Nerō (cp. Gr. "Ανδρ-ων) from Idg. *ner- 'man'. An-io gen. -iēn-is (amongst the Romans declined after the Latin fashion, -iōn-is). Should such forms be regarded as derivatives from words with the suffix -iē- (§ 109) (cp. Ner-ia), which would explain the ē?

Old Irish. Besides Eriu 'Ireland' (gen. Erenn; for the nn cp. § 117 Rem. 3) the only certain examples are the forms which correspond to the Latin feminine abstract nouns in -tiō: air-itiu f. 'accipere': Lat. ēmptiō, aig-thiu f. 'fear' and others. All the cases, except the nom. sing., have -tin-; there is only the dat. (loc.) sing. with its by-form in -te to vouch for *-tion in early Irish. See § 100 p. 301.

In Gallic -jön- is common: we have names of towns like Brigantio (compared with the participial stem brigant- 'projecting', O.Ir. Brigit = Skr. brhat-i § 110 p. 337), Divio, Cabellio; names of tribes like Suessiön-es, Κουριων-ες.

Germanic. Masc. -jan- (like -an-). Goth. arbja O.H.G. arpeo 'heir, beside Goth. arb-i n. 'heritage'. Goth. bandja 'prisoner', beside band-i f. 'chain'. Goth. vái-dēdja 'evildoer' Mid.H.G. übel-tæte A.S. yfel-dæda 'evildoer', beside Goth. ga--dēdi- f. 'deed'. Goth. ga-máinja 'partaker', beside ga-máini-'communis'. The suffix is more frequently independent. Goth. mana-maúrþrja O.H.G. murdr-eo 'murderer', from Germ. *murpra- 'murder'; Goth. timr-ja 'carpenter', beside O.H.G. zimbar 'timber'; fisk-ja 'fisher', beside fiska- 'fish'; vaurstv-ja 'worker', beside vaúrstv 'work'; O.H.G. scirn-o 'buffoon', beside scern 'jest'; scar-io scaro 'head of a troop' beside scara 'troop'. It has the character of a primary suffix in e. g. Goth. arbi-num-ja 'inheritor, heir', O.H.G. not-num-eo 'raptor', O.H.G. sceph-eo scaffo 'conditor', fer-10 fero 'sailor'. Feminines (cp. O.H.G. maga-zoha etc. § 114 p. 355). Goth. arbjō 'heiress', O.H.G. ge-betta O.Icel. bedja 'bedfellow (f.), wife'.

The form -iōn- became incapable of denoting male persons (notice that masculines like Gr. veāriā-ç Lat. agricola O.C.Sl. sluga are foreign to Germanic). It was preserved on the other hand in names of things which in form are parallel to Goth. arbja etc. (also in a few names of animals), which then became feminine. Goth. snōrjō 'basket woven out of string', beside O.H.G. snuori- f. 'string'. O.H.G. bulga 'leathern sack', beside balgi- m. 'bag'. O.H.G. harra 'hair garment', beside har 'hair'. Goth. ga-timrjō O.H.G. zimbirra 'building', beside O.H.G. zimbar 'timber'. O.Icel. birkja 'birch-sap', beside bjork 'birch'. O.Icel. gedda 'pike', beside gadd-r 'thorn, spine' (cp. Lat. stelliō m. 'star-lizard, newt' from stella).

Feminine abstract nouns in -iōn-, whose gender dates from the pre-Germanic period. Goth. gariudjō 'modesty', side by side with ga-riud-i n. (same meaning) (cp. Lat. alluviō and alluviu-m), beside ga-riuō-s 'modest, decent'. O.Icel. vitra 'sagacity' beside

vit-r 'sagacious'; sæla 'luck', beside sæll 'lucky'. The suffix has the character of a primary suffix in Goth. ga-runjo 'inundation', sakjō' strife', A.S. æsce 'question', O.Icel. pykkja 'love'. We also find -tion-, but this was not fertile in Germanic, which contrasts with its history in Italic and Irish: Goth. ra-pjo 'reckoning' (Lat. ra-tiō), O.Icel. prætta 'strife'. Parallel to rabjō is O.H.G. redia, a strong feminine, cp. Lat. exercitiu-m beside exercitio. Side by side with -10n- is the form -1n-, found in abstract denominatives, especially in those derived from adjectival stems: Goth. agláiter 'rudeness' side by side with agláiti n. (the same), magapei 'maidenhood' beside magapi- 'maiden', Goth. gamáinei O.H.G. gimeinī 'community' beside Goth, ga-máini- 'communis' (Lat. communio f. beside com-muni-s), Goth. godei O.H.G. guoti 'goodness, excellence' beside Goth. gob-s 'good', Goth. managei O.H.G. meniat 'crowd' beside Goth. manag-s 'many, much'. We have seen reason for believing that the same -in- is contained in the suffix -110-ga-, as in O H G. Berhting, § 88 Rem. 3 p. 267.

Slavonic. We find -jōn- in the plural of denominative names of inhabitants and classes, as zemljan-e 'countrymen' from zemlja 'land', graždan-e 'citizens' for *gord-jān-e from gradū 'city', seljan-e 'country folk' from selo 'cultivated land', mir-jan-e 'laici' from mirū 'world'. See I § 585, 3 p. 440.

§ 116. The Suffix -uen-. This appears in the forms -uen- -uon- (-uēn-) -uōn- and -un- -uv-, and appears to be derived from the u- and uo-stems, just as -ien- from those in -i- and -10-.

The meaning of the suffix cannot be reduced to any general definition. Amongst the substantives it forms are nomina actionis, which were used as infinitives in Aryan and Greek.

Indo-Germanic. Skr. dy-un- (e. g. instr. dyun-d) n. life', Gr. ai-(F)ων (-ων-) m. space of time, eternity' ai-(F)ων (loc. sing.) 'always', common ground-form "ai-uen- (cp. I § 611 p. 461): compare Lat. ae-vo-m, Goth. ái-v-s m. 'time, eternity' ground-form "ai-uo- (cp. I § 612 p. 462, § 614 p. 464). Skr. pi-van-Gr. πi-(F)ων (-ον-) 'fat': compare-"pī-ue-ro- Skr. pīva-rá-s Gr. πīε-ρό-ς 'fat' Skr. pi-vas- n. Gr. πīό-της etc., see § 74 p. 182.

Skr. pár-van- n. 'knob, joint, pause, break', Gr. α'-πείρων (-or-) 'boundless' for *περ-Γων, πειραίνω 'I bring to an end' for *περ-Γων-_Lω, Skr. párvata-s Gr. πέρρατα πείρατα (see § 82 p. 249): beside these we have Gr. α'-πειρο-ς. Skr. agrādvan- 'eating first', Gr. Hom. ε'd-Γατ- or ε'd dατ- n. 'food' (ε'd ατ- is a wrong spelling, cp. I § 166 p. 147 on δείδιμεν). Skr. grά-van- m. 'soma-stone' O.Ir. broo brō, gen. broon brōn, 'millstone'.

Datives in -uen-ai are used as infinitives (this appears to have been a modification of the original -un-ai -un-ai introduced in the proethnic period on the analogy of the loc. in -uen(-1); cp. -men-ai § 117). Skr. da-ván-e 'to give', Gr. Cypr. do-fer-ai Att. dovan. Avest. vīd-van-ōi 'to know', Gr. eldévai for *feid-fer-ai (cp. § 136 Remark 1).

Aryan. The original relations of ablaut are preserved most nearly in Skr. sing. nom. maghá-va ('generous') acc. -van-am loc. -van-i instr. maghón-ā, Avest. sing. nom. aša-va (pure') acc. -van-em gen. ašaon-ō. In Sanskrit, levelling took place in two different directions. On the one hand the form with -vanspread into the weakest cases: e. g. áthar-vā -vāṇ-am -vaṇ-i produced -van-a -van-as instead of *un-a etc. (cp. the form apaurun-ē dat. preserved in Avestic), a change which was supported by the parallelism of the man-stems (ás-man-a etc.). And the v of forms like rta-vn-a (we should expect *rtaun-a) came from the other forms with -van- -van- (cp. I § 160 p. 144), while such a form as pī-vn-, and (here also) the type of the -manstems (arya-mn-å) may have influenced the re-formation. On the other hand, in some neuter words (e. g. dy-un-) a new paradigm was formed by a confusion with u-stems which were parallel to them, (from which came e.g. the nom. acc. ayu, cp. Goth. aju-ka- in ajuk-dūb-s 'eternity'). An interesting survival of -unon Indian ground appears also in mith-un-ú- 'paired' beside Avest. mib-wan- n, 'pair'. Cp. the Author, Morph. Unt. II 187 ff.

Skr. ták-van- beside tak-vá- ták-u- 'shooting on, quick'. fbh-van- beside fbh-va- rbh-ú- 'capable, aristic'. fk-van- beside fk-vá- 'singing, praising'. pád-van- m. beside pád-va- m. 'way'. ár-van- 'runner' beside Avest. aurva 'quick' A.S. ar-u 'prompt,

ready'. dhán-van n. beside dhán-u- f. 'dune, sandy land'. Avest. er'd-wan- 'raiser, helper' beside er'd-wa- 'uplifted, raised up'.

Skr. ádh-van- m. Avest. ad-wan- m. 'way'. Skr. yd-van'going, traveller' Avest. yaon-a- m. 'path, way'. Skr. pát-van'flying', śák-van- 'able', rá-van- 'bestowing'. Avest. is-van- 'able',
der'z-van- m. 'fetter'. Skr. sná-van- n. 'bond, sinew', túg-vann. 'rapid stream', Avest. karš-van- n. (nom. acc. karš-var) name
of the seven divisions of the earth.

-t-van-: Skr. kf-t-van- 'effecting' Avest. ker'-p-uan- 'one who brings about', Skr. sú-t-van- 'pressing', sa-ji-t-van 'victorious'. These are based on t-stems like -k-f-t- 'effecting', see § 123.

Skr. rtá-van- 'holy. pious' Avest. aša-van- 'pure', Skr. áthar-van- Avest. āpra-van- (apaur-un-) 'fire-priest', Skr. dhitá-van-'rich in gifts', amatī-ván- 'suffering want', samád-van- 'eager for the fray'.

Infinitives. Skr. $d\bar{a}$ - $v\acute{a}n$ - \bar{e} 'to give', Avest. $v\bar{\imath}d$ -van- $\bar{o}i$ 'to know', see above p. 363.

Armenian. siun, gen. sean, 'pillar' for early Armen. *sī-van-or *sē-van-: Gr. κέων m. f. (-oν-) 'pillar' for *κī-Γων. n-cases were no doubt originally formed from albeur, gen. alber, 'spring' (I § 263 p. 214): cp. Gr. φρέωρ φρέωτος (p. 365).

Greek. $al-(F)\dot{\omega}v$ $al-(F)\dot{\varepsilon}v$, $\pi\dot{t}-(F)\omega v$, $\dot{a}\pi\dot{\varepsilon}l\phi\omega v$ for *- $\pi\varepsilon\varrho$ - $F\omega v$, see p. 362 f.

κενε-(f)ών (-ων-) m. 'hollow space' from νενε-fό-ς 'empty' (§ 64 p. 135), with which we must certainly class the masculine names of places as οἰνεών οἰνών 'wine-bin', παρθενεών παρθενεών 'maidens' apartment', ἀνδρών 'man's apartment', ἱππών 'horse stall', λασιών 'place with thick bushes' (τὰ λάσια 'thicket').

The form -un- is no doubt to be seen in $s\tilde{\nu}\vartheta\tilde{\nu}\nu a$ f. 'legal procedure, punishment' for $*s\tilde{\nu}\vartheta\nu r_{-k}a$, $s\tilde{\nu}\vartheta\tilde{\nu}r\omega$ 'I guide straight for $*-\nu r_{-k}\omega$; cp. Avest. asaon-i fem. of asa-van-. Cp. also Hom. $l\vartheta \tilde{\nu}r$ -rara 'in the straightest, truest way' beside $l\vartheta \tilde{\nu}-\varsigma$. See Osthoff, Forsch. auf dem Geb. der Idg. Nominalstammbildung II 24 ff., and the Author, Morph. Unt. II 190. 201 ff. 205 f.

The neuters show the same course of development as those belonging to the -men- and -en-stems (like of 9-ap -aros § 114

Infinitives. do-Fev-ai δοῦναι, εἰδ-έν-ai; see above, p. 363. This formation was very fertile in Ionic, Attic and Arcadian. Θεῖναι 'to place' for *θε-Fev-ai ι-έναι 'to go'. δε-δι-έναι 'to fear'. ἀῆναι 'to blow' for *ἀFη-Feναι, γνῶναι 'to recognise' for *γνω--Feναι, From the contracted forms was taken a termination -ναι, which usurped the place of -μεν -μεναι: thus δῦναι, εἶναι (εἶ-μεν for *ἐσ-μεν), φάναι, διδόναι, δεικνύναι. Many scholars refer φέφειν to *φεφε-Feν, see § 114 p. 347.

Old Irish. $broo\ br\bar{o}$ 'millstone': Skr. $gr\acute{a}$ -van-, see above p. 347.

Germanic. Goth. spar-va A.S. spearwa O.H.G. sparo m. 'sparrow', \sqrt{sper} - 'flutter to and fro'.

§ 117. The suffix -men-. This was used from the in the proethnic and later periods to form nomina actionis, which often varied between the meaning of the thing and the action (as Gr. $\dot{\phi} s \tilde{\nu} \mu a$ 'a streaming' and 'that which streams'); more rarely to form nomina agentis. The nomina actionis were used in Aryan and Greek as infinitives. The gender varied between neuter and masculine; sometimes even in the same word, as Gr. $\chi s \tilde{\iota} - \mu a : \chi \epsilon \iota - \mu \omega \nu$.

The root-syllable had generally the strong grade (the e-form in the e-series). Originally, no doubt, both this and the weak grade stood side by side in each paradigm (cp. Gr. λει-μών: λι-μήν, αετ-μα: αντ-μήν, Ο.Icel. ljō-me: Goth. lath-mun-i), but a process of levelling ensued, generally in favour of the strong form.

There is difficulty in ascertaining what was the weak form of the suffix in the ground-forms of certain cases of the noun, as Skr. várt-man-a várt-man-as (beside ná-mn-a arya-mn-d).

Remark 1. From the analogy of Skr. arc-in-a (-ieff-) and Avest. apaur-un-? (-uen-) -- see § 115, 116 we should expect *uert-mn-, and therefore St *rari-an-a. This is supported by Goth. vund-ufn-i f. 'wound' vit-ubn-i n 'knowledge' (-fn- -bn- for -mn-, I § 215 p. 182) beside lauh--mun-i f. 'flash'. The original paradigm of the latter would have been nom. *laúh-ufn-i gen. laúh-mun-jös, as in Skr *vart-an-ā (-mn-) várt-ma--bhis (-ma-). See the Author, Morph Unt. II 201 209. 217 ff. We might therefore suppose that várt-man-ā was a re-formation in Aryan due to the analogy of the other cases, várt-man-s várt-ma-bhis etc. But although it must be allowed that the weak stem had both these forms in derivatives, yet even in the proethnic period the post-consonantal form -mn- may have been displaced by -men-. There is at least a very strong probability that some such levelling process had taken place in proethnic Indo-Germanic in such infinitives as Skr vid-mán-ē Gr id-uer-ai (cp. also Lat. imper. legi-min-i below) The form of the stem represented by Skr. várt-man-ā would then be yert-men-. I should give my judgement with greater confidence, if there were a satisfactory explanation, of the absence of m in Skr. bhūnā prēnā and the like (Lanman, Noun-Inflection p. 583)

Indo-Germanic. *kley-men- from \(\sqrt{kley-'hear'}: \) Avest. srao-man- n. Goth. hlw-ma m. 'hearing', cp. also Skr. śró-ma--ta-m O.H.G. hliu-mun-t § 82 p. 249. Skr. hb-man- n. Gr. χεῦ-μα χῦ-μα χύ-μα n. 'gush'. Gr. ὁεῦ-μα ὁύ-μα n. O.Ir. sruaim n. 'stream' common ground-form *srey-men-. Skr. bhú-man- n. 'existence, earth' bhū-mán- m. 'crowd, fulness', Gr. φῦ-μα n. 'growth', Lith. bu-men-e (no doubt with \bar{u}) f. 'the present'. Skr. hế-man loc. 'in winter', Armen. jiun, gen. jean 'snow', Gr. xeĩ-ua 'storm' χει-μών (-μων-) m. 'stormy weather, winter'. Skr. bhár--man- n. 'support, fostering, care', Gr. φέρ-μα n. 'fruit of the womb', O.C.Sl. brě-me n. 'burden'. Skr. tár-man- n. 'top of the sacrificial post', Gr. τέρ-μα n. 'goal, end' τέρ-μων (-ov-) m. 'boundary', Lat. ter-men ter-mo (-mon-). Skr. vart-man- n. 'road', O.C.Sl. ore-me n. 'time' for *vert-me. *men-men- 'mind, spirit, thought': Skr. mán-man- n., Gr. θρασυ-μέμνων 'Αγα-μέμνων for *-μεν-μον-(De Saussure, Mém. de la Soc. de lingu. IV 432). Skr. vás--man- n. 'covering' Gr. εἶ-μα n. 'garment, covering' εὐ-είμων 'well clothed'. Skr. ád-man n. 'food', Gr. šő-µεν-au dat. inf. 'to eat', Lith. pl. ëd-men-ys (stem ed-men-i-) m. mouth, chaps'. Skr.

dhá-man- n. statute, action, seat, dwelling, Gr. ἀνά-θημα n. 'erection, something set up, offering' εν-θήμων 'keeping something in good order' θη-μών (-μων-) m. heap' θέ-μα something set up, deposit, pledge', v dhē-. Skr. dā-man- n. 'gift' dā-mán- m. 'gift, giver', Gr. δό-μα n. 'gift' inf. δό-μεναι, $\sqrt{d\bar{o}}$ -. Skr. stháman- n. 'standing-place, strength', Gr. ἐπί-στημα n. 'what is set up upon something else' στή-μων (-μον-) 'warp in the upright loom', Lat. sta-men n., Goth. sto-ma m. 'constituent part, element', Lith. stō-mu m. 'stature, height of body', vsta-. Skr. ás-man- m. 'stone, heaven' Gr. ακ-μων 'anvil, thunderbolt'. Skr. áj-man- n. 'road, train', Lat. agmen n. for *ag-men (the vowel owes its length to the following -gm-) and ex-amen n. for *-ag--men (I § 506 p. 371 1). Skr. oj-man- m. 'strength', Lat. aug--men n., Lith. aug-mu m. excrescence upon bodies or trees'. Skr. sī-mán- m. 'parting of the hair, crown of the head' f. boundary, mark' (as to the fem. gender see Rem. 2 below), O.Sax sī-mo m. 'bond, cord, rope', cp. also Gr. i-uav-z- (ī) 'strap' f-uor-ία 'well-rope' (§ 82 Rem. p. 249 f.); Gr. αίμασία 'enclosing wall, hedge' seems to be derived from a stem *sai-men-. Skr. syú-man- n. 'bond, stripe, row' Gr. \dot{v} - $\mu\dot{\eta}\nu$ (- $\epsilon\nu$ -) m. 'hide, sinew', νασσύματα n. pl. 'patchwork, soles; plots' (prep. κάτ), Lat. as--sumen-tu-m 'patch sewn on'. Skr. ná-ma n. Armen. anun Gr. övo-μα n. Lat. nō-men n. O.Ir. ain-m n. Goth, na-mō n. Pruss. e-mn-a- O.C.Sl. i-me n. (I § 219 Rem. 2 p. 187 f.) 'name'. Gr. γνω-μα n. 'token' γνω-μων (-μον-) 'one who knows or shows, sundial, measuring-rod', Lat. agnomen n. for *ad-gno-men (connected by popular etymology with nomen), O.C.Sl. zna-me n. 'token'.

Skr. jáni-man- n. 'birth' Lat. geni-men (late) beside Skr. ján-man-. Of the same sort are Gr. τελα-μών 'shoulder-belt', O.Ir. men-me 'mind' and other examples. See I § 110 p. 104.

Datives in -men-az used as infinitives (cp. -yen-az § 116 p. 363). Skr. vid-mánē 'to learn, experience' (side by side with

¹⁾ In the English translation, l. 6. of this paragraph, instead of 'hefore originally long vowels', read 'after etc'.

which we also find other cases of vid-mán-), Gr. ιδ-μεναι 'to know'. Skr. dá-manē 'to give' (cp. p. 367), Gr. δό-μεναι 'to. give'. Lat. imper. legimin-ī, in form identical with Gr. λεγέμεν-αι (see below).

-men- seems further to have been used even in the parent language as a secondary suffix: Skr. arya-mán- m. 'comrade, friend', Mid.Ir. Airem, gen. Areman Eremon, beside Skr. aryá-'devoted, attached' O.Ir. aire (gen. airech) 'princeps, primus'.

-men- and -mo-, are often interchanged from the proethnic period onwards (see § 112 p. 340 f.); and this led to a certain confusion, which can be sometimes traced in the separate languages, between the -men- forms and the substantives in -mo-which have the o-grade in the root-syllable (see § 72 p. 170). Gr. ol-μα n. 'assault' instead of *el-μα (Skr. é-man- n. 'course') through the influence of ol-μο-ς ol-μη. O.H.G. lei-mo m. 'loam' instead of *li-mo (Gr. λει-μωίν) through the influence of the form lei-m m.

In all the Indo-Germanic languages -men- was a fertile suffix, most of all in Aryan, Greek, and Latin

Aryan. Skr. tōk-man- 'young blade of corn' Avest. taox-man- n. 'bud, family, offspring'. Skr. hē-mán- m. 'impulse' Avest. zae-man- n. 'zeal'. Skr. dhā-man- n. 'statute, action, seat, dwelling' Avest. da-man- i. e. dā-man- n. 'creation, creature' (I § 200 p. 168): Gr. ἀνά-θημα etc., see above p. 367. Skr. άŝ-man- Avest. O.Pers. as-man- m. 'stone, heaven': Gr. ἄκ-μων 'anvil, thunderbolt'. Skr. nā-man- n. Avest. na-man- (ā) n. O.Pers. nā-man- n. 'name': Armen. anun etc., see above p. 367.

In secondary use: Skr. arya-mán- m. 'comrade, friend' Avest. airya-man- 'obedient' beside Skr. aryá-, see above.

Sanskrit. dhár-man- n. 'support' dhar-mán m. 'bearer', bráh-man- n. 'devotion' brah-mán- m. 'one who prays', svád-man- n. svad-mán- m. 'sweetness, loveliness'; vári-man n. vari-mán- m. 'extent'. ôd-man- n. 'undulation', ê-man- n. 'course', várṣ-man- n. 'height, surface', sád-man- n. 'seat, abode', sá-man- n. 'hymn', trá-man- n. 'protection', yá-man- n. 'course'; jáni-man- n. 'birth', bhári-man- n. 'a carrying'. hávī-man- n. 'a calling upon'. ūṣ-

-mán- uš-man- m. 'heat', ō-mán- m. 'favour, help', jē-mán- m. 'superiority'; prathi-mán- m. 'breadth'. dā-mán- m. 'giver', sō-mán- m. 'presser, preparer of the soma'. Forms like prathi-mán- were popularly connected with the parallel adjectives such as pṛthú- práthīyas-, and hence -i-man- became a secon-pary suffix, as in draḍh-imán- m. 'firmness' from dṛḍhá- 'firm' compar. dráḍh-īyas-, dhāmr-imán- m. 'dark colour, gloom' from dhāmrá- 'dark'.

Avestic. a-pišman- 'without art, without skill'. maesman- n. 'urine', dae-man- n. 'eye', pae-man- n. 'milk, mother's milk', dūn-man- n. 'cloud, vapour' no doubt = $d\bar{u}$ -man- (cp. $d\bar{u}$ -man above), beside Skr. $dh\bar{u}$ -má-s 'smoke', stao-man- n. 'song of praise, laudation', bar's-man- n. 'bundle of consecrated twigs for offering', caš-man- n. 'eye'. ras-man- m. 'army in line, line of battle': Gr. $\delta \rho \epsilon \gamma - \mu \alpha$ n. 'a stretching out, stretch'. urvās-man- 'one who makes others glad, joy-giver'.

Infinitival datives. Skr. vid-mánē, dá-manē, see p. 367 f. above. Skr. dhár-manē 'to support', trā-maṇē 'to protect'. Avest. stao-mainē 'to praise', xšnū-mainē 'to content'. In Avestic the locative also appears as an infinitive, e. g. caš-man caš-mēng 'to behold' beside dat. caš-mainē.

Remark 2. The nominative termination -mā (m. and n.) appears sometimes to have led to a transference to the feminine ā-declension; this process may have been aided by the close connexion between the -menand -mo-stems, which dates from before the Aryan period. Thus e.g. Skr. sf-mā- = sī-mān- 'boundary' (sf-mā- in its turn influenced sī-mān- so far as to give it the fem. gender), dā-mā- beside dā-man- n. 'bond' (also f., according to the grammarians; the change of gender came about in the same way as in sī-mān- f.), O.Pers. tau-mā- 'family' = Avest. taox-man-. Cp. § 114 Rem. 1 p. 348, § 122 Rem. p. 383.

Armenian. jiun snow, anun name, see above, p. 366 f.; for the phonetic changes see I § 202 p. 169. gel-mn, gen. gel-man, wool, fleece: to be compared either with Skr. vár-man-defensive armour Gr. ερ-ιο-ν wool (ν yer-) or with Lat. vellus, Goth. vulla wool (ν yel-). marmin (-min- for -men-, I § 63 p. 50), gen. mar-mn-o-y, body, flesh which is extended by the suffix -o-): Skr. már-man- n. membrum, joint, open part of the body which is especially exposed to mortal wounds.

Brugmann, Elements. II.

Greek. The history of the neuter forms is the same as in the case of the -en- and -yen-stems; see § 114 p. 350.

χεῦ-μα χῦ-μα χυ-μα, χεῖ-μα χει-μών, φέρ-μα, τέρ-μα τέρ-μων and others; see above, p. 366 f.

πνεῦ-μα n. 'breath', πνεὐ-μων (-μον-) m. 'lung'. ἄετ-μα n. ('φλόξ', beside ἀετμό-ν 'πνεῦμα' Hesych.), αὐτ-μήν (-μεν-) m. 'breath, exhalation, vapour' (ἄε-τ-μα? cp. p. 372). ή-μα n. 'missile', ή-μων (-μον-) m. 'thrower, slinger': Lat. sē-men n. O.H.G. sā-mo m. O.C.Sl. sĕ-me n. 'seed', \sqrt{s} ē-. $\mu\nu$ η-μα n. 'memorial', $\mu\nu$ η-μων (-μον-) 'mindful'. ν όη-μα n. 'thought', ν οη-μων (-μον-) 'thoughtful'.

ζεῦγ-μα n. 'bond, bridge of boats': Lat. jūmentu-m for *jūg--men-to-, common ground-form *jeug-men-. δεῖ-μα 'fear'. λεῖμμα for *λειπ-μα 'remnant'. κλῖ-μα κλί-μα 'inclination'. μῖγ-μα 'mixture'. δέρ-μα 'skin torn off, hide': Skr. dar-mán- m. 'shatterer'. έρ-μα 'ear-ring'. στοώ-μα 'something strown, bed, covering': Lat. strā-men n., common ground-form *stī-men; cp. Skr. stárī-man- n. 'a spreading out, strewing abroad' stari-man- m. 'bed'. πέλ-μα 'sole of the foot' cp. A.S. fil-men 'membrana' O.Fris. fil-men-e f. 'skin'. φλέγ-μα 'brand'. γέννα f. 'race, family' probably was neuter originally, and stands for *γεν-μα: Skr. ján-man- n. πεῖσμα 'cable, rope' for * $\pi \epsilon r \sigma \mu \alpha$ from \sqrt{bhendh} 'bind'; as to σ for ϑ see p. 372: cp. Lat. of-fendi-mentu-m. βη-μα 'step, grade, platform': Skr. vi-gaman- n. 'step', common ground-form *am-men-, \(\square\$ gem-. πέμμα 'pastry' for *πεπ-μα. ὑπό-δημα 'something fastened beneath sole' δέ-μα δέ-σμα 'bond': Skr. dá-man- n. 'bond'. al-μα 'blood', beside O.H.G. sei-m m. 'virgin honey'. old-ua 'swell of the sea'. ὄμμα 'eye, visage' for *όπ-μα. νᾶ-μα (Dor. form) 'stream', \sqrt{sna} -. βλη-μα 'missile, shot'. $\dot{\varrho}$ η-μα 'utterance' for *fρη-μα. σα-μα ση-μα 'token', to be compared no doubt with Skr. dhya--man- m. 'measure' n. 'thought', beside dhyā- 'think of' dhī-'appear, resemble, observe, think'. Dor. πã-μα 'that of which one has the disposal, over which one has power, possession', for *kyā-men-, compared with El. ἐμ-πάω bring to effect, accomplish' and with $π\tilde{v}$ -ρος (cp. πάμωχος · ὁ τύριος Hesych.) ·). σχη̄-μα 'demeanour, form'. ὄρῶ-μα 'sight'. ὅρμη-μα 'solicitude'. μίσθω-μα 'stipulated payment'.

The nom. acc. sing. neut. of one or two -men-stems ends in ρ, as in some of the neuter stems in -en- and -μen-: ημαρ, gen. ηματος, 'day', μῦμαρ μῶμαρ 'blame', λῦμαρ beside λῦμα 'pollution', τέκμωρ and τέκμωρ 'proof' (-μωρ for -mf, cp. ῦδωρ I § 366 p. 243). Cp. § 118.

κευθ-μών (-μων-) m. 'hiding-place'. $\pi v \vartheta - \mu \acute{\eta} v$ (-μεν-) m. 'depth, ground'. $\lambda \varepsilon \iota - \mu \acute{\omega} v$ (-μων-) m. 'damp place' and $\lambda \iota - \mu \acute{\eta} v$ (-μεν-) m. 'harbour'. $i \vartheta - \mu \acute{\omega} v$ (-μων-) having knowledge of' ($i \vartheta \mu o - \sigma \acute{v} v \eta$). $\hat{\varepsilon} \pi \iota - \lambda \acute{\eta} \sigma \mu \acute{\omega} v$ (-μων-) 'forgetful' (σ instead of ϑ , p. 372). $\pi o \iota - \mu \acute{\eta} v$ (-μνε-) m. 'herdsman'. Lith. $p \ddot{e} - m \mathring{u}$ m. 'herd-boy'. $\tau \lambda \acute{\eta} - \mu \acute{\omega} v$ (-μων-) 'stead fast, enduring'. $\mathring{a} \lambda \acute{\eta} - \mu \acute{\omega} v$ (-μων-) 'wandering about' ($\mathring{a} \lambda \breve{\alpha} \sigma \vartheta \alpha \iota$). $\mathring{\varepsilon} \lambda \varepsilon \acute{\eta} - \mu \acute{\omega} v$ (-μων-) 'pitiful'. $\tau \varepsilon \lambda \alpha - \mu \acute{\omega} v$ (-μων-) m. 'shoulder-belt, baldrick' properly 'bearer', \sqrt{tel} -. $\tau \varepsilon \varrho \acute{\alpha} - \mu \acute{\omega} v$ (-μων-) 'that becomes soft by boiling'. $\mathring{\eta} \gamma \varepsilon - \mu \acute{\omega} v$ (-μων-) m. 'guide'. $\varkappa \eta \delta \varepsilon - \mu \acute{\omega} v$ (-μων-) m. 'one who cares for' a person. $-\mu \acute{\omega} v$ acquired the character of a secondary suffix, just as Skr. $-i - m \acute{\alpha} n - i - \alpha \varkappa \varrho \varepsilon \mu \acute{\omega} v$ (-μων-) m. 'end fo a branch, top' from $\ddot{\alpha} \varkappa \varrho \circ \varsigma$, $\delta \alpha \iota \tau v - \mu \acute{\omega} v$ (-μων-) m. 'he who sits at meat, guest' from $\delta \alpha \iota \tau \dot{v} \circ \varsigma$.

The dative, in -μεν-αι, and the locative, in -μεν, served as infinitives. -μεναι occurs in Ionic (epic) and Lesbian. ἴδ-μεναι, δό-μεναι; see above, p. 367 f. ἔδ-μεν-αι 'to eat' (Skr. άd-man-, p. 366), θέ-μεναι 'to place' (-θημα θέ-μα, p. 367), ἀή-μεναι 'to blow', βή-μεναι 'to go' (βῆ-μα, p. 370), δύ-μεναι 'to press in, enter' (ἔκ-δῦμα 'garment taken off'), βλή-μεναι 'to strike' (βλῆ-μα, p. 370), δαή-μεναι 'to be versed' (δαή-μαν 'versed'). On the model of these were formed: φανή-μεναι τετλά-μεναι, ζευγνύ-μεναι, ἀειδέ-μεναι, εἰπέ-μεναι ἀξέ-μεναι. -μεν is found in Ionic (epic), Doric, N.W.Greek, Elean, Thessalian, and Boeotian. ἴδ-μεν, δό-μεν, θέ-μεν, ἴ-μεν, ἔμ-μεν (εἶμεν ἡμεν), τετλά-μεν, δρνύ-μεν, φερέ-μεν, εἰπέ-μεν, ἀξέ-μεν.

¹⁾ The nearest cognates of $\pi\tilde{\alpha}\mu\alpha$ are collected by J. Baunack in his Stud. I 73 f.

Corresponding to $-\tau-\mu o$ - $\vartheta-\mu o$ - $-\sigma-\mu o$ - (§ 72, 3 p. 173) we find $-\tau-\mu s v$ - $-\vartheta-\mu s v$ - $-\sigma\mu s v$ - $-\tau-\mu s v$ - occurs in $\lambda a \tilde{a} - \tau \mu a$ 'gulf of the sea', no doubt to be compared with $\lambda a u - \mu o c$ 'throat, gullet', and perhaps in $\tilde{a} s \epsilon \mu a$ $\tilde{a} v \tau \mu \eta v$. $-\vartheta-\mu s v$ -: $\tilde{\iota} - \vartheta \mu a$ 'course'. $-\sigma \mu s v$ - $\pi \lambda a \sigma \mu a$ 'image, figure' from $\pi \lambda a \sigma \sigma \omega$, $\kappa \lambda a \sigma \mu a$ 'something spun' from $\kappa \lambda a \vartheta \omega$, $\pi \epsilon \tilde{\iota} \sigma \mu a$ 'cable' for * $\pi s v \vartheta- \mu a$ (σ had not displaced ϑ in the earliest period of Greek, see I § 204 Rem. 2 p. 171), $\tilde{\epsilon} \pi v - \lambda \eta \sigma \mu \omega v$ 'forgetful' from $\lambda \eta \vartheta \omega$, $\tilde{\epsilon} \rho s \iota \sigma \mu a$ 'support' from $\vartheta \rho s \iota \delta \omega$, $\sigma \chi \iota \sigma \mu a$ 'split' from $\sigma \chi \iota \zeta \omega$, and the neuter forms in $-\iota \sigma \mu a$ and $-\alpha \sigma \mu a$ compared with derivative verbs in $-\iota \zeta \omega$ - $\alpha \zeta \omega$, as $v \sigma \iota \omega \mu a$ 'usage, institution, from $v \sigma \iota \iota \zeta \omega$, $\tilde{\iota} \sigma \pi a \sigma \iota \omega a$ 'caress' from $\tilde{\iota} \sigma \sigma \alpha \omega \omega$; also $\tilde{\iota} \sigma \iota \sigma \sigma \omega a \omega a$ 'joined work' from $\tilde{\iota} \sigma \iota \sigma \iota \sigma \omega a \omega a$

Italic. The neuter forms were often extended by -to-; see § 82 p. 249 ff.

Lat. no-men n., Umbr. nome n. 'nomen' nomner 'nominis': Skr. ná-man- n. etc.; see p. 367 above. Lat. prae-dicāmentu-m, Umbr. tikamne 'dicatione, invocatione'. Lat. testā-mentu-m, Osc. tristaamentud abl. 'testamento'. Lat. Sē-mō (-mōn-) 'seed-god', fem. Sē-mōn-ia, Pelign. Semunu 'Semonum', beside Lat. sē-men n. Umbr. ařmune dat. 'alimoni'.

Lat. nū-men, n.: Gr. νεῦ-μα 'nod'; lū-men for *lūc-men, later *lūgmen (I § 500 p. 367, § 506 p. 371¹), or for *lūc-s-men (cp. illūstri-s and lūna I § 503 p. 369): Goth. lath-mun-i f. 'flash' O.Sax. lio-mo O.Icel. ljō-me m. 'brightness, light, gleam': the ū in nū-men lū-men may be either Idg. ū or Idg. eu. crī-men: Gr. κρῦ-μα κρί-μα 'decision, sentence'. ger-men. sarmen for *sarp-men, sar-mentu-m. cul-men. sēg-men for *sec-men, sēg-mentu-m. tēgmen tēgmentu-m. āgmen: Skr. áj-man- etc., sce above, p. 367. caementu-m for *caed-mentu-m. nē-men: Gr. κῆ-μα 'something spun, yarn', √ snē-. com-plēmentu-m: cp. Gr. πλῆσμα 'filling, what fills'. flū-men flū-mentu-m. certū-men. molī-men molī-mentu-m. volū-men, statū-men, hence were formed leg-ūmen leg-ūmentu-m, alb-ūmen and other similar derivatives.

¹⁾ See footnote to p. 367 above.

regi-men regimentu-m. tegi-men beside tëgmen. of-fendi-mentu-m. monu-mentu-m. colu-men (columna) beside cul-men.

Masculine forms are rarer. ter-mō (-mōn-) beside ter-men n.: Gr. $\tau \dot{\epsilon}_{Q}$ - $\mu \omega \nu$ etc., see above p. 366. ser-mō (-mōn-). pul-mō (-mōn-).

The dat. sing. in -min- $\bar{\iota}$ was used in Latin as the 2. pl. imp. med.-pass., e. g. legimin $\bar{\iota}$ (= Gr. $\lambda \epsilon \gamma \dot{\epsilon} \mu \epsilon \nu \alpha$), sequimin $\bar{\iota}$. The restriction to the plural, and to the medio- passive meaning was caused by the indicative legimin $\bar{\iota}$ = Gr. $\lambda \epsilon \gamma \dot{\epsilon} \mu \epsilon \nu \alpha$ and = $\lambda \epsilon \gamma \dot{\epsilon} \nu \alpha$. See § 71 p. 165.

Old Irish. Neuters. sruam, anm; see above, p. 366 f. deilm 'noise'. cuirm 'beer'. gairm 'call, cry'. druim 'back' for *dros-men, compared with Lat. dorsu-m. cēmm cēim 'stepping, step', beside cingim 'I step', lēimm lēim- 'spring' beside lingim 'I spring', grēimm grēim 'progressus' beside in-grennim 'I pursue' (grend-), see I § 523 p. 380. bēim 'striking, blow' beside benim 'I strike': did this come regularly from *ben-men- or was it influenced by the form of these other nouns? With -p-men-: feid-m 'strain', fo-naidm 'bond, compact'.

Remark 3. The origin of nn in forms like nom. pl. an-mann, dat. pl. an-mannaib, is still quite obscure The latest discussion of this difficult question is by Stokes (Bezzenberger's Beitr. XI 93) and Windisch (Über die Verbalformen mit dem Character R p. 40 f)

men-me m. (gen. men-man) 'mens' for *men-o-men- (cp. Skr. mán-man- n. 'mind, thought'). The nom. in *-men-s was a re-formation like Lat. sanguts Gr. δελφίς, for *δελφίνς, cp. also O.Ir. aru, § 114 p. 352, § 115 p. 360.

Masculine and Feminine forms with pr. Celt. *- $m\bar{o}$ in the nom. sing. (cp. Gall. casa-mo, Sego-mo), gen. Ir. -mon-man dat. -main. The masculine forms appear to be all denominatives: Aire-m: Skr. arya-mán- m., see above p. 368, orbe-m 'heir' from orbe n. (which represents a ground-form *orbh-ii-o-m) 'inheritance', flaithe-m 'ruler' from flaith 'rule', dūle-m 'creator' from dūil 'element', 'brithe-m 'judge' from breth 'semence', olla-m, gen. olla-man, 'princeps poetarum' no doubt connected with oll 'great, mighty'. tala-m (gen. talman), f. 'earth' no doubt for *tf-mō, \sqrt{tel} -.

anim f. 'soul' (dat. an-min) may have been originally a -ma-stem (cp. Lat. anima-) and have been transferred to this declension through the influence of menme.

Germanic. The old variation between neuter and masculine was almost entirely obliterated in favour of the masculine. The neuter survives only in Gothic and Norse in a few examples: Goth. na-mō n. 'name' (O.Icel. na-fn n. by a transference to the o-declension, O.H.G. na-mo m.): Skr. ná-man- n. etc., see p. 367 above; O.Icel. sī-ma beside sī-me m. 'rope' (O.Sax. sī-mo m.): Skr. sī-mán- etc., see p. 367 above.

Masculine. Goth. hliu-ma 'hearing' O.H.G. hliu-mun-t 'call', Goth. stō-ma 'constituent part', see p. 366 above. O.H.G. sā-mo 'seed', see p. 370 above. O.Sax. ho-mo 'brightness', see p. 372 above. Goth. hiuh-ma 'heap'. Goth. skei-ma 'light', O.H.G. scī-mo 'brightness, sheen'. O.H.G. kī-mo 'the bursting bud'. O.H.G. glizemo 'brightness', Goth. glit-mun-jan 'to gleam' Goth. milh-ma 'cloud'. Goth. ah-ma 'spirit'. Goth. blō-ma O.H.G. bluo-mo 'bloom'. This masculine suffix was fertile only in Old Frisian and there only to a limited extent; it became denominative as in Sanskrit etc., e. g. werth-ma 'taxation' from werth 'value'.

-s-men-, like -s-tro- -s-lo- etc. (see § 61 p. 117). O.H.G. rosamo 'aerugo' for *rots-mō beside O.Sax. rotōn 'to rust', cp. O.H.G. rotamo 'redness'. O.H.G. dīhsamo 'prosperity' fram-dehsmo 'increasing prosperity', beside dīhan 'to wax great'. O.Sax. blicsmo 'flash' beside blīcan to 'gleam'. The s came from forms like O.H.G. wahs-amo was-mo 'growth' (wahs-an 'to wax') and O.Sax. brōsmo 'soft part of bread, crumb' (A.S. brys-an 'to break in pieces').

-t-men-, like -t-mo- § 72 p. 175 f. O.H.G. wi-damo 'price of the bride, dowry' from uī- 'bind'; A.S. blostma 'bloom', cp. Mid.H.G. bluos-t beside bluo-t 'bloom'.

The feminine -mon- is rare and certainly a late formation: e. g. O.H.G. bluo-ma beside the masc. bluo-mo.

Balto-Slavonic. Lith. ak-mū m. O.C.Sl. ka-my m. 'stone'. Lith. szel-mū m. 'gable' O.C.Sl. slē-me n. 'beam': cp. Lith. szel-ma 'long beam'. Lith. sé-men-s pl. m. 'seed', especially linseed, O.C.Sl. sé-me n. 'seed': Gr. η-μα etc., see p. 370 above.

In Lithuanian only masculines appear (nom. -mā gen. -meñ-s etc.); the neuter has died out in the same way as in other classes of stems. sto-mā 'stature, tallness', aug-mā 'excrescence', see p. 367 above. pē-mā 'herd-boy', see p. 371 above. rau-mā 'flesh of the muscles', no doubt to be compared with O.H.G. rio-mo 'strap, band', common ground-form *rey-men- (cp. Osthoff, Morph. Unt. IV 142). rē-mā 'heart-burn'. lē-mā 'trunk, stature'. szer-men-s pl. 'funeral meal' (no doubt from szér-ti 'to feed'). šel-mā 'sprout, plant'. tesz-mā 'udder'. āsz-men-s pl. 'cutting edge'.

O.C.Sl. brě-mę n. 'burden', vrě-mę 'time', i-mę 'name', zna-mę 'token'; see above, p. . pis-mę 'letter', \sqrt{peik} . plemę, 'stem, family' no doubt for *pled-mę, compare plodă 'fruit'. ra-mę beside ra-mo 'shoulder' (cp. I § 306 p. 241). vymę 'udder' for *vyd-mę (I § 547 p. 400 f., § 666 p. 526). cismę 'number' for *čīt-smę, cp. čislo § 76 p. 211.

plamy m. 'flame' for *pol-my, beside pol-ěti 'to burn, uri' pla-nati se 'to blaze out'. In a few other examples the only form of the nom. sing. which occurs is one which shows a transference to the i-declension; c. g. pra-men-i 'thread' (gen. pramen-e, like plamen-e); in others we have both forms, plamen-i beside plamy, kamen-i beside kamy.

Remark 4. The original weak form of this suffix perhaps appears in such examples as kaminiya kamin, which Leskien has collected in his Handb. § 43 p. 58.

VI. Suffixes in -r.

§ 118. Nom. acc. neut. in -r $(-r - \bar{r})$. We may fairly class among the elements from which noun stems were formed the -r of neuter words like Skr. tidhar Gr. $ovi \Im a\rho$ Lat. tiber (O.H.G. titar m., but there can be no doubt that it was originally neuter) 'udder' — for further examples see § 114 pp. 347, 350, § 116 p. 364, § 117 p. 371; etymologically it must be connected in most cases with the suffix -ro, in some words perhaps with -er and the comparative suffix -ero. See

§ 74 p. 180. How these forms in -r came to be included in the paradigm of n-stems (e. g. Skr. údhar gen. abl. údh-n-as loc. údh-an-i) is a question we cannot answer. The difference in meaning, which (to judge from the variation of the stem) must once have existed between the nom. acc. and the other cases, had probably disappeared before the dissolution of the proethnic community. With this we may naturally compare the loss of the distinction in meaning, which once existed over and above the difference in gender, between the stems of the masc. Skr. pt-van- Gr. $n\tilde{\iota}$ -(f)ov- and the fem. Skr. pt-va-r- $\bar{\iota}$ Gr. nt-(f)sion f. 'fat'.

In Aryan this nom. acc. form was also used for the pl., just as (e. g.) Skr. náma 'ŏroµa' and purů 'πολυ' were plural as well as singular; it also served as loc. sing., cp. loc. kárman. This plurality of function may be regarded as proethnic. In Avestic however we have a still freer use; the forms in -ar° appear indifferently for cases of the most widely different meaning; e. g. karšvar° 'division of the earth' is used for the gen. sing., dasvar° 'strength, health' for the dat. sing., as well as for the nominative.

In several branches of language the form in -r was made the basis of a new paradigm, though the change never affected any very large number of words. Thus in Avestic we have dat. sing. zafr-\vec{e} nom. pl. zafr-a gen. pl. -zafr-am from zafar throat, mouth beside gen. sing. zafan-\vec{o}; instr. pl. baevar bis from baevar myriad, Gr. \vec{e}a\var{e} blood gen. \vec{e}a\var{e}-\var{o}\var{o}\$ beside Skr. asan- n. 'blood'; Lat. aber gen. aber-is beside Skr. adhan; femur gen. femor-is beside femin-is, jecur gen. jecor-is and jecin-or-is beside Skr. yak-an; O.H.G. wazzar gen. wazzares beside Goth. vato gen. vatins 'water'.

§ 119. The Suffixes -er- and -ter-1). The two forms of the suffix are found side by side without difference of meaning,

¹⁾ The Author, Die Nomina auf -ar- und -tar-, Curtius' Studien IX 361 ff., D'Ooge, On the use of the suffixes -τας -τος -της -τα in Homer, Leipzig 1873. E. Schäffer, Über den Gebrauch der Derivativa auf tor und trix, Prenslau 1859. 1860.

like the comparative suffixes -ero- and -tero- (§ 75 p. 188 ff.). It is probable that the form -ter- arose through the addition of -er to a stem formed with a t-suffix.

The nouns in which these suffixes occur are, with comparatively few exceptions, nomina agentis or names of kindred. The former class has -ter- throughout, e. g. *jeuq-ter- 'harnesser', the latter both -er- and -ter-, e. g. *daiu-er- 'levir' and *po-ter- 'father'. -er- is also found in a few substantives which belong to neither of the two groups, as *n-er- 'man' and *us-er- 'dawn'.

The nomina agentis are masculine, and even in the proethnic period feminines were formed for them by means of -ī--iē-, e.g. Skr. jám-tr-ī Gr. yevé-teiņa Lat. gene-tr-ī-x 'she that produces, mother', see § 110 p. 336. The names of kindred were masculine or feminine according to the sex they denoted, as *po-te-r 'father', *mā-ter- 'mother'. It was not till later periods that special grammatical signs were added to mark this, and then only in a few words; e.g. Lat. jani-tr-ī-c-ēs beside Skr. yā-tar-'husband's brother's wife' Gr. slvá-teq-te 'women married to brothers'.

§ 120. The forms assumed by the suffix -(t)er- in its different grades were very numerous both in the proethnic and later periods. The so-called strong cases had -(t)er- -(t)or- -(t)or-, the weak cases -(t)r- -(t)g-.

First as regards the weak cases: -(t)r- appears before the case endings which begin in a sonant, e. g. Skr. dat. sing. pi-tr-ē dā-tr-ē, (t)g- before those which begin in a consonant, e. g. loc. pl. pi-tf-šu dā-tq-šu. The same forms of the suffix were originally regular in derivatives; e. g. Skr. dātr-t-šu loc. pl. fem. beside dā-tar- dā-tār- 'dator', bhrātq-tvā-m' brotherhood' beside bhrā-tar- 'brother'. In several languages the weak forms of the suffix were soon driven out by the strong in the declension of the -(t)er- stems, especially in nomina agentis; and all that remain to show that weak forms had ever existed in the case-system are derivatives which contain the weak stem. Compare e. g. Gr. λησ-τρ-ίς 'female robber' λησ-τρ-πό-ς 'inclined to robbery' beside ληίσ-τωρ (-τυρ-) and ληίσ-τηρ (-τηρ-) 'robber', Lat. dā-tr-ī-x

beside da-tor (-tōr-), mole-tr-īna beside moli-tor (-tōr-), Umbr. uh-tr-etie 'auctoritate' beside uh-tur 'auctor', Lith. dukr-ēlē 'little daughter', pó-dukr-a pó-dukr-ė 'step-daughter' (Pruss. po-ducr-e) beside duk-tē (-ter-) 'daughter', Pruss. swestr-o O.C.Sl. sestr-a beside Lith. ses-ū (-er-) 'sister'.

With regard to the original distribution of the strong forms of the suffix the following points may be considered certain.

- 1. The nom. sing. ended sometimes in $-(t)\bar{e}(r)$, sometimes in $-(t)\bar{o}(r)$, cp. on the one hand Gr. $\pi a r \dot{\eta} \varrho$ do $-r \dot{\eta} \varrho$ Lat. pater (I § 655, 4 p. 503), O.Ir. a-thir (I § 657, 6 p. 509), O.Icel. fa-der fa-dir, Lith. duk-te O.C.Sl. dusti (Skr. pi-ta da-ta) and on the other Gr. $\varphi \varrho \dot{a} \tau \omega \varrho \ \mu \eta \tau \varrho o \pi \dot{a} \tau \omega \varrho \ \dot{\omega} \tau \omega \varrho$. Lat. sor-or da-tor (I § 655, 4 p. 503), O.Ir. siur for sues- \bar{o} r (I § 657, 6 p. 509), Lith. ses- \bar{u} (Skr. bhrá-ta dá-ta).
- 2. A certain number of these stems had in the acc. sing. and nom. du. pl. -(t)er-, cp. Gr. πα-τέφ-α, O.H.G. fa-ter, Lith. dùk-ter-į (Skr. pr-tár-am).
- 3. There was a loc. sing. in (-er) -eri, cp. Gr. πα-τέρ-ι (Skr. pi-tár-i dā-tár-i).

Further conclusions which I think probable are as follows. All the -(t)er-stems had originally the same inflexion; the difference between -é-:-é- and '-o-:'-ō- was caused solely by difference of accent. Gr. πατήρ πατέρα: μητρο-πάτως-, πάτοςα, ανήρ: ανέρα: αγ-ήνωρ -ήνορα and so forth, just as φρήν φρένα: α-φρων a-φρονα. Moreover the same variation appears where the words are uncompounded; Gr. δω-τήρ δο-τήρ beside δώ-τωρ, έη-τήρ beside έή-τωρ and the like, and Skr. nom. da-tá beside dá-ta, pata beside pá-ta, Avest. acc. bar -tar-em = Skr. bhartár-am beside bašar-em = Skr. bhártar-am (I § 260 p. 212 f.). In Greek there is no trace of a difference in meaning between these latter pairs of forms; in Sanskrit, on the other hand, the nomen agentis as a rule has the character of a participle when the root-syllable hears the accent (the governed nouns being usually in the acc... vasuni data 'bona dans'), whereas, when the suffix is accented, it is a noun pure and simple (usually governing the gen., vásūnā data 'bonorum dator'). This distinction may be original, and

at one time have prevailed in Greek; indeed, the Lat. da-tūr-u-s vouches for the fact that these nomina agentis had a participial character in the parent language, as they actually have in Iranian. It follows that the difference of accent in this class of words may been originally based on a difference of accent in the sentence. Hence it is probable that

- 1. The acc. sing. nom. acc. du. had -(t)or- under some conditions, parallel to -(t)er- under others; cp. Gr. δώ-τος-α φρά-τος-α ἔος-ες (§ 122), Mid.Ir. siair, Goth. brō-par svist-ar O.H.G. bruo-dar, Skr. dá-tār-am svás-ār-am.
- 2. The loc. sing. always ended in -(t)-er-1, even where -(t)or- occurred in the strong cases of the same paradigm, cp. Skr. dā-tar-i (with -ā- as much as dā-tūr-i), svās-ar-i beside dā-tār-am svās-ār-am, cp. Goth. loc. ūh-min: acc. ah-man. Similarly in all the feminine derivatives in -ī- -iē- (§ 110 p. 336 f.) -ter-ī was no doubt the original form in the nom. sing.; cp. Gr. sv-πάτειρα παμ-μήτειρα (from εν-πάτειρ παμ-μήτειρ) as well as δμή-τειρα (beside δμη-τήρ).

Remark The assumption that all -ter-stems had originally the same inflexion is further supported by the Gr voc $a\bar{\omega}$ -reg from $a\omega$ -rig (just as πa -reg from $n\alpha$ -rig)

Considerable readjustment took place in Aryan and Greek in the inflexion of nomina agents which accentuated the suffix. In Sanskrit we have $d\bar{a}$ - $i\acute{a}r$ -am instead of * $d\bar{a}$ - $i\acute{a}r$ -am through the influence of $d\acute{a}$ - $t\acute{a}r$ -am; similarly in the other strong cases. In Greek, the form $-\tau\dot{\eta}e$ of the nom. sing. spread through all the cases: $\partial_0 - \tau\ddot{\eta}e_{-\alpha}$ instead of * $\partial_0 - \tau e_{-\alpha}\dot{a}$, and so forth; only a few vocatives singular are excepted, as $a\ddot{\omega} - \tau e_{-\alpha}\dot{a}$ above. On the other hand, the - $t\acute{e}r$ - of the nomina agents is preserved in the Slavonic -tel- (§ 122): nom pl. $z\acute{e}e^{-t$

Amongst the names of kindred, *bhrá-tor- (Gr. \$\phi_{\tilde{\phi}-\tilde{\phi}-\tilde{\phi}}\) seems to have been associated even in the parent language with forms that had -tér-, such as *po-tér-; e. g an acc. *bhrá-ter-m was formed beside *bhrá-tor-m. Hence in Greek we find the by-forms \$\phi_{\tilde{\phi}}\) -tipe \$\phi_{\tilde{\phi}}\) -tipe \$\phi_{\tilde{\phi}}\) -tipe \$\phi_{\tilde{\phi}}\) -tipe \$\phi_{\tilde{\phi}}\) -tipe \$\phi_{\tilde{\phi}}\) -tipe \$\phi_{\tilde{\phi}}\) and bright derivation of the side of *bhrá-tor-m, no such form as *syéser-m came into use beside *syésor-m (Skr. \$\sigma_{\tilde{\phi}}\) and form as *syéser-m came into use beside *syésor-m (Skr. \$\sigma_{\tilde{\phi}}\) and the absence of \$t\$ in the word prevented its association with forms like *po-tér- *mā-tér-. But Avestic, West-Germanic and Lithuanian ultimately brought the word 'sister'

into close connexion with the other names of kindred; thus acc Avest. xwanhar-em, O.H.G ewester, Lith. ster-i (see below).

In Latin the nominative termination -(t)ōr spread through all the cases da-tōr-em da-tōr-is etc., sor-ōr-em sor-ōr-is etc.

In Greek $-\tau\omega_{\ell}$ — is only found in the nom. sing. except in an isolated example: Hom. $\mu\dot{\eta}_{\sigma}$ — $\tau\omega_{\ell}$ — α $\mu\dot{\eta}_{\sigma}$ — $\tau\omega_{\ell}$ — ϵ_{c} .

In Gothic fadar (contrast $\pi \alpha \pi i e_{\ell} - \alpha$) was formed in imitation of bropar ($\phi e^{\alpha} \pi o e_{\ell} - \alpha$) suistar (cp $\epsilon_{0\ell} - \epsilon_{0\ell}$); in Old High German the forms with e, such as fater muoter, had prevailed over bruodar etc. before the date of the earliest monuments of the language

In Lithuanian we have sest, but acc. sest -: gen. sest -s and so forth with -er- here the analogy of dik-ter-; $(\Im v_y \alpha_{-T^2\ell^2} - \alpha)$ dukter-s etc. has influenced the forms, aided perhaps by the original loc. sing. in *-er-; (Skr. svásar-i).

Compare the relations of Ablaut in the n-stems, which are on the whole similar, § 113 p. 342 ff. and what is said in the Remark there.

§ 121. Ablaut within the root-syllable varied para passu with the variation in the suffix. *po-tér- 'father' Skr. duhitár- etc. 'daughter' have the weak-grade-vocalism; on the other hand *mā-tér- 'mother' has that of the strong grade. Cp. I § 670 p. 535. Skr. uṣ-ár- 'dawn' beside Gr. no. loc. 'early' for *āv'(o)-so- and ǎooro-v for *āv'(o)-so- (see § 122 p. 381).

In nomina agentis, the strong form of the root generally prevailed in Aryan, and that with either accentuation (da-tarand da-tár-); a few variations from this type seem to have survived from the period before varying forms were levelled; as Skr. savyē-šthar- 'the warrior who stands to the left of the charioteer' (-sthar-= *-st-tor-) beside stha-tar- stha-tar-, Avest. a-fritar- 'magician' beside Skr. prē-tár- 'benefactor, lover', Avest. yūx-tar- beside Skr. yōk-tár- 'yoker', Avest. ker'-tar- beside Skr. kar-tár- 'doer'. In Greek we have δο-τήρ: δώ-τωρ, βο-τήρ: βώ-τωρ, cp. also πο-τήρ -δετήρ β α-τήρ and $\dot{\alpha}$ φ-ήτωρ; but we also find $\delta\omega$ -τήρ ζευχ-τήρ and ἴσ-τωρ (ἴσ-τωρ) with exactly the converse accentuation. In Latin, where -ter was displaced by -tor (-tor), we have sta-tor and sta-tor, da-tor, sa-tor, condi-tor and pō-tor, Umbr. fertur (8kr. bhár-tar- bhar-tár-). In the case of in-ventor censor and the like it is impossible to say whether we have the weak or the strong grade. The Latin participles

da-turu-s etc. follow the perf. part. (da-tu-s). In Slavonic we find both the strong (da-tell, su-detell, bljus-tell) and the weak grade (žri-tell).

§ 122. Indo-Germanic. *dayyér- *dajyy- and no doubt also *dajur- (I § 155 Rem. p. 1401) 'husband's brother, brotherin-law': Skr. dēvár-, Armen, taigr gen. taiger (g for y, I § 162 p. 145), Gr. δαήρ for *δαιξήρ (I § 96 p. 90), Lat. lēvir (gen. lēvirī) for *lēver through popular association with vir (cp. also I § 369 p. 279 f.), A.S. tācor O.H.G. zeihhur (for the c and hh see Bugge, Paul-Br. Beitr. XIII 575), Lith, gen. sing. dever-s (nom. sing. dëver-i-s whence the by-form of the gen. dëver-ës; the word is also declined as an io-stem; the true nom. *deve = Skr. dēvá Gr. dāήρ no doubt dropped out of use owing to its gender and to avoid confusion with deve 'goddess') O.C.SL Skr. $n-\dot{\alpha}r$ -, Gr. $\dot{\alpha}v-\dot{\eta}\rho$, gen. $\dot{\alpha}v\delta\rho-\dot{\phi}\varsigma$, 'man', $\delta\rho-\dot{\phi}\psi$ 'human being' (Hesych.) for *vo- (I § 204 p. 170), Umbr. ner-f acc. 'proceres' ner-us 'proceribus'. Skr. uš-ár- 'early light, dawn' Gr. $\hat{\eta}_{\rho i}$ adv. loc. 'early' for * $\hat{\eta}_{\epsilon \rho - i}$ * $\hat{a}_{\mu s - er - i}$ ($\hat{\eta}_{\epsilon \rho - io - \varsigma}$ 'early'), beside which we have aor-oro-v doubtless for *aus-er- (I § 312 p. 249 f.), cp. also ayy-avoo-c 'close on morning' avo-10-v 'morrow, morning' (for *aus- or *aus-) and Lith. auszrà 'red of the morning' (§ 74 p. 180). *suésor- *suesr- *suesr- 'sister' (cp. p. 9 footnote, and § 120 Rem. p. 379 f.): Skr. svásar- Armen. koir gen. Ker (I § 560, 561 p. 416 f.), Lat. sor-or and sobr-tnu-s (I § 570 p. 428), O.Ir. sur Cymr. chwaer (for *chwear-), Goth. svistar instead of *svisar through the influence of svistr-s etc. (I § 580 p. 433 f.), Lith. sesu gen. sesers, O.C.Sl. sestr-a (I § 585 p. 439); we must no doubt class here Gr. ξορ (vocat.) θυγάτηρ, ἀνεψίος and sog-es noonhouses, suggesting Hesych. (2- for 2- I § 564 p. 421), where the meaning has changed.

*po-tér- 'father': Skr. pitár-, Armen. hair gen. haur, Gr. πα-τήρ (note its form in compounds, e. g. μητρο-πάτωρ), Lat. pater, O.Ir. athir, Goth. fadar. *mā-tér- 'mother': Skr. mātár-,

¹⁾ In this Remark a full stop should be inserted after the word 'formation'; and in the preceding paragraph (§ 155) l. 4 read 'prim. Ar. *atharun- ('fire-priest') not *atharun-', instead of 'for atharun-'.

Armen, mair gen. maur, Gr. μήτης gen. μητς-ός (the accent of μήτης no doubt follows that of the voc. μῆτες) (πςο-μήτως), Lat. māter, O.Ir. māthir, Goth. muoter, Lith. mote and móte (woman, wife') O.C.Sl. mati. Skr. duhi-tár- Gr. θυγά-της (like Skr. dami-tár- Gr. παν-δαμά-τως, p. 383) Armen. dustr (the st is obscure) Goth. daúh-tar (early Norse nom. pl. doh-tr-ix like Gr. Hom. θύγα-τς-ες) Lith. duk-tě O.C.Sl. dūšti 'daughter'.

*bhrá-tor- and later *bhrá-ter- 'brother' (cp. § 120 Rem. p. 379): Skr. bhrátar-, Armen. elbair gen. elbaur, Gr. φράτωρ φράτηρ ('member of a φρατρία'), Lat. frater, O.Ir. brathir, Goth. brōħar, Lith. broter-ẽh-s ('little brother'), O.C.Sl. bratr-ŭ (from which came bratŭ by dissimilation, as prostŭ from *pro-strŭ, Miklosich, Etym. Wtb. p. 321) like sestr-a.

Nomina agentis (in Sanskrit the acc. always has -tar-, in Gr. -700- excepting $\mu\eta\sigma\tau\omega\rho$ -, and $-\tau\tilde{\eta}\rho$ -, in Lat. all cases have -tor-). Skr. pura-ētár- 'he who precedes, guide', Lat. praetor, Vez-. Skr. věttar- 'knower', Gr. ἴστωρ ἵστωρ 'knower, witness', Lat. vīsor in-vīsor, O C.Sl. sŭ-vëstelī 'conscius, witness' (ë in place of Idg. of is not original), vegd-. Skr. yok-tar- Avest. yux--tar- 'yoker', Gr. ζευκ-τήφ 'yoke-strap' ζεύκ-τειφα 'binder (f.)', Lat. junc-tor, V jeug-. Skr. boddhar- 'he who knows, or understands something', Gr. πευστήρ-10-5 'questioning, inquiring', O.C.Sl. bljustel-i 'watchman', V bheudh-. Skr. bhar-tar-bhar-tar-'bearer, supporter, nourisher', Lat. In-fertor Umb. ar-fertur 'infertor, Skr. gán-tar- 'he who goes, comes', Gr. βα-τήρ' βαίνων, βαδιστικός (Hesych.), ἐπι-βήτωρ 'mounter, coverer', Lat. in-ventor, \(\sqrt{gem-.} \) Skr. han-t\(\alpha r \) 'he who strikes, kills, murderer', O.C.SI. že-tel-ĭ 'cutter', \(\sigma \) ghen-. Skr. śás-tar- 'he who recites', Osc. cens-tur 'censor', \(\sqrt{kens-.} \) Skr. pak-tar-, 'he who cooks, broils, bakes', Gr. πέπ-το-ια 'cook (f.)' (late), Lat. coc-tor, \sqrt{peq} -. Skr. sáttar- 'he who sits', Lat. ad-sessor, v sed-. Skr. dhā-tárdhá-tar- 'he who places, creator', Gr. 9ε-τήρ 'placer' (late), Lat. con-ditor, O.C.Sl. sŭ-dětel-ĭ 'conditor', v dhē-. Skr. sthā-tár-'standing, not moving' sthá-tar- 'charioteer' savyē-šthar- savya--šthár- 'the warrior who stands to the left of the charioteer' i. e. *-st + tar- (cp. Germ. *fir-sti- § 100 p. 297), Gr. στα-τήρ a

weight and a coin ἀπο-στατήρ 'apostate', Lat. Juppiter Stā-tor, sta-tor ob-stetr-ī-x, \sqrt{sta} . Skr. pā-tár- pá-tar- 'drinker', Gr. πο-τήρ 'drinking vessel, goblet' οἰνο-ποτήρ 'wine-drinker', Lat. pō-tor. Gr. ακ-τωρ 'leader' ἐπ-ακτήρ 'he who goes out for prey, hunter', Lat. āc-tor āc-tr-ī-x, \sqrt{ag} . Avest. zbā-tar- 'panegyrist' O.C.Sl. zva-tel-ĭ. Skr. jñā-tár- 'knower, acquaintance', Gr. γνωστήρ 'witness for the truth of a statement' (-σ- is an analogical insertion as in γνωστό-ς beside γνω-τό-ς), Lat. nō-tor, O.C.Sl. zna-tel-ĭ 'knower'.

Skr. dami-tár- 'tamer', Gr. παν-δαμά-τως 'vanquisher of all', Lat. domi-tor. Skr. jani-tár- Gr. γενε-τής γενέ-τως Lat. geni-tor 'begetter', Lat. gene-tr-ī-x.

Aryan. Skr. dēv-ár-, Skr. n-ár. Avest. n-ar- 'man', Skr. uṣ-ár-, Skr. svás-ar- Avest. xwanh-ar- 'sister' (§ 120 p. 379); see above, p. 381. Skr. ninand-ar- 'husband's sister' is an analogical formation, cp. nand-inī- the same. Here should perhaps be classed Avest. ātar- (acc. ātar-em, nom. (a re-formation) ātarš) m. 'fire'; t is in place of pr. Ar. th, as is shewn by Skr. ātharvan- and Avest. āpravan-.

Skr pi-tár- Avest. pi-tar- p-tar (1 § 473, 2 p. 349) O.Pers. pi-tar- (gen. piśa, I § 261 p. 261 p. 213) 'father', Skr. mā-tár- Avest. O.Pers. mā-tar- 'mother', Skr. duhi-tár- Avest. dug'dar-duyāar- 'daughter', Skr. bhrá-tar- Avest. O.Pers. bra-tar-brother', see p. 382 above. Skr. jámātar- Avest. zāmātar- 'son-in-law'.

In proethnic Aryan napāt- napt- 'offspring, descendant, (§ 123) was associated with the names of kindred, first in the weak cases: Skr. naptar- Avest. naptr- (cp. Czech neti below); yet the acc. sing. is Skr. naptāram Avest. naptāram, like svásāram. Skr. gen. pātyur 'mariti' like pitūr (see Wackernagel, Kuhn's Ztschr. XXV 290).

Remark. In § 114 Rem. 1 p. 348 and § 117 Rem. 2 p. 369 mention was made of the transference of nominatives in -ā and -mā to the ā-declension, we see the same thing in Prākrit, where duhidā 'daughter' and mādā 'mother' were inflected like ā-stems. Similarly, in Lithuanian in-tē 'brother's wife', and in some dialects also sēsē 'sister', which is found side by side with sesā, were declined as ē-stems

The class of nomina agentis was very fertile. Skr. upa--kšētár- 'adherent', Avest. xšae-tar- 'ruler'. Skr. ié-tar- 'conqueror'. Avest. vi-daetar- 'one who looks around, spy'. Skr. ***rô-tar- 'hearer', Avest. **srao-pr-t- f. 'hearer (f.)'. Skr. hô-tar-Avest. zao-tar- 'high priest'. Skr. stō-tár- Avest. stao-tar- 'one who sings praises'. Skr. 108-tar- jós-tar- 'lover. protector' O.Pers. dauš-tar- 'friend': cp. Gr. γευσ-τήρ-ιο-ν 'vessel for tasting, goblet', √ ĝeus-. Skr. vodhar- 'carrier, draught-horse' Avest. vaš-tar-'draught animal' (I § 482 p. 356): Lat. vec-tor-, Vyegh-. Skr. han-tár- 'he who strikes, kills, murderer', Avest. jan-tar- 'killer. slayer' O.Pers. jatar- (read jantar-) 'slayer, foe': O.C.Sl. že-tel-t, see above p. 382. Skr. bhar-tár- bhár-tar- Avest. bar-tarbāšar- ber tar- bearer, supporter (cp. § 120 p. 378): Lat. Infertor; see above, p. 382. Skr. dhar-tár- 'bearer, supporter', Avest. dere-tar- 'holder'. Skr. kar-tár- kár-tar- Avest. kere-tar-'doer'. Skr. draš-tár- 'he who sees', $\sqrt{der \hat{k}}$ -. Avest. har'-tar-'guardian, protector'. Skr. sáttar- 'sitter', Avest. aiwi-šastar-'he who sits': Lat. ad-sessor; see above, p. 382. Skr. dágdhar-'incendiary' V dhegh-. Skr. dhā-tár- dhā-tar- Avest. dā-tar-'he who places, creator': Gr. $\vartheta_{\ell-\tau}\eta_{\varrho}$ etc., see p. 382 above. Skr. må-tar- 'measurer', O.Pers. fra-måtar- 'master', vme-. Skr. da-tár- dá-tar- Avest. da-tar- 'giver': Gr. δο-τήρ δω-τήρ δώ-τως Lat. da-tor (da-tr-i-x) O.C. Sl. da-tel-i 'giver', V dō-. Skr. stha-tar- 'standing' stha-tar- 'charioteer, driver' savyē--šthar- savya-štár- 'the warrior who stands to the left of the charioteer', Avest. rapae-štar- 'the warrior who stands in the chariot': Gr. στα-τήρ etc., see p. 382 f. Skr. pā-tár- pá-tar-Avest. pa-tar- 'protector, guardian'. Skr. yaš-tár- Avest. yaš-tar- 'offerer', Vag-. Skr. vi-bhaktár- Avest. bax-tar-'divider', V bhag-. O.Pers. a-yastar- 'possessor' from Ar. yat-'strive'. Skr. sas-tár- Avest. sas-tar- 'master'. Skr. jna-tár-'knower, acquaintance' Avest. žnā-tar- 'learner, knower' (according to I § 403 p. 298 we should expect šnā-tar-): Gr. γνωστήρ etc., see above, p. 383. Skr. tra-tar- Avest. pra-tar- 'protector'. Skr. yá-tar- he who goes, is on the way'. Avest. a-snātarname of a priest who is responsible for ablutions.

Skr. dami-tár-, jani-tár-; see above, p. 383. Skr. jari-tár-'singer', Cp. Avest. aibi-jar'tar- 'praiser'. Skr. pavi-tár- 'purifier', vardhi-tár- 'increaser', védi-tar- 'knower'. Avest. daibi-tar-'deceiver'. Skr. prati-grahītár- 'receiver' grábhī-tar 'seizer'. Skr. taru-tár- táru-tar- 'subduer'. Skr. cōdayi-tár- beside cōdi-tár-'inciter'.

Towards the end of the Vedic period of Sanskrit, the nom. sing. du. pl. masc. of these nomina agentis began to be used with the present of as- 'esse' as a periphastic future (cp. Lat. datūrus sum), which became a favourite construction in the classical period. In the third person the copula was usually omitted, and the form of the nom. sing. which had become fused with the verb, was generally kept even in the first and second persons of the plural and dual. Sing. dātāsmi 'I will give' dātāsi dātā, du. dātāsvas dātāsthas dātārāu, pl. dātāsmas dātāstha dātāras. Rarely 3 sing. dātāsti, 1. du. dātārāu svas and the like.

The adjectival character of the nomina agentis created a neuter form for them in Sanskrit; thus nom. acc. sing. da-tf (in Veda also -tir, see I § 285 p. 228), pl. -tfni etc. Cp. Lanman, Noun-Infl p. 421 ff.

Armenian. Here are found only names of kindred, all of which have been already mentioned: taigr 'brother-in-law', *Eoir* 'sister', hair 'father', mair 'mother', dustr 'daughter', elbair 'brother', see above, p. 381 f.

Greek. $\delta \tilde{\alpha} \dot{\eta} \rho$ 'brother-in-law', $\dot{\alpha} \dot{\nu} \dot{\eta} \rho$ 'man', $\dot{\eta} \rho \iota$ 'early' $\dot{\epsilon} o \rho - \epsilon \varsigma \iota$ ' $\pi \rho o o \eta' \dot{\nu} o \nu \tau \epsilon \varsigma$, see above, p. 381. $\dot{\alpha} \dot{\eta} \rho$, gen. $\dot{\alpha} \dot{\epsilon} \rho - o \varsigma$, f. m. 'air', Lesb. $\alpha \dot{\nu} \dot{\eta} \rho$, compare $\alpha \dot{\nu} \rho \dot{\alpha}$ 'air'. $\alpha \dot{\nu} \dot{\eta} \rho$, $\alpha \dot{\nu} \dot{\epsilon} \rho o \varsigma$, f. m. 'aether', compare $\alpha \dot{\nu} \dot{\nu} \rho \dot{\alpha}$.

πα-τήρ 'father', μή-τηρ 'mother', θυγά-τηρ 'daughter', φρά-τηρ 'member of a φρατρία'; see above, p. 381 f. εἰνά-τερ-ες 'women married to brothers': Skr. yά-tar- (acc. -tar-am) 'husband's brother's wife' (probably for *iặ-ter-, see I § 253 p. 207), Lat. jan-tr-ī-c-ēs (§ 119 p. 377), Lith. in-tė (gen. in-tės, cp. the Remark on p. 383) 'brother's wife'; it is still doubtful what we should assume as the original form of the root-syllable; there seem to have been both a form with σ following the root-syllable,

and a form without, as in Skr. duhi-tár-: Goth. daúh-tar. γασ-τήρ 'belly'.

The nomina agentis in -τηρ-, -τορ- were a fertile class. ἴστωρ γοτωρ 'knower, witness', ἐπι-ίστωρ 'conscius': Skr. vēttar- etc.; see above, p. 382. φύ-τωρ 'begetter': Osc. Fuutr-eí 'Creatrici, Genetrici', cp. also Skr. bhavi-tar-'impending, future', \(\sqrt{bhey-.} \) βα-τήρ · βαίνων, βαδιστικός (Hesych.), ἐπι-βήτως 'mounter, coverer': Skr. gán-tar- etc.; see above, p. 382. βο-τήρ βώ-τως herdsman', πουλυ-βότειρα f. 'much-nourishing'. ἀφ-ήτωρ 'slinger, shooter': Lat. sa-tor, $\sqrt{s\bar{e}}$; some scholars add Skr. s-tr- \hat{t} 'wife' (cp. Lat. sator 'begetter') which as regards the form of the rootsyllable hears the same relation to sa-tor and -n-two as Skr. savyē-šthar- to Gr. στα-τήρ and Skr. sthā-tár- (p. 382 f.). αμαλλο--δετήρ 'sheaf-binder': Skr ni-dātár- 'fastener', $\sqrt{d\bar{e}}$. ἄχ-τωρ 'leader' ἐπ-ακτήρ 'he who goes out for prey, hunter': Lat. ac-tor. άλάστως 'not forgetful of punishment, avenying deity' beside \ddot{a} -λαστο-ς λήθ-ω. λαμπ-τήρ 'lighter'. $\dot{o}\pi$ -τήρ δι-οπτήρ 'watcher, spy'. ζωσ-τήρ 'girdle'. δια-βλήτωρ 'slanderer' (late). $\nu\rho\bar{\alpha}$ -τήρ 'mixing vessel'. $\delta\mu\eta$ - $\tau\eta\rho$ 'subduer'. $\Delta\mu\eta$ - $\tau\rho\rho$, $\delta\mu\eta$ - $\tau\epsilon\rho\rho\alpha$ 'subduer (f.)'. θηρα-τήρ θηρη-τήρ, θηρά-τωρ θηρή-τωρ hunter (θηράω), κυβερνη--τήρ 'steersman' (χυβερνάω), αὐλη-τήρ 'flute-player' fem. αὐλη-τρ-ίς(αὐλέω), νοσμή-τωρ 'commander' (χοσμέω), μισθώ-τρ-ια 'procuress' (μισθόω). ληιστήρ ληίστως 'plunderer, robber' (ληίζομαι). σημάν--τωρ 'commander' (σημαίνω). φυλακ-τήρ 'watchman' (φυλάσσω for *- $\alpha \times -(\omega)$.

παν-δαμά-τωρ, γενε-τήρ γενέ-τωρ, see above p. 383. ἀλ-ε--τρ-ίς 'miller (f.)': ἀλ- for ml-? cp. Lat. mol-i-tor.

With $-\tau\omega\varrho$ —we find only $\mu\eta\sigma$ - $\tau\omega\varrho$, Homer. acc. $-\tau\omega\varrho$ - ω , 'counsellor' (but as a proper name $M\eta\sigma\tau\varrho$ - ω), beside $\mu\eta\delta$ - $\omega\omega$.

Italic. Lat. *lēvir* modified in form by popular etymology; see above, p. 381. Umb. *ner-f* 'proceres'; see above, p. 381. Lat. *soror* for *syesōr, see above, p. 381.

Lat. pa-ter Umbr. Iu-pater 'Juppiter' Iuve patre 'Jovi patri' Osc. patir 'pater' paterei 'patri' (I § 627 p. 471) Marruc. patres 'patris', Lat. ma-ter Umbr. matrer 'matris' Osc. maatreis

'matris', Lat. fra-ter Umbr. frater 'fratres' fratrom 'fratrum'; see above, p. 382. Lat. ven-ter.

In the group of nomina agentis we may assume that -tor-had prevailed in all cases even in proethnic Italic; only the derivatives show -tr-. The formation seems to have been in active use in all dialects.

Lat. In-fertor, Umbr. ar-fertur 'infertor, flamen' acc. ars-ferturo dat. -ferture: Skr. bhar-tár-; see above, p. 382. Lat. ē-persor, Osc. Γερσορει (o to be read long) "Versori, Τροπαίω, Vuert-. cēnsor (cp. § 79 Rem. 2 p. 231), Osc. censtur keensztur (for the zs see I § 209 p. 176), 'censor': Skr. śás-tar-, see p. 382 above. Lat. In-spector, Umbr. speture 'spectori's peturie dat. 'spectoriae': Avest. spas-tar- 'watchman'. V spek-. Lat. auc-tor, Umbr. uhtur 'auctor' uhturu 'auctorem' uhtretie 'auctoritate'. Osc. embratur 'imperator', regatureí 'rectori'.

Lat. pīs-tōr pīns-tōr pīs-tr-ī-x: Skr. pēṣ-ṭar-'grinder, crusher'. fīctor. vīc-tor. duc-tor. ūs-tor. dē-sertor. tortor for *torc-tor, from torqueō. com-mentor: Skr. man-tár-'thinker', Gr. Μέν-τωρ, √ men-. tex-tor· Skr. táṣ-ṭar-'foreman, architect, carpenter', √ teĥs-. ēsor ēstr-ī-x: Skr. attár-'eater', Gr. ωμηστήρ 'eating raw food' (late) νήστιφα f. 'fasting' (late). messor. cor-rēctor. rap-tor. can-tor. al-tor. oc-cīsor, from caedō. sū-tor. sprē-tor. im-plētor. viē-tor. flā-tōr. cūrā-tor, bellā-tor, fīnī-tor.

Lat. domi-tor, geni-tor; see above, p. 383. meri-tōr-iu-s mere-tr-ī-x. dēbi-tōr. moli-tor. moni-tor.

The connexion of the Latin participles in $-t\bar{u}ru$ -s, such as da- $t\bar{u}ru$ -s, with these nomina agents can not be denied, but the \bar{u} is obscure (I § 89 p. 85).

In Old Irish only the names of kindred remain.

siur, acc. Mid.Ir. siair, 'sister'; see above, p. 381; through the influence of names of kindred in -ter- arose the forms gen. sethar acc. sethir dat. pl. sethraib.

athir 'father', mathir 'mother', brathir 'brother', see above p. 381 f. To these the word for 'uncle' was assimilated, Mod.Cymr. evi-thr O.Corn. evi-ter, cp. Lat. avun-culu-s.

Germanic. svist-ar O.H.G. swest-er 'sister', see above p. 381.

Goth. fa-dar daúh-tar brö-þar O.H.G. fater muoter tohter bruoder; see above, p. 381 f In O.H G. another word seems to have been associated with these: swiger, gen. swiger, 'mother-in-law' (Skr. śvaśrā-).

In Gothic, -tru-m (for *-tr-mi) in the dat pl. and -tr-uns (for *-tr-us) in the acc. pl. gave rise to the nom. pl. in -trjus, as broprjus, after the analogy of the u-declension. In Old High German the names of kindred were also declined as o-stems and as a-stems (according to their gender), but the feminine forms occur only in the pl., and not until a late period. Thus we have gen. sing. fateres beside fater, gen. pl. only fatera, gen. pl. tohtera beside tohter.

Of the nomina agentis we have only doubtful traces. A.S. bacestre f. 'baker (f.)' and the like, see § 110 p 336. A.S. baddor ().lcel. baldr 'chief', ().H.G. smeidar 'artifex', see Kluge, Nominale Stammbildungsl § 30. ().H.G fru-dil fri-dol m 'beloved' ().Icel fri-dill 'concubinus'. O C.Sl. prija-tel-t 'friend' Avest a-fritar- 'one who pronounces a blessing' Skr. prē-tar- 'benefactor, lover'. I must have arisen in Germanic, as in Slavonic, (-tel-t) through dissimilation, cp. murmulon etc. I § 277 p. 221; but there is difficulty in explaining the relation of the vowels in the root-syllable (cp. Brate in Bezzenb. Beitr. XI 187).

Balto-Slavonic. Lith. déver-les gen. déver-s O.C.Sl. déver-l' brother-in-law', Lith. sesu gen. sesers, also nom. sesé on the analogy of môté etc. (cp. the Remark on p. 383), O.C.Sl. sestra 'sister', see above, p. 381.

Lith. mo-tē and mo-te 'woman, wife' O C.Sl. mati 'mother', Lith. duk-tē O.C.Sl. dūsti 'daughter', Lith. bro-ter-ēli-s 'little brother'. O.C.Sl. bra-tr-ū bra-tū 'brother', see p. 382 above. Lith. in-tē (gen. intes) 'brother's wife' (O.C.Sl. je-tr-y like svekry): Skr. yā-tar- etc., see p. 385 above; a confusion with genti-s 'a relative' (m. f.) gave rise to the form gent-ē gen. genter-s or gentes 'husband's brother's wife'. In Czech the inflexion of neti f. 'niece' (= Skr. napt-t) was assimilated to that of the

names of kindred, partly in consequence of the similar ending of the nom. sing.: thus gen. neter-e, like mater-e; cp. Skr. naptar- p. 383.

The class of nomina agentis is found only in Slavonic, where it was fertile. In Lithuanian these forms were displaced by those in -ton-s = 0.C.Sl. -taji, as ar-tóji-s = 0.C.Sl. ra-taji ora-taji 'arator'; as to Lith -kle see I § 281 Rem. 1 p. 224. Slav. -tel- arose from -ter- by dissimilation; see I § 281 p. 224. -tel- without any additional suffix is still found in nom. gen. ınstr. pl., -tel-e, -tel-\vec{u}, -tel-y although the two latter forms may also be regarded as belonging to the o-decl.); elsewhere we have -tel-je-. sŭ-vësteli 'conscius, witness', bljusteli 'watchman', že-telī 'reaper', sŭ-dčtelī 'conditor', zva-telī 'caller', zna-telī 'knower'; see above, p 382 f. da-tell 'giver', see above, p. 384. prija-tell 'friend', see above p. 388. žri-teli 'offerer, priest'. vlas-teli 'commander' (vlada 'I command, rule'), 21-telt 'inhabitant', déla--teli 'worker'. sŭ-birateli 'collector'. umë-teli 'one who understands'. sŭ-vedeteli 'conscius, witness'. prosi-teli 'beggar'. goni-teli 'follower'. -iteli was also used as an independent suffix: e. g. po-dad-iteli 'lender, bail, security', po-greb-iteli 'burier'.

VII Suffixes in -t.

§ 123. The Suffix $-t^{-1}$). In the proethnic language this was a primary suffix; and it was most frequently found, as its use in Sanskrit, Greek and Latin shews, in the final members of compound words. These had the force of a participle, which was generally active and could be either an adjective or substantive. But -t- is used in this way only with roots which end in vowels, liquids, or nasals, such as $e\dot{z}$ -, $dh\bar{e}$ -, bher-, ghen-. Skr. $arth\bar{e}t$ - (artha-i-t-) busy, in haste', Lat. comes stem com-i-t- (properly one who goes with'), \sqrt{ei} -. Avest. $fratema-\bar{d}a$ -t-one set first, set in front, chief', Gr. $3\eta\zeta$, gen. 3η - τ - $\delta\zeta$, 'hired labourer', $\sqrt{dh\bar{e}}$ -. Avest. fratema-da-t- and in the rivers', Lat. anti-sti-t-, \sqrt{sta} -.

¹⁾ De Saussure, Le suffixe -/-, Mémoires de la Soc. de Ling. III 197 ff.

Here must be classed *nepōt- *nept- (Skr. nápāt 'offspring, descendant' instr. nádbhiš for *nabd-bhiš, Lat. nepōs, Mid.Ir. niae, gen. math, 'sister's son', O.H.G. nefo 'nephew, relative' Goth. nip-ji-s 'cousin, relative', O.Icel. niā-r 'offspring', O.C.Sl. net-ijī 'nephew, cousin', see I § 527 Rem. 1 p. 382, § 545 p. 399), if it belongs to the root of *pɔ-ter- 'father' and if its original meaning was 'not having (a father's) protection, belonging to the family of uncle or grandfather', and hence 'nephew' or grandson'; see E. Leumann, Festgruss an Otto von Bohtlingk 1888 p. 77 f.

Next should be mentioned noq-t- 'night' (beside *noq-ti-, cp. the suffix -tati- beside -tāt- § 102 p. 308): Skr. nák-t-(Gaedicke, Der Acc. im Veda 177, B. Kahle, Zur Entwickelung der Consonant. Decl. im Germ. 32 f.), Gr. νύξ νυκ-τό-ς, Lat. nox (which also forms i-cases), O Ir. in-nocht 'hac nocte', Goth. gen. nah-t-s dat. nah-t, O.Lith. gen. pl. nak-t-u.

We also find a few substantive numerals (with by-forms in -ti-, see § 101 p. 306 f.). *dekm-t- 'decade': Skr. daśát-, Gr. δεκάς gen. δεκάδ-ος (for the δ see p. 392), Lith. pl. deszimt-s O.C.Sl. pl. desçt-e. In this way were formed Skr. pancát- Gr. πεμπάς πεντάς 'a group of five' (I § 427 a p. 312) beside Skr. pánca Gr. πέντε 'five', and other examples.

Lastly we find a certain number of nouns in different languages with a short vowel between the root and -t-; as Skr. sravát- f. 'river', Lat. teges, gen. teget-is, f. 'covering', Goth. mitab-s, stem mitad- f. 'measure', Skr. vaghát- 'praying', Gr. agyér- 'gleaming', Lat. teres, gen. teret-is, 'turned, round, long'. Not one of these nouns appears in more than one language. Nevertheless it is natural to derive them from a common source.

In several branches of Indo-Germanic, particularly in Aryan, this suffix -t- was taken widely into use in combination with others by which it was extended. The new compound suffixes were used independently and became fertile, e. g. Skr. -t-nu-.

Aryan. Skr. arthét-, Avest. fratema-dat- practo-stat-, see above p. 389. Skr. viśva-ji-t- 'obtaining all by conquest', Avest. išasem-ji-t- 'subduing, suppressing one's wish'. Skr. deva-stu-t-

'praising the gods', Avest. ahūm-stu-t 'praising the world'. Skr. dēva-šrū-t- 'heard of the gods, audible to them'. Skr. vajra-bhṛ-t- 'bearing the thunderbolt', Avest. aš-ber'-t- 'enduring much' a-ber'-t- 'purveyor' (appellation of a priest's assistant). Skr. su-kṛ-t- 'behaving well', Avest. yās-ker'-t- 'transacting business'. Avest. taxmār'-t- (taxma-ar'-t-) 'pressing on hard'. Skr. adhva-gá-t- 'on the way, traveller', \(\sqrt{gem} \)-. Less often in uncompounded words: Skr. ri-t- 'running', hrū-t- 'injurer, foe', Avest. stū-t- 'praiser'. Moreover these -t-stems are found in Aryan as femmine abstract substantives: Skr. sam-i-t- 'hostile meeting', nr-yū-t- 'team', stū-t- 'praise, song', vṛ-t- 'company, following, troop, band', Avest. xšnūt- 'wisdom'. For the Skr. napt-napt- 'offspring, descendant' Avest. napāt- napt- (fem. Skr. napt-ī-Avest. naptar- \(\sqrt{s} \) 122 p. 383.

Extensions of this suffix gave rise to the suffixes -tya-, e. g. Skr. kftya-s 'faciendus' § 63 p. 123 f., -tmu-, e. g. Skr. kftnú-š 'active' § 106 p. 320, -tvan-, e. g. Skr. kftvan- 'effecting' § 116 p. 364. Compare Skr. mg-t-yú-š 'death' § 105 p. 318 f.

Skr. nák-t- 'night', see above p. 390. Skr. dašát- 'a group of ten' pancát- 'a group of five', see above, p. 390.

A few Sanskrit nouns have -at--it-. sravát- f. 'river'. vahát- f. 'stream'. saścát- f. 'stopping, check'. vēhát- f. 'a cow which yeans prematurely, casts'. vāghát- 'praying, one who prays'. sarit- f. 'river, brook'. yōšít- f. 'girl, maiden'. harit-'tawny'. There is one word in -út-: marút- name of the stormgods.

Greek. $\Im\eta\zeta$, gen. $\Im\eta$ - τ - $\delta\zeta$, 'hired labourer', see p. 389 above. $\pi\lambda\omega\zeta$, gen. $\pi\lambda\omega$ - τ - $\delta\zeta$, 'swimmer' name of a fish. $\omega\mu\sigma$ - $\beta\varrho\omega\zeta$, gen. $-\beta\varrho\omega$ - τ - $\delta\zeta$, 'devouring raw flesh' (\sqrt{ger} -, cp. I § 306 p. 242). $\partial\gamma\nu\omega\zeta$, gen. $-\gamma\nu\omega$ - τ - $\delta\zeta$, 'unknown, not knowing'. $\pi\varrho\sigma$ - $\beta\lambda\eta\zeta$, gen. $\beta\lambda\eta$ - τ - $\delta\zeta$, 'thrown forward, springing forward, prominent'. $\delta\varrho\omega$ - $-\kappa\mu\eta\zeta$, gen. $-\kappa\mu\eta$ - $-\delta\zeta$, 'subdued by the spear'.

νύξ, gen. νυκ-τ-ός, 'night', see p. 390 above.

dexáς, πεμπάς πεντάς, see p. 390 above. So also έπτάς 'a group of seven' ground-form *septm-t-, εννέας 'a group of nine',

συάς τριάς (this word cannot be compared with Lat. triens, gen. trient-is), έξάς etc. In I § 238 p. 199, § 469, 7 p. 346 something has been said of the -δ- in these forms. In the Indo-Germanic case-system (dekmt-*septmt- and so forth) there was a variation between t and d, e. g. dat. *dekmt-ai, instr. *dekmd--bhi(s). The only question is whether the Gr. -δ- arose from an assimilation of the cases with t to this latter form either in Greek or earlier, or whether the δ was a special Greek developement, due to the terminations -α; -ασι, which also belonged to the original d-stems (§ 128). The latter explanation now seems to me the more probable Cp. λ άταγ- § 130 Rem

ἀργέτ- and ἀργῆτ- 'gleaming' the nom was perhaps originally -ēt, gen. -et-os and so forth (cp. below A.S. hæle 'hero' for pr. Germ *χαlέρ) γέλης, gen. -ητ-ος, m. 'runner, courser', ἔχης m. 'possessor', λέβης m. 'cauldron, bowl'.

Italic. Lat. com-es, anti-stes, nepōs (gen. nepōt-is etc.; the weak form of the stem appears in nept-i-s), see p. 390 above. sacerdōs, gen. -dōt-is, for *sácro-dō-t- I § 633 p. 473 f.; where it must be remembered that -dō-t- can be derived not only from \sqrt{d} ō-, but also from \sqrt{d} bē (cp. Gr. 9ω - μ o- ς etc. I § 315 p. 254). locu-plēs, gen. -plē-t-is, whose original meaning has not been clearly determined (see Corssen, Krit. Nachtr. 253). man-suēs, gen. -suē-t-is (beside mān-suē-tu-s). Add in-gen-t-, if it originally meant 'unknown, unheard of', and then 'extraordinary, huge', and so comes from \sqrt{g} en- 'know' (Danielsson, Pauli's Altital. Stud. IV 149 f.).

Lat. nox, see above p. 390.

With -et-: teges (gen. teget-is) f., seges f., merges f.; teres, hebes. An isolated form is caput, gen. capit-is.

Remark 1. With -it- eques (gen equit-is) m. (equo-s), pedes m (pss), voles m. (volu-m), miles m., circes m. (circu-s), palmes m. (palma), ales subst. m. and adj. (āla). K. Walter (Kuhn's Ztschr. X 194 ff.) holds that these correspond to such Greek denominatives as $i\pi\pi d-\tau a$ (eques) $2\gamma e^{i}-\tau \eta - \epsilon$ (§ 80 p. 240). There seems to me to have been a confusion in Latin between $t\bar{a}$ -stems and compounds with -i-t- 'going' (see com-i-tabove), after the vowels preceding the -t- had become indistinguishable through phonetic change. The compounds attracted the $t\bar{a}$ -stems into their

own consonantal declension, a process which was assisted by popular etymology. But it is doubtful whether all these forms (eques etc.) were ta-stems to start with. It may certainly be assumed of a few examples, such as ped-it-, that (like com-es) they were real compounds of -i-t- 'going'.

Old Irish. niae, gen. niath, (Mid.Ir.) 'sister's son', in-nocht 'hac nocte', see p. 390 above.

With -et-: cing-, gen. cinged, 'hero, warrior' Gall. Cinges -etis Cinget-o-rīx, traig 'foot', cin 'debt', luch 'mouse'. Compare Gall. acc. pl. Namnet-as, and further (with ă) Atrebăt-es (beside O.Ir. atreba i. c. ad-treba 'possidet, habitat') as well as Ir. ascad-(nom. ascae) 'rival, enemy' arad- 'charioteer'; in these words it is difficult to determine the original form of the suffix.

Germanic. O.H.G. nefo 'nephew' for *nefo(d) has been attracted into the n-declension: Skr. napat etc., see p. 390 above. O.H.G. nift 'neptis, privigna' = Skr. napt-t.

Gen. sing. Goth. nah-t-s O.H.G. naht-e-s, dat. Goth. O.H.G. nah-t etc. (nom. Goth. naht-s O.H.G. naht 'night'). Skr. nák-t-etc., see above p. 390. In Germanic the various cases of this word followed different declensions.

Remark 2 Consonantal cases are found in the declension of the feminine nouns Goth. vaih-t-s 'thing' brus-t-s 'breast' as from naht-s; and also from spairp-s (spair-d-) 'race-course' dulp-s (dul-p-) 'feast' The two latter should be compared with such Sanskrit fem forms as vi-t-sti-f-(see p 391), if their consonantal inflexion is original

There is a class of nouns which show a vowel before the -t- (pr. Germ. -p- or -d-, following always the position of the accent), which have abandoned their old consonantal inflexion more or less completely. Goth mitap-s (st. mitad-) f. 'measure', beside O.Sax. metod O.Icel. myotud-r m. 'measurer, orderer, artist, creator'. O.H.G. helid A.S. hæled (also hæle, an old nom. without s, for *xalép) O.Icel. hold-r 'hero'. O.H.G. hehhit 'pike', sceffid 'creator', leitid 'leader'. In Norse this class (nomina agentis) was fertile: e. g. hatu-dr hotud-r 'hater', skapadr 'creator' framid-r 'gestor, tributor, dator'.

Goth. mēnop-s (dat. mēnop, pl. nom. acc. mēnop-s) O.H.G. mānod O.Icel. mānad-r (pl. mānad-r m. 'month'. The nominative form *mēno(p) gave rise to Goth. mēna O.H.G. māno, which

then developed n-cases like nefo. In this word -t- was a secondary suffix, and so also in Goth. veitvop-s (veitvod-) m. 'witness'; this form will be discussed below in § 176.

Balto-Slavonic. The Lith. nom. sing. mënû (gen. mënesio) may, with O.H.G. māno, be referred to *mēnōt.

Lith. pl. deszimt-s O.C.Sl. deset-e; see p. 390 above.

Remark 3 The Slav masc. lakutt 'elbow, ell', nogutt 'ungus', pecatt 'seal' form cases according to the consonantal declension, e.g. gen. pl. lakutu nom. pl. pecat-e. Have we here a secondary transference to this declension?

- § 124. The Suffixes -tat- and -tat- formed feminine abstract substantives from Adjectives and Substantives, and had in the proethnic and later periods the parallel forms -tati- and -tati-. They have been discussed in § 102 p. 308 ff.
- § 125. The Suffix $-nt^{-1}$). In all periods this suffix formed all the active participles excepting that of the Perfect (§ 136). In most of the separate groups of languages it has remained in living use down to the present day.

nt- participles became simple nouns in all the languages, though more rarely in some than in others. They became partly adjectives pure und simple (with comparative and superlative), such as Mod.H.G. reizend 'charming' and partly substantives, such as Mod.H.G. freund 'friend'. This change from one part of speech to another has taken place at every stage in the development of the Indo-Germanic languages. Thus for example Mod.H.G. cahn (Lat. dēns) had become a substantive in the proethnic period, freund (Goth. frijūnd-s) in

¹⁾ H. Ebel, Das Suffix -ant und Verwandtes, Kuhn's Ztschr. IV 321 ff. M. Bréal, Origine du suffixe participial ant, Mém de la Soc. de lingu. II 188 ff F. Baudry, Le t du suffixe participial ant, ibid 393 ff. O. Bechstein, De nominibus Latinis suffixorum ent- et mino- ope formatis, Curtius' Stud. VIII 835 sqq (I have not been able to work through Ch. Bartholomae's essay, Die ar Flexion der Adjectiva und Participia auf -nt-, which has just appeared in Kuhn's Ztschr. XXIX 487 ff, so as to make use of it for the following sections, but a cursory survey has shown me, to my great satisfaction, that we have arrived at the same conclusions on certain main points).

proethnic Germanic, heiland (A.S. hælend) in proethnic West-Germanic, and der vorsitzende (O.H.G. furi-sizzando) 'president' in High German. Compare § 144.

-nt- is sometimes added immediately to the root-syllable, e. g. *s-nt- 'being' \sqrt{es} - (Skr. s-ánt- s-at-), sometimes to stems having a tense-determinant, e. g. pres. *qn-ny-nt- \sqrt{qei} - (Skr. ci-nv-ánt- ci-nv-at-), *rud-ó-nt- \sqrt{reud} - (Skr. rud-á-nt-), *bhéudh-o-nt- \sqrt{bheudh} - (Skr. $b\bar{b}dh$ -a-nt-), fut. * $d\bar{o}$ -szó-nt- $\sqrt{d\bar{o}}$ - (Skr. $d\bar{a}$ -syánt-).

Remark 1. It is a plausible hypothesis that the 3. pl. in -nti and -nt (*rudó-nti = Skr. rudú-nti *é rudó-nt = Skr. d-rudan, cp. Lat. rudu-nt) is simply the bare stem of this participal formation, to which -i was sometimes added on the analogy of the 3 sing. in -ti beside -t etc. If so, the 3 pl. perf (Gr. leldyx-ŭai -aai, Goth. vil-un) was doubtless formed originally with some other suffix; and as a matter of fact the nt- suffix is not used in that tense in Aryan

The original variation of ablaut is on the whole clear:

In participles formed from non-thematic verbal stems, the suffix varied between -út- and -ut- in the parent language; as Skr. sing. acc. s-ánt-am ci-nv-ánt-am gen. s-at-ás ci-nv-at-ás pl. loc. s-át-su ci-nv-át-su (instead of *s-at-sú *ci-nv-at-sú), cp. I § 226 p. 193, § 230 p. 196 etc.

With thematic stems, on the other hand, the suffix assumed the forms -ό-nt- and -nt-; as Skr. rudá-nt-am rudat-ás rudat-su (instead of *rudat-sú) Gr. Γιδόντι-τα *Γιδατ-ο΄ς *Γιδατ-οι (replaced by Γιδόντος and Γιδόνοι Γιδοῦοι). It is certain that -ό-nt- and -nt- were original; but it is still a little doubtful whether the paradigm also contained -e-nt-. The nom. sing. ended partly in -o-nt-s (and under certain conditions perhaps in -e-nt-s), partly in -ōn (Gr. φέρων O.C.Sl. bery; there was no loss of -t, contrast εγνον for *ε-γνω-νι I § 611 p. 461).

Remark 2. Special evidence for a form -e-ni- beside -o-ni- and -piis given by Mid.H G. zint O.Icel tind-r 'tooth, prong' = *d-en-i- beside
*d-on-i- (O.H.G. zan, Gr. $\partial dovr$ - etc.) and *d-pi- (Goth. tunp-) It is possible to assume (with B. Kahle, Zur Entw. der Conson. Decl., 13) that
the loc. sing. was originally *déni(i), cp. loc. sing. -en(-i) -men(-i) § 113
p. 344 and -(i)er-i § 120 p. 379. Another view is also possible. *rud-é-nimay once have existed beside *bhéud-o-ni-, *d-é-ni- beside *'-d-o-ni- as $\varphi_{\theta^{-1}r^{-2}}$, beside $d-\varphi_{\theta^{-1}r^{-2}}$ § 113 p. 343 f. and $\pi_{\alpha^{-1}}$ fees beside φ_{θ}

unrea-varage-es § 120 p. 378 while in the -nt- stems also in either case the loc. sing may have had -e-, *dent-(i). This latter assumption would explain very simply the varying declension of these stems in the different languages. Observe especially that in this case there would be no necessity to suppose any levelling of different forms of the stem in participles like Lat. rudëns rudentis etc., inasmuch as rudent- would come as regularly from *rudént- as from *rudent-.

§ 126. Indo-Germanic. Participles. *bhér-o-nt- *bher-nt-, beside *bhér-e-ti 'fert' Skr. bhárant- bhárat-, Gr. φέρων (-οντ-), Lat ferens (-ent-), Goth. bairand-s (-and-), O.C.Sl. bery (*-at-). *dorkézo-nt-, from the causative *dorkéze-ti 'causes to see', V derk-: Skr. daršáyant- 'causing to see' Goth, ga-tarhjand-s 'distinguishing'; Skr. tyājáyant- 'bidding one abandon something' Gr. σοβέων 'driving away quickly, scaring off', Skr. nāśáyant-'causing to disappear, destroying' Lat. nocens from *nocent-(indic. noceō) *rud-6-nt-,1) *rud-nt- from *rud-é-ti flaments, howls': Skr rudánt- rudat- Lat. rudēns (-ent-); Skr. vidánt-'finding' Gr low'r 'seeing' Goth. vitand-s 'knowing'; Skr. giránt- O.C.Sl. žíry 'swallowing' common ground-form* grr--ó-nt-, V ger-; Ski. krntánt- 'cutting off' Lith. krintās (-ant-) 'falling off'. *dō-sió-nt-, from *dō-sié-ti fut. 'he will give': Skr. dāsyánt- Inth dűscs (-ent-) *uē-nt- (the stem doubtless had this form in all the cases; for Aryan vat- in the weak cases see § 110 p. 337), from *yé-ti 'blows' (without vowelgradation): Skr. vá-nt-, Gr. asis a(f)err- for *a(f)nrr-; add Lat. vent-u-s Goth. vind-s 'wind', which have been extended by -o-. *sthά-nt- *stənt-, from *stά-t(ι) (Lat. sta-t, Skr. ú-sthā-t Gr. ĕ-στη): Skr. stá-nt-, Gr. στάς (σταντ- may regularly represent either form of the stem), Lat. stans (stant-, as in Greek); *do-nt- *do-nt-, from do-t(1) (Lut. da-t instead of *do-t, Skr. á-da-t): Gr. dovs (δοντ- for *δω-ντ- or instead of *δα-ντ-, see I § 109 p. 102), Lat. dans (da-nt- = *da-nt-). In the following examples the tense-stem ends in a consonant. *s-nt-*s-nt-, beside *és-ti 'is': Skr. s-ánt- s-at; in Greek the only trace of the orig. stem is *s-nt- in the fem. Dor. &assa i. e. *&(s)-ar-la § 110 p. 337

¹⁾ Or *rud-é-nt-, under other (more primitive) conditions, see § 125 Rem. 2. So also in the cases which follow.

(elsewhere we find new formations, such as Dor. έντ-ες Ion. ἐόντ-ες Att. ὄντ-ες), Lat. prae-sēns (-sent-), Pruss. emprīki-sins 'present' (dat. -sentismu). *dé-d-nt- *dhé-dh-nt- (-nt- no doubt in all the cases), from *dé-dō-ti 'gives', \$\sqrt{dō}\$-, *dhé-dhē-ti 'ponit', \$\sqrt{dhē}\$-: Skr. dádat- dádhat- (acc. dádat-am dádhat-am), Gr. διδόντ- τιθέντ- new formations in place of *δίδατ- *τιθατ-(J. Schmidt, Kuhn's Ztschr. XXVII 394 f.). *qι-nu-nt- *qi-nu-nt-, from *qi-néu-ti- \$\sqrt{qe}\$-: Skr. cinv-ánt- cinv-at- 'gathering, arranging', šak-nuv-ánt- 'being able'; in Greek we have a reformation ἀγ-νύ-ντ- 'breaking' taking the place of *άγ-νν-αντ-1) *άγ-νν-ατ- which would correspond to the 3. pl. ἀγ-νύ-āσι. *mγ-n-nt- *mγ-n-nt- *mγ-n-nt- from *mγ-nā-ti, \$\sqrt{mer-}\$ Skr. mγ-n-ánt-mγ-n-at- 'grinding'; Gr. δαμ-ν-άντ- (nom. δαμνάς) 'taming', where this strong form of the stem is carried through the paradigm.

A number of participles of this kind became simple nouns even in the parent language. Skr. jára-nt- 'frail, old,

¹⁾ In this section, as in Vol I § 235 p 198 f, I have regarded -avas the regular phonetic representative of original $-\dot{n}$. This view has been recently attacked by Kogel in the Literal Centralbl 1888 Sp. 1380, in his cuticism of Burghausei, who maintained (as I do) that έδοι (for *ε(n)αντι) was the normal form of the 3. pl of the 100t es-, the comparison Skr sánti = Gr eloi (for *derri) = IIG sind '18', says our clitto, 'almost universally (99) accepted'. In view of this, I am bound to call attention to the evidence of the word $n-dvr-= \text{Idg. *} ky-\mu/= \text{ which}$ is shortly to be mentioned in the text; a form which is of especial importance from its isolation, and which in my opinion decides the question of the representation of Idg. in Greek distinctly in favour of av Can any one maintain the alternative that in the proethnic period of Greek * π -irr- became π -arr- through the influence of the weak form * π -ar-*ky-nt-? This form disappeared in that very period, and in other instances of levelling between different cases it is the reverse process and that only that has been established — e. g. -frr- for -far- on the analogy of -fert-, $\varphi_{\ell-\varepsilon-\sigma\ell}$ for $\varphi_{\ell-\alpha-\sigma\ell}$ on the analogy of $\varphi_{\ell\varepsilon\nu-}$. Nor are the objections urged by Meringer (Ztschr. f. österr. Gymn. 1888 p. 149 f.) against my theory at all more serious. I hope to find an opportunity elsewhere of dealing with his arguments in detail; suffice it here to say, that in maintaining as he does (p 150) that the e of the Indo-Germanic sound en, which he and J. Schmidt assume in place of v, 'naturally' became a in Aryan, he has completely overlooked the fact that before this 'n the Aryan L-sounds would necessarily appear as c-sounds, which no more happens here than it does before ir = Idg. rr.

hoary', Gr. γέρων (-ορντ-) 'old man'. Skr. šá-švant- šá-švat-'complete, whole, every' for *sú-svant- (I § 557 p. 413), Gr. πάντ- (πᾶς) α-παντ- (α-πας) 'all, every', Idg. *ku-ýt- *ku-ýt- originally perhaps 'coming to fulness', compare Skr. śva- 'swell out' Gr. xvéw 'am pregnant' xvog 'fetus' (to the same root belongs Dor. πã-μα § 117 p. 370 f.); cp. Goth. all-s § 66 p. 147 and Lat. omni-s § 95 p. 286. Skr. br-hant- br-hat- 'exalted, high, great' fem. brhat-i, O.Ir. Brigit f. ('she who is exalted'), see § 110 p. 337. *d-o-nt- *d-nt- 'tooth' (cp. § 125 Rem. 2 p. 395 f.) from Ved- 'eat': Skr. dánt- dat- (dat-ás dad-bhíš), Gr. οδόντ- nom. οδούς and οδών; *δατ- appears in οδάξ § 86 p. 256, § 88 p. 265, Lat. dent- nom. dens (Osc. dunt- = dont- is uncertain, see Danielsson, Pauli's Altital. Stud. III 184), O.Ir. det (Mod.Cymr. dant) dat. dēit, Goth. tunp-u-s O.H.G. zan (see p. 402 f.), Lith. dant-i-s (we still find gen. pl. dant-ū beside dancziū) 1), it seems more probable that Gr. Lesb. Edovres was a re-formation, the original word being altered on the analogy of ¿δω, than that a by-form *éd-o-n-t- 'tooth' should have existed side by side with *d-on-t- in Indo-Germanic; the o- of odoo's however has yet to be explained; the theory of J. Schmidt (Kuhn's Ztschr. XXV 51) and G. Meyer, (Gr. Gr.² p. 306) does not satisfy me.

Aryan. Skr. váh-a-nt- Avest. vaz-a-nt- (nom. váhan vazas) 'vehens': Lat. vehēns, Goth. ga-vigand-s, Lith. vežās O.C.Sl. vezy, common ground-form *uégh-o-nt-, beside indic. *uégh-e-ti 'vehit'. Skr. dhāráya-nt- Avest. dāraya-nt- 'holding', beside indic. dhāráya-ti- dārayeiti; Skr. vāháya-nt- 'causing to ride, causing to run': Gr. òzéw' causing to drive, ride', Goth. vagjand-s 'setting in motion'. Skr. náś-ya-nt- Avest. nas-ya-nt- 'becoming lost', beside indic. náś-ya-ti nas-yeiti. Skr. prchá-nt- Avest. per'sa-nt- 'asking': Lat. poscēns for *por(c)-scent-, beside indic. prchá-ti per'saiti poscit ground-form *pr(k)-ské-ti, \(\sim \) prek-. Skr. vindá-nt- Avest. vinda-nt- 'finding', beside indic. vindá-ti vindaiti, \(\sim \) ueid-.

¹⁾ I see no sufficient reason for doubting that in danta we still have the old -nt-stem (Brückner, Archiv für slav. Phil. III 247) grinda beside grindžiā from grindi-s 'deal board', only shews that the word has been influenced by the analogy of such forms as danta.

Skr. udan-yá-nt- 'streaming' beside indiç, udan-yá-ti. Skr. vak-šyá-nt- Avest. vax-šya-nt- fut. 'about to speak', beside indic. vak-šyá-ti vax-šya-nt. Skr. vá-nt- Avest vå-nt- 'blowing', beside indic. vá-ti vāiti: Gr. áɛıç, see above p. 396. Skr. sná-nt- 'washing oneself, bathing', beside indic. sná-ti: Lat. nāns. Skr. s-ánt- Avest. h-ant- 'being, true', beside indic. ás-ti as-ti 'is'. Skr. y-ánt- Avest. y-ant- 'going, coming', beside indic. é-ti aeiti. Skr. dád-at- 'giving, dádh-at- ponens', Avest. daāant- 'giving, ponens'. beside indic. Skr. dáda-ti dádha-ti Avest. daāaiti; the Avestic form was a new formation, see above, p. 397. Skr. su-nv-ánt- Avest. hu-nv-ant- 'pressing out', beside indic. su-nō-ti hu-naoti. Skr. krī-n-ánt- 'buying', beside indic. krī-nā-ti.

In proethnic Aryan, participles like vá-n-t- blowing lost their nasal in the weak cases on the analogy of sánt-am: sat-ás etc. Compare § 110 p. 337. Beside Skr. mahat- Av. mazat- (mahat-á mahád-bhiš, mazaþ) great we have a remarkable form Skr. mahánt- Avest. mazānt- (mahánt-am, mazānt-em). Compare with it the Vedic acc. mahá-m and such compounds as mahā-grāmá-s great host. mahānt- is doubtless a contamination of mahan- (mahān-) and mahat-; compare § 135.

On the whole Sanskrit has preserved faithfully the vowel-gradation of proethnic Aryan; e. g. sing. acc. prchá-nt-am su-nv-ánt-am instr. prchát-á su-nv-ád-bhiš. On the other hand, we find in Avestic the strong form of the stem constantly transferred to the weak cases, as gen. pl. jasent-am contrasted with Skr. gácchat-ām, dat. pl. berezenbyō contrasted with Skr. brhád-bhyas.

Participles used simply as nouns. Pre-Aryan: Skr. járant-, Skr. šá-švant-, Skr. brhánt-, Avest. ber'zant- 'exalted, high, great', Skr. dánt- 'tooth' (Avest. dant-an- has the -en- which is so common in names of parts of the body, cp. § 114 p. 345 ff.); see above, p. 397 f. Aryan: Skr. mahnt- Avest. mazānt- 'great', see above, Skr. pršant- 'spotted, dappled', dhršánt- 'courageous, bold', rhánt- 'small, little' (the opposite of brhánt-), Avest. sao-šya-nt- fut. part. 'who will help, saviour, preserver'.

Greek. Participles. ὁέων (-0-ντ-) 'flowing', beside indic.

φέει φεῖ: Skr. sráv-a-nt, √ srey. φορέων 'bearing', from φορέω φορω: Skr. bharáya-nt-, V bher-. πέψων (-0-ντ-) fut. 'about to cook', from πέψω, γ peq-. λιπών (-ο-ντ-) 'leaving', from ε-λιπ-ον: Skr. ric-á-nt- Vleyq-. γνούς (-όντ-) 'learning' for *γνω-ντ- (I § 611 p. 461), from ε-γνω-ν; μιγείς (-έντ-) 'mixed with, united with for *μιγη-ντ-, from ε-μίγη-ν. τεκταίνων 'making', from τεκταίνω for *τεκταν-μω. τζμάων 'honouring', from τζμάω. δουλόων 'subjugating', from δουλόω. στάς (στάντ-) 'placing oneself, being in a position', beside ε - $\sigma \tau \eta$ - ν ; see p. 396 above. π - $\tilde{\alpha} \varsigma$ (acc. π -áv τ - α gen. π -av τ -óg) 'complete, all' for *ky-át-, see p. 398 above; the indic. would perhaps be *kėy-ti. πέψας (-αντ-) part. aor. 'cooking', beside $\iota - \pi \varepsilon \psi - \alpha$, instead of * $\pi \varepsilon \pi - \sigma - \alpha \nu \tau - \pi \varepsilon \pi - \sigma - \alpha \tau - =$ *peq-s-ήt- *peq-s-ηt- or perhaps instead of the single form *πέπ- $-\sigma - \alpha \tau - = p \dot{e}g - s - \mu t$ (which may have been regular in all the cases); the latter view is supported especially by Ved. nom. sing. dhákšut (dah- 'burn'). τι-θείς (-έντ-) 'placing' contrasted with Skr. dádh-at-; see above, p. 397. ἀγντς (-ύντ-) 'breaking' (trans.) contrasted with Skr. śak-nuv-ánt-; see above, p. 399. δαμ-ν-άς (-άντ-) 'taming', see ibid.

In Greek only a few traces remain of the different forms due to the original vowel gradation. Beside φέφοντ- a form *φέρωτ- = Skr. bhάταt- is implied in Herael. loc. pl. πρασσόντασσι and the like: such a form as *φερασσι for *φερατ-σι (Skr. bhάταt-su) would be altered to φερόντ-ασσι through the influence of φέφοντ- in the other cases. Dor. έασσα (Cret. dat. λάττα) = Skr. s-at-t has been already mentioned on p. 396. If we may trust a few corrupt glosses in Hesychius, a form fexat-, fem. α-έκασσα once existed beside έκών έκόντ-ος willing. See R. Kögel, Paul-Br. Beitr. VIII 116, J. Schmidt, Kuhn's Ztschr. XXV 590 ff.

Remark 1 It is very questionable whether $\Re e_{\mu\mu\alpha\sigma\sigma\alpha}$ furnace, stove' comes directly from the partic. $\Re e_{\mu\nu}$ warming', as some maintain. It is important to notice that we have the parallel form $\Re e_{\mu\alpha\nu}$. Cp. πe_{ν} beside πe_{ν} - πe_{ν} -

Participles used simply as nouns. Pre-Greek: γέρων, πᾶς, οδούς, see p. 398. Greek: δράκων 'dragon' (δρακών part. 201.),

ἄρχων 'ruler', κρείων 'ruler' (εὐρυ-κρείων 'ruling over wide realms'), μέδων 'counsellor, lord' (εὐρυ-μέδων): Goth. mitand-s 'measuring', ὁρίζων 'the bounding line, horizon'; ἐκών 'willing', φαέθων 'shining, bright', μέλλων 'future'.

Italic. Participles. Lat. sedēns (-ent-), Umbr. zeřef serse 'sedens'. Lat. prae-sēns, Osc. praesentid 'praesente'. Lat. dūcēns: Goth. tiuh-a-nd-s 'drawing', √ deuk-. agēns: Skr. áj-a-nt- Gr. ἄγων, √ ag- 'agere'. monēns for *moneient-, beside moneō (I § 134 p. 121): Skr. mānáyant- honouring', √ men-remember, think'. cōn-spiciēns· Skr. paś-ya-nt- 'seeing', √ spek-rudēns: Skr. rud-á-nt- 'lamenting', √ reud-. vorrēns (verrēns): O.C.Sl. vrīchy 'threshing', √ uers-. rumpēns: Skr. lumpá-nt-breaking'. im-plēns, beside im-ple-t (plē-). flāns, beside fla-t (flā-). albēns, beside albe-t. plantāns, beside planta-t. stāns, dāns, see p. 396 above. mi-nu-ēns ster-nu-ēns may represent immediately the original forms in -nu-ūt--nuu-ūt-; and similarly li-nēns ster-nēns (li-n-ent- ster-n-ent-), may be directly compared with Skr. my-n-ánt- Gr. δαμ-ν-άντ-; see above, p. 397.

Few traces can be found of vowel gradation in the stem. If the form -e-nt- did not ever occur beside -o-nt- -nt- in the original paradigm of the participles from thematic stems (see \$ 125 Rem. 2 p. 395 f.), then in all the examples of participles of this class in Latin, -ent- must be due to an assimilation of all the cases to those with Idg. -nt- (e. g. gen. rudent-is = Skr. rudat-ás). The grade -o-nt- is still seen in eunt-is etc. beside iens, flexu-nt-es beside flexentes, Roman knights on active service, voluntas for *volont-i-tas beside volēns, and other examples; see Bechstein in Curtius' Stud. VIII 344. 348. 352; the forms ferundu-s faciundu-s also are indirect evidence for o-ntin the partic.; see § 69 p. 162. In the participles from nonthematic stems, such as prae-s-ent-, -ent- regularly represents both -nt- and -nt- (I § 240 p. 200); and this form, which appeared in all the cases, may have helped to establish -ent- in the former class to the exclusion of -o-nt-.

The purely nominal use of the suffix is here more common than in Aryan and Greek. Pre-Italic: Lat. dens, see p. 398.

Lat. prae-sens, Osc. pray-sentid. Lat. serpēns, parēns, ad-ulēscēns, cliēns, oriēns (sc. sōl); ē-loquēns, con-gruēns, in-nocēns, sapiēns, abundāns, in-tolerāns. In its adjectival function the participial suffix was fertile even beyond its original sphere; thus such forms as bene-volenter -volentior -volentissimu-s which were attached to bene-volu-s etc., produced māgni-ficenter -ficentior-ficentissimu-s (from -ficu-s).

In Old Irish it is only used as a purely nominal suffix. Brigit f. = Skr. brhat-i and dēt 'tooth', see above p. 398. loche, gen. lochet, 'flash', Vleuk-. brage 'neck'. care cara, gen. carat, 'friend', Gall. Carant-onus Carant-illus. tē, pl. tēit, 'hot' for *tepent- (I § 339 p. 269).

Germanic. Goth. kius-a-nd-s O.H.G. chios-a-nt-i 'trying, choosing': Skr. jōš-a-nt- 'being fond of', \$\sqrt{geys-.}\$ Goth. us-vakja-nd-s 'awakening' O.H.G. wecche-nt-i 'wakening': Skr. vājáya-nt- 'urging, driving on', \$\sqrt{*yeg-}\$ 'move, be strong'; Goth. fra-vardja-nd-s O.H.G. far-wertte-nt-i 'causing to disappear, destroying' Skr. vartáya-nt- 'causing to turn, or run a course', \$\sqrt{yert-.}\$ Goth. nasja-nd-s O.H.G. nerie-nt-i 'saving', \$\sqrt{nes-.}\$ O.H.G. feh-ta-nt-i 'fighting': Lat. pec-tēns. Goth. vit-a-nd-s O.H.G. wizz-a-nt-i 'knowing': Skr. vid-a-nt- 'finding', Gr. id-o-vt- 'seeing', \$\sqrt{yeid-.}\$ Goth. ga-daúrs-a-nd-s 'venturing': Skr. dhrē-a-nt- 'courageous'. Goth. salbō-nd-s O.H.G. salbō-nt-i 'anointing', beside indic. Goth. salbō-p O H.G. salbō-t.

The original vowel-gradation has disappeared. But an example of original -nt- survives in Goth. hulund-i 'cave, hole' § 110 p. 337.

The participles in actual use were declined in Gothic as weak n-stems; except that in the nom. sing. we have -nds i. e. *-nd-a-z besides the usual form from n-stems: thus, nom. kiusa-nds and -nda, gen. -ndins and so forth. In Old High German this participle was an -io-stem; -nti is the so-called uninflected form. Parallel to it is the inflected form: 'strong' -nter, 'weak' -nto. See the sections on the cases.

Participles becoming Substantives:

Pre-Germanic. Goth. tunp-u-s O.H.G. zan 'tooth', see

above p. 398. This variation arose from the original doublet, pr. Germ. * $t\acute{a}n\rlap{p}-=*d-\acute{o}-nt-$ and *tund-=*d-nt'. Such cases as acc. sing. Goth. $tun\rlap{p}-u$ (instead of * $tun\rlap{p}-u=*d\acute{o}nt-m$) gave rise to the u-inflexion; see Kahle as already quoted, 12 ff.

Examples common to all branches of Germanic are: Goth. frijond-s O.H.G. frunt 'friend' ('who loves'), Goth. fijand-s O.H.G. fiant 'enemy' ('who hates'), no doubt also Goth. all--waldand-s O.Sax. alo-waldand 'All-ruler, Almighty' O.H.G. waltant 'ruler, director', and a few similar words. Other examples are found only in single dialects or groups of dialects, as Goth. giband-s 'giver', mērjand-s 'proclaimer', O.H.G. wigant A.S. wizend 'fighter', O.H.G. helfant 'helper'. These participles, which became substantives only in Germanic, still show an unextended nt-inflexion, though it is nowhere found in all the cases: e. g. nom. pl. Goth. frijond-s O.H.G. frunt O.Icel. frand-r = *-nt-es (Gr. $-v\tau-\epsilon_S$), loc. (dat.) sg. Goth. frijond O.H.G. friunt = *-nt-i- (Gr. - $\nu\tau$ -i); whereas other cases in Gothic and West-Germanic follow the o-declension, as nom. sing, Goth, frigond-s O.H.G. friunt (thus in O.H.G. we have nom. pl. friunta as well as friunt), and in Norse follow the n-declension, as nom. sing. frænde frænde.

A still younger stratum is formed by substantives like O.H.G. waltanto 'he who rules', furi-sizzando 'architriclinus', nerrendeo 'preserver, saviour'. Their substantival use was based upon the n-inflexion, to which as participles they were transferred; compare Mod.H.G. der resende and the like.

Balto-Slavonic. Lith. vežąs O.C.Sl. vezy 'vehens': Skr. váh-a-nt- etc., see p. 398 above. Lith. velkąs O.C.Sl. vlčky 'dragging, drawing': Gr. ελκων, V(s)μelq-. Lith. pinąs 'plaiting' O.C.Sl. piny 'stretching, hanging', ground-form *pηη-ό-nt-, V(s)pen-. Lith. mėlžąs 'milking': Gr. ἀμέλγων 'milking'; O.C.Sl. mlūzy 'milking': cp. Skr. mrj-ά-nt- 'wiping off, rubbing off'. Lith. limpąs 'cleaving, clinging': Skr. limpá-nt- 'smearing', Vleip-. Lith. bú-sęs O.C.Sl. by-šę fut. 'about to be' (byšąšte-je 'rò μέλλον', the only relic of the future participle in Slav.): Avest. bū-šya-nt-, common ground-form *bhū-sįó-nt-, V bhey-. Lith. jčszkąs 'seek-

ing', beside indic. 1. pl. přeszko-me, for *jëszko-nt- (I § 615 p. 465): O.H.G. eiscont-i 'inquiring, asking' Lith. turįs (turint-) 'having', beside indic. 1. sing. turiù 1. pl. tùri-me. O.C.Sl. chvalę (gen. chvalęšta) 'praising', beside indic. 1. sing. chvalją 1. pl. chvali-mū.

The old vowel-gradation has disappeared. Participles belonging to non-thematic vowel stems followed the analogy of stems in -o-nt-, e. g. Lith. esas and esas O.C.Sl. sy being, beside indic. es-ti jes-tu. In Prussian however there is a form -sins = Idg. *s-yt- or *s-yt- (p. 396 f.).

Remark 2 I cannot believe that Lith daūgujēsis 'heavenly' = danguje loc. $+ s_1 s$ 'being' (J. Schmidt, Kuhn's Ztschr. XXVII 393). Nor can 1 believe that O C Sl. dade beside dady 'dans' represents another non-thematic form corresponding to the 3. pl dad-e/u (= Skr. dád-atí); as to dade and other forms in -6 beside -9 see O. Wiedemann, Beitr. zur altbulg. Conjug. 128 f, Leskien Handb² p 76 f.

In Baltic and Slavonic most of the cases of the -nt- participles were attracted into the zo-declension owing to the suffix of the feminine; e. g. gen Lith. vēžanczio O.C.Sl. vezašta. The acc. sing. Lith. vēžant-z still belongs to the unaltered consonantal inflexion.

Lith. dant-i-s 'tooth'. Skr. dánt- etc., see p. 398 above. Pruss. dilant-s 'worker'.

§ 127. The Suffix $-yent^{-1}$). This Suffix appears in Aryan, Greek and Italic in denominative adjectives; it usually denotes the possession of something, more rarely a resemblance to something.

In the strong cases -yent- = Skr. -vant- Gr. -fevt-, and m the weak cases -yyt- = Skr. -vat- Gr. *-fat-. The latter was displaced by -fet- (loc. pl. $\chi \alpha \rho i \epsilon \sigma i = *\chi \alpha \rho i - f \epsilon \tau - \sigma i$, fem. $\chi \alpha \rho i \epsilon \sigma \sigma \alpha = *\chi \alpha \rho i - f \epsilon \tau - \chi \alpha \rho$, ϵ being taken from the cases which had -(f) \(\epsilon \tau \tau - \over \text{nsu-s} - \over \text{su-s} \) for -o-yyt + to-, a derivative form which also appears in Avestic, see § 79 p. 231 f.

¹⁾ See Ebel's (and Bartholomae's) essays mentioned on p. 394 footnote. A. Goebel, De epithetis Homericis in sic desinentibus, Wien 1858, Schuster, Die homerischen Adjectiva auf -sic, Ztschr. für österr. Gymn. 1859 § 16 ff. O. Schönwerth and C. Weyman, Über die lateinischen Adjectiva auf osus, Archiv für lat. Lexicogr. V 192 ff.

In the proethnic language this suffex seems to have been displaced by - μes - - μos - in a certain number of the cases. We have evidence of this in the proethnic Aryan nom. sing. masc. in *- μas (Avest. - νa , altered in Skr. to - νas - νan , see § 136 Rem. 2), voc. sing. masc. in *- μas (Skr. - νas , Avest. - νo) and the Greek * τa -fos Hom $\tau n o$ compared with Skr. ta-vant- (see Rem. 1). Observe the similar phenomena in the Aryan -mant-stems (Whitney, Skr. Gr. § 1235): nom. sing. Skr. -m o -m o and Avest. -m o, voc. Skr. -m o (Avest. *-m o), and notice the Homeric forms $\tau n o$ - μo and n- μo (Dor. $\tau a \mu o o$ $u \mu o o$) (which are probably to be compared with the Aryan stems in -m o (which we have $\tau a o$ - $\mu o o$ in Thessalian; Solmsen (Kuhn's Ztschr. XXIX 77) and Kozlovskij (Archiv f. slav. Phil. X 657 f.) are no doubt right in comparing O.C.Sl. ta-m o 'thither' ja-m o 'whither'.

Idg. Skr. άρα-vant- 'watery', Gr. ὁπό-εις 'rich in sap'. Skr. višá-vant- 'poisonous, poisoned', Lat. vīrōsu-s. Gr. δολό-εις 'crafty': Lat. dolōsu-s. Gr. οἰνό-εις 'made of or with wine', Lat. vinōsu-s 'full of wine' or 'like wine' (sapor, odor).

Remark 1. Further examples of the meaning 'like something' are aestuōsu-s cadāverōsu-s mōnstruōsu-s etc. (Archiv für lat. Lexikogr. V 216 ff.); examples from Aryan are Skr vṛṣ̄aṇ-vant- 'like a vṛṣ̄aṇ-', indrasvant- 'like Indra' (the s is due to the analogy of stems in -as-), Avest. drafṣ̄aka-vant- 'like a small flag, fluttering, undulating' (K. Geldner, Kuhn's Ztschr. XXV 401). This meaning is specially frequent in the Sanskrit adverbs in -vát (acc. neut.), such as angiras-vát 'like angiras' pūrva-vát 'after the ancient fashion, as of yore', and in the adjectives formed from pronouns such as Skr. tvā-vant- Avest. pwā-vant- 'who is of thy nature, like thee', Skr. tā-vant- ētā-vant- Avest. aeta-vant- 'tantus' Skr. yā-vant- Avest. ya-vant- 'quantus', from which we cannot separate Hom. τῆος ἦος Dor. a'ς for pr. Gr. *τā-foς *ā-foς.

Aryan. The accent in Sanskrit falls sometimes on the suffix, but oftener on the word to which it is added. Skr. áma-vant-Avest. ama-vant- 'acting with violence, constraining with force, strong', from Skr. áma- Avest. ama- m. 'violence, strength'. Skr. putrá-vant- Avest. pupra-vant- 'having a son or sons', from putrá- pupra- m. 'son'. Skr. vastra-vant- 'having a beautiful garment' Avest. vastra-vant- 'provided with clothing', from vástra-m vastre-m 'garment, vesture'. Skr. agni-vánt-, 'provided with fire',

from agni-š 'fire'. Skradht-vant- 'devout' from dht-š f. 'devotion', udan-vánt- 'rich in water' from udán- n. 'water', bráhman-vant- 'accompanied with prayer' from bráhman- n. 'prayer' (I § 229 p. 195), ny-vánt- 'rich in men' from nár- m. 'man', marút-vant- 'accompanied by the Maruts' (marút-), pad-vánt- 'having feet', from pád- m. 'foot', támas-vant 'dark' from támas- n. 'darkness', nas-vánt- 'with a nose' from nás- f. 'nose'. Avest. gaoma-vant- 'provided with flesh' from gaoma- m. 'flesh', aši-vant- 'holy' from aši-š f. 'holiness', astvant- i. e. astu-vant- (cp. I § 159 p. 143) 'having a body, corporeal' from astu-š m. 'body', d*biš-vant- 'hostile, hating' from *d*biš- Skr. dvíš- f. 'hate, enmity'. In Old Persian the suffix occurs in the feminine proper name harau-vat-ī- = Avest. haraxwant-ī- Skr. sáras-vat-ī (sáras-vant- 'rich in water'); cp. I § 159 p. 143.

We have no certain explanation of the length of the final vowel of the contained stem in Skr. ἀἐνα-ναητ- beside ἀἐνα-ναητ- 'possessing horses' from ἀἐνα-, sutά-ναητ- 'provided with pressed soma' from sutά-, ἑάktī-ναητ- 'mighty' from ἑaktī-, νiṣū-νάητ- 'which has or wears different sides, which is in the middle' from νίṣu and the like. Cp. mά-ναητ-, yuṣmά-ναητ-, tά-ναητ- in Rem. 1. p. 405 and ἀἐνα-magha-s etc. § 22 p. 38, and also Gr. -ω΄-εις -ή-εις in the Greek section.

This suffix was frequently added in Sanskrit to the passive participle in -tá- (§ 79 p. 225 f.), as kṛtá-vant- 'factum habens, having done'. In the course of the Vedic period this was developed into a perf. part. act., which is very common in classical Sanskrit, where it is almost always used as a predicate; e. g. mā na kašcid dṛṣtavān 'no one has seen me'.

Greek. The f of -fεντ- appears e. g. in Corcyr. inscr. στονόfεσσαν = Homer. στονόεσσαν. ἀμπελό-εις 'rich in vines' from ἄμπελο-ς. τζμή-εις 'treasured, honoured' (Pamphyl. inscr. τιμά-fεσα) from τζμή. χαρί-εις 'graceful' from χάρι-ς acc. χάρι-ν. ὑγί-εις 'having growth, blooming' (cp. Osthoff, Morph. Unt. IV 180 ff.). Hom. εὐρώεις no doubt meaning 'mouldy, musty' from εὐρώς (post-Homerie gen. εὐρῶ-τ-ος etc.) 'mould'. τελέεις beside τελήεις (see below) 'having fulfillment, fulfilling itself', no doubt

for *relev-fevr-, from relog n. nepásic 'horned' (late) from repus. -o-eic, proper to the derivatives from o-stems, became an independent suffix: μητι-όεις 'rich in wisdom' from μητι-ς, λχθν-όεις 'full of fish' from \(\frac{1}{2}\textit{9\vec{v}-c}, \delta\rho-\delta\rightilde{c}\) cloudy' from \(\delta\delta\rho, \ni\varphi-\delta\rightilde{c}\) snowy' from acc. νίφ-α, κλωμακ-όεις rocky' from κλωμαξ, θυόεις from Fig. n.: this is found even where the word is derived from an a-stem: σκιόεις 'shady' from σκιά, μηχανόεις 'fertile in resource' from unravn. On the other hand from o-stems we find -n-eig as well as -ο-εις: μεσήεις 'moderate' from μέσο-ν, φοινήεις 'bloody' from quivo-ç 'bloody'. The same -n-eic occurs also in Juneic beside θυόεις, τελήεις having fulfilment, fulfilling itself beside τελέεις, έλκήεις 'full of wounds', from έλκος n., ὑωπήεις 'overgrown with underwood' from ὁωψ, etc. -ω-εις is found in other words besides εὐρώεις; e. g. Hom. κητώεις 'full of hollows' (cp. κητώδης p. 409), ωτώεις 'eared' (ωτ-) and in late authors πηλώεις loamy, muddy' (πηλό-ς), δενδριώεις 'wooded' (δένδρο-ν).

Remark 2 It cannot be established that $\Phi_{\ell\ell;\alpha\sigma_0\sigma_0}$ contains the α of the $-f_{\alpha\tau}$ - (see p 404) which we must assume as the weak form of the suffix (J. Schmidt, Kuhn's Ztschr XXV 591). See Wackernagel ibid. XXVIII 130 f

Italic. It is found only in the Latin compound suffix -ōnsu-s- ōsu-s, where the termination of forms containing o-stems became regular in all words. The suffix of Avest. ašavasta-from aša-vant- is exactly parallel; see p. 404 above. verbōsu-s from verbu-m, officiōsu-s from officiu-m; fāmōsu-s from fāma, silvōsu-s from silva; piscōsu-s from pisci-s; aestuōsu-s from aestū-s; crīminōsu-s from crīmen; nivōsu-s from nix, like Gr. νιφ-όεις.

VIII. The Suffix -d-(-ad-).

§ 128. In Sanskrit -ad- occurs a few times, in Greek -adand -id- are found more frequently, in Latin there are a certain number of examples of -d- with a preceding vowel, and in Germanic we have denominative verbs in -at-jan, which seem to correspond to the Greek verbs in -a ζ eir (- ζ - = -d- χ -). Side by side with these forms in Greek, Italic, Germanic and BaltoSlavonic we find other suffixes having d for their distinguishing consonant which appear to be connected with them (-do- may be related to -d- as -to- to -t-). Thus we may be justified in regarding this suffix as proethnic, although there are perhaps only two examples in which -d- appears in more than one branch of language: O.H.G. gramızzon A.S. zremettan: Gr. zeóuado-5, and O.H.G. albiz O.Icel. alpt: O.C.Sl. lebedi.

Remark. We must not disrogard the possibility that the -d- of this suffix may have come from -t- in the proethnic period, and that not only in the cases with bh-suffixes, such as Skr držid-bhiš. See I § 469, 7 p. 346, and cp. II § 180 Remark

Aryan. There are only three certain instances, all in Sanskrit. dṛṣád- f. 'rock, great stone, millstone', bhasád- f. 'back parts, pudenda muliebria', śarád- f. 'autumn'. Add vanád-, a doubtful word found in the Rig-Veda, meaning perhaps 'desire'.

Greek. Adjectives and (feminine) Substantives in -αδ-: συγάς 'flecing', μηγάς 'mixed', μαινάς 'raving', μηκάς 'bleating', τοκάς 'bearing, bringing forth', νομάς 'pasturing', γυμνάς 'naked, stripped for gymnastics, practised', τεφράς 'ash-coloured', χοιράς rising up, jutting out'; νιφάς 'snow-flake', σπιλάς 'reef', λλλάς 'cord, rope', χολάδ-ες 'entrails, intestines', λαμπάς 'torch', πηγάς 'rime, frozen earth', γενειάς 'beard, hair of the beard', πελειάς 'wild dove'. Stems ending in -id- (fem.), the i of which in many words certainly comes from the i-stems: Eoid- (Eoid-oc etc.) 'strife' beside acc. ἔρι-ν, κάλπιδ- 'jug, vessel' (κάλπιδ--oc etc.) beside acc. κάλπι-ν, ζοι-ς 'rainbow', αὐλις 'place for passing the night', alyis 'stormcloud, shield of the gods', aonis 'shield', γλυφίς 'notch in the shaft of an arrow', κερκίς 'weaver's comb', axois 'locust', eniyovvis 'upper part of the thigh'. Connected with these &formations, and undoubtedly in great part derived from them, are a variety of elements of the nature of suffixes containing -δ-. Examples are χρόμαδο-ς (mentioned above), to which κέλαδο-ς 'noise, tumult' is parallel; κόρυδο-ς 'tufted lark', which in its formation comes very close to the cognate Germ. word *xerut- 'stag' (Danielsson, Gramm. und etymol. Stud. I 31); patronymics like 'Auropidng m. from

'Aκτορίς f.; adjectives in -ωόης such as νητώδης like a seamonster' (for the ω cp. κητώεις), which have been incorrectly classed with the adjectives in -εἰδής 1); and the numerous verbs in -άζω and -ίζω with a characteristic dental which were derived from these δ-nouns, such as δικάζω, νομίζω.

Italic. There are a few examples in -id-, no doubt with Idg. 1: Lat. capis (-id-is) f., Umbr. kapiře 'capide', Osc. καπιδιτωμ i. e. capid-t-to-m 'ollarium'; Lat. cassis f., cuspis f., lapis m. Add pecus (-ud-1s) f., herēs (-ēd-is) m. f., mercēs f., palūs (-ūd-is) f. Here too are found a variety of formative elements connected with this d-suffix: as in ōr-dō -din-1s (beside or-d-1or), cp. Gr. μελεδών μελεδώνω, capēdō frīgēdō rubēdō, cp. Gr. ἀχθηδών, χαιφηδών. The -do- of such adjectives as imbridu-s lūcidu-s however cannot be classed here, if they were originally compounds with dō- 'give' (as Skr. jala-da-s 'giving water' artha-da-s 'bringing benefit, generous') (Corssen, Krit. Beitr. 97 ff., Osthoff, Verb. in der Nominalcomp. 121 ff.; see also the evidence given by Thurneysen in his essay, Uber die Herkunft und Bildung der lat. Verba auf -io, 1879, p. 13).

Old Irish. On account of the coincidence of t and d in unaccented syllables it is hard to say what Irish forms belong to this section. Yet it is clearly established that the adjectival suffix -de = *-dio-, e. g. conde 'caninus' talmande 'terrestris', contains an original -d-, not -t-.

Germanic. The verbs in -at-jan should be first mentioned, as Goth. lauhatjan O.H.G. lohazzen 'to shine like lightning' lougazzen 'to burn like fire', Goth. kaupatjan 'to box the ears, cuff' (pret. kaupasta), svogatjan 'to sigh', O.H.G. blecchezzan 'to flash', roffezzen 'eructare', snepfezzen 'to sob'. The following words may also be referred to old d-stems: O.H.G. gremizzi 'provoked' beside gramizzon gremizzon, einazzi, dat. pl. einazzem 'singulatim'; O.H.G. albız m. O.Icel. alpt f. 'swan' (the Icelandic

The complete similarity between the usage of -ειδής and -ώδης only shews that even in antiquity the two terminations had been connected by popular etymology. I reserve a fuller discussion for another opportunity.

word still keeps the consonantal declension, see Noreen, Altn. Gramm. I § 327. 328): O.C.Sl. lebed? 'swan', O.H.G. hiruz A.S. heorot 'stag' (cp. E. Brate, Bezzenb. Beitr. XI 184 f.); Goth. stiviti n. 'patience', O.H.G. fiscizzi 'fishery, fishing' and several other similar forms (von Bahder, Verbalabstr. 111 ff.).

Balto-Slavonic. There are no examples with -d-, only -do- -di- and the like; and it must be remembered that Balto-Slavonic d may also be referred to Idg. dh. Lith. pa- $kl\bar{o}da$ -s-pa- $kl\bar{o}de$ 'cloth for spreading underneath' from pa- $kl\bar{o}ti$ 'to spread out', and other examples. O.C.Sl. $vra\bar{z}ida$ 'enmity', $kriv\bar{o}ta$ 'wrong', and other examples. d = pre-Balt.Slav. d seems to be certain only in $lebed\bar{t}$ 'swan' (see above).

IX. The Suffix -k- and -q-.

§ 129. In § 83-89 we assumed that a certain number of Greek, Italic, and Old Irish words in -k- had formerly been -ko- or -qo- stems, e g, Gr. ἀλώπηξ (Skr. lopāśá-s), ὄρτυξ (Skr. vartaka-s), μεῖραΞ (Skr. maryaká-s) rεāΞ (O.C.Sl. novakŭ), Lat. senex (Skr. sanaká-s), vertex, filix, bibāx, O.Ir. aire (Skr. aryaka-s). In these cases it is sometimes certain and sometimes very probable that there has been an attraction from the o-declension to the consonantal; but we find in the same languages other similar stems in -k- which cannot be explained with any degree of probability as derived from an original -koor -qo-. For Greek and Italic the reader may be referred to Leo Meyer's Vergl. Gramm. II 409 ff., 508 ff. In Old Irish, examples of this kind are nather, gen. nathrach, 'water-snake', lair 'mare', fal 'hedge' (Zeuss-Ebel Gr. C. 805 ff., Wh. Stokes, Bezzenberger's Beitr. XI 84 ff. 155). In Aryan there is only one doubtful relic of these forms: vipāś- f. beside vipāśā- f. name of a river, which is referred to vépate is in trembling, whirling motion'.

This being the case, it may be assumed that -k-q- once existed as suffixes parallel to -ko-qo-, bearing much the same relation to them as -t- to -to-. And further the transition of such classes of forms as $\partial \lambda \delta n \eta \xi$, $\partial g v \xi$, senex, aire to the con-

sonantal inflexion may have been aided by the influence of such original k-stems.

X. The Suffix -g- (and -g-?)

§ 130. We find suffixes in -g in Aryan and Greek; but not one of the words containing them appears in both simultaneously. Thus it is not safe to assume this suffix for the parent language.

Remark. We must not overlook the possibility that -g- may have come from -k- in the proethnic period, and that not only in the cases with bh-suffixes such as Skr. $u\dot{\delta}ig$ -bh: See I § 469, 7 p. 346. In the case of Gr $2\dot{\omega}\tau\alpha\gamma$ - ($2\dot{\omega}\tau\alpha\xi$) 'drop, dregs': Lat. latic- (latex) it may be assumed that the Greek word originally had k, and passed over to the ordinary inflexion of g-stems simply through the influence of the form of the nom. sing. and of the loc pl ($-\alpha\xi$ - $\alpha\xi\epsilon$) (cp. gen. $\delta g\tau v\gamma - os$ § 86 p. 258 and gen. $\delta exid^2-os$ § 123 p. 392), and many other instances are doubtful for the same reason. Cp. § 128 Rem p 408

Aryan. Skr. sanáj- 'old' (beside sanaká-s), dhršáj- 'bold', tršnáj- 'thirsty' (beside tršnā- 'thirst'), ušij- 'longing, desirous', vanij- 'merchant', bhurij- 'arm'. Forms like instr. pl. ušig-bhiš point to -j- = Idg. -g-.

Greek. ἄρπαξ, gen. ἄρπαγ-ος 'robbing, rapacious', whence ἀρπάζω (the ā of Lat. rapāc- shews that it is quite a different word). φάρυξ (-υγ-) 'throat, gullet'. πτέρυξ (-υγ-) 'wing, pinion'. μάστῖξ (-ῖγ-) 'scourge, lash'. The parallel forms -αγγ- υγγ- -ιγγ- are more frequent; these may possibly have arisen from an original formation in which a nasal followed the γ-suffix (cp. I § 221 p. 188 ff.), e. g. φάλαγξ 'phalanx', φάραγξ 'steep rock, gorge', λάρυγξ 'larynx' (similarly φάρυγξ is found later for φάρυξ), στόρθυγξ 'tooth, prong, point', σάλπιγξ 'trumpet', σμῶδιγξ 'weal, swelling'.

XI. Suffixes in -s1).

§ 131. The Suffix -es-2). The nouns formed with this suffix in the parent language were partly neuter substantives (generally

¹⁾ The Author, Zur Geschichte der Nominalsuffixe -as-, -jas- und -vas-, Kuhn's Ztschr. XXIV 1 ff. D'Arbois de Jubainville, Les thèmes celtiques en s, Mém. de la Soc. de lingu. II 327 ff.

²⁾ Th. Aufrecht, Bildungen auf nus, ros nas, Kuhn's Zischr. II 147 ff. A. Goebel, Das Suffix 3r, in seinem Verhältnisse zum Suffix

abstract), with which were associated adjectives like Skr. yašás'glorious, majestic' Gr. ψενδής 'deceitful', and partly masculine
or feminine substantives, e. g. nom. Skr. ušás Gr. ἡώς 'dawn'.
These two groups bear very much the same relation to one
another as the group of neuter and the group of masculine and
feminine -men-stems, e. g. Gr. χεί-μω: χει-μών § 117 p. 365 ff.;
we sometimes find -εσ-stems, as we found -men-stems, which
seem to have had both forms of inflexion from the earliest times;
e. g. Skr. tápas- n. 'warinth'. Lat. tepor m., Lat. tenus n. Gr.
τένος n. 'bond': Lat. tenor m. At the time of the separation of
the languages the neuter forms greatly preponderated. We may
begin with these, and the vowel-gradation of the stems will be
separately discussed under each of the two classes.

§ 132. 1. Neuter Substantives in -es- and the adjectives connected with them.

From the procthmic period onwards -es- is regular in all cases of the substantives except the nom. sing., which had -os, and in the adjectives also except in the nom. sing., whose ending in the masc. was -ēs, in the neut. -es. The vocalism of the root-syllable is almost without exception that of the strong grade (the e-grade in the e-series), and takes the accent in substantives, while in adjectives it falls on the formative suffix. E. g. Gr. ψεῦδος gen. ψεῦδος etc. μένος gen. μένεος etc. beside ψεῦδός ψεῦδός gen. ψεῦδος etc. δυσ-μενής -μενές gen. -μενέος etc.

This double system of declension in the substantives and adjectives was no doubt developed out of a single one. The abstract substantive, denoting a quality, when it was used simply for the owner of that quality, formed a nom. sing. with the mark of masculine or feminine gender in the same way as nouns like Gr. $\pi \alpha - \tau \eta \rho$; so also, with a similar indication of gender, an acc. sing. $-\epsilon s - \eta n$, nom. pl. $-\epsilon s - \epsilon s$; and the different accent connected with the new meaning caused a differentiation

e: oder die Neutra in 30;, ibid. XI 53 ff. H. Ebel, Neutra auf -as im Altirischen, Kuhn-Schleicher's Beitr. VI 222 ff. Wh. Stokes, Irish neuter stems in s, Kuhn's Ztschr. XXVIII 291 ff. H. Ebel, Suffix -as im Gothischen, ibid. V 355 ff.

of accent in the other cases corresponding to the new function of the word. There is evidence however that amongst the cases of the neuter substantive there once were also forms with -és-; this is shewn by the datives like Skr. dohás-ē 'to milk', which are used as infinitives. There must also have been cases where the suffix was simply -s- (the weak-grade form), namely, those in which the case-suffix bore the accent: compare Skr. str. -a-m 'head' Gr. κόρση 'temple, forehead' beside Skr. širas 'head' (I § 306 p. 242), Skr. ή-s-α-s ή-s-α-m Gr. τωμο-ς for *ώμ-σ-ο-ς Goth. am-s-a m. 'shoulder beside Lat. um-er-u-s, Skr. vats-á-s 'year, calf' beside Gr. Féroc n. 'year', Skr. ōša-dhi- f. 'medicinal herb' for *ay-s-a- beside ávas 'help, comfort', man-dhātár-'thoughtful, devout person' for *manz-dhātar- beside mánas 'thought', Lith. tams-à beside Skr. támas 'darkness', Lat. farrfor *fars- beside Goth. bariz-ein-s 'of barley' (I § 571 p. 429) and many similar examples (The Author, Kuhn's Ztschr. XXIV 10 f., J. Schmidt, ibid. XXV 26, Danielsson, Pauli's Altıtal. Stud. III 192) 1). Finally we must observe the frequency of the instances in which the root-syllable shows the weak grade, e. g. Skr. śir-as beside Lat. cerebru-m for *ceres-ro-m Gr. λίπος 'fat' beside Skr. répas 'spot, stain', Gr. πάθος beside πένθος, Gr. ἄγος 'guilt' beside Skr. ágas 'sin', Goth. ga-digis 'structure, work' beside Gr. τείχος 'wall', Gr. πύος 'pus', Skr. duv-ás- 'eagerly striving' and the like (Osthoff, Morph. Unt. IV 182 f.). We may then reconstruct the paradigm of these neuters as follows: nom. acc. *ker-os 'head', gen. kr-s-es (or -os), dat. * $k\bar{r}$ -s- \acute{a}_{l} , loc. * $k\bar{r}$ r- $\acute{e}s$ - $\acute{e}s$ - \imath ; nom. acc. * \acute{a} -gos 'sin, guilt' (Skr. $\acute{a}g$ as), gen. *aq-s-és (or -ós), dat. *aq-s-áz, loc. *ag-és -és-i (cp. Gr. αγος αγεος). The dat. *-és-ai (cp. Skr. inf. bhry-ás-ē jw-ás-ē etc.) was then formed on the model of the loc. -és -és-i. In most instances however, and even in the parent language, the nom. acc. (*kéros) gave the type for the position of the accent and the form of the root in all the cases. With regard to the adjectives we must further observe that the accentuation of the

¹⁾ Cp. also Lat. max-imu-s beside Skr. mahd-s 'great' and Umbr. Osc. Celt. *neks- in nesimo- nessam § 73 Rem. p. 179 f.

final syllable of the stem was original in compounds also: Gr. ἀν-αγής 'innocent, pure' δνο-μενής 'ill-disposed', Skr. an-agás 'sinless' (beside án-agas) α-rēpās 'spotless' su-pīvās 'very fat' etc. Along with these there are other words which have the later accentuation, Gr. οὐρανο-μήκης 'heaven-high' μεγα-κήτης 'monstrously great' Skr. su-mánās 'well-disposed' dur-νάsās 'ill dressed', with other examples.

Indo-Germanic. *kléy-os: Skr. śrάν-as Gr. κλέρος κλέος 'fame, glory', O.C.Sl. slovo 'word'. *gén-os 'race, family': Skr. jánas Gr. yévos Lat. genus. Gr. στέγος τέγος 'roof, house', O.Ir. tech leg 'house'. *séd-os 'seat': Skr. sádas Gr. Edoc O.Icel. setr (gen. setrs). *rég-os: Skr. rájas 'darkness, dust', (Armen. erek 'evening') Gr. ἔρεβος Goth. rigis (gen. rigizis) 'darkness'. *nébh-os 'clouds, atmosphere': Skr. nábhas, Gr. νέφος, Lith. debes-1-8 (dinstead of n- is difficult to explain; perhaps it is due to the influence of dangù-s 'heaven', Holthausen in Paul-Braune's Beitr. XIII 590) O.C.Sl. nebo. *uéid-os: Skr. védas 'knowledge', Gr. ɛldog 'form, idea'; add perhaps (with the weak form of the stem) *yits-, ἴσο-ς Cret. Fίσ-Fο-ς 'like'; see § 64 p. 135. Gr. α̈γ-ος 'awe', Skr. yaj-ás- 'honouring', Viag-. Skr. ándh-as 'plant', Gr. ανθ-ος 'bloom'. Skr. dás-as 'glorious deed' Gr. pl. δήνεα 'counsels, wiles', common ground-form *dáns-os. Skr. édh-as 'wood for burning', Gr. alg-og 'brand'. Skr. oj-as 'strength' Gr. έρι-αυγής (late) 'very bright' and *ύγής 'strong, sound' in ύγεία ύγεινό-ς Ύγεῖνο-ς, Lat. augus-tu-s. Skr. áp-as áp-as work, religious practice', Lat. op-us.

The dative and the locative of nomina actionis served also as infinitives, a usage which is doubtless proethnic. In Vedic infinitives in -as-ē the formative suffix usually bore the accent; this must be due to an early isolation of meaning. Skr. jīvās-ē (dat.) 'to live' Lat. vīver-e (loc.).

In several languages -es- sometimes appears in close connexion with other formative elements, which precede it; as in Lat. pīg-nus. These formations existed in the parent language; indeed they were so well established that the compound suffix had the appearance of a primary formation (cp. Skr. kf-t-ya-

and the like, § 123 p. 391). Skr. pt-v-as Gr. πī-(f)-oς n. 'fat'. In the word *mē-n-os n. (or nom. *mē-n-ōs m., § 133) dat. *mē-n-s-áż loc. *mē-n-és -és-i from \checkmark mē 'measure', the *mē-n-s- form of the stem prevailed through all the cases, producing the masc. Gr. μήν gen. μηνός Lesb. μῆνν-ος, Lat. mēns-i-s gen. pl. mēns-um, O.Ir. mī gen. mīs 'month'; in Lithuanian *mē-n-es- still survives in the gen. mēnes-io etc. '). The Aryan mās- and the Old Church Slavonic mēs-ecī, which J. Schmidt explains as coming from an Idg. nom. sing. *mēs for *mēns (see I § 220 p. 188), may have been formed directly from the root; see § 134, 1. *lozq-nos 'remainder, what is left over' from \checkmark leig- 'leave': Skr. rēk-nas 'riches' (bequest'), O.II.G. lēhan n. O.Icel. lān n. 'loan'.

Of the simple adjectives no example is found in more than one language simultaneously in its adjectival function; e. g. Skr. mahás- 'great' beside máhas- n. 'greatness', yašás- 'glorious' beside yášas- n. 'glory', Gr. ψενδής, σαφής. On the other hand several adjectives are so found in composition. Skr. dur-manas-'ill-humoured' Gr. δνσ-μενής 'ill-disposed', Skr. ny-mánas- 'having a man's mind' Gr. 'Ανδρο-μένης, from *mén-os n. Avest. dēuš-r-savah- Gr. δνσ-κλεής 'of ill report', from *kléy-os n. Skr. puru-dásas- 'rich in wondrous deeds', Gr. πολν-δήνεα' πολύβουλον, πολύμητιν (Hesych.), from *dáns-os n.

Aryan. Neuters. Skr. śráv-as 'fame glory', Avest. srav-ō 'word, prayer, glory, honour' (with ca 'and' it has the form sravas-ca): Gr. κλέος etc.; see above, p. 414. Skr. jráy-as 'level, tract', Avest. zray-ō O.Pers. dray-a 'sea'. Skr. nám-as 'obeisance, reverence', Avest. nem-ō 'prayer, invocation' (cp. O.Ir. nem 'heaven' p. 419), ν nem-. Skr. mán-as Avest. man-ō 'thought': Gr. μέν-ος 'courage, anger', Lat. Miner-va (I § 569 p. 426). Skr. vác-as Avest. vac-ō 'word, speech': Gr. Fέπ-ος 'ĕπ-ος 'word, speech' ν μεq. Skr. sáh-as Avest. haz-ō 'might': Goth. sig-is (a-stem), 'victory', ν seĝh-. Skr. práth-as Avest. frap-ō 'extent, breadth': Gr. πλάτ-ος 'extent, breadth' (the root in the weak grade, as in πλατ-ύ-ς), O Ir. leth 'side'. Avest. raoc-ō

¹⁾ Another and less probable explanation of this word has been mentioned in vol. I \S 221 p 189 f.

'light, clearness, brightness' O.Pers. rauc-a 'day', Skr. sva-rōcas-'shming of itself', V leuq-. Skr. όj-as Avest. aoj-ō 'strength': Gr. ἐρι-ανγής etc.; see above, p. 414. Skr. vár-as 'width' beside úr-as 'breast': Gr. εὖρ-ος 'breadth', like ἐὖρὐ-ς; see § 104 p. 314. Skr. kár-as 'deed', jár-as 'age', pēṣ-as 'form', jáv-as and júv-as 'swiftness'. Avest. tac-ō 'course', drāŋ-ō 'length', haṣc-ō 'dryness'.

Examples of the dative used as an infinitive; pr. Ar. *-as-az. Skr. Ved. dōhásē 'to milk' (dōh-as n. milking'), bhárasē 'to bear', spárasē 'to obtain'. Avest. avanhē 'to help' (av-ō n. 'help, protection') and by an extended analogy vaocanhē inf. to the indic. aor. vaoc-a-p from vac- 'to speak', srāvayanhē inf. to the indic. srāv-ayent caus. 'causes to hear, announces'.

Ar. -n-as, -t-as. Skr. rék-nas 'riches', Avest. raex-nō ('gladness'?), see above p. 415. Skr. é-nas 'oppression, wickedness, sin', Avest. ae-nō 'enmity, hate, vengeance'. Skr áp-nas 'possession', ár-nas 'wave'. Avest. zae-nō 'readiness, watchfulness, guard', xwar'-nō 'brightness, glory', raf-nō 'joy, happiness'. Skr. drávinas 'property'. Skr. srō-tas O.Pers. rau-ta 'river' (I § 558, 3 p. 414). Skr. ré-tas 'seed'. Avest. vī-sas-tō 'obedience, learning', parš-tō 'fight, weapon for fighting'. Ar. -u-as is found in Skr. ptvas, see p. 415.

In Adjectives. Skr. tarás- 'eagerly striving' beside táras 'eager striving', apás- 'active' beside ápas 'work', rakšás- 'injuring, injurer' beside rákšas 'injury', tavás- 'strong'. Avest. dvaęšah- (nom. sing. dvaęšā) 'tormenting, tormentor' beside dvaęšō 'torment', rādah- 'giving, giver' beside rādō 'gift', xwar'nah- 'bright, glorious' beside xwar'nō 'brightness, glory', aenah- 'hostile, enemy' beside aenō 'enmity'. Skr. dur-manas- 'out of humour' Avest. duš-manah- 'ill-disposed', Skr. su-mánas- Avest. hu-manah- 'well disposed', Skr. nr-máṇas- Avest. nar'-manah- 'with a manly mind, heroic'. Skr. su-cétas- 'having a good disposition, wishing well', puru-bhōjas- 'nourishing many'. Avest. duž-varšnah- 'evildoer', aivi-aojah- 'surpassing in strength, subduing victoriously', O.Pers. aspa-canah- proper name (no doubt to be compared with Skr. cánas- n. 'pleasure'). — Skr. vēdhás- 'helping, gracious', Avest. aša-vazdah- proper name, and vohvazdah- i. e. vohu-vazdah-

proper name, ground-form *yedh + tes-, \sqrt{yedh} - 'lead', Skr. su- $m\bar{e}dh\acute{a}s$ - 'intelligent', ground-form *mydh + tes-, see I § 482 p. 356.

Armenian. Here the es-stems have been lost. A part of them became o-stems, as sar, gen. saroy, 'height, peak, declivity': Skr. siras- Avest. sarah- 'head', common ground-form *krr-es-.

Greek. $n\acute{e}o_{S}$ 'membrum virile' for * $n\acute{e}o_{S}$: Skr. $p\acute{a}s$ -as the same. $F\acute{e}\tau$ -o_S ' $\acute{e}\tau$ -o_S 'year': Lat. vetus (originally a subst.), Skr. vats- \acute{a} -, see p. 413 above. $9\acute{e}\rho$ -o_S 'heat, summer': Skr. $h\acute{a}r$ -as 'glow, heat'. $\tau\acute{e}r$ -o_S 'sinew, bond': Skr. $t\acute{a}n$ -as 'offspring', Lat. ten-us. $\zeta \acute{e}v\gamma$ -o_S 'yoke': Lat. $\jmath \vec{u}gera$ $\jmath \vec{u}geribus$, cp. also Mid.H.G. $\jmath iuch$ n. 'measure of land'. $\beta \acute{e}\lambda$ -o_S 'missile', $\check{e}\gamma\chi$ -o_S 'spear', $\check{e}\rho\chi$ -o_S 'enclosure', $\kappa \acute{e}\vartheta$ -o_S 'hidden depth', $\delta \acute{e}o_{S}$ 'fear' for * $\delta F_{E\chi}$ -o_S, $\vartheta \acute{e}\rho\sigma$ -o_S (Aeol.) and $\vartheta \rho \acute{a}\sigma$ -o_S 'hidden depth', $\delta \acute{e}o_{S}$ 'fear' for * $\delta F_{E\chi}$ -o_S, $\vartheta \acute{e}\rho\sigma$ -o_S (Aeol.) and $\vartheta \rho \acute{a}\sigma$ -o_S 'woe, sorrow' and $\pi \acute{a}\vartheta$ -o_S 'suffering, experience, misfortune'. $\check{o}\chi$ -o_S 'vehicle' instead of $\check{e}\chi$ -o_S (which is preserved in Hesych.) through the influence of \check{o} $\check{o}\chi_{OS}$, $\checkmark u\acute{e}gh$ -; cp. Lat. modes-tu-s p. 418, O.H.G. fahs p. 420. $u\~{\eta}\kappa$ -o_S 'length'. $v\~{\eta}\delta$ -o_S 'pleasure'. $a\i{\eta}\vartheta$ -o_S 'brand': Skr. $\acute{e}dh$ -as, see p. 414 above, $\check{a}\gamma\kappa$ -o_S 'valley, ravine': Skr. $\acute{e}vk$ -as 'bend, curve'. $o\'{a}\kappa$ -o_S 'shield'. $\psi v\~{\chi}$ -o_S 'cold'. $\kappa v\~{v}\vartheta$ -o_S 'glory'. $\acute{e}vγ$ -o_S 'frost': Lat. $fr\~{i}g$ -us.

πῖος 'fat' for *π̄-F-ος: Skr. pɨvas, see above, p. 415. εἶρος 'wool' for *Fερ-Fος, cp. Lat. vervēx ('laniger'). ἔρ-νος 'sprout, twig'. ἔθ-νος 'multitude, race'. $\gamma\lambda\tilde{\eta}$ -νος 'show, marvel'. δά-νος 'gift, loan', $\sqrt{d\bar{v}}$ - (cp. § 66 p. 142 f.). τέμενος 'piece of land'. πάχετος 'thickness'. ἔδαφος 'ground, foundation'. κάλλος 'beauty'.

ψευδής 'deceitful, lying' beside ψεῦδος. σαφής 'clear, plain'. $\vec{\alpha}$ -σθενής 'weak' beside σθένος. εὐ-μενής 'well-disposed' beside μένος. $\vec{\alpha}$ -πευθής 'unaware, uninvestigated': Avest. baođah- n. 'consciousness, knowledge'. $\vec{\alpha}$ -ληθής 'unconcealed, true' beside Dor. $\lambda \vec{\alpha}$ θος 'forgetfulness'. $\vec{\delta}$ υσ-χερής 'hard to deal with': Skr. háras 'grip'; we should also add χείρ 'hand' if Wackernagel is right in referring χειρ- to *χερσ- (Kuhn's Ztschr. XXIX 131 ff.); the gen. *χερ-σ-ός would then be explained in the same way as Lat. farr- p. 413. — $\pi \lambda \dot{\eta}$ -ρης 'full' side by side with $\pi \lambda \eta$ -ρόω 'I fill' Lat. plē-ru-s.

Italic. Lat. op-os op-us op-er-is, op-er-a, Umbr. ose 'opere' osatu 'operato', Osc. úpsannam 'operandam' (I § 633 p. 474): Skr. άp-as áp-as, see above p. 414. Lat. vet-us vet-er-is ('agedness, or being stricken in years; old creature', hence as an adj.) 'old', vetus-tu-s, Osc. Vezkeí dat., name of a god, '*Vetusco' (cp. vetusculu-s): Gr. Fέτ-ος. Pr. Ital. *med-os 'measure' (Gr. μέδ-μνο-ς, Goth. mit-an): Lat. modes-tu-s moder-arī (the o instead of e is due to mod-u-s), Umbr. meˇr-s mers 'ius, fas' for *med(o)s, the o being lost by syncope, see I § 633 p. 474. Umbr. vas 'vitium' for *vak(o)s, beside Lat. vacāme. Lat. aes, gen. aer-is, which can hardly stand for *a½-es-, but for *a½s-, the weak form of the stem¹) (the nom. acc. aes instead of orig. *a(i)-os was formed on the analogy of the other cases), aēnus Umbr. ahesnes 'aenis' for *uzes-no- (1 § 134 p. 121): Skr. áy-as 'metal, iron', Goth. áis (gen. áizis) 'ore, money'.

Lat. nem-us (-or-): Gr. rέμ-og 'place of pasture'. dec-us (-or-): Skr. daśas-yá-ti 'he honours, is at the service of, is obliging' Ven-us (-er-), originally n 'love's enticement'. Skr. ván-as- 'charm, sweetness'. scel-us (-er-). temp-us (-or-). terg-us (-or-): Gr. στέφφ-ος τέφφ-ος 'leather, skin', esp 'the hard hide on an animal's back', corp-us (-or-). pondus and foedus, like modes-tu-s, have exchanged their e for o (*pend-os *feid-os, the latter still appearing in fēdus-tu-s), through the influence of parallel stems in -o- (abl. pondō), cp. Gr. όχος above, p. 417, O.H.G. fahs p. 420.

Lat. infin. in -er-e for *es-i (loc.), as vivere (Skr. jīvás-ē), agere, minuere; ferre velle esse are discussed in § 162. fierī is a new formation for (O.Lat.) fiere, modelled on aqī, sequī, see ib.

vol-nus, mū-nus, fū-nus, pīg-nus, facinus; mi-nus must also be classed here; see § 135. pectus.

The vowel-gradation which belonged to the -es-suffix in the pre-Italic period (preserved e. g. in gen-us -er-is) was superseded in many words in favour of the form -os- which prevailed over the other forms. This is seen in tempus -oris etc.; yet

¹⁾ See Osthoff in Paul-Braune's Beitr XIII 405

we have also -es- in the adverb temper- $\bar{\iota}$, tempes-tu-s, and temper-are. Similarly we have penus -oris etc., whilst the loc. sing. penes (cp. ali's), which had become a preposition (or postposition), retained the form -es-. -os- is also found in derivatives, e. g. rōbus-tu-s (gen. rōbor-is) onus-tu-s (gen. oner-is), corpus-culu-m (gen. corpor-is) opus-culu-m (gen. oper-is) cp. O.C.Sl. -os-tip. 422.

Adj. pūbēs and pūber, gen. pūberis. Further dē-gener, bi-corpor, both of them probably fairly modern formations having no direct connexion with the original Indo-Germanic type. Similarly the use of vetus (also veter) as an adjective was of recent date; cp. vetus-tu-s like onus-tu-s, veter-ātu-s like sceler-ātu-s. Here we have a repetition of the process by which adjectives of this kind were formed in the original language.

Old Irish tech teg, gen. tige, 'house': Gr. $\sigma \tau \acute{\epsilon} \gamma - o\varsigma \tau \acute{\epsilon} \gamma - o\varsigma$ 'roof, house'. nem 'heaven', which we may either compare at once with Skr. nám-as 'obeisance, reverence', so that the original sense was 'object of reverence', or suppose to stand for *neb-os = Skr. nábh-as O C.Sl neb-o, its form having been influenced by words containing the \sqrt{nem} - like Gall. $v \epsilon \mu \eta \tau ov$ Ir. nemed 'sacred thing or place'. leth 'side'. Skr. práthas etc., see above p. 415. au $\bar{\sigma}$ (Mid Ir), gen. aue, 'ear': O.C.Sl. ucho 'ear'; should we add Gr. ov Dor. ov 'ear'? (see § 114 p. 347). mag 'level tract of country', Gall. Ov vo - $\mu \alpha \gamma os$ = O.Ir. Find-mag. ov log luach 'price, hire'.

With -nes-: $d\bar{u}$ -n 'stronghold'; even as early as in Gallic we have Aovyv-dovvog beside Aovyvv-dovvov. $gl\bar{u}$ -n 'knee'.

In Germanic the old inflexion suffered great changes.

The transference of these nouns to the o-declension, which appears so frequently in Gothic and Norse, seems to have taken place in proethnic Germanic, and to have been partly due to the analogy of forms like Skr. vats-ά- (beside Gr. Fέτος), p. 413. Goth. άis (gen. áizis) O.H.G. ēr n. 'ore' pr. Germ. *aiz-a- (Goth. áiza-smiþa O.H.G. ēr-smid, § 40 p. 73): Skr. áy-as etc., see p. 418 above. O.H.G. lefs m. 'lip' beside A. S. lippa m. 'lip' (cp. I § 337 p. 267 f.) for pre-Germ. *lebes- *leps-. Goth. ahs

(gen. ahsis) O.Icel. qx n. O.H.G. ahir ehir n. 'ear of corn' : Lat. ac-us. O.H.G. fahs O.Icel. fax m. 'hair', no doubt due to contamination of a form *pek-os n. with *pok-o-s m. (Gr. πόκο-c) (cp. Gr. ayog p. 417, Lat. modestu-s p. 418). Goth. veihs (gen. veihsis) n. 'borough, vicus': cp. Skr. vēšás- m. 'neighbour, vassal'. Goth. beihs (gen. heihsis) n. 'time' beside heihan 'to thrive, grow', V tenq-(I § 214 p. 181); it is usual to compare Lat. tempus, but I cannot think it proved that Lat. p is ever = Idg. q. Goth. blahs-jan 'to fear', a denominative: Lat. locusta for *tlocus-tā (Osthoff, Paul-Braune's Beitr. XIII 412 f.). Goth, rimis (gen. -isis) n. 'rest', \(\sqrt{rem-.} \) Goth. agis (gen. -1818) n. 'fear', O.H.G. egis-līh 'terrible' egis-o m. (A.S. ezes-a m.) 'fear' egison 'to terrify'. Gr. az-og 'pain at heart, grief'. Goth. sigis n. O.Icel. sigr (gen. sigrs) m. A.S. sizor m. 'victory' O.H.G. sign-on 'to conquer', Goth. sigis-láun § 40 p. 73: Skr. sáhus; see above, p. 415. Goth. hatis (gen. -1218) n. O.Icel. hatr n. 'hate', Goth. hatizon 'to hate'. Goth. rigis (gen. -izis) n. O Icel. rokkr n. 'darkness': Skr. rújas etc., see above p. 414. Goth. ga-digis n. 'building, work': Gr. \(\tai\chi_1\cor\chi_2\cor\chi_3\) 'wall', with vowelgradation in the root-syllable (p. 413). Goth, bariz-ein-s adj. 'of barley' O.Icel. barr n. 'barley': Lat. farr- for *far-s-; see above, p. 413. Goth. skapis n. 'harm', O.Icel. setr (gen. setrs) n. 'seat': Skr. súd-as etc., see p. 414 above.

No satisfactory explanation has been given of the variation between -s- and -z-, as Goth. gen. agis-is beside riqiz-is, Goth. valvis-ōn 'to roll oneself, wallow' O.H.G. egis-ōn beside Goth. hatiz-ōn O.H.G. sigir-ōn.

In West-Germanic we find beside this another entirely different modification of the original declension, due to the

syncope in final syllables. After a long root-syllable, the nom. acc. -oz was dropped (I § 661, 2 p. 517). This loss coupled with the influence of the o-declension, first established a paradigm such as O.H.G. sing. nom. acc. kalb ('calf') gen. kalbires dat. kalbire, pl. nom. acc. kalbir gen. kalbiro dat. kalbirum. Then in the gen. dat. sing. -ir- was dropped, kalbes kalbe being formed on the analogy of wortes worte from nom. wort; hence -irnaturally became the mark of the plural, especially in the nom. and acc. which had no other distinguishing sign. (A more remote consequence was that -ir-, Mid.H.G. Mod.H.G. -er-, was used for the sign of the plural in a multitude of words with which it had originally no connexion whetever). In the oldest period of West-Germanic this style of inflexion (kalb gen. kalbes, pl. kalbir) is commonest in animal names; cp. besides kalb e. g. O.H.G. lamb (A.S. lomb) 'lamb', and outside of this category ei 'egg' pl. eigir (A.S. z pl. z zru), rīs 'sprout, twig', and other forms. Compare the use of these words as the initial members of compounds, § 40 p. 73. Other words however, through the same phonetic change in the form of the nom. acc. sing., entirely lost their ir-inflexion, e. g. O.H.G. mast n. mast, food, fattening': Skr. méd-as n. 'fat' (I § 591 p. 447 f.).

Remark 2 Certain substantives which follow the i- and the udeclension have also been regarded as representing original -es-stems; as O.H.G. sigi A.S. size m. 'victory', O.Sax. heti A.S. hete m. 'hate' A.S. eze m. 'fear', A.S. sife n. 'sieve' and O.H.G. sigu sigo m. = sigi, situ sito m. 'custom' (Gr. \$306). The nom sigi is said to stand for *siziz, -os -az having been replaced by -es -iz because of the other cases, and the analogy of the m. f. i-stems having then come into play. This transference must have been complete before the beginning of the Christian era; for the i-stem appears in Strabo's Zeyl-ungos (cp. Segi-mēru-s Segi-mundu-s in Tacitus, O.H.G. sigi-nomo). But I can see no satisfactory reason for the displacement of -az by -iz in these words and these only, and it seems more reasonable to assume that they are original i-stems; in fact we have such parallel forms as Skr. van-i-j beside ván-as. It is perhaps less improbable that -os under certain conditions should have become -uz in proethnic Germanic, whence the form sigu (cp. O.H.G. angust § 101 p. 307), see Paul in his and Braune's Bestr. VI 187, and Bremer shid. XI 3. who remarks: 'I see in -uz the representative of an Idg. sonant s (z), a subject which I hope to discuss in a systematic form at some future time'.

-nes--tes-: O.H.G. lēhan n. 'loan', see above p. 415; A.S. hrō-dor n. beside hrē-d (m.?) 'glory'. Cp. also A.S. hæl O.Icel. heill n. 'favourable omen, happiness' for *hailiz- beside the adj. Goth. hái-l-s 'healthy' (§ 76 p. 206), A.S. hlæw n. 'grave-mound' for *hlaiwiz- beside Goth. hlái-v 'grave-mound' ground-form *kloz-yo- (§ 64 p. 137) and the like.

Adjectives like Gr. ψευδής δυσ-μενής do not seem to occur. It is a question whether they can be inferred from the appearance of -s- side by side with -z- in the oblique cases of the substantives and in derivatives. See Rem. 1 p. 420 above. O.H.G. mast 'mast, food' has also a secondary use as adj. 'fattened'.

Balto-Slavonic. Here we find only Substantives. In Lithuanian they have become masc. or fem. i- or zo-stems: -es-i-and -es-za-.

Lith. debes-1-s m. and f. 'cloud' (but we have the consonantal stem preserved in the gen. pl. debes- \tilde{u}) O.C.Sl. nebo 'heaven': Skr. nábh-as etc.; see above, p. 414.

Lith. ĕdes-i-s, gen. -10, m. 'food (for animals)': cp. Lat. eder-e. kalbes-i-s, gen. -10, m 'phrase, proverb', beside which we have kalbes-é f. 'speech'. Gen. mënes-10 and mënes-ës 'of a month'; see above, p. 415. The original -es- is also seen in kalbes-ni-s 'talk', mökes-ti-s 'payment' and the like: see § 101 p. 307.

O.C.Sl. slov-o 'word': Skr. śráv-as etc., see above p. 414. uch-o 'ear': Mid.Ir. au; see above, p. 419. ok-o 'eye'. tělo 'body'. Gen. ličes-e 'of the face'; the nom. sing. *liko, is wanting, its place being taken by lice. In consequence of their similar termination in the nom. acc. sing. es-stems were often inflected like neuter o-stems; e. g. gen. slova instead of sloves-e. On the other hand some of the Slavonic es-stems were perhaps o-stems originally, and became es-stems only because of this same similarity of form, c. g. drěv-o 'tree', dělo 'work'. The suffix -osis no doubt also to be traced in abstract nouns like azos-ti strait', cp. Lat. angus-tu-s; see § 101 p. 307.

§ 183. 2. Substantives, masculine and feminine, with the suffix in the form -os-. Side by side with the neuters in -os- there existed in the original language a certain number of masculine and feminine substantives with -os- in the strong cases, -ōs in the nom. sing., -es -es-i in the loc. sing., and -s- in the weakest cases. It is only in Italic that this formation is at all fertile; and there the \bar{o} of the nom. sing. was carried through all the cases. The masculine or feminine form and the neuter form often appeared side by side, as Lat. decor: decus (cp. p. 411 f.).

Skr. $u\mathring{s}-\acute{a}s$ - f. Gr. $\mathring{\eta}\acute{\omega}_{\mathcal{G}}$ f. (for * $\check{a}us$ - $\check{o}s$) 1) Lat. aur- $\check{o}r$ -a dawn'. The acc. sing. was originally *-os- η : Skr. $u\mathring{s}\acute{a}s$ -am Avest. $u\mathring{s}\acute{a}s$ -em, Gr. $\mathring{\eta}\acute{\omega}$ for * $\mathring{\eta}\acute{o}a$; Skr. $u\mathring{s}\acute{a}s$ -am and $u\mathring{s}\acute{a}m$ were re-formations, the latter modelled on the nom. $u\mathring{s}\acute{a}s$. Loc. -es-i: Skr. $u\mathring{s}\acute{a}s$ -i; Gr. $\mathring{\eta}\acute{o}\widetilde{i}$ was a re-formation. Gen. Skr. Ved. $u\mathring{s}\acute{a}s$ instead of * $u\mathring{s}$ - \mathring{s} - \mathring{s} - \mathring{s} - \mathring{s} , instead of which we find later $u\mathring{s}\acute{a}s$ -as, and a similar re-formation in Greek, $\mathring{\eta}o\mathring{v}_{\mathcal{G}}$ i. e. * $\mathring{\eta}\acute{o}o_{\mathcal{G}}$. Does the accent of the Att. $\mathring{\varepsilon}\omega_{\mathcal{G}}$ (acc. $\mathring{\varepsilon}\omega$) indicate that the original accent was * $\mathring{a}us\mathring{o}s$?

*ājuos- *ājus- *ājus- (cp. *ājuen- *ājun- § 116 p. 362 f.): Gr. acc. alū, a by-form of alūva, for *alfoa, loc. alės adv. 'always'; the weakest form of the stem is found in Sanskrit only as a neuter noun, ājuṣ- 'life'. Cp. also Ir. ais aes m. 'age' Mod Cymr. oes § 108 p. 329.

Gr. aidais f. 'shame, modesty', acc. aida, and parallel to it aideo-, in aidéomai fut. aidéo-somai and air-aidhs.

Latin. Masculines. decor beside decus Skr. dašas-yá-ti 'honours, is at the service of'; tenor beside tenus Skr. tánas 'off-spring' Gr. τένος 'sinew, bond'; angor beside angus-tu-s ānx-tu-s Skr. áhas 'distress'; tepor beside Skr. tápas 'heat' and many other similar words. honōs honor (hones-tu-s), sūdor, ador, amor etc. Compare also rūmi-ficō beside rūmor § 34 p. 60. In the nom. sing. -ōr (-or) took the place of -ōs on the analogy of the other cases, where -r- regularly represented -s- between vowels

¹⁾ $\hat{\eta}\hat{\omega}_{c}$ proves that the law of vowel-shortening discussed in I § 611 p. 461 did not come into operation until after the loss of intervocalic σ .

(I § 569 Rem. 2 p. 426 f.). aurōr-a (see above), like Flōr-a beside flōs, cp. § 60 p. 110.

Remark. It is possible that all these nouns, excepting the word for 'dawn', were originally masculine; if so they kept their original gender in Latin, whilst Gr. aldw's became feminine, in the same way as the -tu-stems (§ 108 p. 323. 327)

It is uncertain how we ought to regard the Sanskrit masculine abstract substantives jarás- 'weakness of age' bhiyás- 'fear' tavás- 'strength'. They belong to this section if their acc in -ásam is a re-formation like uṣásam. Further: were such Latin substantives as sēdēs mōlēs plēbēs pūbēs really, as is usually assumed, originally s-stems? Possibly we should assume a double class of masculine and feminine substantives in the parent language, corresponding to the two classes appearing e. g. in Greek, ǎx- $\mu\omega\nu$ contrasted with π_{0i} - μ_{i} , $\delta\omega$ - $\tau\omega_{i}$ contrasted with π_{0i} - μ_{i} , $\delta\omega$ - $\tau\omega_{i}$ contrasted with δ_{0} - τ_{i} , distinguished by a difference of accent and of vocalism in the suffix. The accent of $\hat{\gamma}$ $\hat{\omega}$, $\hat{\omega}$ would then have been shifted just as that of the forms in $-\omega\nu$ - $\mu\omega\nu$. Adjectives like Gr. ψ - ω 0 $\hat{\omega}$ 1, (§ 132 p. 412 f.) would then bear a nearer relation to these m. and f substantives in $-\hat{\varepsilon}$ s than to the neuters in $-\delta$ s.

§ 184. The Suffix -s- (-2-s-, -i-s-, -u-s-).

Side by side with the nouns formed with -es- (-os-), which have been discussed in §§ 131—133, we find nouns which have the same s-sound in the suffix, but which cannot be shewn with certainty to have ever had an e (o) before the s. And we must remember that although -es- was certainly used as a single and independent suffix at the time of the dissolution of the proethnic community, it may nevertheless have arisen from the fusion of two distinct elements (-e-s-, or rather perhaps as in *gene-s-, see p. 20).

The nouns here to be discused may be arranged in four groups.

1. Skr. bhás- n. 'light, brilliancy' (nom. acc. bhás instr. bhāsā), Lat. fas n. (indecl.) originally 'utterance', √ bhā- (Bloomfield, Amer. Journ. of Phil. IX 19 compares Att. φῶς with Skr. bhás). Ar. *dās- 'gift' in Skr. dás-vant- 'rich in gifts' su-dás- 'giving richly' (acc. -dás-am- gen. -dás-as-) Avest. vanhu-đāh- 'giving good' (acc. -đánh-em gen. -đánh-ō), √ dō-. Skr. jnás-m. 'relative', cp. jnā-ti-š. Lat. flōs flōn-is, Flōr-a Osc. Fluusaí dat. Lat. spē-r-are O.Lat. pl. spē-r-ēs spē-r-ibus beside spē-s. Should we class here the Greek *spāς- *rapāς- in ×ράατ- καρήατ-

'head' (for *xoāo-v- *xaoāo-v-, cp. § 114 p. 347)? There is nothing to prevent our comparing with these words Skr. más- 'moon, month' O.C.Sl. měs-ecī 'month' from \sqrt{m} e- 'measure', see § 132 p. 415.

2. -3-s-. Skr. kravíš- n. 'raw flesh', Gr. ×ρέας n. 'flesh', cp. Lat. cruor. Gr. ×έρας 'horn' beside Skr. śiras- 'head' (originally 'prominent point'); Lat. cere-brum may contain either *keres- or *keres-, γῆρας 'old age', γέρας 'gift of honour', δέμας 'bodily frame'. Skr. támis-rā tamis-ra-m 'darkness' beside túmas; Lat. tenebrae instead of *temebrae (I § 570 p. 428 f.) and Mid.Dutch deemster 'dark' may contain either *temes- or *teməs-. Skr. rōciṣ- n. 'light' beside sva-rōcas- and Avest. raocah- n. 'light, clearness', O.Pers. raucah- 'day'. Avest. hadiṣ- O.Pers. hadiṣ- n. 'seat' beside Skr. sádas-. As regards the Aryan forms, however, it must be borne in mind that -iṣ- may represent Indo-Germanic -1-s-.

To this class perhaps also belong Gr. masc. ερως 'love' and γέλως 'laughter'. According to Solmsen (Kuhn's Ztschr. XXIX 109), there was the same ablaut-relation between these nominatives and the stems ερας- γελας- seen in Hom. εραν-νός ἡρώσ-σατο Pindar. γελανής Hom. εγέλασ-σα, as between δω- *dō- and δα-*do- 'give' (I § 317 p. 255 f.): γέλως *γελασ-ος *γελασ-ι etc., thence by qualitative assimilation of the vowel *γελο(σ)-ος *γελο(σ)-ι; later on they passed into the o-declension: acc. γέλο-ν ἔρο-ν and so forth.

3. -i-s-. Lat. cinis, pulvis, gen. cineris for *cinis-is cp. cinis-culu-s (I § 33 p. 33). Danielsson (Gramm. u. etym. Stud. I

51) compares, perhaps rightly, cinis with Gr. κόνι-ς. The same scholar assumes a stefn θέμισ- 'ordinance, right' in θεμισ-κρέων θέμισ-τ- and so forth. Here might also be classed some of the Aryan neuters in -iš- (see under 2); I will add only Skr. arciš- 'beam' jyōtiš- 'light'.

Was this -is- ever the weak form of an earlier -jes-?

4. -u-s-. Skr. dhánuṣ- n. 'bow' beside dhanu-ṣ m. dhán-van- n.; páruṣ- n. 'knot' beside párvan- n.; mádhuṣ- n. 'sweetness' beside mádhu- n.; mánuṣ- m. 'human being' beside mánuṣ m. Goth. mann- for *munu-. Lat. pecus n. beside pecu, genus m. n. 'knee' beside genu can hardly be deemed parallel examples; see § 104 p. 313.

In a few instances we find the ablaut -us-: -ues- (-uos-). Mention has already been made of Skr. áyuš- n. 'life' compared with Gr. aléç alæ § 133 p. 423. Another example is Skr. áruš- n. 'wound' beside O.Icel. ørr n. 'scar' for *aruiz-.

135. The Suffix -jes- -12es-1).

This is a primary comparative suffix, side by side with the secondary -ero- -tero- (§ 75 p. 188 ff.). The fact that it is contained in the superlative suffix -is-to- (§ 81 p. 242 ff.) indicates that its comparative meaning was wider then that of the sister suffix -ero- -tero-, which from the earliest period to which we can trace it was used only in comparing two things (e. g. Gr. nó-regos which of two?). So that originally the combination -is+ tero- in Gr. ἀριστερό-s Lat. sin-ister and the like (§ 75 p. 190 ff.) was probably not a mere pleonasm.

Even in the proethnic language the comparatives and superlatives containing this suffix had been brought into connexion with 'Positives' formed with all manner of suffixes (-u-, -o-, -roetc.), and were regarded as being derived from them, e. g. Skr. svád-īyas- Gr. ήδ-ίων 'suavior' beside svād-ú-š ήδ-ύ-ς 'suavis'. Thus -ies- (-is-to-) acquired the character of a secondary suffix, which appears very clearly in the new formations which are so

J. Schmidt, Das primäre Comparativsuffix, Kuhn's Ztschr XXVI
 877 ff.

common in the separate languages, such as Skr. bráhm-īyas-Lat. amīc-ior. Compare § 58 p. 107, § 81 p. 243.

As regards the ablaut of the root-syllable, the general rule seems to have been that the comparative had the strong grade (e in the e-series), and the superlative the weak grade. Parallel to this there was always a difference of accent. The corresponding positive was generally a form in which the weak-grade was regular in the root-syllable. Thus *léngh-jes-: *lngh-istó-: *lpgh-ú- 'brisk, small, little' = Avest. renj-yah- Gr. ελάσσων for *\$\lambda\gamma\gamma-\lambda\nu (I \ 459 p. 360, \ 497 p. 365, \ 618 p. 466) instead of * Elega-low through the influence of the form Elaz-: Skr. lúgh-ištha-s Gr. ελάχ-ιστο-ς (both with the accent shifted, see § 81 p. 243): Skr. lagh-ú-š Gr. ¿laz-v-ç; Skr. práth-īyas-: prth-ú-š; Gr. κρέσσων: κράτ-ιστο-ς instead of *κρατ-ιστό-ς: κρατ- $-\dot{v}-g$; $\partial \lambda \epsilon i \zeta \omega v$: $\partial \lambda i \gamma - i \sigma \tau o - g$ instead of * $\partial \lambda i \gamma - i \sigma \tau o - g$; $\partial \lambda i \gamma - o - g$; O.H.G. suoz-iro: Goth. sut-ista. These distinctions of ablaut were to a large extent lost through the influence of analogy; particularly as between the comparative and superlative. E. g. Skr. lághīvas- instead of *lánghīvas- or the true phonetic form *láh--īyas (I § 454 p. 335 f.); and conversely práthištha- instead of *prthišthá-, báhištha- instead of *bahišthá- (compar. báh-īyasposit. bah-ú-); Gr. τάχ-ιον instead of θασσον (τάχιστα, ταχύ-ς), and conversely ελέγχιστο-ς instead of ελάχιστο-ς; in μάσσων and μήπιστο-ς (μαχ-οό-ς) the vowel-grades have exactly changed places; Goth. sut-iza instead of *svot-iza (O.H.G. suoz-iro), but conversely O.H.G. suoz-isto instead of *suz-isto (Goth. sut-ista).

In considering all such cases however it must be remembered that in the original paradigm of the comparative besides. -ies- and -ios- the stem also appeared in the form -is-, before which the root-syllable must have had the weak-grade; e. g. dat. sing. *logh-is-ái like the superlative *logh-is-tó-; and this form of the root may also have appeared before -ies- (see below). We have perfect right to assume if we choose that even in the proethnic language the strong form of the root (*longh-ios-) had prevailed in all cases of the paradigm of the Comparative, so that, e. g. *loghisái had dropped out of use in favour of *longh-ios-)

isái; but it is quite as easily conceivable that forms like *lightisái descended into the separate languages, and there assisted in levelling the forms of the Comparative and the Superlative. The latter assumption would also make it easier to understand such instances as μάσσων: μήνιστο-ς (Avest. mas-yah- O.Pers. mab-išta-).

There are some examples without vowel-gradation in the root: *plē-jos- *plē-js-: *plē-zs-tó-: *plē-ro- = Skr. prā-yas Gr. $\pi\lambda \acute{\epsilon}-\emph{e}_{\varsigma}$ for * $\pi\lambda\eta\chi\sigma$ -: Gr. $\pi\lambda \acute{\epsilon}\acute{\tau}\sigma$ - $\tau\sigma$ - ς : Lat. plē-ru-s Gr. $\pi\lambda\acute{\eta}$ - ρ - $\eta\varsigma$.

As regards the different forms assumed by the comparative suffix itself in different languages many points are still obscure. The history of -ies- is in many ways parallel to that of the participal suffix -ues- (§ 136).

Remark 1 It is absolutely impossible to maintain that -zens- was the original form of this suffix. I attacked this view in Kuhn's Ztschr. XXIV 54 ff, and J. Schmidt in the same periodical XXVI 237 ff. has again undertaken its defence Schmidt imagines that -zens (-zēns) in the nom. sing mase became -zōs (-zēs) in the proethnic language by a regular phonetic change (cp. I § 220 p 188) and that the nasal was dropped in other cases by analogy To say nothing of the fact that no certain examples of this proethnic phonetic law (-zōs coming from -zōns) have been adduced (cp. also p. 415) 1), the results which Schmidt's hypothesis involves are altogether incredible and inadmissible see the Author in Iw. Muller's Hdb II 55 and Solmsen, Kuhn's Ztschr. XXIX 83 (Collitz too declares azainst Schmidt, Bezzenb Beitr X 65). I therefore still believe in -zes-(and in -zes- also; see p 439).

-zes- and -izes- stand side by side, just as -zo- and -ize-; and the form -izes- which is represented by Skr. -iyes- Gr. Att -zo(σ)- may be compared with -ize-, see § 63 p. 122.

The following conclusions may be considered as adequately established for the parent language (in what follows the parallel forms -iges--iges-are disregarded)

- 1. - $\chi \bar{o}s$ in the nom. sing. maso., - χos in the nom acc. sing. neut: Avest. vah- $\chi \bar{a}$ vah- $\chi \bar{o}$, Skr vás- χas (n), Lat. $ma-j\bar{o}r$ instead of $-j\bar{o}s$ (I § 569 Rem. 2
- 1) R Meringer (Ztschr. f. österr. Gymn. 1888 p. 134) derives the acc. pl. * $g\bar{o}s$ (Skr. $g\bar{a}s$ Gr $\beta\bar{\omega}$;) through * $g\bar{o}ns$ from * $g\bar{o}yns$. On p. 138, however, he assents to my view that the acc. sing. was * $g\bar{o}(y)m$ before a sonant, but * $g\bar{o}yn$ before a consonant. I confess I do not see how to reconcile these statemente I must still regard Meringer's * $g\bar{o}yns$ as a monstrosity, and the view that $g\bar{a}s$ $\beta\bar{\omega}$; are re-formations on the analogy of the acc. sing. as perfectly admissible.

- p. 426 f.) mā-jus, O.Ir. māo (m.), Goth. háuhis (n. adv.) for pr. Germ. -jas, O.C Sl. bol-je (n.) for pr. Slav. -jos.
 - 2. -jos in the voc. masc.: Skr. cds-yas.
- 3. -½s- in the loc. sing.: Skr. vás-yas-i (the accent has been shifted). Also in the fem. nom. -¡és-ī, gen. -is-¡és etc.; levelling in different directions produced on the one hand Skr. vás-yasī vás-yasyās, on the other Goth. Sut-1zei sut-izeins, and O.C.Sl. bol-jīši bol-jīše (instead of *boljēši *bolīše) The suffix has also the -tev-form in Lith. sald-ēs-ni-s 'sweeter' with -es-for -1es- (I § 147 p. 131), in the unique Pruss. gen. pl. muis-ies-on 'maiorum' and perhaps in Lat. mā-jes-tās beside mā-jor (this may also be a new formation modelled on hones-tās: honor and the like) and pē-jer-āre beside pē-jor (cf. Osthoff, Zur Gesch. d. Perf. 115).
- 4. -is- in the weak cases, e. g. dat. sing. -is-di loc pl. -is-sú. This form of the suffix has spread through the paradigm, wholly or in part, in Gr. πλίες πλίες neut. πλια (*πλεξς-), Goth. sut-iz-a gen. sut-iz-ins, mdiz-a gen. máiz-ins, O C Sl. gen boljīša 'maioris' for *boljīs-jā instead of *bol-īs-jā (see below). There were moreover adverbs in -is- *mɔ-js = Osc. mais 'magis' Goth. máis 'more', Lat. mag-is, Goth. vairs for *yirs-iz, Gr. πρεία- = Lat. prīs- in πρεία-yu-ς πρεία-βυ-ς prīs-cu-s. Further -is- occurred in the fem, gen -is-jés etc, see 3. Cp. superl. -is-i6-, § 81 p. 242 ff.

Finally I regard it as probable.

In Aryan, -iš- was displaced by -yas- in the weak cases: dat. sing. Skr. vās-yas-ē Avest. vah-yanh-ē, gen sing. Skr vās-yas-as Avest vah-yanh-ō. Where -yas- is also found in the strong cases in the same group of languages, as Skr. kanīyas-am 'iuniorem' Avest vaňhanh-em 'meliorem' (-ħh-=-hy-, I § 558 p 415), it is not original, but due to a secondary change Instead of -yas in the voc sing. masc. -yan appears in the post-vedic language; this form is doubtless due to the analogy of -van (§ 136 p. 441)

In Latin the -10s of the nom. sing. was carried through the whole case-system, later it became -i0r following the other cases, where -sregularly became -r-; mā-jor -jūr-em -jūr-1s etc.; cp. hon-or -ūr-em and so forth, § 138 p. 423.

The Old Church Slavonic nom. sing. masc. boljiji beside neut. bolje is probably not a compound word (bolji+ji), but a modification of "bol-iji which had the suffix in the form -ijes-; beside it we find nove-ji with -jes-. boljiji owes its form to the influence of the neuter bolje, or of masculines like doblji-ji, or of both together. The masc. terminations -iji and -ji (instead of *-ija *-ja = Idg. *- $ij\bar{o}s$ *- $j\bar{o}s$) are due to the influence of the -ijos -iji the same

relation as doblit: doblie. From the nom acc. sing. neut. and nom. sing. masc. -j- passed on to the other cases which had -ise- = -is-ie-: gen. boljiša instead of *boliša etc. See 3. above, fem. boljiše instead of *boliše.

But what is the origin of the nasal in Skr. vas-yas- (nom. vas-yan acc. vás-yūs-am) and of the Greek paradigm skánowr -or-os etc.? In § 63 p. 132 we regarded -1es- as an extension of the comparative -io- by -es-; compare Skr. náv-yas- Lat. nov-ior beside Skr. náv-ya- Goth. niu-ji-s, Lat. nim-is beside nim-iu-s. Now in some instances there may have been a form -jen- parallel to -10- and having the same force. The stems formed with this stood in Greek side by side with those which had -zes-, and were taken into more extended use because they had an easier and clearer inflexion than that of the -zes- comparatives, which had broken up into very dissimilar groups through the operation of phonetic laws within the casesystem, thus arose no-lov-lov-o; like zeor-lov -lov-o; (§ 115 p. 359), and $\chi \epsilon_1 \varphi \phi' - \tau \epsilon_2 \varphi \phi - \varphi = \pi t \phi' - \tau \epsilon_2 \varphi \phi - \varphi = \pi t \phi' - \tau \epsilon_2 \varphi \phi'$. In Sanskrit however - $\gamma d \epsilon_2$ and -yan- were contaminated, producing the form -yas-, just as mahant- (beside mahat-) seems to have arisen from the fusion of an n-stem and a t-stem. (§ 126 p. 399) Cp Danielsson, Gramm. and etym. Stud. I 49. Thus we should have side by side e. g. (1) *plē-to- (Gr. πλέω-ς πλέο-ς Cret. πλίω. Armen. I., gen. hoy, 'full', Skr prāyēna prāya-šaš 'for the most part. usually, mostly'), (2) *ple-zes- *ple-zes- (Skr. pra-yas, Gr. πλείω πλείστο-ς etc) and (8) *plē-zen- *plē-zn- (nlslar -or-os, neut Att nlsis, cp. with the latter Cret. πρείν Hom. πρέν Att. πρίν beside πρεισ-; πλείν: πλείον πλέον = Goth. máis · háuhis). Compare further (1) Skr. kan-yā 'maiden' Gr. zavó-c 'new' for *xav-to-: (2) Skr kán-īyas- 'younger' kan-išthá- 'youngest' (3) Avest. kain-in- f. 'girl'; Gr. (1) &a-10- 'easy' (\$\delta_1 - ldio-5, \delta_1 - tego-5): (2) \delta_1 \delta_2 \delta_4 \delta_4. δήιστο-ς δαστο-ς: (3) δη-ίων δάων (etymology doubtful, see Osthoff, Zur Gesch d. Perf 446 f.)2). Compare the parallel forms *az-uo- (Lat. aevo-m Goth. áiv-s): *āk-yes- (Gr. alés alő Skr. áyuš-): *āk-yen- (Gr alw' alér Skr. áyun-) § 116 p. 362, § 133 p. 423, Skr. fbh-va- fbh-vas- fbh-van- 'artistic' and other examples.

Indo-Germanic. lengh-(i)ios- beside *lngh-ú-: Skr. lágh-īyas- Avest. renj-yah- Gr. acc. ἐλάσσω, cp. p. 427 above. *suād-(i)ios- beside Skr. svād-š Gr. ήδύ-ς Goth. sut-s 'suavis': Skr. svād-īyas-, Gr. ήδ-ίω -ίω, Lat. suavior 'instead of *suād-ior through the influence of suāvi-s, O.H.G. suoz-iro Goth. sut-iza. *δk-(i)ios- beside Skr. aś-ú-š Gr. ωκ-ύ-ς Lat. acu-pediu-s: Skr. áś-īyas-, Gr. ωκ-ίων (this is not actually found, but may be

We find also μαλιώ-τερο-ς (Solon) βελτιώ-τερο-ς (Telesilla) compared with μάλιον βελτίων formed on the same principle as σοφώ-τερο-ς § 75 p. 193.

²⁾ In view of this it may not be rash to see a further group of old -io- forms in the Att. gen. sing. of the compar. in -ιου (ἀπό τοῦ μείου, ἐχ δάττου, Meisterhaus, Gramm. d. Att. Inschr. p. 67).

inferred from em-iaro-ς), Lat. ōc-ior. *plē-ios- (*plēis- by a proethnic contraction from *plē-is-; see I § 116 p. 108) beside Lat. plē-ru-s Gr. πλή-ρ-ης: Skr. adv. prā-yas Avest. frā-yah-, Gr. πλείω πλέες, Lat. plēōr-ēs or plēōr-ēs and plīs-ima carm. Arv., (O.Ir. lia, see p. 435), O.Icel. fleir-e (re-formed to correspond with meir-e). *mō-ios- *mə-is- beside O.Ir. mā-r Gall. -māru-s (in proper names) 'great' Goth. -mēr-s 'great' (cp. § 81 p. 247): Osc. mais 'magis', O.Ir. māo mō, Goth. máiz-a adv. máis'); perhaps Gr. Maίων should also be classed here.

Aryan. Skr. vás-yas- Avest. vah-yah- vaẋ-yah- (I § 558 p. 415) beside vás-u- vanh-u- 'good'. Skr. áṡ-īyas- Avest. ās-yah- beside āṣ-ú- ās-u- 'swift': Gr. ἀκ-ίων etc., see above. Skr. máh-īyas- Avest. maz-yah- 'greater': Gr. Ion. μέζων, Lat. mājor (cp. I § 135 p. 122) mag-is mag-is-ter (cp. I § 469, 8 p. 346 f.). Skr. néd-īyas- Avest. nazd-yah- 'nearer' for pr. Ar. *na-zd-; see I § 591 p. 447 and II § 4 p. 9.

Skr. vár-tyas- beside ur-ú- 'wide'. śrέ-yas- beside śrt-lá'fair, glorious': should we compare (fr. κρείων 'noble, princely,
ruler' (which has passed into the -ντ- declension, like θεράπων
etc., see § 114 p. 350)? kṣĕp-tyas- beside kṣτp-rá- 'quick'.
dáv-tyas- beside dū-rá- 'distant'. téj-tyas- beside trg-má- 'sharp'.
sráj-tyas- beside srag-vín- 'crowned'. náv-yas- náv-tyas- beside
náv-a- 'novus': Lat. nov-ior, O.H.G. niw-ro nuw-iro 'novior'.
pré-yas- beside priy-á- 'dear'. jyá-yas- 'mightier'. As regards
Skr. sthéyas- instead of *sthá-yas- beside sthi-rá-, sphéyas- instead
of *sphá-yas- beside sphi-rá-, see § 81 p. 244.

Avest. mas-yah- 'greater' beside O.Pers. maħ-išta- 'the greatest': Gr. μάσσων beside μακ-ρό-ς 'long'. Avest. taṣ-yah- 'more warlike, stronger' ground-form *tenq-zes- (I § 200 p. 168, § 473 p. 350), beside superl. tanc-iṣta-. In Avestic the metre often shows that the reading should be -iyah-, as renjiyah-, nazdiyah-, masiyah- (beside mah-) s.ya

In Sanskrit we find occasionally new formations from noun-

In the light of this paragraph what is said about this Gothic word in I § 685 p. 475 should be corrected.

stems, as tīkšņ-īyas- from tīkš-ņá- 'sharp', bráhm-iyas- like bráhm-ištha-, drádh-īylas- like drádh-īštha-; see § 81 p. 245.

Greek. $-\iota o(\sigma)$ - $-\iota o$ - (σ) - occurs only in the acc. sing. masc. and the nom. acc. plur. masc. and neut. By its side we find through all the cases $-\iota ov$ - $-\iota$ -ov- $(-\iota v$ - in $\pi \lambda \epsilon \bar{\iota} v$, $\pi \varrho \epsilon \bar{\iota} v$ $\pi \varrho \bar{\iota} v$ $\pi \varrho \bar{\iota} v$; in Rem. 1 p. 430 I have stated my conjecture that this form represents Idg. $-\iota ov$ - and never contained s. $-\iota o(\sigma)$ - $-\iota ov$ - occur in Attic.

The examples are given in the form of the acc. sing. masc. in $-\iota\omega$ - $\iota\omega$ for *- $\iota\omega$ 0/0- α *- $\iota\omega$ 0/0- α .

 $\pi \alpha \sigma \sigma \omega$ and $\pi \alpha \gamma - i \omega$ beside $\pi \alpha \gamma - i - \zeta$ 'fat, thick'. $9 \alpha \sigma \sigma \omega$ for *θαγχ-10σ-α beside ταχ-ύ-ς 'swift' (we must compare Pol. dažyć 'to press forward, aspire, hasten', see Bezzenberger in his Beitr. XII 241; the favourite comparison of this with Avest. tašyah- has not been reconciled with phonetic law), cp. ελάσσων p. 427. βραδ-ίω beside βραδ-ν-ς 'slow': Skr. mrad-tyas-. γλυκ-ίω beside γλυχ-ύ-ς 'sweet'. ὀλείζω beside ὀλιγ-ο-ς 'little' ὀλίγ-ιστο-ς, from which ολίζω was afterwards formed. κακ-ίω beside κακ-ό-ς 'bad'. $\partial x \partial - i\omega$ beside $\partial x \partial - \rho \partial - \varphi$ 'hostile'. $\eta \sigma \sigma \omega$ 'inferiorem' beside $\partial x - \alpha$; ήττασθαι instead of *ήττοῦσθαι follows ντκάσθαι, and from the verb ήττᾶσθαι the substantive ήττα was itself formed (Wackernagel, Kuhn's Ztschr. XXX 299 f.) ἀμείνω for *ἀμεν-ιω 'meliorem'. A form *ayy-100- 'nearer' may be inferred from the adv. donov for dyy-jov (beside dyy-i): Skr. ah-tyas- O.H.G. eng--ir-o 'narrower'. μείω 'minorem' for *μει-ιο(σ)-α beside *mi-no-*mi-nu-, Lat. mi-nus Goth. minniza for *mi-nu-is-, see below: the superl. $\mu\epsilon\tilde{\imath}\sigma\tau\sigma$ -c stands for $*u\epsilon(k)$ - $\iota\sigma\tau\sigma$ -c (for the vowel-grade of the root cp. ελέγχ-ιστο-ς and the like p. 427) or else is a new formation in imitation of its opposite πλείστο-ς. πλείω πλέω 'more' instead of $*\pi \lambda \eta - (\iota) o(\sigma) - \alpha$ has been affected by the form of πλεῖστο-ς (like Skr. sthέ-yas- instead of *sthά-yas- through the influence of sthéstha-, § 81 p. 244), and perhaps also to some extent by μείω; by the side of it we find a form πλεισ- for *plēs-, belonging properly to the weak cases of the comparative, in Hom. $\pi \lambda \dot{\epsilon} - \epsilon \varsigma \pi \lambda \dot{\epsilon} - \alpha \varsigma$ Cret. $\pi \lambda \dot{\iota} - \epsilon \varsigma$ neut. $\pi \lambda \dot{\iota} - \alpha$ (ι for ϵ , I § 64 p. 51 1): Skr. prā-yas etc.; see p. 431 above. χρείσσω χρείττω

¹⁾ Here for 'in the Doric dialects' read 'in some Doric dialects'.

beside Ion. κρέσσω (: κράτ-ιστο-ς κρατ-ύ-ς 'strong' and μείζω beside Ion. μέζω (: μέγ-ιστο-ς μέγ-α-ς 'magnus') owe their ει to the analogy of χείρω ἀμείνω ὀλείζω, conversely Ion. Εσσω beside ήττω follows κρέσσω, cp. I § 639 Rem. p. 479 and Ber. d. sachs. Ges. d. Wiss. 1883 p. 193.

In rare instances we find nominal suffixes preceding the comparative - $\iota o \sigma$ -, as $\star \iota \omega \lambda - \iota \omega$ 'pulcriorem' beside $\star \iota \omega \lambda \iota \circ \sigma$, $\beta \iota \lambda - \tau - \iota \omega$ 'meliorem'. Compare the superlatives, § 81 p. 245.

In Cretan (Gortyn) we find $\pi \varrho \epsilon i \gamma \omega$ ($\pi \varrho \epsilon i \gamma \upsilon \alpha$) beside $\pi \varrho \epsilon \bar{\imath} \gamma \upsilon - \varsigma$ and $\pi \alpha \varrho \epsilon \bar{\imath} \omega$ ($\pi \alpha \varrho \epsilon \bar{\imath} \omega \alpha \varepsilon \omega$) instead of * $\pi \varrho \epsilon \bar{\imath} \tau \omega$ = Ion. $\pi \varrho \epsilon \sigma \omega \omega$, beside $\pi \alpha \varrho \tau \nu' - \varsigma$. It remains doubtful whether these forms are regular phonetic representatives of * $\pi \varrho \epsilon \iota \omega \gamma - \iota \omega$ (cp. Dor. $\pi \alpha \varrho \varrho \omega \omega$ for * $\pi \alpha \varrho \sigma \omega \omega$), or new formations with - ω instead of - $\iota \omega$ on the model of some one or more forms where the ι had regularly disappeared.

One example of an adverb in -is is $n\varrho\varepsilon\iota\sigma$ - ('before') found in the compound Cret. $n\varrho\varepsilon\tilde{\iota}\sigma$ - $\gamma\upsilon$ - ς (whence $n\varrho\varepsilon\tilde{\iota}\gamma\upsilon$ - ς by assimilation). Thessal. $n\varrho\varepsilon\tilde{\iota}\sigma$ - $\beta\upsilon$ - ς (cp. I § 428 p. 316), which corresponds to the prīs- of the Lat. prīs-cu-s (beside prior prius), cp. Rem. 1 p. 429 and for - $\gamma\upsilon$ - $\beta\upsilon$ -, § 91 Rem. p. 277. Obviously * $n\varrho\varepsilon\iota\varsigma$ is related to Cret. $n\varrho\varepsilon\iota\iota\nu$ (Hom. $n\varrho\iota\iota\nu$ Att. $n\varrho\iota\iota\nu$) as $n\lambda\varepsilon\iota\sigma$ - (in $n\lambda\dot{\varepsilon}\varepsilon\varsigma$ $n\lambda\varepsilon\tilde{\iota}\sigma$ - $\tau\sigma$ - ς) to Att. $n\lambda\varepsilon\tilde{\iota}\nu$ and as $n\lambda\varepsilon\dot{\iota}\sigma\iota\varsigma$ (1. e. * $n\lambda\varepsilon\iota\sigma\sigma$ - $\varepsilon\varsigma$) to $n\lambda\varepsilon\dot{\iota}\sigma\upsilon$ - $\varepsilon\varsigma$, cp. Rem. 1 p. 430. If we start from an original * $pr\dot{\varepsilon}\iota$ - $z\sigma$ -* $pr\iota(z)$ -is- (by analogy *pri- $i\sigma$ - and *prez-is-), Lat. $pr\bar{\iota}s$ - may represent not only * $n\varrho\varepsilon\iota\varsigma$ but also *priz-is (cp. $n\varrho\dot{\iota}\nu$). It must be admitted that the forms $n\varrho\dot{\iota}\sigma\gamma\upsilon$ - ς $n\varrho\dot{\varepsilon}\sigma\beta\upsilon$ - ς are still obscure 1).

Italic. O.Lat. minerimu-s for *minis-imo-s (cp. plūr-imu-s etc.), minis-ter, Osc. minstreis mistreis minoris': cp. Goth. minniza

¹⁾ The student who believes that the doctrine of 'hyphaeresis' ($x\acute{e}\sigma xero$ = * $xe(i)e\sigma xero$, $\sigma n\acute{e}\sigma a$ = * $\sigma nee\sigma a$) is not a mere midsummer madness, may find comfort in supposing that * $nee\sigma$ stands for an older form * $ne(i)e\sigma$ an analogical modification of an original loc. *pri- $i\acute{e}s$. It is simpler however to analyse *nees into ne +-e, (the genitive ending), and to regard it as a by-form of $n\acute{e}e$ -os Skr. pur- $\acute{a}s$ (I § 294 p 234) Prellwitz, De dial. Thessalica 1885 p. 11 takes a very similar view, but a different explanation may be found in Per Persson's Studia etymologica, Upsala 1886, p. 95.

'minor' for *mi-nu-is- O.C.Sl. minjiji 'minor' and the archaic Gr. μείω 'minorem' for *μει-ιοσ-α (p. 432), minus was a neuter like vol-nus Gr. δά-νος (see § 132 p. 415 and p. 418); it originally meant 'minority', and then like vetus came to be used as an adjective, when it had thus become the opposite of mājus, mājoris mājor etc. gave rise to the analogous formations minōr-is minor etc.¹). Umbr. mes-tru f. 'maior' (cp. § 75 p. 195), Osc. mais 'magis'. O.Ir. māo etc., see p. 431 above. Osc. pústir-is 'posterius'.

Lat. $\bar{o}c$ -tor beside acn-pediu-s: Skr. $\dot{a}\dot{s}$ -iyas- etc., see p. 430 f. above. nov-ior beside novo-s. Skr. $n\dot{a}v$ -yas- etc., see p. 431 above. sen-tor beside senex: Skr. $s\dot{a}n$ -yas- beside $s\dot{a}n$ -a-s 'old', O.Ir. sin-iu 'older' sinser 'the elder, eldest' for *sens-tero-s beside sen, Lith. $sen\ddot{e}s$ -n-s 'older' beside $s\ddot{e}n$ -a-s, cp. also Goth sinista 'eldest'. mel-tor. $p\ddot{e}$ -tor. $m\ddot{a}y$ or $m\ddot{a}y$ with magns beside $m\ddot{a}g$ nu-s: Skr. $m\dot{a}h$ -v-v-c, see p. 431 above, the evidence of the Gr. $u\dot{e}\gamma$ a-c-c-and the Goth. mkil-s shews that the root originally had e and hence it seems necessary to assume that the Latin word has been influenced by the pr Ital. *maxs-Idg. *ma-2s-(cp. Osc. mais beside Lat. magns, Umbr. mes-tru beside Lat. magister), which belongs to a different root.

pleores and plisma, see p. 431 above It has not yet been clearly shewn what relation the forms plous plus, plur-es, ploer-a and plourume (C. I. L. I 32) bear to *ple-los- which we must assume as the ground-form of the comparative stem.

Remark 2 For a discussion of these latter forms see Stolz (Iw Muller's Handb. II p 164), Danielsson (Pauli's Altital. Stud. IV p 164 and Osthoff (Paul-Braune's Beitr. XIII 445 f) Danielsson's proposal to assume a form * $pl\bar{o}$ -zos- parallel to * $pl\bar{e}$ -zos- is the simplest from the phonetic standpoint. We should start from a stem * $pl\bar{v}z$ -, whence we should arrive at *plozs- (according to I § 612 p 462)2), and then at $pl\bar{u}s$ - In plous- ou would be merely a graphic representative of the sound \bar{u}

¹⁾ It seems to me less probable that even at the time when minus was still a substantive, there was also a mase, form minor, like decorbeside decus and the like (§ 133 p 423)

²⁾ In the third live of this paragraph read 'explosive or spirant' instead of 'sonant'.

Adverbs in -is-. Lat. mag-is beside major. nimis. satis. prīs in prīs-cu-s beside prior, see p. 433 above; is it also contained in prīdem ? 1). Osc. mais 'magis': Goth. máis.

There was in Latin a very great deal of levelling between the form of the comparative and that of the positive, which converted -zes- into a secondary suffix. suāvior instead of *suād-ior follows suāv-i-s for *suād-u-i-s, cp. Skr. svād-īyas-. tenuior instead of *ten-ior follows ten-u-i-s, cp. Skr. tan-īyas-. levior instead of *leg-ior follows levi-s for *legu-i-s. sēr-ior instead of *sē-(i)ōs follows sē-ru-s, in the same way, in old Irish, side by side with the regular sia there arose a form sīriu sīre on the analogy of the positive sī-r 'long'. jūn-ior juven-ior, cp. Skr. yáv-īyas-. audāc-ior. facil-ior. asper-ior. doct-ior. sapient-ior.

Lat. super-ior inter-ior dexter-ior Osc. pústir-is; see § 75 p. 195. Late formations are plūriōrēs proximior and the like.

Old Irish Only the nom. sing has been kept.

māo mō for *mō-jōs, beside mā-r 'great'. Osc. mais etc., see p. 431. sin-iu beside sen 'old' Skr. sán-yas- etc, see p. 434. laig-iu 'smaller'.

It is often a secondary suffix, as in sīr-iu (see above), foills-iu from follus 'manifest', uaisl-iu from uasal 'liigh'.

Sometimes we find -u instead of -iu after consonants, as lug-u beside largru. This is perhaps a new formation modelled upon those forms in which i had been dropped between vowels, such as mao (*mau)

The forms in -a have not been explained: examples are with māa mā side by side māo; lia beside il 'much': Skr. prā-yas etc, see p 431 above; sia beside sī-r 'long', ōa beside ōac ōc 'young'. Skr. yáv-īyas-; nessa 'nearer'.

-is-tero-. sinser öser, see § 75 p. 196.

Germanic. As a rule, the suffix is extended by n-suffixes.

¹⁾ $pr\bar{i}di\bar{c}$ can only be regarded as * $pr\bar{i}s$ - $di\bar{c}$ if it is assumed that $postr\bar{i}di\bar{c}$ stands for *postris- $di\bar{c}$ (cp. Osc pústir-is) (Havet's explanation, in Mém de la Soc. de lingu. IV 229, seems to me untenable). But $postr\bar{i}$ may also be loc sing of postro-, and $pridi\bar{c}$ may have been formed later in imitation of $postr\bar{i}di\bar{c}$.

These are absent only in such adverbs as Goth. háuh-is 'higher' nēhv-is 'nearer', hald-is 'more gladly, potius, rather' fram-is 'further on'; the termination -is seems to be the original neuter termination -ios (Rem. p. 428 f.), while such adverbs as Goth. vairs O.H.G. wirs 'worse', for pr. Germ. *uirs-iz, Goth. mins O.H.G. min 'less', for *minu-iz represent Idg. -is (see loc. cit.).

Pr. Germ. -iz-en- (-1z-en-) m. n. (f. Goth. -iz-ein- O.H.G. -ir-ōn-). Goth. sut-iza O.H.G. suoz-iro 'sweeter': Skr. svád-īyas-etc.; see above, p. 430. Goth. máiza O.H.G. mēro 'greater': Osc. mais etc., see above, p. 431. Goth. hard-iza O.H.G. hart-iro hert-iro beside Goth. hard-u-s 'hard': Lith. kartēs-ni-s beside kart-ù-s 'bitter'. Goth. háuh-iza O.H.G. hōh-iro beside Goth. háuh-s 'high'. Goth. bat-iza O.H.G. bezz-iro 'better'. Goth. vairs-iza O.H.G. wirs-iro 'worse, wickeder'. The forms have often been levelled to match the positive, and secondary formations have arisen: Goth. jūh-iza O.H.G. jung-iro and jūg-iro beside Goth. jugg-s O.H.G. jung, as contrasted with Skr. yáv-īyas- O.Ir. ōa, cp. O.H.G. jungisto § 81 p. 248, Goth. alp-iza O.H.G. alt-iro beside Goth. al-p-ei-s O H.G. al-t 'old'. The origin of Goth. minn-iza O.H.G. minn-iro for *mi-nu-iz-, compared with Gr. µsiw Lat. mins-ter O.C.Sl. mīnjījī, is obscure.

-ōz--ōz-en- appeared in proethnic Germanic side by side with -iz--iz-en-, see § 81 p. 248. It is used only in the comparatives of o-stems in Gothic and (with rare exceptions) in Old High German. Adv Goth. sniumundōs 'more hastily', aljaleikōs 'otherwise'. Goth. frōdōza from frōp-s 'wise', svinpōza from svinp-s 'strong, powerful', O.H.G. hobōro from hob 'beloved', liohtōro from lioht 'bright', gileganōro from gi-legan 'apt, suitable': hōhōro (also hōhiro) from hōh 'high', hērōro (also hēriro) from hōr 'grand, glorious'; this variation is frequent; tiurōro (and tiuriro) from tiuri 'dear, valuable'.

O.H.G. obarōro (obarōsto) from ob-aro 'upper', aftrōro (aftrōsto) from af-tro 'later', fordrōro fordarōro (fordarōsto) from for-dro for-daro 'former' mēr-iro and mērōro from mēro.

Balto-Slavonic. In Lithuanian the only form of the suffix is -1es-, in the combination -ē-s-n-1-s -ē-s-n-e; the origin of

the second part (-n-jo-) is difficult to explain (an attempt may be found in Schmidt's paper in Kuhn's Ztschr. XXVI 399 f.). In Slavonic in the nom. acc. sing. neut. -je = Idg. -zos; as regards -jiše- instead of -iše- = Idg. -is-jo- and nom. sing. masc. -jiji (later -jiji, no doubt by the rule in I § 36 p. 37) -ji, see p. 429 f.

Remark 3. For the Lithuanian comparative adverbs in -1aus, such as saldžiaūs 'more sweetly', whose suffix has nothing to do with -1es-, see § 81 p. 248 f.

Lith. sald-ēsni-s O.C.Sl. slaždījī, neut. slažde, beside sald-ù-s slad-ù-kū 'sweet'.

Lith. gerësni-s beside gëra-s 'good', didësni-s beside didi-s 'great'. It is clearly denominative in e. g. baltësni-s from bál-ta-s 'white' jaunësni-s from jáu-na-s 'young'.

In Prussian a solitary example with -ies- is preserved (-iesno doubt = Idg. -ies-): muis-ies-on 'maiorum'.

O.C.Sl. boljījī boljījī neut. bolje 'greater': Skr. bál-īyas'stronger, more powerful'. gorjījī 'worse': Skr. gár-īyas- 'gravior',
mīnjījī 'smaller': O.Lat. miner-imu-s minis-ter, see pp. 433 f. 436
above. krēpljījī beside krēpūkū 'strong'. chuždījī beside chudū
'bad'. vyšījī beside vysokū 'high'. As to the effects produced
by the first j of -jījī upon preceding consonants, see I § 147
p. 132 ff.

This formation however is not so frequent in Slavonic as that in -ē-jīs-: nom. sing. masc. -ējī nom. acc. sing. neut -ējē gen. -ējīša and so forth. novējī from novū 'new'. silīnējī from silīnū 'strong'. mūnožajī from mūnogū 'multus', for *mūnogējī according to the rule given in I § 76 p. 66. As the last example shows, the ĕ of -ējī was Idg. ē, and it can scarcely be doubted that this comparative formation arose from the addition of the suffix -ies- to the instr. sing. in -ē of the o-stems; compare the Germ. comparative in -ōz-(en-), formed from the instr. sing. in ō. From the nom. sing. in -ē-jī -ē-jē, j passed into the other cases; hence the gen. -ē-jīša instead of -ē-īša and so forth. The Prussian comparatives with -ais- seem to be of the same kind; e. g. maldais-in acc. sing. masc., from malda- 'young', cp. O.C.Sl.

mladě-ji beside mladŭ 'young', urais-in beside ura- 'old', massais adv. less' beside Lith. māša-s 'small'. It is doubtful however whether these forms come from the instrumental in -ë or from that in -ō, whether -ais- represents -ē-is- -ēis- or -ō-is--ōis-.

§ 136. The Suffix -ues-1). This served to form the Perfect Participle Active.

In this participle as elsewhere the perfect stem was reduplicated; cp. Skr. ba- $bh\bar{u}$ - $v\dot{a}s$ - Gr. $\pi\epsilon$ - φv - $\omega' g$ from \sqrt{bheu} - 'become'. Even such forms as Goth. pl. masc. $b\bar{e}r$ -us- $j\bar{o}s$ 'parents' Lith. fem. $s\dot{e}d$ -us-i (beside $s\dot{e}d$ -au 'I sit') contained reduplication, as we shall see when we come to discuss the verb.

Remark 1 It may be assumed that the syllable of reduplication had not come to be regarded as an integral element in the formation of the -ues- participle, until the latter had been associated with the perfect system (single forms with -wes- may very well have had the reduplicating syllable before that time, see § 52, 2 p 93 f, and these very forms may have been the chief factors in cementing the connexion of this participle with the perfect-system) It is therefore a question whether the partic Skr vid-vás- Gr fειδώ, είδω, has not descended as an unreduplicated form from a period older than the date at which this association had taken place; it is certain that the infinitive Avest vid-van-or Gr eid-év-ai (§ 116 p 363), whose connexion with the verb belongs to a comparatively late period, never had the reduplication. I conjecture that this participle of weid-was always unreduplicated, and being a word very frequently used banished the reduplication even in the forms of the finite verb (Skr véda Gr olde etc) Other participles without reduplication must be explained in the same way, e. g. Skr. sah-vás- viši-vás-, Gr είκ-ώς, αγοια (sc. ή οδός) αιθυια (80. denc)2), Lith dey-es O C.Sl. žeg-u, Lith rež-es O C Sl vez-u.

The root-syllable has generally the weak-grade of Ablaut; this is regular in Aryan, as Skr. ri-rik-vás- beside ri-réc-a he

¹⁾ J. Schmidt, Das Suffix des participium perfecti activi, Kuhn's Ztschr XXVI 329 ff. W. Schulze, Zum participium perfecti activi, ibid XXVII 547 ff. (with this essay compare Spitzer, Lauth des arkad. Dialektes, Kiel 1883, p 11 ff). F Mikhosich, Beitr. zur altsloven. Gramm., Vienna 1875, p 5 ff. (das Partic praet. act I)

²⁾ Cp. E. Wörner, Die Substantiva auf υια, in Sprachwissensch. Abh. aus G. Curtius' gramm. Gesellsch 1874 p 111 ff On p. 114 the author writes of participles like ἄγυιι that 'either they have lost their reduplication, or else — more probably — they never had any'

set free, made empty', ca-kr--vás- beside ca-kár-a 'he made', Gr. lo-vĩα f. 'knowing' beside olds, Lith. vilk-es O.C.Sl. vluk-ŭ beside the pres. velk-ù vlěk-a 'I trail'. Certain forms, however, seem to have originally had the strong grade, that is e in the e-scries, ë in the e-series and so forth. This is indicated by Gr. εἰδώς (: ἰδυῖα, οἶδε), κεκλεβώς Messen. (: κέκλοφε), ἐρρηγεῖα Heracl. (: ἔρρωγε), λεληχώς (: λελαχνῖα), ἀρηρώς (ἀραρνῖα), ἐστη-ώς (: ἔστα- $-\omega_S$) and the like; also by Goth. veitvo \bar{p} -s 'witness', if, as is probable, its ei = Idg. ei (see below) 1). It may be assumed, that originally this form of the root was proper to the strong cases of the masc. and neut., where the participal suffix appears ın its -o- form (-uŏs- not -uĕs-). nom. sing. masc. *uérd-uōs acc *weid-wos-m. Further explanation of the forms assumed by the root-syllable (c. g. Goth, ber-us-jos Lith. sed-es) must be reserved for the section dealing with the formation of the perfect-stem.

With respect to the phonetic variation in the character of the participal suffix, our enquiry into its original form or forms is met by the same difficulties as we encountered in dealing with the primary comparative suffix (§ 135). Much has still to be explained.

Rem. 2 In Kuhn's Ztschr XXIV 69 ff I have attacked the view (which J. Schmidt, ibid XXVI 337 ff, has again undertaken 10 defend) that this suffix originally contained a nasal (-uens-) My criticism (§ 135 Rem 1 p 428) of the old view of the comparative suffix, applies equally well to this It is absolutely untenable. The arguments on either side are on the whole the same, see loc cit. I therefore still regard -uesas the original form

There is no record of a form -unes- parallel to -ues- (op. -ies- beside -ies-) Osthoff, Zur Gesch d Perf 401 ff, endeavours to shew that in Skr. forms like ökivis- paptivds- the termination -ivas- took the place of -uvas-.

If we disregard this question as to the initial part of the suffix and regard it simply as -ues-, the following assumptions may be considered as adequately established for proethnic Indo-Germanic.

1. The nom. sing mase, ended sometimes in -uvs, Gr &d-vc, sometimes in -uvs, (Lith. da-ves instead of *da-ves (see below) The pr. Ar. -uds, Avest vid-va, may represent either termination; here we must notice the

¹⁾ O.C.Sl. vlěku and brěgů prove nothing. See O. Wiedemann, Beitr. zur altbulg Conjugation, 1886 p 132 f.

Skr. compounds with d-dus-su, as u-vidvas-su-vidvas- beside vid-vus-, as favouring the view that -us and -us existed side by side in Aryan.

- 2. - ψos in nom. acc. sing. neut.: Gr. eib-o's. There was probably a parallel form - ψes , compare the masc. - ψes . It remains uncertain whether the Lat. neuter forms caddver and papaver contained this suffix (-ver would have taken the place of the phonetically regular *-ves).
- 3. 408, or (under other conditions) 408, in the voc. sing. m.: Skr vid-vas.
- 4. -μέs- in the loc. sing. Skr. *-vas-: (there is unfortunately not a single example of this case in our text of the Veda). We may again directly compare with this the feminine formation (cp. § 135 p. 429): nom. -μέ-sī gen. -μέ-sī (Gr. -εῖα beside -νῖα; an original γεγονεῖα: *γεγον-ναῖς became, by levelling, on the one hand γεγονεῖα: γεγονείας, on the other γεγοννῖα: γεγοννίας; cp. also Laced βίδεοι beside βίδνοι ίδνῖοι lδῦτοι name of an official ('inspectors').
- 5. -us- in the weak cases: dat sing Skr vid-uš-ē Avest. vid-uš-ē, gen. sing. Skr. -úš-as Avest. -uš-ō, gen. pl Skr -úš-ām Avest. -uš-am, instr. pl. Avest -ūž-bīš. Further in the fem. suffix -us-μē- and the corresponding masc. neut. -us-μο- gen. sing f Skr. vid-uš-yās Gr. ið-via;, Gr pl ιδυῖοι βιδυοι (see 4), Goth. bēr-us-jōs m. 'parents', gen. sing. f. Lith. vilk-us-ios O C Sl vlūk-ūše gen. sing. m. Lith vilk-us-10 O C Sl vlūk-ūša. Cp. further the Ar nom. sing in -uš: Skr vid-uš Avest. vid-uš maman-uš and other like forms, compare perhaps Osc sipus 'sciens' and O.C.Sl vlūk-ūša (see below), and again the comparative formation Skr viduš-tara-Avest jāger-būš-tara-

Lastly, I regard it as probable

6 That the strong cases of the mase (except the nom sing) had -uos-, where the tense-stem bore the accent acc sing. Avest vid-vånh-em.

It will be remembered that we have regarded -1es- as an extension of -10-, and assumed the existence, side by side with -1es-, of a form -1en-with the force of a comparative suffix (§ 135 p. 430). In the same way, I regard -1es- as an extension of -10- (cp. Skr. pak-νά- Lat ar-vo-s pas-cuo-s perspicuo-s residuo-s and the like, see G. Curtius, Ber. d. sāchs Ges. der Wiss., 1885, p. 432)¹), and I assume the existence of a parallel form -1et-, made by the addition of the -t- (-et- -ot-) discussed in § 123 p. 389 ff This -1et- appears in Greek and Gothic Gr acc. sing. εἰδ-ότ-α gen. sing εἰδ-ότ-ος etc., Hom. τεθτη-ῶτ-α, Goth. veit-νοδ- 'witness', veit-νοδ-: *123 p. 393 f The form -1οδ- was originally proper to the nom. sing. masc, and the phonetic coincidence of -1οδ and -1οδ-s in Greek produced there the contaminated declension. I doubt, however, whether this was also the origin of the Skr. -vat- in loc pl. vid-vát-su instr. pl. vid-vád-bhiš nom. acc. neut. vid-vát. We saw in § 127 p. 405 that in proethnic Aryan these participles

We have the two side by side in *āi-ues- *āi-uo- § 116 p. 362 f.
 § 135 p. 423.

coincided with the vani-stems in the formation of the nom. and voc. sing. masc.: -yās and -yas. Now pr. Ar. *-uš-šu loc. pl. and *-už-bhiš instr. pl. (Avest. vīā-ūž-bīš) must have regularly become in Sanskrit *-uišu and *-uābhiš, and similarly, *-yas-su and *-yaz-bhiš (if -yas- had taken the place of -uš- before the phonetic change of š and ž came into operation) must have become -vatsu and -vadbhiš (I § 557 p. 412, § 591 p. 448). In either case, especially in the latter, a new and closer phonetic relation to the vanistems was established. If *-uišu *-udbhiš arose first, then it must have been just the association with the vani-stems that superseded these terminations by -vai-su -vadbhiš'). The neuter form vid-vát and the post-Vedic vidvattara 'wiser' vidvattā- vidvattva-m 'erudition' were further results of this connexion.

Now whence comes the nasal in Skr. -v\(\bar{q}s\)-? To explain this as we explained the nasal in Skr. -y\(\bar{q}s\)- (p 431) as being derived from a form -ven- parallel to -ves-, is hardly probable, because there are no participial forms corresponding to the Greek comparative \(\nu\)\(\tilde{c}\)\(\nu

And lastly, the *cant*-stems may have given rise to the later formation of the voc. sing. in -van instead of -vas, having first exchanged -vas for -van in their own system.

In Lithuanian we find vilk-es beside da-ves, Pruss laipinn-ons beside klanti-wuns, OCSl vluk-u beside da-vu, similarly gen. vilk-us-io beside dã-vus-10, vlūk-ŭša beside da-vūša. In the nom sing, the consistent absence of v after the consonant may have been caused by the fact that this sound regularly disappeared after certain consonants (cp. I § 184 p. 160 f.)2); the form which the suffix took in these instances was then applied generally to all tense-stems that ended in a consonant. At the same time the absence of the r in the other cases (rilk-us-io vluk-uša etc.) may have helped in forming the type In the case of Slavonic however, we have further to take into account the possibility that there existed a nom. in *-ns (cp. Skr. vid-úš etc p 440). -ŭ may be the regular phonetic representative of this ending. Lith. -vens -ens, -ves -es replaced *-ves *-es through the influence of the present form -ans -as (-ens probably arose first, on the model of -ans, then -rens likewise), and a further consequence was that the neuter of the preterite in -ve -e was formed upon the neuter of the present in -a. The Prussian -wuns -ons (-uns -ons) is a similar analogical formation; but it remains an open question whether the original

¹⁾ This association prevented the development of forms parallel to the loc. pl. mahīyassu and the instr. pl. mahīyābhi (see I § 557 Rem. p. 412, § 591 Rem. 2 p 448).

²⁾ In l. 18 of this page read 'after initial s- (sz-)' instead of 'before'.

form here was *-yes, whose e-vowel, after the insertion of the nasal, became o (u) because of the preceding u-sound, or whether we should take Idg *-uos as our starting-point. In Slavonic we have masc. -vu -u and neut. -vu -u, just as in the present -y serves for both genders: as here -y passed from the mase, to the neut., so probably did -vu -u in the preterite, the old neuter form falling out of use. If now -u = Idg. *-us, it is a very natural suggestion that -vu arose from a contamination of *-ne and *-uēs or *-uōs But -wi may have arisen in the same way as -jī (p. 429 f): if so, there once existed side by side masc. -va = Idg. *-wos and neut. *-vo = Idg. *-vos, *-vo produced the mase -vu and was itself afterwards driven out of the field by -ri Gen Lith da-vus-io OCSl. da-vuša owe their r to the nom (we should expect *d-us-10 *d-uša), Lith. buousio O C Sl. byvăša (beside bū-vcs by-vu) are to be analysed as bûv-usio byv-ŭša (instead of *buv-uša), and thus these forms may have helped to give currency to the formations davusio etc OCSI chvalji chvaljišu for *chvalju *chvaljuša (later chvalivă chvalivăša) follow the type of the non-derivative verbs, ep. part. pret pass. chvaljenu like vedenu (Wiedemann, Beitr. zur altbulg. Conjug 134)

It is to be hoped that the explanations advanced here and on p 429 ff. will not meet with the fate which has befallen J Schmidt's attempt to elucidate the same difficult theme, and be regarded as 'final'. We are still, I think, some distance, perhaps a very considerable distance, from a final conclusion.

ldg. Skr. rr-rik-vás- Gr. $\lambda \epsilon$ - $\lambda \omega \pi$ - $\omega \omega$ Lith. lkk-es, \sqrt{leig} leave at liberty, leave'. Skr. ja-gan-vás- (later also ja-gmi-vás) ja-gm-úš-Avest. ja-ym-uš- (cp. I § 199 Rem. 2 p. 168, § 225 p. 192 f.): Gr. $\beta \varepsilon - \beta \alpha - \omega_{\zeta}$ no doubt instead of * $\beta \varepsilon \beta \alpha \nu - (F)\omega_{\zeta}$ (cp. the last-mentioned passage, and the Greek section below), Lith. gim-cs 'having come into the world' (I § 249 p 204), \sqrt{gem} . Skr. bi-bhī--vás- bi-bhy-úš- Avest. bi-wi-vah- beside Skr. bi-bháy-a 'he was afraid', V bhej-. Skr. šu-šru-vús- šu-šruv-úš- beside šu-šrav-a 'he heard', V kley-. Skr pa-pti-vás- pa-pt-úš- beside pa-pát-a 'he shot through the air, flew': Gr. πεπτώς for *πε-πτα-ώς (πε--πτηιώς πε-πτεώς are later formations following the perfect of στά), γ pet-. Skr. sēdi-vás- sēd-úš- beside sa-sád-a 'sat', sēd-= Avest. hazd- I § 591 p 447. Lith. sed-cs having seated oneself, V sed-. Avest ta-pk-uš- beside tac- 'run' (I § 473 p. 349): O.C.Sl. tek-ŭ 'having run, flowed'. Skr da-d-vás-(da-dī-vás- da-dā-vás-) da-d-úš- Avest. da-ā-vah- da-p-uš- 'δεδωxω'ς': Lith. dã-ves O.C Sl. da-vũ, $\sqrt{d\bar{v}}$ - 'give'. Skr ja-jîn-vás-1α-jn-úš- and jān-úš- beside ja-jnāú 'he knew' pres. jā-nā-ti: O.C Sl zna-vŭ beside zna-ti 'to know'.

It was further extended to the x-perfect: δεδωχ-ως beside δέ-δωχ-ε 'has given', ξ-στηχ-ώς beside ξ-στηχ-ε 'stands', τεττμηχ-ώς beside τε-τίμηχ-ε 'has honoured' and so forth.

The femme forms in $-\varepsilon \tilde{\iota}\alpha - \varepsilon i\alpha \varsigma$ (see p. 440) appear in Doric dialects and in Attic: e. g. Heracl. $\varepsilon \rho \rho \eta \gamma - \varepsilon \tilde{\iota}\alpha$ Ther. $\varepsilon \sigma \tau \tilde{\alpha} \kappa - \varepsilon \tilde{\iota}\alpha$, Att. $\gamma \varepsilon \gamma \sigma \nu - \varepsilon \tilde{\iota}\alpha$.

It occurs in Homeric forms with $-(f)\omega\tau$ - instead of $-(f)\sigma\tau$, whose ω was taken from the nom. sing. masc., e. g. $\pi\epsilon$ - $q\nu$ - $\tilde{\omega}\tau$ - σ -, $\mu\epsilon$ - $\mu\alpha$ - $\tilde{\omega}\tau$ - $\epsilon\varsigma$ - $\tilde{\omega}\tau$ - $\sigma\varsigma$, $\tau\epsilon$ - $\partial \nu\eta$ - $\tilde{\omega}\iota$ - α . Cp. $\mu\dot{\eta}\sigma$ - $\tau\omega\varrho$ - α formed on the pattern of $\mu\dot{\eta}\sigma$ - $\tau\omega\varrho$ § 120 Rem. p. 380, § 122 p. 386.

These perfect participles, like the other forms of the perfect stem, were remodelled on the analogy of the presents in -ω in different dialects, especially in those of the Aeolic group: e. g. Lesb. πεπληφώκοντα εὐεργετήνοισαν, Thess. ἐν-οικο-δομεικόντεσσι, Boeot. ΓεΓϋκονομειόντων (see above), Hom. κεκλήγοντες, Hesiod. ἐρρίγοντι, Pind. πεφρίκοντας, Delph. τετελευπακούσας. Here it was a purely syntactic consideration, viz- the similarity of meaning (the Greek Perfect being a Present in point of time) that suggested this transfer to the system of the present-inflexion; the new feminine formations, on the other hand, such as Hom.

Att. βεβῶσα, Att. ἐστῶσα τεθτῶσα, Herod. ἑστεῶσα, with precisely the same endings as the pres. part. τιμῶνα and the like, were m part also determined by the contracted forms in -ωτ- (ἐστῶτ- for ἐστῶτ- for ἐστῶτ- for τεθνηότ-) of the corresponding masc. and neut.; the -ω- of these feminines in -ῶσα was taken from the corresponding masc. and neut., the -σα from the pres. part. fem. I do not believe that ἐστῶσα is derived from a hypothetical τέστάσυσα.

Italic. An attempt has been made to trace this suffix in Lat. cadaver and papaver, the former being regarded as 'that which has fallen' (cadō cadā-bundu-s, cp. πτωμα 'corpse') or 'that which has been destroyed' (cadamitas cassu-s Skr. kad-, see Bersu Die Gutturalen und ihre Verbindung mit v im Lat. p. 170), the latter as 'that which is inflated' (papula pampinu-s), and both compared with participles like Gr. nenagna's (Curtius, Das Verb der gr. Spr. II² 250). The suffix has also been traced in Lat. perfects like se-vī strā-vī amā-vī, which have been regarded as examples of a crystallised periphrastic formation of the same kind as the Skr. fut. datásmi 'I will give' ('dator sum, daturus sum') (Curtius, Ber. d. sachs. Ges. d. Wiss., 1855, p. 421 ff., Schulze, Kuhn's Ztschr. XXVIII 266 ff.). Lastly, the same suggestion has been made for Osc. sipus 'sciens' (1), as compared with a Lat, perf. *sēp-ī equivalent to sapuī (J. Schmidt, XXVI 372 ff); its termination might have come from either ibid. Idg. *-us or *-uōs (cp. p. 440).

This suggestion is most plausible as applied to sip-us, least as applied to $s\bar{e}$ - $v\bar{\iota}$.

In Germanic only a few isolated examples have survived. Goth. bēr-us-jōs pl. m. 'parents' ('they that have brought forth'), bher-, cp. indic 1. pl. bērum 1. sing. bar. A.S. ēzesa ēzsa O.Sax. ēcso m. 'owner' = Goth. *áig-us-ja m., beside Goth. áigan 'to have, possess'. The suffix is -us-zo- as in the Gr. pl. līvīo, gen. sing. Lith. vikusio O.C.Sl. vlūkūša (p. 440).

Balto-Slavonic. Lith. geïd-es beside gerdžiù 'I long for, desire', O.C.Sl. žid-ŭ beside žida žida 'I wait, await'. O.C.Sl. čit-ŭ beside čit-a 'I reckon, esteem, honour'. Lith. kirt-es beside

kertù 'I hew, strike', O.C.Sl. črit-u beside crit-a 'I cut': Skr. ca-krt-vás- beside krnt-á-ti 'cuts, splits', V gert-. Lith. milž-es beside mėlžu 'I milk', O.C Sl. mlūz-ŭ beside mlūzą 'I milk', V melő-. Lith. link-es beside linkstù 'I bend myself', lenk-es beside lenkiù 'I bend', O.C.Sl. lek-ŭ beside leka 'I bend'. Lith. min-es beside menù 'I betlink me': Avest, ma-man-uš (p. 440) V men-. Lith. pin-cs beside pinù 'I plait', O.C.Sl. pin-u beside ping 'I stretch, hang', V (s)pen-. Lith. vém-cs beside vemiù 'I vomit' Skr. vēmi-vás- beside Skr. va-vám-a 'he vomited', √ uem-. Lith. mir-cs O.C.Sl. mĭr-ŭ 'dead', see p. 442 above. Lith. vér-es beside veriù 'I open or shut the door' (Pruss, et--urruns) O C.Sl vir-u beside vira 'I open or shut the door', V yer-. Lith. ger-es beside geriù 'I drink' O.C. Sl. žīr-ŭ beside žirą 'I swallow', V ger-. O.C Sl. stīr-ŭ and pro-strīvu (originally *styr-us-: *sty-ues-) beside stila 'I stretch', V ster-. Lath, vež-es O.C.Sl vez-ŭ beside vežù veza 'veho'. Skr. ūhi-vás- ūh-úš- beside ındıc. u-váh-a 'venit', V ueāh-. Lith, dēg-cs O C.Sl. žeg-ŭ beside degù žeya 'I burn' O C SI peh-ŭ beside pek-a 'I bake'. Skr pēci-vás- pēc-úš- beside indic. pa-pác-a 'coxit', \(\sqrt{peq-.} \) Lith. séd-es beside sédu 'I sit'. Skr sēdi-vás-, see p. 443 above. Lith. dã-ves O.C.Sl. da-vũ beside dử-ti da-ti 'to give'. Skr. da-d-vás-, sce p. 443 above. O C.Sl dě-vů beside dě-ti 'to lay', V dhē-, Lith. dějes dějusio, following the pret. déjau, inf. dě-ti 'to lav'. O.C.Sl. sta-vũ beside sta-ti 'to place oneself', see p. 442 above, and compar. the Pruss. po-stauns i. c -stawuns (cp. below, klantīwuns beside klantīuns), Lith stójes stójusio, following the pret. stójau, ınf. stó-ti 'to place oneself, step'. Lith saus-es Lett. sus-is beside Lith. saustù 'I become dry', O.C.Sl. süch-ü beside süchna 'I become dry'. Skr. śu-śuś-vás- beside indic. śu-śőś-a 'he became dry', V saus- (ep. I § 557 p 413).

Just as 'the Lithuanian participles dějęs and stójęs follow the preterite in -jau, so do the forms mātes mācziusio ('pret. macziaŭ pres mataŭ inf. matý-ti 'to sec'), válges válgiusio ('pret. válgiau pres. válgau inf. valgy-ti 'to eat'); where it should be observed, that mātes válges, earlier mātens válgens, according to the regular phonetic laws must be referred to *mateens *valgiens

(I § 147 p. 131). Further examples of the same sort are penéjes beside penéjau 'I nourished, fattened', péskójes beside jëskójau 'I sought'. On the other hand we find u in the Pruss. klanti-wuns 'having condemned' (klantī-t 'to condemn'), less correctly written klantīuns; and similarly signauns (signa-t 'to bless'), teikūuns (teiku-t 'to form, make') as well as the form postāuns quoted above must have had the termination -uuns.

O.C Sl buždř for *būd-jŭ beside pres. buždą inf. budi-ti 'to wake' chvaljř beside pres chvalją inf chvali-ti 'to praise' etc., are like Lith. mätes mäcziusio, later we have -ivŭ, as budivŭ chvalivŭ. Cp. p. 442. děla-vŭ beside děla-ją děla-ti 'to work'. želč-vŭ beside želčją želč-ti 'wish'.

MEANING CONVEYED BY THE SUFFIXES: NOUNS CLASSIFIED FROM THIS POINT OF VIEW.

§ 137. In the foregoing account of the formation of nounstems (§ 59—136) our classification has been based upon the phonetic character of the formative suffixes. It will be useful to re-arrange the facts of this chapter in the history of nounformation from the point of view of their meaning.

Considered in this respect the different suffixes have many points in common and are connected in many ways; all of which can be exhibited more clearly and studied more directly by a fresh survey

The original meaning of the proethnic Indo-Germanic formative suffixes is unknown; accordingly the method by which we are to consider them must be based upon the logical categories which they generally serve to denote. We need not concern ourselves with the question whether any given suffix in its very oldest usage was, or was not, capable of fully expressing the idea which it helps to represent in those periods of the history of language which we are able to observe.

It is only a small proportion of the formative suffixes in which we can trace from the beginning a simple and clearly

defined function; as, for example, in the comparative -tero-. Most of them serve several purposes, and it is often impossible to reconcile the meanings of a particular suffix. It must be admitted, however, that it is far from certain whether in such cases we have really to recognise only one formative element. The same group of sounds may have more than one etymological origin, e. g. -mo- as a suffix of comparison (Lat. summu-s for *sup-mo-) may have a different origin from -mo- in substantives like Lat. fu-mu-s ani-mu-s (§ 72 p. 170 ff.).

In the following sections there is no need to do more than emphasise the most important points. I have not attempted to make the survey absolutely comprehensive from any point of view.

Adjectives.

§ 138. Variation according to gender (masc. neut. fem.), and the formation of derivatives to denote comparison (degrees of comparison), are usually assigned as the chief characteristics of adjectives as such in the Indo-Germanic languages. However these types of inflexion are all found in substantives also, so that no hard and fast line can be drawn between the two groups.

The suffixes which appear in adjectives in the proethnic and later periods are all found in substantives as well. The question then arises, whether the substantival or the adjectival use is the older. In some cases the latter is undoubtedly earlier, e. g. Lat. caprīna in pellis caprīna and the like, compared with caprīna 'goat's flesh' (§ 154). In another group of forms, however, the substantival meaning seems to have been the older e. g. Skr. máhas- 'greatness' compared with mahás- 'great', Gr. ψεῦδεσ- 'deceit' compared with ψευδέσ- 'deceitful' (§ 155). In other instances again, no distinction is possible a priori, e. g. in Avest. per nā- f. 'plena' and 'plenitudo, plenitas' (§ 158).

Many Indo-Germanic adjectival suffixes have no definite meaning to distinguish their own class of adjectives from others. The most sharply defined are those with a comparative meaning. These we will consider first. § 180. Adjectives with Comparative meaning. The elements of meaning which are really distinctive of this class are first the idea of contrast by comparison, and secondly the idea that what is predicated by the adjective is only true in a relative and limited sense.

-io- in *al-io-s 'alius', *medh-io-s 'medius' *me-io-s 'meus' and the like simply helps to express the idea of contrast by comparison, which is given by the root itself. See § 63, 3 p. 132 f. It may be conjectured that -io- had etymologically nothing to do with the notion of comparison, but that in the earliest or some of the earliest of these adjectives the suffix came to participate in this idea, which was really expressed by the root of the word (cp. § 57 p. 104 f.); and that it was then used independently in other words with the same force.

-ies- (-ien-) which is probably an extension of -io-, expresses primarily contrast by comparison in the widest sense. adjectives formed with this suffix came into close connexion with other adjectives of the same root and the same root-meaning, where the idea of relativity was wanting; hence they were applied to express not so much absolute contrast (as that of 'new': 'old') as limited contrast ('new in comparison with something else which must also be called new') A further limitation of meaning appeared with the to derivative -is-to- (§ 81 p. 242 ff.). A distinction in usage sprang up between -ies- (-is-) and -is-to-, which is analogous to that between -ero- -tero- and -mo- (-mmo-) -tmmo-: whilst -is-to- denotes comparison with several other objects, -ies- (-is-) is confined to comparison with one other. E. g. comparative Skr. lágh-īyas- Avest. renj-yah- Gr. ελάσσων and superlative Skr. lágh-iš-tha-s Gr. ελάχ-ισ-το-ς beside Skr. lagh-ú-š Gr. ¿lax-í-ç ('agile, small, little'). In formations like Gr. ἀρ-ισ-τερό-ς 'left', as contrasted with 'right' (§ 75 p. 190 ff.), the notion of contrast with a single other thing is still further expressed by the addition of -tero-; for this suffix, as we shall see, was especially used in the Indo-Germanic period and later to express ideas which are contrasted absolutely. See § 135 p. 427 ff.

-ero- and -tero- seem to have been first used only in words expressing conceptions of space and time, and in certain pronouns of a different meaning. In these the comparison contains only one notion, that of strong contrast, like 'below': 'above'. *pdh-ero- 'lower': Skr. ádhara-, O.H.G. undaro; *en--tero- 'inner': Skr. ántara-, Armen. ender-k, Gr. evrepo-v, Lat. inter-ior, O.C.Sl. jetro. *qo-tero- 'which (of two)?': Skr. katará-Gr. nórego-g, Umbr. podruh-per, Goth. hvabar, Lith. katrà-s. Add certain examples found in single languages, as Armen. mer O.Ir. ar n- Goth. unsar 'our', Gr. nué-repo-c Lat. nos-ter 'our' (contrasted with 'your'), Gr. aγρό-τερο-ς 'dwelling in the open fields, wild', thus having the sense of ayour-s, but originally distinguished from it by the reference to its opposite aarv. In Aryan and Greek -tero- then became a common comparative suffix for adjectives of any formation and meaning, like Skr. amá-tara- Gr. ωμό-τερο-ς compared with amá- ωμό-ς 'raw', and here there was comparison no longer with the absolutely opposite idea, but with the notion expressed by the so-called positive; probably this process was completed partly through association with the other group of comparatives formed with -ies-, such as Skr. sodd-tyas- Gr. ήδ-ίω (acc. sing.). In the older stratum of comparatives, like *en-tero- *ni-tero-, it is seldom that the idea of relative contrast appears, as in Gr. πρότερον η 'before that' Osc. pruter-pan 'prius quam'. See § 75 p. 188 ff.

-to--is-to--mo-(-mmo-) -t-mmo-. -to- and -mo- are found first in numerals, where they were used to express position in a numerical series, e. g. *dekmto- 'decimus': Gr. dénato-ç Goth. tathunda Lith. desziñta-s O.C.Sl. desetü, *septmo-*septmmo- 'septimus': Skr. saptamá- Gr. εβδομο-ς Lat. septimu-s O.Ir. sechtm-ad Lith. sēkma-s O.C.Sl. sedmy-jt. Thus these suffixes were suited to set one particular idea in comparison with several others separately. Hence -is-to- was formed beside -ies-- is-, to express comparison with a number of objects, cp. e. g. Gr. μέγιστος εγω ύμων 'I am greater than any one of you' (μείζων εγω ύμων 'I am greater than you', ύμεῖς being regarded as a single notion), πόλεμον ἀξιολογωτατον τῶν προγεγενημένων

'more remarkable than any one of the preceding wars' (Thucyd I-1).

-mo- passed from the numerals to those stems which expressed ideas of space and time and contained the suffix of contrast -ero-, forming either (in contrast to -ero-) the true superlative, as *up-mo- *up-nmo- 'uppermost, highest' (Skr. upamá- Lat. summu-s) beside *upero-, or, as in Gothic, a general expression of comparison, e. g. Phil. 2, 3 sis aŭhuman 'se superiorem' (from which was derived the normal superlative aŭhum-ist-s). In the same way, -tnmo- ranged itself beside -tero-, and in Aryan it proved quite as fertile a suffix. See § 72 p. 166 ff., § 73 p. 177 ff., § 81 p. 242 ff.

In Lettish -aka- became the usual suffix of comparison; sa'ld-ak-s 'sweeter'. See § 89 p. 273 f.

§ 140. Verbal Adjectives. Under this head I include all such adjectives as have a more or less participial character, cp. § 144. Here we may make several subdivisions.

1. Forms with Active Meaning.

-nt-. *bhero-nt- 'bearing': Skr. bhárant- Gr. φέρων Lat. ferēns Goth. baírand-s O.C.Sl. bery. See § 126 p. 396 ff.

-ues-, with the implied idea of a completed action (cp. 3 below). Skr. ririk-vás- Gr. λελοιπ-ως Lith. Uk-ęs 'having let free, left'. Goth. bēr-us-jōs 'parents' ('those who have brought us into the world'). See § 136 p. 438 ff.

Other forms, found in single languages, are: Skr. -vant-, in kṛtá-vant- 'factum habens, having done', see § 127 p. 406. Slav. -lo- in bi-lū 'having smitten', see § 76 p. 212 ff.

2. Forms with Medial and Passive Meaning.

-mno--meno--mono- had from the earliest period the same meaning as the medial personal-endings. Skr. ydja-māna-Avest. yaza-mna- Gr. άζό-μενο-ς partic. of yája-tē yazai-tē ἄζεται 'he honours'. See § 71 p. 163 ff.

-mo- has the same meaning as -mno- in Umbro-Samnitic and Balto-Slavonic. Umbr. persnih-mu 'precamino' Osc. censa-mu-r 'censemino', Lith. vēša-ma-s 'being carried, fit to be carried'. See § 72 p. 166.

Ar. -ana- is used as a medio-passive suffix, as in Skr.

dúh-ana-s dúgh-ana-s, beside the act. indic. dégdhi 'he milks'. See § 67 p. 151 f.

- 3. Forms expressing completed action and hence a state, chiefly passive.
- -to-. *klā-tó- 'heard, famed': Skr. śrutá- Gr. κλυτό-ς Lat. in-clutu-s O.Ir. cloth O.H.G. Hlot-hari ('Lothair') hlāt ('loud'). *gm-tó-: Skr. gatá- 'gone, gone forth, come' ά-gata- 'untrodden', Gr. βατό-ς 'trodden', passable', Lat. circum-ventu-s. See § 79 p. 218 ff.
- -no--nno- and in some of the languages also -eno--ono-. *pl-nó- *pl-nó- 'filled, full': Skr. pūrná- Avest. per na-O.Ir. lan Goth. full-s Lith. plina-s O.C.Sl. plinŭ; Gr. στυγ-νό-ς 'hated'; Lith. kil-na-s 'exalted'. Goth. fulg-in-s 'hidden'; O.C.Sl. vez-enŭ 'carried'. Goth. vaŭrp-an-s O.H.G. gi-wort-an 'become'. See § 65 p. 138 ff.

-ues-, with active sense, see 1 p. 451.

- 4. Forms expressing the feasibility, possibility, or necessity of the action; passive.
- -io- -izo-. Skr. yáj-ya-s Gr. äγ-10-ς 'venerandus'. Skr. dfś-ya-s dárś-iya-s 'visible, worth seeing'. Gr. στύγ-10-ς 'abominable, detested'. Lat. ex-1m-1u-s 'eximendus, distinguished'. Goth. brūk-s (stem brūk-ja-) O.H.G. prūchi 'useful'. See § 63, 1 p. 123 ff.
- -tno--tnno-. Lat. dandu-s 'who is to be given'. Lith. sùk-tina-s 'torquendus'. See § 69, 2 p. 161 ff.

Further the words formed with -to- (3) seem to have sometimes implied this secondary meaning even in Indo-Germanic, primarily however in negative usages. It is found especially in Greek, as $\lambda v - ro' - \varsigma$ 'that may be freed or loosed'. See § 79, 1 p, 220.

'timendus, terrible', ¿¿aró-ç 'catable'; similarly in Lith. -ma- (2), as vēša-ma-s 'fit to be carried, transportable', sùka-ma-s 'capable of being twisted'.

§ 141. Denominative Adjectives. The relation to the noun from which they are derived may be any one of many different kinds: the word may mean 'made of the same material', 'belonging to the same species', 'derived from', possessing', 'being provided with' etc.

-ino--tno--a*ino-. This is especially used with the meaning 'made or consisting of', 'arising from', 'belonging to the same kind as' that which the original noun expresses. Gr. φήγ-ινο-ς 'beechen' (φηγό-ς). Lith. άuks-ina-s 'golden' (άuksa-s). Avest. bawr-aęni-š Lith. bebr-in-i-s Lat. fibr-īnu-s 'coming from the beaver' (e. g. fur). Skr. sat-īná-s (sánt-) Gr. ἀληθ-ινό-ς (ἀληθη΄ς) O.H.G. war-īn (war) 'truthful'. See § 68 p. 155 ff.

-μent-. The chief meaning is 'provided with' that which the original word denotes; more rarely it means, 'of the same kind'. Skr. višά-vant- 'poisoned, poisonous' Lat. vīrōsu-s 'poisonous' (višά-m vīru-s 'poison'). Gr. οἰνό-εις 'made from or with wine', Lat. vīnōsu-s 'full of wine, like wine' (οἶνο-ς vīnu-m 'wine'). Skr. putrά-vant- 'having a son or sons' (putrá-s 'son'). Gr. χαρί-εις 'graceful, gracious' (χάρι-ς 'grace'). Lat. verbōsu-s 'full of words, diffuse' (verbu-m 'word'). See § 127 p. 404 ff.

-tno--tnno-. This is found in adjectives formed from temporal adverbs. Skr. pra-tná-s 'ancient, old', nú-tna-s nú-tana-s 'present'. Lat. diù-tinu-s, cras-tinu-s, Lith. dabar-tina-s 'present'. See § 69, 1 p. 160.

-qo-occurs in adjectives derived from adverbs, which chiefly express ideas of space. Skr. nī-ca-'low, going downwards', O.C.Sl. ni-c-ī' pronus'. Lat. reci-procu-s orig. 'turned backwards and forwards'. Besides these, -qo- and also -iqo- are found in adjectives formed from substantives; the relation to the original word varies very widely. Skr. sūcī-ka-s 'pricking' (sūcī-'needle'), sindhu-ka-s 'arising from the Indus (sindhu-ĕ)', Lat. amni-cu-s (amni-s), O.Ir. sūile-ch 'oculeus' (sūīl n. 'oculus'), Goth. stáina-h-s O.H.G. steina-g 'stony' (Goth. stáin-s O.H.G. stein 'stone'). Skr.

paryāy-ikā-s 'strophic' (paryāyā-s 'strophe'), Gr. νημφ-ικά-ς 'bridal' (νύμφη 'bride'), Lat. bell-icu-s (bellu-m), O.Ir. cuimn-ech 'mindful' (cuman 'remembrance, memory'), O.H.G. wuot-ig 'furious' (wuot 'fury'). See § 86 p. 255 ff., § 87 p. 260 ff.

The following examples of the proethnic methods of forming adjectives will further serve to shew how widely the relation of the derived to the original word may vary in different cases.

-io--iio-. *pətr-iio-s 'relating to one's father, fatherly' (*pətér- 'father'): Skr. pitriya-s Gr. πάτριο-ς Lat. patriu-s. Skr. uṣ̄as-ya-s 'dedicated to the dawn' Gr. ἡοῖο-ς 'early, eastern' (uṣ̄as-ŋω̄ς 'early light, dawn'). Skr. nav-iya-s 'navigable', Gr. νήιο-ς 'belonging to a ship, consisting of ships' (nāv- νη(F)- 'ship'). The adjectival usage is seen with special clearness in compounds like Gr. ὁμο-πάτρ-ιο-ς O.Icel. sam-feār 'having the same father' compared with the Gr. ὁμο-πάτωρ O.Pers. hama-pitar-, with the same meaning. See § 63, 2 p. 125 ff.

-no-. Skr. strāi-ṇa-s 'feminine' (strī- 'woman'). Gr. ἀλγεινό-ς 'paining, painful' (ἄλγος 'pain'), Hom. ἐραννό-ς 'lovely' (ἔρως
'love'). Lat. aēnu-s (aes), τlīgnu-s (τlex), paternu-s (pater).
Skr. purā-ṇá- 'ancient' (purā 'earlier, before'): Umbr. Osc.
*kom-no- n. 'τὸ κοινόν' (kom 'cum'); Lith. jáu-na-s O.C.Sl. ju-nū
'young' (jaū ju 'already, by this time'). See § 66 p. 139 ff.

-ro-. Avest. tap-ra (cp. § 74 p. 182 footnote). Mid.Dutch deemster O.H.G. dinstar 'dark' Lith. tims-ra-s 'bay-coloured' (Skr. támas- n. 'darkness'). Gr. οἰζυ-ρό-ς 'mournful' (οἰζύς 'mourning'), φοβε-ρό-ς 'fearful' (φόβο-ς 'fear'), δροσε-ρό-ς 'dewy' (δρόσο-ς 'dew'). See § 74 p. 179 ff.

Particular uses in the separate groups of languages: Ar. -ais especially frequent with the meaning of origin, as Skr. savitr-á-s
'sprung from savitar', but also denoting every kind of relation,
e. g. Skr. mānas-á-s 'mental' (mánas-n. 'mind'), see § 60 p. 112 f.
Ar. -in-: Skr. cittin- 'intelligent' (citti-š 'intelligence'), parninAvest. per min- 'winged'. (Skr. parná-m 'wing'), O.Pers. vīpin'belonging to a clan (vīp-)', see § 115 p. 357 f. Skr. -nu-: rōciš
-nú-š 'shining' (rōciš- 'light'), kraviš-núš 'greedy of raw flesh'
(kraviš-), see § 106 p. 320 f. Gr. -140-, especially with the

meaning 'proportioned, suited to' that which the original word denotes; as νόμ-μο-ς 'suited to law, legal's (νόμυ-ς 'law'), see § 72, 3 p. 174. Gr. -συνο-: δουλό-συνο-ς 'subject, in service' (δοῦλο-ς 'servant'), see § 70 p. 163. Lat. -āli- -ēli- -īli- -ūli: vītāli-s, fidēli-s, hostīli-s, īdāli-s, see § 98 p. 292. Kelt. -āko-, as O.Ir. marc-ach 'equester' (marc 'horse'), see § 89 p. 273. Germ. -iska-Lith. -iszka- O.C.Sl. -ĭsko-: Goth. judaiv-isk-s 'Jewish' (Judaiu-s 'Jew') gud-isk-s 'divine' (guþ 'god') O.H.G. ird-isc 'earthly' (erda 'earth'). Lith. prús-iszka-s 'Prussian' (Prúsa-s 'a Prussian), dēv-iszka-s 'divine' (dēva-s 'God'), O.C.Sl. kūnęž-ĭskā 'princely' (kūnęgū 'prince'), dēt-īskū 'childish' (dēti f. pl. 'children'), see § 90 p. 276.

- § 142. Amongst denominative adjectives, those with a diminutival meaning form a special group: they denote what merely approximates to the description given by the original adjective, what is only similar to it. This meaning has often disappeared, so that the derived adjective has acquired the meaning of the word from which it was formed.
- -lo-. Gr. $\pi\alpha\chi\nu$ - $\lambda \dot{o}$ - ς 'somewhat thick' ($\pi\alpha\chi\dot{v}$ - ς 'thick'), $\dot{\eta}\dot{o}\dot{v}$ - λo - ς 'sweetish' ($\dot{\eta}\dot{o}\dot{v}$ - ς 'sweet'). Skr. bahu- $l\dot{a}$ beside $bah\dot{u}$ 'thick'. See § 76 p. 198 ff.
- -qo. *sene-qo- orig. 'oldish', beside *seno- 'old': Skr. sanaká-Lat. senex (Goth. sineig-s). Skr. anīyas-ka- beside ánīyas-'thinner, finer', Lat. prīs-cu-s compared with prior, melius-c-ulu-s with melior, nigri-care with niger. *anīghu-qo- orig. 'somewhat narrow', from *anīghú- 'narrow': Armen. ancuk anjuk- O.C.Sl. azūkū 'narrow'. See § 84 p. 252 f., § 88 p. 262 ff. Cp. also Lith. -oka-, as saldóka-s 'sweetish, fairly sweet', see § 89 p. 273.

With this must perhaps be classed -go-, Skr. árbha-ga-'youthful' beside árbha-'small, young', O.H.G. alfi-h'old' O.Sax. lutti-c'small'. See § 91 p. 276 f.

Compare the substantival diminutives, § 153.

- § 143. Adjectives formed with primary suffixes whose original function cannot be clearly defined.
 - -o- *ney-o-s 'new': Skr. náva-s, Gr. véo-g, Lat. novo-s, O.C.SL

nort. *saus-o-s: Skr. \$5-\$a-s 'drying, parching', Gr. Ion. avo-c Lith. sausa-s O.C.Sl. suchti 'dry'. See § 60 p. 109 ff.

-u-. *grr-u-s (*gr-u-s): Skr. gurú-š 'heavy, violent, hard', Gr. βαρύ-ς Lat. grav-i-s Goth. kaúru-s 'heavy'. *angh-u-s 'narrow': Skr. ahú-š Armen. ancu-k anju-k Goth. aggvu-s O.C.Sl. αεŭ-kŭ. *suād-u-s (*sud-u-s) 'sweet, pleasant': Skr. svādú-š Gr. ήδύ-ς Lat. suāv-i-s Goth. sut-s. See § 104 p. 312 ff.

-ro--gro-. *rudh-ró-s -gró-s 'red': Skr. rudh-irá-s Gr. \$6009-00-5 Lat. rub-er O.C.Sl. rūd-rū. *spo-ró-s: Skr. sphirá-s 'fat, large, rich', Lat. pro-sper, O.C.Sl. sporū 'rich'. Skr. cit-rá-s 'shining, glorious, wonderful' O.H.G. heit-ar 'shining, clear, bright'. See § 74 p. 180 ff.

-mo-, excluding its participial function. (§ 140, 2). Avest. gar'-ma- Lat. for-mu-s O.H.G. war-m 'warm', Armen. jer-m Gr. 9ερ-μό-ς 'warm'. Skr. tū-tu-má- Avest. tū-ma- 'strong'; Skr. tig-má- 'sharp', O.Ir. lua-m 'celox'. Goth. rū-m-s 'roomy'. Lith. szir-ma-s 'gray'. See § 72, 3 p. 170 ff.

-uo-: *gi-uo-s 'living': Skr. jīvá-s Lat. vīvo-s Mod.Cymr. byw Goth. qiu-s Lith. gýva-s O.C.Sl. šivū. *fdh-uo-s: Skr. ūrdhvá-s Gr. δοθο-ς 'upright', Lat. arduo-s 'steep', O.Ir. ard 'high, great, noble'. Skr. pūr-va-s 'former, earlier', Gr. *πρω-fo-in Dor. πρῶν 'of yore', and other words, O.C.Sl. pri-vy-jī 'primus'. See § 64 p. 133 ff. In Latin and Germanic this suffix is used in a considerable number of adjectives denoting colour; which must be explained as due to the influence of a few examples (as *ghel-uo-: Lat. helvo-s O.H.G. gelo), cp. § 57 p. 104 f.

The Relation of Adjectives to Participles.

§ 144. An adjective can be used to denote not only a quality inherent in the nature of a thing, but a transitory attribute, defined in regard to time according to the standpoint of the speaker; thus it comes to have somewhat of a verbal character, in other words it becomes a participle $(\mu \epsilon \tau o \chi \eta)$. Its verbal nature may include the power of governing a case, and of distinguishing different epochs of time, different kinds of action (momentary, continuous, inceptive), and Voice (diathesis, genus verbi). See § 140 p. 451 f.

In general the existence of adjectives as a class must necessarily precede that of participles. Where however we find purely nominal and purely participial values side by side in any one word, it would be incorrect to regard the former as in every case the older; for the participle may be again gradually reduced to a simple noun.

In many cases it is impossible to determine whether the nominal character of any given form dates from a time before the corresponding adjectival form had developed verbal uses, or whether a participle has been re-converted into a noun; e. g. in the case of Skr. śá-śvant- Gr. ä-nāç 'complete, whole, every' Skr. bṛhánt- 'exalted, high, great' (§ 126 p. 397 f.), Skr. vid-vás-'heedful, full of knowledge' compar. vidúṣṭara- vidvattara- (§ 136 p. 438), and in the Skr. and Lith. -to-participles constructed with an adnominal genitive, as Skr. ánuspaṣṭō id bhavaty ēṣō asya 'conspectus est ille ab eo' (lit. 'eius'), Lith. arklys suēstas vilko 'equus devoratus a lupo' (lit. 'lupi'), cp. also Διόσ-δοτος (§ 79 p. 218 ff.).

The former transition, from a purely nominal to a participial use, may be assumed with certainty in a few instances in the separate languages; e. g. in the Sanskrit participles with -vant-, like kṛtá-vant- 'having done' (§ 127 p. 406), and in the Slavonic participles in -lo-, as bi-lü 'having smitten' (§ 76 p. 212). The connexion with the verbal system was established by the influence exerted on the meaning and usage of the adjectival forms in question by verbal forms derived from the same root, either those of the finite verb, or, sometimes, other participles previously formed. The process of transition was complete when analogous forms of the same kind could be made at will from other verbs in actual use.

Undoubted examples of the change from a participial to a purely nominal character are of frequent occurrence in later periods. Such are e. g. Gr. ἐκών 'willing' μέλλων 'future' Lat. ε-loquens sapiens Mod.H.G. reizend 'charming' (§ 126 p. 396 ff.), and the Gr. compar. ἀσμεν-έστερο-ς 'more glad' ἐρρωμεν-έστερο-ς 'stouter, stronger' (§ 71 p. 163 ff., § 75 p. 194).

Substantives denoting material things or persons (Concrete Substantives).

- § 145. Distinction of Sex. The o-suffixes served to indicate male creatures, e. g. *ekyo-s 'horse, stallion': Skr. áspa-s Gr. εππο-ς Lat. equo-s O.Ir. ech. Female creatures were distinguished by the a-suffixes and by -ie- -i-, e. g. *ekya-'female horse, mare': Skr. áśvā Lat. equa Lith. aszva; *ylq-jē-*ylq-7- 'she-wolf': Skr. vxkt O.Icel. ylg-r O.H.G. wulpa. See § 59 ff. p. 107 ff., § 109 ff. p. 332 ff. It must, I think, be assumed, as I have already observed (in § 57 Rem. p. 104, cp. my essay on Gender there cited), that originally neither the o- and a-suffixes nor even -ie- (-i-) had any connexion with animal sex; it is far more probable that in one or two words, perhaps in *genā- 'woman' *māmā- 'mother' *s-tr-ijē-*s-tr-7- 'woman', the idea of female nature contained in the root of the word was imparted to the suffix, and that this led to the creation of such forms as *ekuā- beside *ekuo-, *ulqiēbeside *ulqo-, to describe the female as distinct from the male animal. It was only through being contrasted with -a- and -iethat the o-formation afterwards came to denote male sex. And it was still constantly and indeed primarily used to denote any given creature without reference to gender, e. g. 7nno-5 'horse'. See § 158.
- § 146. Names of kindred. The suffix most frequently used is -er--ter-, as in *dajuér- 'husband's brother-in-law' (Skr. dēvár- etc.), *suésor- 'sister' (Skr. svásar- etc.), *po-tér-'father' (Skr. pitár- etc.). See § 119 ff. p. 376 ff. This suffix in its origin had certainly nothing to do with the notion of kinship. From its accidental use in one or other of these nouns it was taken to form a series of words in which its function was to denote that idea. *po-tér- seems to have been originally a nomen agentis: 'protector'.
- § 147. Names of Animals. The use of -bho- in one or other of the words denoting animals, which had come down from the earliest times, led the Indians and the Greeks to employ

this suffix in other instances to form animal-names; e. g. Skr. śarabhá-s a fabulous eight-legged creature, Gr. šlago-ç 'stag'. See § 78 p. 216 f.

In Germanic are found bird-names with Idg. -go-, as Goth. ahak-s 'dove' O.H.G. habuh 'hawk', which follows cranuh 'erane' (Armen. krun-k). See § 91 p. 277 and Kluge Nom. Stammb. p. 29.

§ 148. Names of parts of the body. -en- is found in a large number of proethnic names for parts of the body, though to begin with the suffix had no such meaning. It follows however that this use of it must have developed in the proethnic period, although we cannot tell which of the words containing it, e. g. Skr. idh-an- Gr. ii $\partial -\alpha$ -(ii) 'udder' Skr. ii ii $\partial -\alpha$ -(ii) 'liver', formed the type for the rest. It was still a living suffix with the same sense in the separate languages, e. g. Skr. $d\partial i$ $\partial \alpha$ -ii forearm', Avest. $n\partial \alpha$ -ii nose'. See § 114 p. 344 ff.

§ 149. Nomina agentis.

- -en-. Skr. tákṣ-an- Gr. τέκτ-ων 'carpenter, artificer'. Avest. spas-an- 'watchman', O.H.G. speh-o spy'. Lat. ed-ō O.H.G. ezz-o 'glutton'. Gr. κραυγ-ών 'screamer, wood-pecker'. Goth. nut-a 'fisher', O.H.G. bot-o 'messenger'. See § 114 p. 344 ff.
- -ter-. Skr. dā-tár- dā-tar- Gr. δο-τήρ δω-τήρ δώ-τωρ Lat. da-tor O.C.Sl. da-tel-t 'giver'. Skr. pā-tár- pā-tar- 'drinker', Gr. οἰνο-ποτήρ 'wine-drinker', Lat. pō-tor 'drinker, drunkard'. See § 119 ff. p. 376 ff.
- -lo-. Gr. κάπηλο-ς 'huckster' δείκηλο-ς 'actor'. Lat. figulu-s 'potter' legulu-s 'gatherer, gleaner'. O.H.G. putil 'beadle' ('summoner') brūt-pitil 'a wooer's best man, suitor's advocate', tregil 'bearer'. Lith. tekčla-s 'grindstone turning about an axle' (lit. 'runner'). See § 76 p. 198 ff.

We have an example of a suffix of this meaning occurring only in one group of languages in the Lith. -ika-, as szérika-s 'feeder' tupika-s 'sheaf-binder', see § 87 p. 262.

Many nomina agentis in the Indo-Germanic languages arose

through the metaphorical use of nomina actionis for the door of the action. Thus Skr. dháti-š m. 'shaker' (as f. 'a shaking'. cp. Gr. 950-ç f. 'a raging, roaring'), Avest. rāiti-š m. bestower' (as f. 'bestowal, alms', cp. Skr. rāit-š f. 'alms, gift'), O.Ir. tāid m. O.C.Sl tait m. 'thief' (orig. 'concealment, theft'), see § 99 f. p. 293 ff. Skr. mán-tu-š 'counsellor' as well as 'counsel, advice', see § 108 p. 323 ff. Cp. § 157.

The nomina agentis may be used to denote an activity limited in point of time as well as one constantly repeated. It is especially in the former use that, like the participles, they have developed verbal constructions; for example those in -ter-, as Skr. vásūni dátā 'bona dator' beside vásūnā dátā 'bonorum dator' (cp. p. 378 f.), Lat. (rarely) dator dīvitiās, jūsta orātor beside dator dīvitiārum, jūstērum ērātor, Gr. (Aesch. Prom. 612) πυρός βροτοῖς δοτῆρ' ὁρᾶς Προμηθέα 'thou seest Prometheus, the bestower of fire upon men'. If the connexion between the substantive and the verbal meaning is relaxed, the former may by degrees lose the character of a nomen agentis altogether; there then remains only the notion of a concrete thing or person, Thus *po-ter- at the time of the separation of the Indo-Germanic races had ceased to mean 'protector', which seems to have been its orginal signification, and meant simply 'father' (cp. § 146). *uksen- (Skr. ukšán- Mod, Cymr. ych Goth, auhsa) did not mean 'sower, begetter', but 'bull'. Gr. τρυγών 'turtle deve' orig. 'cooer' (τρύζω 'I coo'), Lat. praetor orig. 'qui praeit', O.H.G. heri-zogo 'duke' orig. 'leader of a host'.

§ 150. Nomina instrumenti.

-tro--tlo-. Skr. arl-tra-m arl-tra-s O.H.G. ruo-dar Lith. lr-kla-s 'rowing implement, oar'. Skr. kάr-tra-m 'magic charm'. Gr. φέφε-τφο-ν φέφ-τφο-ν Lat. fer-culu-m 'framework for carrying, litter, bier'. See § 62 p. 118 ff.

-ro--lo-. Avest. pata-ra- 'wing', Gr. πτε-ρό-ν 'feather, wing' (means of flying', \sqrt{pet} - 'fly'). Lat. scalp-ru-m 'cutting instrument, knife', caelu-m 'chisel' for *caed-lo-m, prēlu-m 'press' for *prem-s-lo-m. See § 74 p. 180 ff., § 76 p. 198 ff.

-dhro- -dhlo- in the European languages. Lat. su-bula in-subulu-m Czech ši-dlo punch, awl' (Lat. suers). Gr. αήλη--δρο-ν 'magic charm', ἐπι-βάδοα 'means of climbing, ladder'. Lat. crī-bru-m, tere-bra, suscitā-bulu-m. Czech bēli-dlo 'means of colouring white, white paint'. See § 77 p. 213 ff.

Gr. -τηριο- Lat. -tōrio- in neuter nouns. Gr. θελκ-τήριο-ν 'means of enchantment or delight' κρι-τήριο-ν 'means or ground of decision' καλλυν-τήριο-ν 'means of adornment, ornament' κανστήριο-ν 'branding iron' σημαν-τήριο-ν 'seal, stamp', Lat. liquā-tōriu-m 'filtering vessel, strainer' scalp-tōriu-m 'instrument for scratching' circum-cīsōriu-m 'lancet'. See § 63 p. 128 f.

Lith. -tuva-: kosz-tùva-s 'strainer, sieve', min-tuvaï 'tool for tearing flax' and other examples see § 61 p. 117.

Nomina agentis (§ 149) are often used to denote an instrument, this being regarded as if it were a living performer of the action: cp. Mod.H.G. träger used both for the person who carries and for the means of carrying (beams and the like), feld-messer 'surveyor's instrument' and gas-messer 'gasometer' [Eng. shutter, fender etc.] and the like. Thus Skr. sē-tár-'fetter, bonds' (si- 'enchain, bind'), Gr. ὑαιστήφ 'hammer' (ὑαίω 'I shatter, crush') ζενκ-τήφ 'yoke-strap' (ζενήνυμι 'I yoke') ἀφν-τήφ 'ladle, spoon, scoop' (ἀφύω 'I draw water, ladle') just like do-τήφ 'giver'; Lat. runcō, -ōn-is 'hoe' like edō -ōn-is; O.H.G. meiği 'chisel' (Goth. máita 'I hew') sluzzu 'key' (lit. 'he who closes') slegii 'mallet' ('beater') just like putil 'beadle'.

We find also nomina actionis becoming names of instruments, see § 155.

§ 151. Nomina loci. The suffixes chiefly used to form names of places were those which also formed nomina instrumenti (§ 150). A locality may often be regarded as the means for the performance of an action, c. g. a hiding-place is a means of concealment. When a suffix has so acquired this function in a few words, it may then be used directly in other words as a suffix denoting locality.

-tro--tlo-. Skr. kšé-tra-m 'place of settlement, field' Avest. sōi-pre-m 'place of settlement, dwelling-place'. Skr. stha-trá-m

'standing-place, position', jani-tra-m 'birthplace, home'. Gr. λέκ--τρο-ν 'lying-place, bedi, θέα-τρο-ν 'place of exhibition, theatre'. Lat. cubi-culu-m, specta-culu-m, hospita-culu-m, ambula-cru-m. Lith. bū-klà 'home'. bu-kla-s (ū?) 'lair of an animal'. See § 62 p. 118 ff.

-ro--lo-. Skr. mand-irá-m housing, chamber, house', Gr. μάνδ-ρα 'fold, pen, stall'. Skr. aj-irá-m 'arena, courtyard'. Gr. εδ-ρα O.Icel. set-r n. 'seat'. Gr.Lac. ελλά for *εδ-λα Lat. sella for *sed-la Goth. sit-l-s 'seat', O.C.Sl. selo 'fundus, habitaculum' Upper Sorb. sy-dlo 'dwelling-place'. Here no doubt should be classed Idg. *ag-ro-s 'common, meadow, field' (Skr. áj-ra-s, Gr. ἀγ-ρό-ς Lat. ag-er Goth. ak-r-s) as denoting 'a place for driving cattle', \sqrt{ag} - 'agere', cp. Skr. ajirá-m; the word acquired the meaning 'arable land' only when pasturing gave way to tillage, and the greater part of the land was cultivated by the plough. See § 74 p. 180 ff., § 76 p. 198.

-dhro--dhlo-. Gr. ἀλινδή-Θοα, 'wallowing-place', γενέ-θλη 'birthplace' ἔδε-θλο-ν 'seat, site'. Lat. volatā-bru-m 'wallowing-place for swine', sta-bulu-m, natā-bulu-m, conciliā-bulu-m, lati--bulu-m, late-bra. Czech by-dlo 'dwelling'. See § 77 p. 213 ff.

Gr. -τηριο- Lat. -tōrio-. Gr. ἀγωνισ-τήριο-ν 'place of battle', ἀκροῶ-τήριο-ν 'hall of audience', ἐσγασ-τήριο-ν 'place of work', βουλευ-τήριο-ν 'council hall'. Lat. audī-tōriu-m dēversōriu-m condi-tōriu-m.

Other suffixes came in other ways to denote locality. Thus -μen- in Greek, as οἰνεών οἰνών 'wine-bin', παρθενών παρθενών 'maidens' apartment', ἱππών 'stable', λασιών 'place thick with bushes', see § 116 p. 364. -to- in Lat., as arbus-tu-m 'plantation' ('something provided with trees'), filic-tu-m 'place full of ferns', carec-tù-m 'place full of reeds', see § 79 p. 231 f. and cp. § 152. Cp. further the nomina actionis which have become names of place, § 155.

§ 152. Collective Nouns. Under this head there is little to notice. The chief means which the Indo-Germanic languages possess of denoting groups of things collectively in the singular

is the use of the neuter (e. g. Gr. $\dot{v}\pi\dot{\gamma}$ x00- \dot{v} 'dependencies' compared with $\dot{v}\pi\dot{\gamma}$ x00- \dot{v} 'subject, dependent') which cannot be properly considered in this section, although indeed the view of the distinctively neuter case-suffixes as having been originally used to form the stem of the noun to which they were added is one which has nothing against it and a good deal in its favour. Nor are we here concerned with the collective use of the singular in names of peoples and the like (e. g. Gr. \dot{o} $\Pi\dot{v}\rho\sigma\eta\dot{v}$ = 'the Persians' O.Pers. mada = 'the Medes collectively, Media'), or with the later use of compounds in which the final member had become a kind of suffix, (e. g. O.H.G. liut-scaf 'natio' Mid.H.G. heiden-schaft 'heathendom, the Saracens and their country').

Notice first that denominative adjectives, denoting connexion with the word from which they are derived, are a very common means of representing the collective idea. It will be found, I believe, that the neuter is regular in all the cases which occur frequently, and this was a factor of importance in expressing the collective meaning. E. g. Gr. -ικό-ν: ἱππικό-ν 'body of horsemen', ὁπλιτικό-ν 'body of heavyarmed troops', συμμαχικό-ν 'alliance, host of allies', see § 87 p. 260. The Lithuanian collectives in -ýna-s also, such as aužůl-ýna-s 'a number of oaks standing together, grove of oaks', krūm-ýna-s 'thick underwood', akmen-ýna-s 'heap of stones', appear to have been originally neuter, see § 68 p. 159.

We must further observe that sometimes suffixes used in substantives denoting a quality are also used collectively; e. g. Skr. janá-tā 'company of people, community', Little-Russ. bidota 'proletariate' temnota 'ignorant people' (§ 80 p. 238 ff.), Gr. poaroia O.C.Sl. bratrija 'brotherhood' (§ 63 p. 125 ff.).

The collective nouns cannot always be clearly distinguished from the nomina loci (§ 151). A few of the group of Latin neuters in -tu-m mentioned in the previous section may be repeated here; e. g. arbus-tu-m 'plantation', virgul-tu-m 'bushes', salic-tu-m 'willow plantation, undergrowth of willows'.

§ 158. Diminutives and Pet Names. The sense of diminution (depreciation, detraction, endearment and so forth)

often disappeared, partly even in prehistoric periods. Compare the diminutive adjectives in § 142.

-lo-. Skr. vṛṣ̄a-lá-s 'mannikin, small man', ṣalāka-lā 'little shaving'. Gr. ἀρχτύλο-ς 'young bear'. Lat. porc-ulu-s porcil-ia O.H.G. 'farhel-i Lith. parszē-l-i-s 'little pig, sucking pig'. Lat. rot-ula Lith. ratē-l-i-s 'small wheel'. O.H.G. bendil 'little band'. See § 76 p. 198 ff.

-qo-. Skr. marya-ká-s 'mannikin', Gr. μεῖραξ 'girl' μειράκ-ιο-ν 'boy'. Skr. aśva-ká-s 'small horse'. Gr. βωμαξ 'small altar'. Lat. homun-c-iō 'mannikin' (in the sense of a weak creature), ovi-c-ula 'little sheep'. Lith. parszùka-s 'little sucking pig', tēvùka-s 'little father', O.C.Sl. synŭ-kŭ 'little son'. See § 84 p. 252 f., § 88 p. 262 ff.

Usages confined to single groups of languages: Gr. neuters in -ιο-ν: ὀρνίθ-ιο-ν 'small bird', ἐταιρίδ-ιο-ν 'little mistress', ἀσπίδ-ιο-ν 'small shield', ὰδελφ-ίδιο-ν 'little brother', see § 63 p. 128. Germanic neuters with -īna-: Goth. gáit-ein O.H.G. geiz-īn 'little goat', Goth. gum-ein 'little man', see § 68 p. 158. In both these instances the intermediate stage was the idea of belonging to a species, which suggested that of incompleteness and inferiority. The developement was perhaps the same in the case of the suffix -ien- in Avest. kain-in- f. 'girl', Lat. pūs-iō 'little boy' pūmil-iō 'dwarf' senec-iō 'little old man' homunc-iō and others of the same sort, see § 115 p. 358. 359. Mention should also be made of the Germanic diminutives with Idg. -go-, such as O.H.G. armihha 'paupercula' snurshha 'little daughter-in-law', see § 91 p. 277.

Diminutive suffixes were often combined, as Gr. -x-uo-, Lat. -c-ulo- -l-ulo-, Germ. -l-una-, Lith. -le-la- (nom. -le-l-i-s). This was done partly to give a fuller and more emphatic expression to the idea of diminution, e. g. Lat. agellulu-s beside agellu-s, from ager field, Lith. mergelèle beside mergèlé, from mergà 'girl', partly in consequence of a complete loss of the diminutival sense in the first suffix, e. g. Lat. mus-c-ulu-s, Mod.H.G. ferk-el-chen.

-lo- and -qo- were frequently employed in the proethnic and later periods in names of persons, especially to form 'pet names'. How far indeed the suffix retained its proper sense, is often hard to determine in any particular instance. Skr. bhānu-la-s, Gr. Oçaov-lo-s, O.Ir. Tuathal, Goth. Vulfi-la, Pruss. Butil. Skr. dēva-ka-s dēvika-s Gall. Dīvico Dīvic-ia, Skr. šuna-ka-s Gr. Kvvaš, Skr. sana-ka-s Gall. Senicco Seneca O.H.G. Sinigu-s (the termination is Latin), O.H.G. Berhtung Berhting, Pruss. Tewiko Banduke.

Relation of Adjectives to Concrete Substantives.

§ 154. No distinction in form has ever been made in the Indo-Germanic languages between the adjective or participle on the one hand and the concrete substantive on the other.

Adjectives were used without change as substantives, just as substantives were often used without change as adjectives. Thanks to this usage the original adjectival or substantival character was often completely lost; thus Idg. *dont- 'tooth' (Skr. dánt- etc.), originally a verbal adjective meaning 'eating', became a simple substantive, perhaps even in the proethnic period (§ 126 p. 394. 398). The original character of a particular word however often appears side by side with the new sense, e. g. Lat. natu-s 'born' and 'son', aber 'udder, exuberant fulness, abundance' and 'fertile, rich'.

The process of the change from adjective to substantive was frequently that the meaning of the adjective came to include the idea of some substantive to which the adjective was especially often applied. Thus ναῦς 'ship' was often left unexpressed Greek, as in the phrases ή τριήρης, ή πρύμνη. In many instances the different languages show a remarkable agreement, and there the usages in question may date from the Indo-Germanic period. Thus we have fem. Gr. ἀεξία (sc. χείφ) Lat. dextra (sc. manus) 'the right hand', O.Ir. for deis (sc. laim) 'on the right', Goth. taihsva (sc. handu-s), Lith. deszine (sc. rankà) 'the right hand', but on the contrary masc. Skr. dákšina-s (sc. hásta-s) 'right hand'. Lat. capr-īna Brugmann, Elements, II.

'goat's flesh' Lith. ož-ënà 'flesh of a he-goat' O.C.Sl. bĭbrov-ina 'beaver's flesh'; Lat. rāp-īna 'turnip-field' Lith. aviš-ënà 'oat-field' O.C.Sl. nov-ina 'newly ploughed land, fallow land', see § 68 p. 156 ff.

But some formative suffixes acquired the special function of converting adjectives into substantives, being used as denominative suffixes to form names of persons or things possessing the attribute or quality which was expressed by the original word. -en- is very commonly so used, especially in Germanic; e. g. Avest. mar^et -an- 'a mortal' beside mar^et a- 'mortal', Gr. $\sigma\tau\rho\alpha\beta-\omega\nu$ 'squinter' beside $\sigma\tau\rho\alpha\beta\delta-\varsigma$ 'spinting', Lat. $R\bar{u}f$ - \bar{v} beside $r\bar{u}fu$ -s Goth. $r\dot{u}ud$ -a 'red one' beside $r\dot{u}u\bar{p}$ -s 'red', Lith. rud- \bar{u} 'autumn' beside $r\dot{u}da$ -s 'reddish-brown'. See § 114 p. 344 ff. Other suffixes of this kind are found only in single groups of languages, as $-\bar{a}qo$ - in Balt.-Slav., e. g. Lith. $nauj\bar{o}ka$ -s O.C.Sl. $novak\bar{u}$ 'novice' beside $na\bar{u}je$ -s $nov\bar{u}$ 'new' (§ 89 p. 274), and Germ. -inga-, e. g. O.H.G. arming 'poor man, poor fellow' beside arm 'poor' (§ 88 p. 267).

Substantives denoting an activity or state (nomina actions, verbal abstract nouns).

§ 155. To denote an activity or a state is in general the function of the verb. Substantives which express an action or a state owe their existence to a metaphor, as do those which denote a quality (§ 157), — action and state being regarded as belonging to the category of material objects.

It often happens that the nomen actionis does not express its own idea simply, but represents also, by a confusion, the notion of a person or thing that is in some way connected with the action; thus such substantives come to denote material objects. The designation of the action may be applied to its (grammatical) subject: e. g. Mod.H.Germ. rat (properly 'advice') = 'adviser, counsellor', strom strömung (properly 'a streaming') = 'streaming water', verzierung (properly 'an adorning') = 'something which adorns'. [Cp. Eng. counsel (in e. g. Queen's Counsel), a grief = 'something which grieves', a hindrance = 'something

which hinders'.]. Or it may be further extended to denote the external (direct) object of the action, that which is in any way affected by the action, e. g. Mod.H.Germ. saat (properly 'a sowing') = 'what is sown', wohnung (properly 'the act of inhabiting') = 'the house a man inhabits' [cp. Eng. contrivance = 'what is contrived', belief = 'what is believed']. Or to the internal ('cognate') object, thus giving rise to a term for the result of the action, e. g. Mod.H.Germ. riss (properly 'a rending') = 'a rent', wuchs (properly 'a growing') = 'the result of growing. growth, figure', vereinigung (properly 'a uniting') = 'the result of uniting, a united body' [cp. Eng. growth, union, a spelling = 'the method or result of spelling a word'. In the same way we have such words used as nomina instrumenti, e. g. Mod.H.Germ. verzierung = 'means of adornment', lòsung (properly 'a setting free') = 'means of setting free, redemptionmoney' [cp. Eng. distinction = 'means of distinguishing', influence ('he will use his influence for me') = 'means of influencing', relief = 'means of relieving']; or as nomina loci e. g. Mod.H.Germ. wohnung = 'a dwelling-place', trift (properly 'a driving') = 'pasture-land' [cp. Eng. dwelling, pasture] etc. Cp. Paul Princ.2 p. 81 f.

These various developements are generally difficult to separate clearly, and hence in what follows we shall not confine our attention to the *nomina actions* in the strict sense but consider along with them those which show the secondary variations of meaning that have just been enumerated.

We will begin with the suffix which seems to retain the simple meaning of an action or state most regularly.

-ti-: *sru-ti-s 'a flowing, stream': Skr. sruti-š Gr. φίσι-ς. *qi-ti-s: Skr. άpa-citi-š 'requital, punishment' Gr. τίσι-ς 'valuation, fine, punishment'. Skr. ma-ti-š 'thought, mind', Ğr. μάν-τι-ς (m.) 'one inspired, seer', Lat. mēns 'mind', Goth. ga-mund-s 'remembrance' ana-mind-s 'conjecture', Lith. at-minti-s 'memory', O.C.Sl. pa-metī 'remembrance'. Skr. śru-ti-š 'hearing, sound, news, tale', syū-ti-š 'sewing, sack', prā-jnāti-š 'perception' jnā-ti-š m. 'relative', Gr. χύ-σι-ς 'outpouring, gush, libation', ἡῆ-σι-ς 'speaking, word'.

öψι-ς 'sight, countenance', μάρπ-τι-ς (m.) 'seizer, robber'. Lat. mors, tussi-s, ves-ti-s, cos, hos-ti-s. O.Ir. buith 'existence', bli-th 'painting'. Goth. us-tatht-s 'perfection, completion', fra-lust-s 'loss, destruction', sath-t-s 'sickness, illness', ga-skaft-s 'creation, created thing', O.H.G. sih-t 'sight, power of sight', Mid.H.G. trift 'driving, common (cattle-drive), meadow'. Lith. dù-ti-s O.C.Sl. da-ti 'gift'. Lith. gir-ti-s 'feast', skllsti-s 'cleft in the hoof of cattle', pir-ti-s 'bath-room', pri-eiti-s 'suburb'. O.C.Sl. po-znati 'cognitio', vristi 'state, condition, position', sè-ti 'string'. See § 100 p. 294 ff.

-ni-. Skr. lū-ni-š 'a tearing loose, severance', Goth. lū-n-s 'means of deliverance, ransom money'. Skr. gīr-ni-š 'a swallowing', jūr-ni-š 'heat'. O.Ir. tāin 'a driving forth, booty', buain 'harvesting, harvest'. Goth ana-busn-s 'bidding, injunction, order', ga-rēhn-s 'intention, plan', siun-s 'a seeing, power of sight, countenance, appearance'. Lith. bar-nì-s 'quarrel' O.C.Sl. bra-nì 'battle'. Lith. šinksnì-s 'step'. O.C.Sl. stīg-nì 'way, road'. See § 95 p. 285 ff.

-tu-. Skr. gán-tu-š 'course, way', Lat. ad-ventu-s. Avest. vī-dātu-š 'decomposition of the body, dissolution, death'. Gr. κτιστύ-ς 'a founding', ἀκοντιστύ-ς 'javelin-throwing, fight with javelins'. Lat. ad-itu-s, or-tu-s, gemi-tu-s. O.Ir. mess 'deciding, sentence'. Goth. kus-tu-s 'trial, proof', vahs-tu-s 'growth'. Lith. lytù-s lėtu-s 'rain'. See § 108 p. 323 ff.

-mo--ma-. *dhū-mo-s 'ebullition': Gr. θυμό-ς 'ebullition of temper, passion, courage', Skr. dhūmá-s Lat. fūmu-s Lith. dúmai O.C.Sl. dymŭ 'smoke'. Skr. sár-ma-s 'a flowing', Gr. όρ-μή 'impulse'. Skr. bhā-ma-s 'light, brightness'. Gr. πταρ-μό-ς 'sneezing', ἰῦγ-μό-ς 'shrieking', ἀρπαγ-μό-ς 'plundering, booty', δασμό-ς 'partitiqu, division', τι-μή 'estimation, honour', γνό-μη 'intention, opinion'. Lat. anι-mu-s anι-ma, fā-ma. Goth. dō-m-s O.H.G. tuo-m 'sentence, judgment, position, worth', O.H.G. strō-m 'stream'. Lith. lañksma-s 'bending', rēksma-s 'roar', sukima-s 'a turning', sākyma-s 'a saying'. O.C.Sl. u-mū 'mind, understanding'. See § 72, 3 p. 170 ff.

-men-. Skr. dhá-man- 'statute, operation, seat, dwelling-

place'. Avest. daman- 'creation, created thing', Gr. ἀνά-θημα 'a setting up, that which is set up, votive offering' θέ-μα 'a storing up, deposit'. Skr. dá-man- 'a giving', Gr. δό-μα 'gift'. Gr. ὁεῦ-μα ὁν΄-μα O.Ir. sruaim 'a streaming, stream'. Skr. bhár-man- 'support, fostering care', Gr. φέρ-μα 'fruit of the womb', O.C.Sl. brĕ-mę 'burden'. Skr. háνī-man- 'a summoning', ἔ-man- 'a going', dhár-man- 'prop, support'. Gr. ἡ-μα 'a throwing', νόη-μα thought', ὅρα-μα 'sight', ζεῦγ-μα 'bond, bridge of boats'. Lat. nū-men, lū-men, agmen, certā-men. O.Ir. cēim 'a stepping, step', bēim 'a striking, stroke', gairm 'call, cry'. Goth. hliu-ma 'hearing', skei-ma 'a light' O.H.G. scī-mo 'brightness, gleam'. Lith. rē-mū 'heart-burn', aug-mũ 'excrescence'. See § 117 p. 365 ff.

-o-, -ā-. Skr. jān-a-m 'birth, origin', Gr. γόν-ο-ς 'birth, offspring'. Gr. χρόμ-ο-ς 'noise, murmur, neighing', O.C.Sl. grom-ŭ 'thunder'. Skr. ghōṣ-a-s 'sound, din' Avest. gaoṣ-a- m. 'ear'. Gr. όλχ-ό-ς 'dragging, that which drags', τόμ-ο-ς 'cut, slice'. Goth. ga-fāh-s 'capture', dragk 'drink'. Lith. úž-valka-s 'outside covering, bed-covering' O.C.Sl. oblakŭ 'cloud'. Gr. φο-ή 'flood', Lith. srav-à 'flowing, bleeding'. Gr. qυγ-ή Lat. fug-a 'flight'. Skr. bhid-å 'split, division'. Goth. gib-a 'gift'. See § 60 p. 109 ff.

-es--os--s-. Skr. dásas 'glorious deed', Gr. δήνεα 'counsels, wiles'. Skr. ápas ápas 'work, religious performance', Lat. opus. Gr. όῖγος Lat. frīgus 'cold'. Skr. dốhas 'milking', námas 'obeisance, reverence', Avest. tacō 'course'. Gr. ἦδος 'pleasure', alθος 'brand', δίος 'fear'. Goth. hatis 'hate', agis 'fear'. Gr. alδώς 'shame, modesty'. Lat. tepor, amor. See § 131 ff. p. 411 ff.

-1en- -tien- in some European languages. Lat. cap-iō, religiō, Goth. ga-runjō 'overflow', sakjō 'strife'. Lat. ra-tiō, Goth. ra-pjō 'ratio'. Lat. men-tiō, O.Ir. er-mitiu 'honor'. See § 100 p. 294 ff., § 112 p. 341 f., § 115 p. 355 ff.

Other suffixes used in the formation of nomina actionis will be discussed in §§ 156 and 158.

When the nomina actionis had come to denote material objects, they were liable a still further extension of meaning, namely to be used as adjectives (cp. § 154). Here perhaps should

be classed e. g. Skr. pti-ti-š 'stinking' and tapya-tú-š 'hot, glowing', originally 'stench' and theat, glow'.

Relation of the nomina actionis to the Infinitive (Supine)¹).

§ 156. Since the nomina actionis denote not merely a continuous activity but also one which may be defined in point of time, they sometimes come to be used in verbal constructions. Here, as in the case of the adjective (§ 144), the connexion with the verb may include the power of governing a case, and of distinguishing differences of time, different kinds of action (such as momentary, continuous, inceptive) and Voice (diathesis, genus verbi).

This kind of assimilation to the character and construction of the verb appears e. g. in Gr. την τοῦ θεοῦ δόσιν ὑμῖν (Plat.) the gift of God to you', περὶ δὲ σφίσι καταδουλώσεως (Thuc.) = περὶ δὲ τοῦ ἑαντοῖς καταδουλωθηναι (τοὺς Ἔλληνας), Lat. reditus Rōmam. But a still more complete identification is seen in what are called infinitives (and supines), which are crystallised cases (generally acc., dat., loc.) of nomina actions. An infinitive may be said to be completely formed when the noun is no longer regarded as a case-form belonging to its own system, and its construction no longer follows the analogy of its original use as a noun; this is true, for example, of Gr. δόμεναι δοῦναι Lat. dare, at the earliest period of which we have record. Before, however, such forms were completely isolated from the nominal system,

¹⁾ E. Wilhelm, De infinitivi linguarum Sanser Bactr Pers. Graec. Osc. Umbr Lat Got forma et usu, 1873. J. Jolly, Geschichte des Infinitivs im Indogermanischen, 1873. A. Ludwig, Der Infinitiv im Veda, 1871. M. Müller, Grammatical forms in Sanskrit corresponding to the so-called Infinitives in Greek and Latin, Essays IV 420 ff. H. Brunnhofer, Über Dialectspuren im vedischen Gebrauche der Infinitivformen, Kuhn's Ztschr. XXV 329 ff. Chr. Bartholomae, Die Infinitivbildung im Dialect der Gäthä's, ibid XXVIII 17 ff. L. Meyer, Der Infinitiv der homer. Sprache, Gött. 1856 E. Windisch, Zum ir. Infinitiv, Bezzenberger's Beitr. II 72 ff. A. Denecke, Der Gebrauch des Infinitivs bei den ahd. Übersetzern des 8. u. 9. Jahrh, Leipz. 1880. W. Müller, Über den letto-slavischen Infinitiv, Kuhn-Schleicher's Beitr. VIII 186 ff.

they passed through a number of intermediate stages, and hence it is often hard to say whether any particular form should be called an infinitive in the strict sense of the word 1). The infinitives that least deserve the name are the Irish, because the nomina actionis used in Irish where other languages use the infinitive retained the construction of nouns, c. g. ar-dot--chuibdig fri sechem na m-bria-thar sin 'pledge thyself to obey these words' (literally 'to the obeying of these words'). In this latter respect (the power of governing an acc.) even the language of the Veda shews a further degree of developement; e. g. we find not only andhasah pītáyē for the drinking of the somajuice', but also andhas pitaye; the same double construction is found in the Avesta (cp. Bartholomae, Kuhn's Ztschr. XXVIII 12 f.). The infinitive reached its most characteristic developement in Greek and Latin, the only languages in which we find a special expression for differences of voice.

The following formative suffixes are distributed amongst the infinitival forms (we may omit the Keltic infinitives). -tu-in Ar., Lat, Balt.-Slav., see § 108 p. 323 ff. -ti- in Ar., Balt.-Slav., see § 99 f. p. 293. -men- in Ar., Gr., see § 117 p. 365 ff. -uen- in Ar., Gr., see § 116 p. 362 ff. -es- in Ar., Lat, see § 131 f. p. 411 ff. In single groups of languages: -i- in Ar., see § 93 p. 279 f.; -lo- in Armen., see § 76 p. 202; -o- in Umbr.-Samn., see § 60 p. 114; -ono- in Germ., see § 67 p. 153. 154.

As the participle might again become a simple noun (§ 144), so also could the infinitive. In this case, however, the process was more difficult because it was not inflected. The approximation to the noun was easiest where there was least necessity for expressing its relations by means of inflexion, that is, in its use as subject or object; e. g. Gr. πάντεσσιν λιπὶ ξυροῦ ἴσταται ἀχμῆς ἢ μάλα λυγρὸς ὅλεθρος ᾿Αχαιοῖς ἡὲ βιῶναι (Hom. Κ. 173), πειρήσω ἀλαλνεῖν (Id. T. 30), Lat. habēre ēripitur, habuisse nun-

¹⁾ Hence c. g the objection urged by Brunnhofer against Ludwig and Wilhelm, that they had adduced as infinitives Vedic forms which were nothing but nomina actionis (Kuhn's Ztschr. XXV 330).

quam (Sen.), hic verert (= verecundiam) perdtdit (Plaut.). This led on to such constructions as Gr. $\tau \delta$ legs., Lat. tuom amare (Plaut.), nostrum istud vivere triste (Pers.), nil praeter plorare (Hor.), quid hūius vivere est? (Sen.) 1) and so forth. See Paul Princ. 2 311 f.

Substantives denoting a quality (Abstract Substantives in the strict sense).

§ 157. Substantives which denote a quality, owe their existence to a metaphor just as do the nomina actionis: an attribute or natural quality was regarded as belonging to the class of material objects.

Substantives denoting a quality often come to designate the person to whom the quality belongs, e.g. Mod.H.G. Jugend = 'youthful persons, young folk (collectively)' or 'a single youthful person', [Eng. youth]. But it is difficult to maintain any sharp distinction between the separate uses, and therefore the words which show this secondary developement of meaning will be treated along with the rest. It is important also to recognise the fact that no hard and fast line can be drawn between this class of nouns and the nomina actionis with their secondary shades of meaning. It is natural enough that the two divisions should often overlap.

The suffixes that most frequently appear in these abstract nouns are the following.

-ta-. Avest. cista- 'wisdom'. Gr. πινυτή 'prudence, understanding'. Lith. geltà 'yellowness'. Lat. juventa Goth. junda 'youth'. Skr. pūrnatā- O.H.G. fullida O.C.Sl. plūnota 'fulness'. Skr. ghōratā- 'awfulness' Goth. gáuriþa 'trouble'. Skr. dīrghatā-O.C.Sl. dlūgota 'length'. In Greek and Slavonic are found concrete nouns like ἀγρότη-ς 'countrymen' junota 'youth'. See § 79 p. 220 ff., § 80 p. 238 ff.

-tāti--tāt- and -tūti--tūt-. Skr. sarvátāti-š sarvátāt-'completeness' Avest. haurvatāt- 'safety' Gr. ὁλότης 'totality, entirety'. Gr. νεότης 'youth', Lat. novitās 'novelty, strangeness'.

Cp. Wölfflin, Der substantivierte Infinitiv [im Latein], Archiv für lat. Lexikogr. III 70 ff.

Lat. juventus and juventus. O.Ir. centu 'unitas'. Goth. gamáindup-s 'communitas'. See § 102 p. 308 ff.

-nā-. Avest. per nā- Goth. fullo 'fulness'. Skr. jaranā 'decrepitude, age'. See § 65 ff. p. 138 ff.

-io--iā-. Skr. pālitya-m 'greyness', śrāišthya-m 'excellence'. O.H.G. gi-fuori 'fitness, usefulness'. Lith. ilgi-s 'length', O.C.Sl. ostrije 'sharpness'. Gr. ἀγηνορίη* 'manliness', ἀναρχία 'anarchy'. Lat. audacia 'boldness', modestia 'moderation', sapientia 'wisdom'. See § 63 p. 122 ff.

-tuo--tua-. Skr. dēvatvá-m 'divinity', šucitvá-m 'purity', sātmatvá-m 'inspiration, possession by a deity'. Goth. pivadv 'servitude', fijapva 'enmity'. O.C.Sl. zětistvo 'violence'. See § 61 p. 116 f.

-ti-. *penqti-s 'fivefold character, pentad, the number five': Skr. pankti-š O.Icel. fimt O.C.Sl. petī. Skr. yuvati-š 'maiden' (orig. 'youth' (abstr.) O.H.G. jugund 'youth'. O.C.Sl. dlŭgostī 'length', qzostī 'narrowness'. See § 99 p. 293, § 101 p. 306 ff.

-es- -os-. *reges- 'gloom, darkness': Skr. rájas (Armen. erek) Gr. ἔρεβος Goth. riqis. Skr. máhas- 'greatness, size', yášas- 'glory', Gr. εὖρος 'breadth', μῆκος 'length', βένθος 'depth', μέγεθος size, greatness'. Lat. Venus 'charm of love', languor 'weariness', lēvor 'smoothness', dulcor 'sweetness'. See § 131 ff. p. 411 ff.

In single groups of languages: e. g. Lat. -tūdin-, forti-tūdō 'fearlessness', lassitūdō 'weariness' (cp. § 128 p. 409), Lith. -ybē-, auksztŷbe 'height, highness', O.C.Sl. -ba-, zŭloba 'wickedness' (§ 78 p. 217 f.).

The Relation of Adjectives to Abstract Substantives (nomina actionis and substantives denoting a quality) formed with the same suffixes.

§ 158. In conclusion we have to discuss another question which bears upon the origin of the substantives denoting an action or a quality and the general relation between adjectives and substantives in Indo-Germanic.

Many nouns formed with o-suffixes act both as adjectives and as abstract substantives; as a rule it happens that the

feminine or neuter form, more rarely that the masculine form is the one which is used substantivally. If the adjective is a nomen agentis, we have a corresponding nomen actionis, e. g. Skr. srutá-s 'flowing': srutá-m n. 'a flowing, flood'. Or if it predicates an attribute, then the corresponding substantive denotes the attribute, e. g. Lith. gelta-s 'yellow': geltà f. 'yellowness'.

The following are examples.

-to- -ta-.

Feminine. Avest. cistā- 'wisdom': Skr. cittá- partc., in the neut. 'observation, thought, intent, spirit'. Gr. nervth 'intelligence, wisdom': πινντό-ς 'intelligent'; γενετή 'birth, origin': Lat. genitu-s; βοοντή 'thunder'. . Lat. offensa 'a stricking against, offence': offensu-s; repulsa 'rejection': repulsu-s; impensa 'expenditure': impēnsu-s; multa 'punishment': mulsu-s instead of *mol(c)tu-s (the isolation of the substantive from the participle preserved it from the analogical change which affected the latter), Skr. mrštá- 'grasped, touched'. O.Ir. ed-part ed-bart 'oblatio': do-breth Mid.Ir. 'datum est', (Skr. bhrtá-8 Gr. weoró-c); loth 'filth': compare this and the Lat. lutu-m lutu-s 'mud' with Lat. -lūtu-s (ab-lūtu-s etc.) 'besprinkled, soiled'. Goth. skanda O H.G. scanta 'disgrace': O.H.G. scant 'shamed'; O.H.G. forahta 'fear': Goth. faurht-s 'fearful'; A.S. zud 'battle': Skr. hatá- 'smitten'. geltà- 'yellowness': gelta-s 'yellow'; banktos pl. 'boisterousness, storm': bankta-s 'boisterous'. O.C.Sl. vrista 'condition, state, position, stage': Skr. vrttá- 'versus'. The secondary Idg. suffix -ta- in Lat. juventa Skr. pūrnatā etc. should be added here, see p. 238 ff.

Neuter. Skr. mytá-m 'death' O.H.G. mord 'murder': Skr. mytá-s 'dead'. Skr. matá-m 'meaning, opinion, intent' Lat. com-mentu-m 'idea, invention, design' O.Ir. der-met 'forgetfulness': Skr. matá- 'thought, intended'. Idg. *kleu-to-m 'faculty of hearing' Avest. sraote-m Goth. hliup: Skr. śrutá-s 'heard'. Skr. srutá-m 'flowing, flood, stream': srutá-s 'flowing'; stutá-m 'laudation, praise': stutá-s 'praised, lauded'; mānita-m 'a doing of honour': mānita-s 'to whom honour is done, honoured'; Avest.

fra-date-m 'help, success': fra-data- 'helped, made'. O.H.G. ferid 'navigium'. O.C.Sl. pato 'fetter': partic. petü. Here we must also class Idg. -mn-to-, as in Skr. śrōmata-m 'a listening to' O.H.G. hliumunt 'repute, character', Lat. cōgnōmentu-m, see p. 249.

Masculine. Skr. ghā-ta-s 'blow, slaying'. Avest. stutō 'laudation, prayer', cp. Skr. n. stutá-m. Gr. xom-ogró-g 'raising of the dust, cloud of dust': νέ-ορτο-ς 'newly arisen' Lat. ortu-s; ἔμετο-ς 'vomiting: ἐμετό-ς Skr. vamita-s 'vomited'; στρατό-ς 'encamped host': Skr. strtá-s Gr. στρωτό-ς 'outspread, outstretched': οἶτο-ς 'fate': Skr. éta-s 'hasting' Lat. -itu-s; φόρτο-ς 'burden': φερτό-ς 'bearable' Skr. bhrtá-s 'borne'; θάνατο-ς 'death': θνητό-ς 'mortal'; κωκυτό-ς 'wailing', κοῖτο-ς 'couch' (with κοίτη) and other exx. Lat. lectu-s (and lectu-m) 'couch', lutu-s (and lutu-m 'mud', cp. O.Ir. loth f. above. A.S. O.Icel. sess 'seat' (cp. Lat. sub--sessa f. 'ambush'): Skr. sattá-s 'sıtting' Lat. ob-sessu-s; O.H.G. giwaht 'mention, fame': Skr. uktá-s 'spoken'; Goth. mob-s 'wrath' O.H.G. muot 'spirit, temper, courage' beside O.C.Sl. mě-ti 'to dare'; O.H.G. frost (and O.Icel. frost n.) 'frost' beside friosan 'to freeze'. Lith. bùta-s 'dwelling, house': Skr. bhūtá-s 'become, been', cp. O.Ir. both f. 'dwelling-place, hut' Skr. bhūtá-m 'existence with power, welfare, prosperity', maiszta-s (and maiszta) 'uproar': Gr. uīxtó-s'mixed'; tvárta-s'enclosure': tvérta-s'grasped, enclosed', of course these Lithuanian masculine forms may once have been neuter. O.C.Sl. čitŭ 'number' po-čitŭ 'enumeration': Skr. citá-s 'arranged in rows or layers', cp. Skr. cuta 'layer', podu-jetu 'grasp, support' podu-jetu 'grasped, undertaken'.

Remark. With regard to the relation of the forms with vocalism of the strong grade to those with that of the weak grade (e g. O.C.Sl. pato peto) see p 221 above.

 $-no--n\bar{a}-$, $-eno--en\bar{a}-$, $-ono--on\bar{a}-$.

Fem. Avest. per na- Goth. fullo 'fulness': Avest. per na-Goth. full-s 'full'. Skr. jaraná 'old age': Skr. jaraná- 'deerepit'. O.H.G. stulina 'theft': O.Icel. stolenn 'stolen'.

Neut. O.H.G. zorn A.S. torn 'anger, wrath', orig. 'a torn or rent condition of the temper': Skr. dīrná-s 'torn to pieces';

O.H.G. mein 'falsehood, mischief': mein 'false, deceitful'. Str. váhana-m 'a carrying': vahana-s 'carrying' O.C.Sl. vezenű 'carried'; vártana-m 'turning, motion': vartana-s 'setting in motion'; mána-m 'measuring, measurement': vi-mána-s 'measuring out'. Geth. baíran inf. 'bear': baúran-s 'borne'.

Masc. Skr. uṣṇa-s (also uṣṇa-m uṣṇā) 'heat': uṣṇā-s 'hot'. Skr. yajṇā-s 'reverence': Gr. ἀγνό-ς 'worthy of reverence, sacred, pure'. Gr. θῦνο-ς 'onset, fight': Skr. dhūna-s 'violent, agitated'. O.H.G. scīn 'visibility, brightness, gleam': scīn 'visible'.

-io- -ia-.

Fem. Skr. kṛtyá- 'infliction, bevitchment': kṛtya-s 'faciendus'. Gr. φράτριος O.C.Sl. bratrija 'brotherhood': Gr. φράτριος orig. 'brotherly'. Gr. ἡσυχία 'peace': ἡσύχιο-ς 'peaceful'; ξενία hospitality': ξένιο-ς 'hospitable'. Lat. noxia 'guilt, crime': noxius 'guilty, criminal'. O.H.G. lugī (which implies a preceding "luz-iō-) O.C.Sl. luža 'lie': O.H.G. luggi lukki O.C.Sl. lužī 'lying, false'. A.S. nyt O.Icel. nyt-r 'use, advantage'. A.S nyt O.H.G. nuzzi 'useful, serviceable'. O.C.Sl. feminines like suša 'dryness' qrožda 'folly', see p. 131.

Neut. Skr. vácya-m 'speaking, word, blame': vācya-s 'dicendus'; kṣ̄atriya-m 'lordship, supremacy': kṣ̄atriya-s 'possessing lordship, ruler'. Gr. σφάγιο-ν 'offering, beast of offering': σφάγιο-ς 'striking, killing'; θελατήφιο-ν 'delight, enchantment': θελατήφιο-ς 'delighting, enchanting'. Lat. auguriu-m 'act of divination, prophecy': auguriu-s 'prophetic'. O.H.G. gi-fuori 'suitability, usefulness': gi-fuori 'suitable, useful'. Furthermore forms like Lith. kūti-s 'cut, blow' (: Skr. kartya-s 'to be hewn or cut off') etc. no doubt represent original neuters; see p. 124 f.

-tno-tyno-. Examples of neuter forms are O.Pers. cartana-'action', loc. cartanaiy used as infinitive, Lat. gen. dandī 'of giving': Lat. àandu-s 'to be given', Lith. sùktina-s 'torquendus'. See p. 161 ff.

-tuo- -tua-. Neut.: Skr. kártva-m 'task': kártva-s 'faciendus'. Fem.: O.C.Sl. žetva 'harvest': Skr. hántva-s 'feriendus'.

-mo--ma-. Fem.: Gr. θέρμη 'warmth': θερμό-ς Armen. Jerm 'warm'. Goth. miduma 'midst': O.H.G. metamo metemo 'mediocris' Avest, madema- 'medioximus', ep. p. 167. O.C.Sl. tima 'great number', orig. 'strength': Ayest. tima- Skr. til-tumá- 'strong', ep. p. 171. Neut.: Avest. gar'me-m 'warmth': gar'ma- 'warm'. Masc.: Skr. gharmá-s 'warmth, heat': Avest. gur'ma-Lat. formu-s O.H.G. warm 'warm'. Goth. rūms O.H.G. rūm 'room': Goth. rūm-s 'roomy'; Mid.H.G. stīm 'turmoil, confused masses': Skr. stīma-s 'lazy, crawling' pra-stīma-s 'thronged, heaped'.

-ro--rā-. Fem. Skr. támisrā- Lat. tenebrae 'darkness': Mid.Dutch deemster O.H.G. dinstar 'dark'. Gr. ἄκρα 'point, peak': ἄκρο-ς 'pointed' O.C.Sl. ostrŭ 'sharp'. Neut. Skr. tamisra-m beside támisrā-, Gr. ἄκρο-ν beside ἄκρα. Skr. chidrá-m 'perforation, hole, interruption': chidrá-s 'perforated'. O.C.Sl. vedro 'good weather': vedrŭ 'clear, bright'.

This brief list of examples is enough to justify the conclusion that the fluctuation between the adjectival and substantival value in the o-nouns dates from the proethnic period 1). Now in the case of the double usage of the es-stems (such as Skr. máhas- 'greatness': mahás- 'great', Gr. ψεῦδος 'lie': ψευδής 'lying, false'), which is also proethnic, it can scarcely be doubted that the substantival value is the older, and it would be natural to adopt the same view in the present instance. But no decision is possible until the original meaning of the a-suffixes as opposed to the o-suffixes has been established. In discussing these (p. 106, 458) we were led to the conclusion that except in a comparatively small group of words (e. g. Lat. equo-s equo), they had no connexion whatever with the distinction of animal sex. A further consideration may now perhaps be suggested. Is it not precisely in the variation of meaning we have just noticed that we must look for light on the original function of the o-and a- suffixes?

¹⁾ It is still a question for investigation how far this use has been extended in the separate families of languages apart from the direct influence of the original variation of meaning in similar cases which came down from Indo-Germanic (op. e. g. B. H. Balser, De linguae Graecae participis in neutro genere substantive posito, Lips. 1878, p. 29 ff.).

NOUNS WITHOUT FORMATIVE SUFFIXES (ROOT-NOUNS)1).

§ 159. The term Root-nouns is applied to those nouns which do not admit of analysis into root and formative suffix, in the termination of whose stem no element can be recognised which is similarly used elsewhere to form noun stems. Whether, however, all the nouns that full under this definition were from the beginning absolutely simple forms, must be left an open question. Many of them, e. g. Skr. div- 'heaven' and Lat. hiem-(see below), may have been originally compound forms.

Root-nouns are found in all divisions of Indo-Germanic; they have been preserved most frequently in Aryan and the classical languages. In many instances they lost the special character of their formation and passed into the analogy of some vowel declension (cp. § 56 p. 102 f.), and we may regard this change of declension as the chief cause of their comparatively rare appearance in Armenian and in Germanic²), and of their almost complete disappearance in Balto-Slavonic. Here however we are bound to discuss all the nouns of this kind which occur in the separate languages, when the change of declension has made no difference in their meaning.

The Root-nouns have no simple, clearly marked function (such as that of denoting material things, actions or any other special idea). Even those which are demonstrably proethnic have meanings of different kinds. The uncompounded examples are mostly substantives, and amongst these the nouns denoting an action (fem.) and those denoting the agent preponderate; and in the former group we must include those that are used as

¹⁾ Leo Meyer, Die einsilbigen Nomina im Griech. und Lat., Kuhn's Ztschr. V 366 ff.

²⁾ As far as the Germanic is concerned, this exchange of declension has been thoroughly discussed by B. Kahle, Zur Entwickelung der consonantischen Declination im Germanischen, Berlin 1887.

infinitives in Aryan, Greek and Latin. When they are the second members of compounds these nouns usually denote an agent.

This method of forming noun-stems was still in active use in the separate development of Aryan, Greek and Italic.

§ 160. Root-nouns uncompounded.

We will begin with such examples as appear simultaneously in more than one group of languages.

1. Forms showing vowel-gradation.

*uoik-*uik- (\sqrt{ueik} - 'enter'): Skr. vis- f. 'settlement, house, community, stock', Avest. vis- O.Pers. vip- f. 'village community, clan'; Gr. oixads, better written, oixads, 'homewards' (compare Hom. $\tau oixads$ -ix-is-?); O.C.Sl. vis-i 'village', which follows the i-declension. With Skr. acc. vis-am cp. div-am Gr. dia beside dyam Ziv (see p. 481).

* $dor\hat{k}$ - * $dr\hat{k}$ ($\sqrt{der\hat{k}}$ - 'see'): Skr. $dr\hat{s}$ - f. 'seeing, perception, eye', adj. 'seeing, beholding', inf. $dr\hat{s}$ - \hat{e} 'to see' (§ 162); Gr. $\delta o \rho \hat{s}$ - $\delta o \rho \hat{s}$ - $\delta c \rho \hat{s}$ - f. 'roe, gazelle' (named from its eye).

Avest. barez-berez-f. 'height', adj. 'high'. O.Ir. bri, gen. breg, 'mountain' (I § 288 p. 230, § 298 p. 236). Goth. bairg-, gen. bairg-s, 'fortress, city'. Avest. barez-may stand for *bhfgh-*bhorgh- or *bhergh-; all the other forms represent *bhrgh-.

*sem-, sm- sm-. Gr. $\varepsilon I_{\varsigma}$ Cret. εv - ς , gen. εv - $\delta \varsigma$, 'unus', εv 'unum' (εv - $\delta \varsigma$ substituted for * $\varepsilon \mu$ - $\delta \varsigma$, see I § 204 p. 170); $\mu \omega v v \xi$ 'with undivided hoof' for * $\delta \mu$ - $\omega v v \xi$, fem. $\mu i \alpha$ for * $\delta \mu$ - α ; " μ - α 'simul' instr. sing., see I § 236 p. 199. Lat. sem-per 'in one unbroken sequence, always'; for -per see I § 658, 7 p. 504.

*kred- (*kerd-) and *kyd- 'heart'. Skr. śrád dadhāmi 'I believe, trust' Lat. crēdō for *crezdō (I § 507 Rem. p. 372) O.Ir. cretim 'credo' (I § 521 p. 379), from the pr. Idg. phrase *kred dhē-. Lat. cor cord-is O.Lith. gen. pl. szird-u (now szirdžiū) from *kyd-, cp. Gr. καρδ-lā Ion. κραδ-ίη etc., where the root has the same vowel-grade (I § 292 p. 234). Gr. κῆρ no doubt for *κηρδ 1).

¹⁾ This shews that the law of vowel shortening discussed in I § 611 p. 461 f. was later than the loss of the d. Cp. p. 423 footnote.

Remark 1. Armen. sirt and Goth. hairto 'heart' represent *kerdor *kērd- (the ē being shortened, op. I § 614 p. 464 f.). What relation
does this form bear to kred*? In view of this difference and of others,
such as Lat. grex: Gr. γέργερα (§ 52 p. 94), Gr. βρέφος O.C Sl. śrčbe for
*žerbe, Gr. φίργω O.H.G. blechen Skr. bhrájatē: Skr. bhárgas (op. also Skr.
drakēyāmi and the like I § 259 °p 212), we may perhaps suppose that
the metathesis — under certain conditions — occurred in proethnic IndoGermanic.

*ped- m. 'foot'. Ar. pad-: Skr. acc. sing. påd-am dat. sing. pad-ė loc. pl. patsú, Avest. acc. sing. pād-em pad-em dat. pl. pad-byō instr. sing. pād-a. Armen. pl. ot-k; by its side we find ting. otn gen. otin. Gr.Dor. πῶς (πῶς?) πὸς Att. πούς (the ov has not been explained), gen. ποδ-ός etc., instr. sing. Lesb. Boeot. etc. πεδ-ά 'after, with', Heracl. Fīxaτί-πεδ-ο-ς 'amounting so 20 feet'. Lat. pēs ped-is, Umbr. peři persi 'pede' du-purs-us, bipedibus'. In Germanic *ped- occurs in O.Icel. fet n. 'step', *pod- in A.S. fæt 'step'; elsewhere *pōd-: nom. pl. O.Icel. fætr A.S. fēt = pr. Germ. *fōt-iz, loc. sing. A.S. fēt = pr. Germ. *fōt-i; Goth. acc. fōt-u fōt-uns (pr. Germ. -un -uns = -m -ys, I § 244 p. 203), on the pattern of which was formed nom. sing. fōt-u-s etc. (thus the correspondence of the Gothic word with Skr. pad-ú-š would be purely accidental). For the ablaut cp. I § 311 p. 249.

Skr. vac- f. 'voice, speech', without vowel gradation (acc. vac-am dat. vac-vac- m. 'speech, word, prayer' (nom. $vax\dot{s}$ acc. vac-em instr. vac-a). Gr. $\ddot{o}\psi$ f. 'voice'. Lat. $v\bar{o}x$ f. 'voice, word', all from \sqrt{ueq} - 'speak'. The original paradigm is uncertain, perhaps nom. * $u\bar{o}q$ (-s) acc. * $u\dot{o}q$ - η n loc. * $u\dot{e}q$ -i dat. *uq- $a\dot{q}i$. Cp. I § 314 p. 252 f.

Skr. bhráj- f. 'brightness, gleam' instr. bhráj-á (cp. pres. bhráj-a-të). Gr. $\varphi\lambda \delta \xi \varphi\lambda \delta \gamma$ - $\delta \zeta$ f. 'flame' (cp. pres. $\varphi\lambda \delta \gamma$ - ω). The root is bhleg- (bhág-), cp. Rem. 1 above; the original paradigm of the noun is not clear.

*nas- *nas- 'nose'. Skr. du. nás-a instr. sing. nas-á, O.Pers. acc. nah-am. Lat. nar-em, which has become an i-stem (narium etc.). Cp. also A.S. næs-dyrlu, Lith. nas-raī nós-i-s. Originally it formed acc. *nás-m dat. *nas-ái. Cp. I § 318 p. 257. We

cannot regard as certain the often repeated conjecture that the -s- in Lat. nas-u-s O.C.Sl. nos-u is explained by supposing *nas(s) to be the original form of the nominative, cp. I § 569 Rem. 3 p. 427.

2. Forms showing vowel-gradation, and the loss of the final consonant of the root before the -m which appears in the acc. sing. when a sonant follows. (Cp. I § 188 p. 162, § 192 p. 164).

*dieu- *dijeu m. 'heaven, bright day'. Skr. dyāú-š diyāú-š acc. sing. dyam diyam div-am nom. pl. dyav-as diyav-as div-as loc. sing. dyáv-i div-i dat. sing. div-é instr. pl. dyú-bhi-š. Gr. $Z\varepsilon i$ - ε for * $Z\eta y$ - ε (I § 611 p. 461) voc. $Z\varepsilon \tilde{v}$ acc. $Z\tilde{\eta}v$ (whence sprang the forms $Z\tilde{\eta}\nu\alpha$ $Z\eta\nu\delta\varsigma$ $Z\eta\nu\dot{\iota}$) $\Delta\dot{\iota}(F)$ - α gen. $\Delta\iota F$ - $\delta\varsigma$ loc. △1.f-i. Lat. Umbr. Osc. Jov- (for *D10v-, 1 § 135 p. 122, § 506 p. 371) and Di(y)ov-: Lat. Jov-em Jov-is, Jupiter Juppiter voc. = Zεν πάτερ (I § 612 p. 463), dat. O.Lat. Diov-ei Diov-e, Umbr. Iuve Osc. Iuv-eí 'Iovi' Osc. Diúv-eí 'Iovi'; the Ital. -ov- may in all the cases = Idg. ey (I \S 65 p. 52)¹); to these add Lat. diem for *diem. Germ. gen. sing. in O.H.G. (Alemannic) Zios-tac A.S. Twes-daez O.Icel. Tys-dag-r (Goth. *Tius-dag-s) 'day of Tiu (Zio), Tuesday'. The original paradigm seems to have been: nom. *diéu-s (beside this possibly a parallel form *diés before consonants and when it stood last in a sentence, cp. Gr. Zής Lat. dies) acc. *diém voc. *diéu (for the quality of the accent see I § 671 p. 536) loc. *dzéy-i dat. *diy-áj loc. pl. *diu-sú.

Remark 2. The analysis of *diu- into *di-u- is no doubt right.
*diu- seems to bear the same relation to *di- *dez- as sru- (Skr. sru-tá'flowing') bears to sr- ser- (Skr. sar- 'go, flow'), see § 8 Rem. 2 p. 20 f.
Then as we speak of a 'root' srey-, we may certainly add *dzeu- to the
root-nouns. However, if any scholar, in view of Avest. bazau-š O.Pers.

¹⁾ There is nothing to prevent our claiming for Italic the same double forms *dieu- and *dieu- as we find in Sanskrit; op also I § 120 p. 111 and § 153 p. 138 f., § 170 p 150 (bi-dēns: dui-dēns). I am therefore unable to agree with Danielsson, who would separate etymologically Jouand Diov- (Gramm. und etym Stud. I. 49)

dahyāu-s and Gr. βαπλεύ-ς (for -ημε) should prefer to class this word amongst those containing suffixes, I should offer no objection. It is entirely a matter of convention.

*gōu-8 m. f. 'ox, cow'. Skr. gāú-š acc. sing. gám and gāv-am nom. pl. gāv-as loc. sing. gáv-i dat. sing. gáv-ē instr. pl. gő-bhiš. Avest. gau-š gao-š acc. gam gaum (i. e. gav-em) gaom (i. e. qav-em) instr. qav-a qav-a. Armen. kov, gen. kovu (u-decl.). Gr. $\beta o \tilde{v}$ -s for * $\beta \omega u$ -s (I § 611 p. 461) acc. Hom. Dor. $\beta \tilde{\omega} \nu$, gen. $\beta o(f) - \delta g$, the acc. $\beta o \tilde{\nu} \nu$ is a new formation following Bovs. Lat. bos bov-is (is this borrowed from some Umbr.-Samn. dialect? see 1 § 432 Rem. 1 p. 322), Umbr. bum 'bovem' buf 'boves' bue 'bove'; Ital. bov- may be Idg. *gou- or *geu- (I § 65 p. 52). O.Ir. bō gen. bō, cp. I § 174 p. 153; kelt. *bov- may be either Idg. *goy- or *gey- (I § 66 p. 56). O.H.G. chuo O.Sax. $k\bar{o}$, A.S. $c\bar{u}$ O.Icel. $k\bar{y}$ -r; the relation of the vowels presents a difficulty; *kō- (O.H.G. O.Sax.) may perhaps have been developed out of the acc. pr. Germ. * $k\bar{o}n = Gr. \beta\tilde{\omega}\nu$, and *kū- (A.S. O.Icel.) may perhaps come from an Idg. stem of the form *gŭ- (cp. Skr. śata-gu- 'having a hundred cows' Gr. ξxατόμ-βη = *-qμ-ā). The original paradigm may be conjecturally given as follows: nom. sing. *qōy-s (also possibly a parallel form * $q\delta$ -s like * $di\bar{e}$ -s, cp. Gr. $\beta\tilde{\omega}_{S}$ beside $\beta\tilde{\omega}_{S}$) acc. sing. *gom nom. pl. *goy-es loc. sing. *géy-i dat. sing. *guy-áz *gy-áj loc. pl. *qŭ-sú.

Skr. rás 'property, treasure, riches' acc. rám and ráy-am instr. pl. rābhíš nom. pl. ráy-as dat. sing. rāy-ē, Avest. nom. pl. rāy-ō inst. sing. ray-a gen. pl. ray-am; cp. Skr. rē-vánt"rich' ray-i-š 'property, treasure, riches'. Lat. rēs rem rēī 'property, thing'. Cp. I § 150 p. 136.

Skr. kṣám- f. 'earth': nom. kṣás acc. kṣám nom. pl. kṣám-as loc. sing. kṣám-i gạn. abl. sing. kṣm-ás gm-ás jm-ás instr. sing. kṣam-á jm-á. Avest. zå acc. zam gen. z²m-ō instr. z²m-ā. Gr. $\chi \Im \omega \nu$ f., $\chi \Im \omega \nu$ f., $\chi \Im \omega \nu$ for instead of * $\chi \Im \omega \nu$ f. (I § 204 p. 172), $\chi \Im \omega \mu$ - $u\lambda \delta$ -g $\chi \omega \mu$ -al (Maia for * $\chi \mu$ -aia * $\Gamma \mu$ -aia?). Cp. further Lat. hum-u-s, hom-ō O.Lat. hem-ō, hūm-ānu-s (probably not for *hūmin-ānu-s, but formed immediately from * $h\bar{\nu}$ m- and only at a later

period connected with homo), Goth. gum-a, Lith. žm-ōnà wife' (cp. p. 346 footnote 1), O.C.Sl. zem-lja. The original paradigm may be conjecturally given as follows: acc. *gzhōm¹) nom. pl. *gzhóm-es loc. sing. *gzhém-i dat. sing. *gzhŋm-ái (cp. Skr. kšam-å Gr. χθαμ-αλό-ς χαμ-αί Goth. gum-a) *ghm-ai loc. pl. *gzhŋn-sú.

Avest. zyå m. 'winter' acc. zyam gen. zim-ō. Gr. χιών f. 'snow', gen. χιόν-ος instead of *χιομ-ος, like χθον-ός (see p. 482). Lat. hiem-s hiem-is. O.Ir. gam 'winter' instead of *gi(i)am- O.Cymr. gaem for *geam- *gi(i)am-, see I § 383 p. 288, § 392 p. 293. We may conjecture that the orig. paradigm was acc. *ghióm *ghiióm nom. pl. *ghióm-es *ghiióm-es loc. sing. *ghiém-i *ghiiém-i dat. sing. *ghim-ái loc. pl. *ghim-sú *ghiim-sú. The word may be mentioned here, although it is certainly not a root-noun in the strict sense of the word, cp. Skr. hē-man Gr. χει-μών. But we find nowhere else an Idg. suffix -em-²).

*dem-'house', \sqrt{dem} -'build'. Gen. Skr. dán Avest. dēng = pr. Ar. *dam-s, Avest. loc. dam = pr. Ar. *dam. Gr. gen. * $\delta \varepsilon \nu \varsigma$ = Skr. dán in $\delta \varepsilon \sigma$ - $n \delta \tau \eta \varsigma$ 'lord of the house' (I § 204 p. 171); $\delta \alpha = *dm$ - in $\delta \alpha$ - $n \varepsilon \delta \sigma$ - ν 'house-floor', then 'ground' in general; here probably must be classed $\delta \alpha \mu \alpha \rho \tau$ - 'wife', which should be analysed into $\delta \alpha \mu$ - $\alpha \rho \tau$ - = Idg. * $d \eta m$ - (I § 236 p. 199); remarks

As regards the initial part of the word I assume the correctness of Bartholomae's hypothesis, see I § 554 Rem. 1. p. 407

²⁾ In view of the fact that words of contrasted meaning often influence each other in form (on this point ep. amongst others the Author, Ber. der kgl. sächs. Gesellsch der Wissensch. 1883 p. 191 ff., W. Meyer, Die Schicksale des lat. Neutrums im Romanischen 1883 p. 191 ff., W. Meyer, Die Schicksale des lat. Neutrums im Romanischen 1883 p. 12, Holthausen in Paul-Braune's Beitr. XIII 590, Wheeler, Analogy and the scope of its application in language, Ithaca N. Y. 1887, p. 19 sq.), it is not a very bold conjecture that there once existed in proethnic Indio-Germanic a form "fh(i)-en-, whose n gave place to m under the influence of the word *sem-summer' so often joined with it (Avest. ham-Armen. am-arn O.Ir. sam O H G. sam-ar, cp. Bartholomae, Ar. Forsch. II 111 f). Even during the period of separate developement the words for these two ideas have sometimes influenced one another; op. e g. O.Ir. gam. sam (see I § 392 p. 293), O.H G. wintar: sumar (see Kahle, Zur Entwickl. der consonant Decl. im Germ., 1887, p. 20).

on further examples from Greek may be found in R. Meringer's paper in the Ztschr. f. österr. Gymn. 1888 p. 152. Cp. also Avest. dm-ana- and Armén. tun gen. tan for *tm-an-. We may conjecture therefore that the following was the original paradigm: acc. *dōm, whence Gr. $\delta \tilde{\omega} \mu$ -a, nom. pl. *dóm-es, loc. sing. *dém-i gen. sing. *dém-s (cp. gen. Skr. $g\delta \tilde{s}$ Avest. $gao \tilde{s}$, Skr. $dy\delta \tilde{s}$), dat. sing. *dm-áz *dnm-áz loc. pl. *d η -sú.

As to the forms *diēm *gōm *rēm see I § 150 p. 136, § 188 p. 162. I may now also refer the reader to Johansson, De derivatis verbis contractis (Upsala 1886) p. 117 ff., R. Meringer, Ztschr. f. österr. Gymn. 1888 p. 132 ff.

Obs. 3. Meringer's welcome 'Hints' show very clearly that in the question he discusses there is much that still needs explanation. Here I can only add a few remarks (cp. p. 428 footnote). I regard the accusatives also (*gzhōm *ghyōm *dōm) as regular phonetic developements. What Meringer (in footnote 6 p 139) offers as 'another possible solution' is distinctly preferable to that which is given in the text itself, for if there had ever been a nom. sing. * $d\chi \bar{c}s$ * $g\bar{c}s$ without ψ , it is certain that the ψ would never have been again inserted in these forms (Skr. dyāúš) without being at the same time restored to the precisely parallel acc. sing (such a form as *dyaum is unheard of). Moreover, I do not feel convinced that u and sever disappeared before consonants and at the end of a sentence in the nom, sing, as well as the acc. (Gr. Zij; Lat. dies, Gr. βως, Skr. ras Lat res); in all these we must allow the possibility of a re-formation on the model of the acc. sing. With regard to kšās I must here emphatically repeat what I have said elsewhere. Meringer's assertion (p. 132. 137), that J. Schmidt has 'demonstrated' the loss of n after \$\bar{a}\$ \$\bar{e}\$ \$\bar{v}\$ before final s in pro-ethnic Indo-Germanic, does not agree with the facts (cp. § 135 Rem 1 p. 428) Lastly, I would add that we are not justified in assuming the same Indo-Germanic inflexion for all monosyllabic stems of this kind, so as to construct e. g. an acc. "nām 'navem' simply on the model of *gōm. It is not necessary to suppose that all these monosyllables arose at the same period of the parent language. For example, *nay-'ship' may have been formed at a later stage, and so have been dealt with otherwise than the older stems were at the time when they came into existence.

3. Forms in which vowel-gradation cannot be proved.

*rēg- 'ruler, king'. Skr. rāj- 'prince, king', usually found as the second member of compound words. Lat. rēx rēg-is. O.Ir. rī rīg, Gall. Catu-rīg-es ('battle-lords'). Goth. reik- nom. pl. reik-s; the ei is remarkable (I § 74 p. 64).

Skr. ds- (instr. as-a) Avest. ah- (n.?) 'month'. Lat. os n., or-is. Cp. also O.Icel. os-s 'river-mouth'.

Gr. quie Lat. fur 'thief'. V bher- 'carry'.

Gr. xήρ 'hedgehog', Lat. ēr hēr.

*nāu- f. 'ship'. Skr. nāú-š acc. nāv-am dat. nāv-ē. Gr. ναῦς for *νāu-ς, ναυσί for *νāu-σί (Ion. νηῦς νηυσί are new formations), nom. pl. νῆ-ες gen. sing. νη-ός νεως (I § 611 p. 464). Lat. nāv-em, which has become an i-stem, nom. nāv-i-s. Cp. also O.Icel. nōr (gen. nōs) m. from pr. Germ. *nōu-a-z.

*mūs- 'mouse'. Skr. mūš-, nom. pl. mūš-as. Gr. μῦς loc. pl. μῦσί; μῦν μυός instead of *μῦ(σ)-α *μῦ(σ)-ός follow ὀφρῦν -ύος and the like; μνός then produced μυσί beside μῦσί. Lat. mūs- mūr-is Germ mūs- is kept e. g. in nom. acc. sing. O.H.G. mūs, nom. pl. A.S. mys O.Icel. mys-s; beside which we find new formations following the vowel declension. O.C.Sl. myst follows the i-declension. A by-form Idg. *mus- (the accentless form of the weak grade) is seen in Skr. muš-ká-s Lat. mus-culu-s (should we assume a parallel form mūsculu-s?) § 88 p. 262 f.

Skr. dis- f. 'direction, region of the sky', Lat. gen. dic-is in dicis causa 'only in appearance, for form's sake', \sqrt{deik} - 'point out, show'.

Gr. viq-a acc. 'snow', Lat. nix niv-is, go back to a common ground-form *snigh- (I § 423 p. 309, § 433 p. 322 f.), \sqrt{sneigh} -.

Gr. $\chi \dot{\eta} \nu \chi \eta \nu - \dot{\sigma} \varsigma$ Dor. $\chi \dot{\alpha} \nu \chi \bar{\alpha} \nu - \dot{\sigma} \varsigma$ 'goose' for * $\chi \alpha \nu \sigma$ -; the nom. $\chi \dot{\eta} \nu$ is a new formation which has replaced * $\chi \dot{\alpha} \varsigma$ as $\mu \dot{\eta} \nu$ replaced $\mu s \dot{\iota} \varsigma$ (stem pr. Gr. * $\mu \eta \nu \sigma$ -). In Germanic the same stem occurs in a few forms, as in A.S. loc. sing. $\chi \bar{e} s = Gr. \chi \eta \nu - i_{,}$ and also in the Lith. gen. pl. $\bar{e} a s - \bar{u}$, which elsewhere conforms to the vowel-declension. The -s- of the word however, may perhaps be an element of the nature of a suffix, cp. O.H.G. ganazzo 'gander'.

Gr. άλ-ς άλ-ός m. Lat. sal sal-is m. n. 'salt', Umbr. salu 'salem'; Lat. sal instead of *sal follows forms like pēs. Armen. αλ gen. αλ-l and O.C.Sl. sol-t are 1-stems.

4. There is a special group of forms in which are found -u -v -y - y- before case-endings which begin with a con-

sonant, and -uy--ii--yn--yr--il- before those which begin with a vowel. See I § 253 p. 207, § 306 p. 243, § 312 p. 250.

*bhrū-s f. 'eyebrow' dat. sing. *bhruu-ái. Skr. bhrū-š loc. pl. bhrū-šū acc. sing. bhrūr-am dat. sing. bhruv-ē. Gr. ἀφρῦ-ς acc. ἀφρῦ-ν gen. ἀφρῦ-ος; loc. pl. ἀφρῦσι instead of *ἀφρῦσι. A.S. brū. The O.C.Sl. brūv-ĭ belongs to the i-decl. Compare the parallel forms Gall. brīva 'bridge' O.H.G. brūwa 'brow' whose common ground-form is *bhrēu-a-.

*sū-s 'sow' dat. sing. *snu-áż. Gr. \bar{v} -c \bar{v} -v-óc. Lat. sū-s $\bar{s}\bar{u}$ -bus su-em su-is, Umbr. sim 'suem' (I § 57 p. 46). O.H.G. sū O.Icel. $s\bar{y}$ -r; *suu- is perhaps represented by A.S. suzu f. 'sow', see Bugge, Paul-Braune's Beitr. XIII 509 f. Cp. the dimin. $s\bar{u}$ -qo- § 88 p. 263.

Gr. $l\chi \vartheta \tilde{v} - \varsigma l\chi \vartheta \tilde{v} + l\chi \vartheta \dot{v} - o\varsigma$ m. 'fish'. Lith, gen. pl. dial. žuv- \tilde{u} ; elsewhere it follows the *i*-decl., žuv-*i*-s. Cp. Armen. ju-k-n etc. § 88 p. 263.

Gr. l-g f. 'power, might' instr. l-g. Lat. vl-s vlm for *vl-m (I § 612 p. 463, § 655, 4 p. 503). *ull- before sonants seems to have disappeared.

The other instances belong only to single groups of languages: e. g. Skr. $g\bar{o}$ - $s\bar{a}$ -s gen. $-s\bar{a}$ n-as 'gaining cattle' $(-\bar{v}$ -), $p\bar{u}r$ gen. pur- $a\bar{s}$ 'fortress' $(-\bar{l}$ -).

5. Skr. jyā- jiyā- f. Gr. βίā f. 'might'. Compare Skr. perf. ji-jyāu subst. neut. jyāna-m and perf. ji-gāy-a pres. jāy-a-ti.
Cp. § 8 Rem. 1. p. 20, and Morph. Unt. I 6.

§ 161. Examples from single groups of languages. The largest numbers are found in Aryan, Greek, and Italic.

Aryan. When they denote an action these root-nouns are always feminine.

Skr. drúh- f. 'injury, enmity', concrete 'injurer, enemy', Avest. druj- f. 'lie', concrete 'fiend (f.)'. Skr. kfp- f. 'figure, appearance', Avest. kehrp- f. 'figure, body': cp. Lat. corp-us. Skr. kšáp- f. Avest. xšap- f. 'night'. Skr. Avest. ap- f. 'water': acc. Skr. áp-am Avest. ap-em, instr. Skr. ap-á Avest. ap-a Skr. acc. khā-m f. 'source', finds its complement in Avest. xå f. 'source',

both from pr. Ar. *khū-s *khū-m, beside Ar. khan- 'dig'. Skr. spáš- Avest. spas- m. 'spy, inspector', cp. Lat. au-spex, Gr. σχώψ 'owl'. Skr. hfd- n. Avest. zard- n. 'heart'. Skr. máh-Avest. maz- 'great'.

Skr. vfdh- f. 'help. prosperity', adj. 'helping, strengthening'. vft- f. 'host of foes, foe', adj. 'turned against anyone'. nft- f. 'bearing, gesture'. yúj- 'yoked with, companion', cp. Gr. σύ-ζυξ Lat. con-jux. tś- 'lord'. bhú- f. 'world', nom sing. bhú-ξ pl. bhúv-as. dhī- f. 'thought'. bht- f. 'fear'. gir- f. 'praise, laud', adj. 'praising', nom. sing. gtr ground-form *ḡr-s pl. gir-as ground-form *ḡr-es. jά- f. 'being, creature' adj 'born, formed', nom. sing. jά-s acc. sing. jά-m loc. pl. jά-su, ground-form *ḡv̄-. sthd-'standing', nom. sing. sthâ-s acc sthâ-m. psā- f. 'food' ni-drā-f. 'sleep' vrā- f. 'host, troop' like jyā- § 160, 5 (Morph. Unt. I 18. 43).

Avest. var^ez - ver^ez - 'work'. mas- 'great, wide', cp. Gr. $\mu\alpha r$ - $\varrho\dot{\phi}$ - ς .

Armenian. The old root-nouns have passed into other declensions. See the examples in § 160. It is however possible that certain case-forms, such as ot-k 'pedes' sirt-k 'corda', still belong to the old consonantal inflexion

Greek. στύξ στυγ-ός f. hatred, awe', cp. ψενσί-στυξ hating lies'. πρώξ πρωκ-ός f 'drop, dew', ground-form *p̄̄̄̄k-, see I § 306 p. 242. ἀλκ-ί loc. sing. beside ἀλν-ή 'strength of body'. κρόκ-α acc. sing. beside κρόκ-η 'woof', compared with κρέκειν, which was also used of the noise caused by the striking of the web. φρίξ φρίκ-ός f. beside φρίκ-η 'the shiver of the surface of the water'. Thus no doubt δίκ-η has replaced an older *δίξ = Skr. δίξ-λύγξλυγγ-ός f. 'hiccough' beside λυγγάνομαι λύζω λύγ-όην (O.H.G. sluccho n. 'devourer'); for the nasal in the root-syllable cp. I § 221 p. 187 and Skr. μύη- beside μή- (acc. μίη-am and μή-am) Lat. con-junx beside -jux. Θρίξ τριχ-ός f. 'hair' (cp. I § 496 p. 364 f.). αὐλαξ f. 'furrow' for *ά-Γλαν-, with the by-forms δλξ ἄλοξ ωλαξ, seems to have sprung from an old doublet *Γλακ-: *Γολκ- with ablaut, from (s)μείq- 'draw, pull' (cp. Darbishire, Notes on the spir. asper in Greek, Cambridge 1888,

p. 29). ἐωκ ἐωγ-ός f. 'rift, cleft, split', beside ' ἑηγ-νυ-μι. ωψ 'countenance' acc. ωπ-α; compare κύκλ-ωψ ἑλίκ-ωπ-ες and οἶν-οψ αἶθ-οψ, which probably shew an old gradation ωψ ωπ-α *ôπ-ός etc. κρῖ n. 'barley' no doubt for *κρῖθ, cp. κρῦθή. θώς, gen. θωός, 'jackal' beside θεβ- 'run'. χρή 'necessity' (cp. also ὁμοκλή 'joint cry, loud cry', μεσό-δμη 'intermediate structure, cross-beam'), like βία § 160, 5 (Morph. Unt. I 49. 64). κρέξ κρεκ-ός m. a bird, and also 'braggart', beside κρέκω, cp. κρόκ-α above. τρώξ τρωγ-ός m. 'gnawer, worm' beside τρώγω. κῖ-ς κι-ός m. 'a worm in the corn', like Skr. dht-š dhiy-ás. κλώψ m. 'thief' beside κλέπ-τω. Further examples are given by Bloomfield, Amer. Journ. of Phil. IX 7 ff.

Italic. Lat. lèx lèg-is f. 'law', Osc. ligud 'lege' ligis 'legibus' Marruc. lixs 'lex' or 'leges' Pelign. lex-e 'in leges'. Lat. vās vās-is n. 'vessel', Umbr. vas-us 'vasis' (the preservation of the voiceless s in all the cases is perhaps due to the analogy of the nom. acc. sing.). man- 'hand', Umbr. man f acc. pl., Lat. man-ceps malluviae for *man-luviae, with other exx. (Danielsson, Pauli's Altital. Stud. III 189 f., Duvau, Mém. de la Soc. de lingu. VI 226 f.). The connexion between Lat. frūx frūg-is f 'produce' and Umbr. frif acc. 'fruges, frumenta' (I § 57 p. 46) is doubtful, see Pauli Altital. Stud. V 114 f.

Lat. lūx lūc-is f 'light'. nux nuc-is f. 'nut'. pix pic-is f. 'pitch'. vic- gen. vic-is f. 'change' (beside vincō, see Osthoff, Paul-Br. Beitr. VIII 272). nex nec-is f. 'death'. prex prec-is f. 'prayer'. op-s op-is f. 'might, means, power'. pāx pāc-is f. peace'. dap-s dap-is f. 'feast', beside Gr. dan-árŋ 'expenditure'. arx arc-is f. 'citadel'. faex faec-is f. 'dregs'. faux fauc-is f. 'throat'. spē-s, acc. spe-m, f. 'hope'. re-quiē-s, gen. -quiēī, f. like Skr. jya- § 160, 5 (Morph. Unt. I 10). strix strig-is f. 'horned owl'. dux duc-is m. 'leader'. vas vad-is m. 'surety'.

Osc. far n. 'far' and Umbr. far n. 'far' farer 'farris' appears to be a root-noun; far-: Lat. farr- (for *far(e)s-, see § 132 p. 413 and p. 420) = Skr. kfp-: Lat. corpus.

Old Irish. bri 'mountain', rī 'king', bō 'cow', see § 160. This method of forming noun-stems seems to have died out in

Irish. Cp. further the Gall. brog- 'district, neighbourhood, land' in allo-brox pl. allo-broges, parallel to which we find brogi- in Brogi-marus O.Ir. bruig and other exx. (Zimmer, Kelt. Stud. I 117 f. Thurneysen, Keltoroman. 50).

Germanic. The original root-nouns (§ 160) were all more or less completely transferred to the vowel declensions; e. g. out of the Goth. paradigm, sing. nom. bairgs gen. bairgs dat. (loc.) bairg acc. bairg pl. nom. bairgs gen. bairge dat. bairgim acc. bairgs only the gen. dat. sing. and the nom.-acc. pl. belong to the original consonantal declension.

Even amongst the few root-nouns which do not recur in other languages there are none in which the simple root is used for the stem in all the cases. Examples of forms whose stems contain no suffix are: O.H.G. dat. sing. gi-nōz nom. pl. gi-nōz beside nom. sing. gi-nōz 'companion' (i. e. 'one who enjoys (geniesst) with another'), A.S. dat. (loc.) sing. bēc beside nom. sing. bōc 'book', O.Icel. nom. pl. hend-r beside nom. sing. họnd (Goth. handu-s) 'hand'; see Kahle's essay cited on p. 478 footnote 2. As regards some of these nouns it is probable that they had at first a vocalic formative suffix, and that it was a secondary process, affecting even then only a certain number of their cases, which put them on a level with the root-nouns.

Balto-Slavonic. The root-nouns as a class have almost entirely disappeared, giving place to new formations on the model of the vocalic declensions; e. g. Lith. nós-i-s f. 'nose', O.C.Sl. vīs-ī f. 'village', see § 160. Besides these there are only a few traces preserved in the forms of the gen. pl. in Lithuanian: O.Lith. szird-u, Mod.Lith. žas-ū žuv-ū; we should add Slav. krūv- f. 'blood' gen. sing. krūv-e, beside which we have nom. sing. krūv-ī instead of *kry.

§ 162. Nomina actionis used as Infinitives. Cp. § 156 p. 470 ff.

This usage is found in Aryan, Greek and Italic. In all three the dative is used as an infinitive; in Sanskrit other cases are used as well.

In Sanskrit the case-suffix had the accent, if the verb had no prefix; otherwise the accent fell on the root-syllable. drš-ć 'to see' bhuj-ć 'to enjoy', nir-újē 'to drive forth' (Lat. ag-ī) ni-námē 'to bend down'. Avest. sav-ōi 'to use' dar's-ōi 'to see'.

Lat. ag-ī (: Skr. -ájē), dīc-ī, sequ-i ūt-ī, hence also tund-ī posc-ī mi-nu-ī etc. in imitation of these forms. A difference in meaning was established between these and the locative forms agere etc. (§ 132 p. 418), the latter being distinguished as active, the former as deponent or passive forms; the origin of this process was probably an accidental preponderance of the use of the dative of root-nouns to serve as infinitives in deponent verbs.

-s- sometimes appears between the root-syllable and the dative termination. This is rare in Aryan. Skr ji-š-έ 'to conquer' -prák-š-ē 'to fill, satisfy', Avest. ā nāšē 'to bring near', root Avest. nas- Gr. ἐνεγκ-. Gr. γράψαι 'to write' δεῖξαι 'to show'. The -s- is identical with the element which is frequently found in the verb finite after the root-syllable, particularly in the sigmatic aorist, to which it gave its name (it is very possible that it is etymologically identical with the -s- which is used in the formation of noun-stems, § 134 p. 424 ff.; cp. Morph. Unt. III 42 f.); hence in Greek this kind of infinitive was confined to the sigmatic aorist. In Latin we may compare such forms as da-rī fer-rī.

Remark 1. There are difficulties in determining the relation of the Latin forms in -se -re to those in *-sī -rī, several different views are almost equally tenable. If we start by assuming that Latin inherited from an earlier period only forms in *-es-i (vīvere amāre) *-aī (agī) *-s-aī (darī), we must suppose that the following are new formations: dare ferre on the model of vīvere amāre, and on the other hand amārī following darī, fierī also instead of fiere. But perhaps even in the pre-Italic period there were parallel forms in *-s-i (da-re), op dīxe scrīpse and Skr infinitives like dīš-i (see below) Lastly it is also possible that on the analogy of indic. *aget. infin. *agesi (agit agere) the infinitives *es-si *fer-si (esse and ferre respectively) were first formed to correspond to es-t fer-t and that then and not before ferrī was formed on the model of agī

Remark 2 In Old Latin and even later in poetic diction beside the forms in -ī and -rī we find equivalent forms in -ier and -rier, as agier darier. It has often been assumed that agier should be analysed into agie-r, -r being the sign of the passive as in agitu-r, and *agie being the

ground-form of agt. This every one would admit if *agie could be explained as an infinitive form 1), and if the change from -ie to -i could be shewn to be regular (it is not shewn by the voc fili, for the -i of this form may be the original weak-grade of -i20- -12e-, op. § 63 p. 122). Other explanations of -ier -rier are equally unsatisfactory; see e. g. J. Stadelmann, De quantitate vocalium Latinas voces terminantium, Lucerne 1884, p. 73, V. Henry Mem. de la Soc. de lingu. VI 62 ff I con ecture that -er represents the preposition ar (ar-biter ar-vorsus), which appears to be of dialectic origin (I § 369 Rem. 1 p. 280). For the change of -ar to -er see I § 97, 3 p 91, cp. in-ers arti-fex im-pertio; and for the position of the word cp. quem ad beside ad quem and Umbr asam-ar 'ad aram'. It need not surprise us to find at so early a stage of Latin the combination of the infinitive with a preposition which is established in the Romance languages (cp. ad before the infinitive, as Ital. ho a scrivere, Diez Gramm III4 231 ff.), since even in Latin the infinitive had again approximated to the noun, and at least inter and practer were used with it (see p 471 ff). Nor is there any difficulty in the assumption that agr-er, after the origin of the -er had been forgotten, had the same meaning as agi the assimilation in usage was caused by the association of the final r of agrer with the r of agor agulur etc. This entire class of infinitive formations, being like ar of dialectic origin, were allowed to drop out of use in classical prose, like so many other idioms that came from the same source.

In Sanskrit we find, besides the dative, the acc. in -am, the loc. in -i and the gen.-abl. in -as used as infinitives, e. g. ä-nám-am (ā-nam- 'incline or bend towards one'), dṛṣ-i ṣa-dṛṣ-i (cp. dṛṣ-ē p. 490), abhi-ṣriṣ-as (abhi-ṣriṣ- 'make fast to').

§ 163. Root-nouns appearing as the second member of compound words.

In the Indo-Germanic and later periods we find compounds in which a root is the second member, and serves as a noun to denote the agent, as in the Skr. puru-drûh- 'injuring many'. There is no need to assume that the root was first used in the compound as a nomen actionis and that the whole word was subsequently epithetised (i. e. converted into an adjective, see § 50 p. 92), since in proethnic Indo-Germanic the root could be used alone to denote the agent; cp. Skr. rāj- p. 484, Skr. drûh- Avest. druj- etc. p. 486 ff. More rarely the compound has a passive sense, as Skr. sq-yuj 'joined by bonds of friend-

¹⁾ Thurneysen's explanation seems to me improbable (Über die Herkunft und Bildung der lat. Verba auf -10, p 46)

ship or kinship', cp. yúj- 'yoked with, companion'. Compound words of this type were formed in Aryan, Greek and Italic.

Indo-Germanic. Skr. sq-yuj-, see above, manō-yúj'yoked by thought, by mere will', Gr. σύ-ζυξ ὁμό-ζυξ 'yoked
together, united', especially 'joined in marriage', Lat. con-jux.
Skr. viśva-vid- 'knowing everything', Gr. νῆ-ις acc. νή-ιδα 'not
knowing, ignorant'. Skr. trι-bhúj- 'threefold, triple' Avest. qzō-būj- 'freeing from distress', Gr. πρόσ-φυξ 'fugitive, client'. Skr.
pṛtanđj- (pṛtanā-aj-) 'running in or to battle', Lat. rēm-ex. Skr.
muhur-gir- 'devouring suddenly', cp. Gr. ἀμο-βρως 'devouring
raw' gen. -βρῶ-τ-ος etc., see I § 306 p. 242, § 312 p. 250,
II § 123 p. 391.

I may add a few examples taken from the separate groups of languages.

Aryan. Skr. vytra-hán- Avest. ver pra-jan- 'slaying Vritra': acc. Skr. -hán-am Avest. -jan-em dat. Skr. -ghn-é Avest γn-ệ loc. pl. Skr. -há-su. Skr. upastha-sád- 'sitting in the lap', Avest. armae-šād- sitting quiet'. Skr. úd-aĥc- 'turned or directed upwards' acc. sing. úd-aĥc-am loc. pl. úd-ak-ξu, ny-àĥc- Avest. ny-anc- 'turned or directed downwards', cp. Gr. ποδ-απ-ός 'coming whence?' Lat. prop-inqu-o-s long-inqu-o-s (cp. I § 228 p. 195); the Sanskrit and Avestic declension of words containing -aĥc-anc- (Whitney Skr. Gr. § 407 ff, Bartholomae Handb. § 192, J. Darmesteter, Le suffixe -ac- en Iranien, Mém. de la Soc. de de lingu. III 302 ff.) shows many new formations, partly caused by a confusion with forms which had the suffix -qo- (see § 86 p. 256). Skr. satya-yáj- 'duly honouring, duly offering' Avest. daeva-yāz-honouring the demons, offering to them'. Avest. na-zd- Skr. nēd-, only in compar. and superl., see § 135 p. 431.

In Sanskrit, compounds of this kind are very common. Any root could be used in this way. We may add as further examples su-dfs- 'seeing well', sahō-vfdh- 'increasing strength', purō-yúdh- 'fighting before', purō-bhú- 'being in front, surpassing'. In Iranian too this kind of formation remained in active use, cp. vohu-var'z- 'working good', ahūm-mer'c- 'slaying, injuring the world' (also -mer'nc-, cp. Skr. yuūj- Gr. λύγξ p. 487).

Greek. ψεγοί-στυξ hating deceit. οἰνό-φλυξ drunken with wine, wine-bibbing (cp. I § 427 p. 314, § 428 p. 316). χέρ-νεψ water for the hands originally washing the hands, ὑπό-δρα for *-δρακ neut. adv. 'looking from below upwards', cp. Skr. dfś-f. 'sight, aspect'. Here perhaps we may class δεῦρο (which hitherto has never been satisfactorily explained) if it stands for *δε-Γροπ 'inclined hither', compare ῥέπω 'I incline' ῥοπή 'inclination, sinking, direction'; v is regular, as in ναλα-ῦροψ; δεύρω Hom. Γ 240 may be for *δε-Γρωπ; more probably it is only a reformation on the model of ἄνω πρόσω and the like.

Italic. Lat. jūdex 'declarer of the law, judge' for *jouz-dic-s (I § 33 Rem. 1 p. 33, § 594 p. 450), Osc. med-diss med-dis 'meddix' (I § 501 p. 368); m spite of its abbreviated form metd. which occurs once, I should prefer not to separate the first part of the Oscan word from Umbr. meř-s mers 'ius, fas' (§ 132 p. 418). Lat. prae-ses -sid-is. tubi-cen -cin-is. lībri-pēns -pend-is. redux -duc-is.

Remark. For arti-fex opi-fex see § 85 p. 254

Germanic. O.H.G. ort O.Icel. odd-r 'point' may have been a compound of this kind, standing for *ud+dhē- 'upraise, lift on high' (I § 536 Rem. p. 392); it is however quite conceivable that the original form was *ud+dh-o-, with the suffix -o-, which in this position would date from a very early period.
